If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,

1 Safety information

Safety information

Important-Please read these instructions fully before installing or operating

Before use

The installation of this appliance is best carried out by 2 people.

- Dispose of all packaging carefully and responsibly.
- The appliance is designed for **indoor use only** and must be protected from rain, moisture and extreme temperature variations.
- This appliance is designed for house hold use. **Do not** use the appliance for industrial and commercial use, or any other purpose.
- The appliance **MUST** be positioned on a firm level base.
- **Do not** splash water on the appliance. It may cause electrical parts to fail and result in an electric shock.
- Leave the appliance in its intended place of installation and in its correct orientation for at least 4 hours before switching on to allow the cooling system to settle before first use or after any transportation.
- Your appliance is an environmental friendly product and it contains non CFC/HFC gas substances in the cooling system (Called R600a) and in the insulation (Called cyclopentane) which are potentially flammable if exposed to fire. Therefore, take care not to damage, the cooling circuit/pipes of the appliance in transportation and in use. In case of damage do not expose the appliance to fire,

Safety information

Important-Please read these instructions fully before installing or operating

potential ignition source and immediately ventilate the room where the appliance is situated.

- **Do not** sit, stand or place any other heavy objects on top of the appliance. This could result in injury or damage to the appliance.
- **Do not** allow children to play with the appliance to avoid the risk of entrapment and suffocation.
- Keep ventilation opening, in the appliance enclosure or in the built-in structure, clear of obstruction.

During use

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely. Young children should be supervised to ensure that they do not play with the appliance.
- **Do not** use mechanical,

electrical or chemical way to speed up the defrost process not recommended by the manufacturer.

- **Do not** use or place other electrical products inside the appliance not recommended by the manufacturer.
- **Do not** store liquids in glass containers in the freezer compartment as these may shatter.
- **Do not** store flammable materials such as alcohol, gasoline, LP gas or glue etc in the appliance.
- In case there is an inflammable gas leaking, open the window for air circulation and do not pull out the plug or turn the temperature knob. **Do not** touch the appliance until the valve of gas is turned off. Otherwise, sparks may happen.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- **Do not** attempt to repair the appliance yourself. Contact the Customer Helpline:0345 257 7271.

⚠ Safety information

Important-Please read these instructions fully before installing or operating

- Children aged from 3 to 8 years are allowed to load and unload this appliance.
- ⚠**WARNING!** When positioning the appliance, ensure the supply cord is not trapped or damaged.
- ⚠**WARNING!** Do not locate multiple portable socket-outlets or portable power suppliers at the rear of the appliance.
- ⚠**WARNING!** Do not damage the refrigerant circuit.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Cord entanglement Hazard. The cable of the appliance can give rise to risks of entanglement, strangulation or tripping if not correctly placed. You must make sure that the electric cable is positioned safely.

Safety information

Important-Please read these instructions fully before installing or operating

To avoid contamination of food, please respect the following instructions

- Opening the door for long periods can cause a significant increase of the temperature in the compartments of the appliance.
- Clean regularly surfaces that can come in contact with food and accessible drainage systems.
- Clean water tanks if they have not been used for 48h; flush the water system connected to a water supply if water has not been drawn for 5 days.
- Store raw meat and fish in suitable containers in the refrigerator, so that it is not in contact with or drip onto other food.
- Two-star frozen-food compartments(if they are presented in the appliance) are suitable for storing pre-frozen food, storing or making ice-cream and making ice cubes.
- One-, two- and three -star compartments (if they are presented in the appliance) are not suitable for the freezing of fresh food.
- If the appliance is left empty for long periods, switch off, defrost, clean, dry and leave the door open to prevent mount developing within the appliance.
- The refrigerating appliance is not intended to be used as a built-inappliance, unless specifically shown as such into its instruction manual.
- The drawers, baskets and shelves should be kept in their current position unless otherwise specified in this document.

-  ⚠ WARNING!
  During using, service and disposal the appliance, please pay attention to symbol similar as left side, which is located on rear of appliance (rear panel or compressor)
  and with yellow or orange color.
  It's risk of fire warning symbol. There are flammable materials in refrigerant pipes and compressor. Please be far away fire source during using, service and disposal.
- This refrigerating appliance is not suitable for freezing foodstuff.

