Safety information important- please read the instructions fully before operating. → For household and indoor use only.

- This appliance must be used for its intended purpose only and operated as instructed in this user manual.
- Use only the voltage specified on the rating plate of the heater.

WARNING: in order to avoid overheating do not cover the heater. WARNING: To reduce the risk of fire, keep textiles, curtains, or other

- flammable materials at least 1 m away from the air outlet. Only use this heater on a horizontal and stable surface.
- Do not place the heater immediately below a socket outlet.
- Do not use this appliance with a programmer, timer, separate remotecontrol system, or any other device that switches the heater on automatically, since a fire risk exists if the heater is covered or positioned
- To avoid risk of overloading your plug socket, the use of an extension lead with this heater is not recommended.

Important- this heater is intended for floor use only. Do not mount on

- · Do not use this heater in the immediate surrounding of a bath, a
- shower, or a swimming pool.
- Do not leave the appliance unattended.
- **WARNING:** Do not use this heater in small rooms, when they are occupied by people unable to leave the room alone, unless
- constant supervision is provided. • This appliance is not intended for use by persons (including children)
- with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by the person responsible for their safety.
- Children should be supervised to ensure that they do not play with the
- Children less than 3 years should be kept away unless continuously Children aged from 3 years and less than 8 years shall only switch on/off
- the appliance provided that it has been placed or installed in its intended normal operating position and they have been given

supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children aged from 3 years and less than 8 years shall not plug in, regulate, and clean the appliance or perform user maintenance.

CAUTION- some parts of this product can become very hot and cause burns. Particular attention must be given where children and vulnerable people are present.

- Check the appliance before each use for signs of wear or damage. If damaged, discontinue from use immediately and do not use until the appliance has been inspected and approved for use by a qualified
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent, or a similarly qualified persons in order to avoid
- Always switch off the heater before removing the plug from the power
- Do not remove the plug from the power socket by pulling on the cord, always grip the plug to remove.
- Always unplug the appliance when not in use, when moving the appliance or before cleaning.
- Do not immerse the appliance or its cord in water or any other liquids.
- Do not twist, kink, or wrap the cord around the appliance as this may cause the insulation to weaken and split.
- Do not run the power cord under carpets, rugs etc. • Do not cover or restrict the airflow to the inlet or exhaust grilles,
- restricted airflow can cause the appliance to overheat and become a fire • Do not insert or allow any foreign objects to enter any ventilation or
- exhaust opening, as this may cause an electric shock, fire, or damage the appliance.
- Do not use this heater if it has been dropped.
- Do not use if there are visible signs of damage to the heater.
- Do not use the heater on deep pile carpets or long hair type rugs. Keep combustible materials such as drapes and other soft furnishings away from the heater.

BATTERY WARNING CAUTION – Danger of explosion if batteries are incorrectly fitted

• Batteries should be installed by an adult. Keep new and used

- batteries away from children
- Only use CR2025 3V batteries in this remote control. Be sure to insert correctly taking care to observe the correct child's oesophagus (food pipe). polarity (+ and -).
- Use only batteries of the same or equivalent type as recommended.
- Do not recharge non-rechargeable batteries.
- Never mix old and new batteries (replace all batteries at the
- Never try to crush. Puncture or dismantle batteries.
- Do not short-circuit the supply terminals.
- Always remove exhausted or dead batteries from the product.
- Remove batteries from the product before extended storage. Dispose of used batteries responsibly at local authority
- household waste recycling facility. DO NOT dispose of batteries in a fire as the batteries may
- In the event of a battery pack leaking, do not allow the liquid to
- come in contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice. WARNING: CONTAINS COIN OR BUTTON BATTERY!

- Hazardous if swallowed, a coin or button battery can cause serious internal chemical burns if swallowed.
- WARNING: Dispose of used batteries immediately. Keep new and used batteries away from children.
- If you think batteries have been swallowed or placed inside any part of

the body, seek immediate medical attention.

- Carefully turn the unit upside down. Use the Screws to fix the Feet onto the Heater. Take care to ensure that they are located correctly in the bottom ends of the Heater side moldings.
- Only Fit 2 screws to each foot in the positions as shown below.

WARNING: in order to avoid overheating do not cover the

Getting to know your heater.

Operating instructions

Remote Control

- Follow the manufacturer's instructions when installing new batteries.
- Be sure to insert correctly taking care to observe the correct polarity (+ and -). Do not mix old and new batteries

Before using your heater.

- Make sure you have read and fully Understood the safety instructions before operating the fan heater. • Choose a safe, horizontal, stable surface to place your heater and position the power cord so not to create a trip hazard.
- · Plug the power cord into a suitable power socket.

Once the heater is connected to a suitable plug socket the display panel will show '--' indicating

highest power setting 'H3' and the display will show a preset temperature of 35°C. Whilst the heater is in power mode select this button again to switch the heater off. The display will revert to '--' indicating the heater has returned to standby mode.

POWER SETTING – Press the power button to change the power level of the heater. On first power on, the heater will automatically start on H3 (high). Each press will cycle through the power levels: H1 (Low) H2 (mid) H3 (high).

temperature range is 5-35°C. After setting the temperature, the display will flash the corresponding temperature for 5 seconds before saving it. The heater will then begin to heat. Once the set temperature is reached, the heater will stop heating. When the ambient

TIMER - When the heater is turned on, pressing the timer button will initiate the timer shutdown setting. The timer can be set for a range of 1-24 hours. Pressing the '+' and '-' buttons will adjust the desired time. Once set, the corresponding number on the screen will flash for 5 seconds before saving. At this point, the Timer icon will light up, and the heater will operate normally. Once the countdown time is reached, the heater will automatically shut off.

In standby mode, pressing the 'Timer' button will initiate the timer start-up setting. The timer can be set for a range of 1-24 hours. Pressing the '+' and '-' buttons will adjust the desired

time. Once set, the corresponding number on the screen will flash for 5 seconds before

The heater is fitted with a safety switch which cuts the heater off if it falls over. This switch is located under the base. The heater needs to be placed on a firm and level surface in order to operate. Standing the unit on the long pile carpet may not activate the switch.

saving. At this point, the screen will display the currently set value. Once the countdown time

Auto Dim Function - If there is no operation for 30 seconds, the brightness of the display and

indicator light will reduce to 50% of the original brightness. When there is no operation for 60

Overheat safety cut-out. Your heater is fitted with a safety device the switches off the heater in the event of overheating.

Should the heater stop working, turn the heater off and inspect for blockage of air inlet or outlet. Wait at least 5 minutes for the protection system to reset before attempting to restart the heater. If the heater fails to operate or the safety device switches the heater off again, return heater to you nearest service centre for examination or repair.

Care and Maintenance.

The heater requires regular cleaning to ensure trouble free operation:

is reached the heater will automatically turn on.

seconds, the screen will automatically enter rest mode.

- Always turn off and unplug the heater from the mains supply before cleaning.
- Make sure the appliance has cooled down completely before cleaning. Use a slightly damp cloth to wipe the exterior of the heater to remove dust and dirt.
- Ensure the heater is dry before plugging back into the mains supply. Do not immerse cord, plug or the appliance in any liquid or allow moisture to come into contact with the electrical parts.

- Do not store appliance while it is still hot.
- When not in use, clean the heater before storing away in the original or similar sized box.
- Store the heater in a safe, clean, and dry place, away from direct sunlight and out of reach of