3 Installing your refrigerator

Installing your refrigerator

Bringing it all together

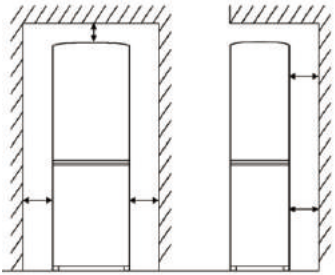

Transportation

Caution: 2 people are required to unpack and handle the appliance, it is recommended that gloves are worn.

- The appliance should be transported only in an upright position. Do not tilt the appliance greater than 45 degrees . The packaging as supplied must be intact during transportation.
- After transporting the appliance, leave it for at least 4 hours before switching on to allow the cooling system to settle. Failure to comply could result in damage to the appliance.
- Do not move the appliance by pulling the door or handle as it may damage your flooring and wall coverings etc.
- Empty any water in the drain tray before moving .
- Make sure that the defrost water pipe at the back of the product is fixed to the plastic evaporating pan on the top of the compressor to avoid deforst water spillage on the floor .
- Ensure the supply cable is not caught under the appliance during and after moving.
- Carefully remove all packaging materials including the foam base, dispose of correctly

Installation

- Ensure sufficient spacing is provided for the appliance to be installed. Leave space on both sides (5cm), back (5cm) and above the appliance (5cm) to ensure proper ventilation.

- Do not place the appliance near a heat source or in direct sunlight.
- Do not put any heavy objects on top of the appliance. It will damage the appliance.
- Do not install the appliance in a moist and wet place

- Adjust the feet at front to level the appliance. It should be installed on a smooth surface to avoid excessive vibration and noise.
- Each appliance has a climate class (shown on the rating plate) where it indicates the temperature range of the appliance operation in place. The appliance may not work properly if it is left for a long period at a temperature outside the specified range.

extended temperate (SN): 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 10 °C to 32 °C (from 50°F to 90°F)';

temperate (N): 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 ° C to 32 °C (from 61°F to 90°F)';

subtropical (ST): 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 38 °C (from 61°F to 100°F)';

tropical (T): 'this refrigerating appliance is intended to be used at ambient temperatures ranging from 16 °C to 43 °C (from 61°F to 110°F)

- Refer to section "Care and Maintenance" to prepare your appliance for use .

Installing your refrigerator

Bringing it all together

Door Reverse

Warning: Remove the main plug before reversing the door. 2 people may be required to reverse the door

1. Remove the top right hinge cover.
2. Undo the screws. Then remove the hinge bracket.
3. Remove the top left screw cover.
4. Move the core cover from left side to right side. And then lift the upper door and place it on a padded surface to prevent it from scratching.
5. Unscrew and remove the bottom hinge pin, turn the bracket over and replace it.
6. Refit the bracket fitting the bottom hinge pin. Replace both adjustable feet.
7. Place the door back on. Ensure the door is aligned horizontally and vertically so that the seals are closed on all sides before finally tightening the top hinge.
   Insert the hinge bracket and screw it to the top of the unit.
   Insert the hinge bracket and screw it to the top of the unit.
8. Put the hinge cover and the screw cover back.
9. Detach the Fridge and the Freezer door gaskets and then attach them after rotating.

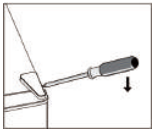

FIGURE 1

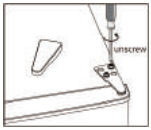

FIGURE 2

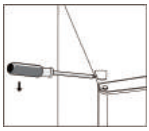

FIGURE 3

FIGURE 4

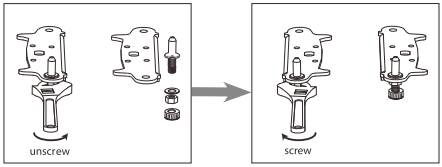

FIGURE 5

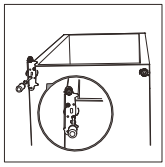

FIGURE 6

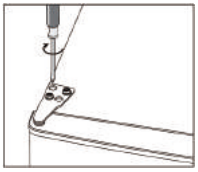

FIGURE 7

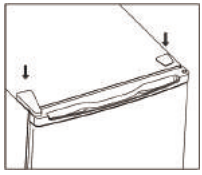

FIGURE 8

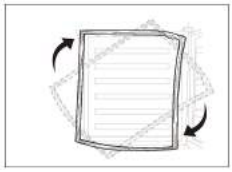

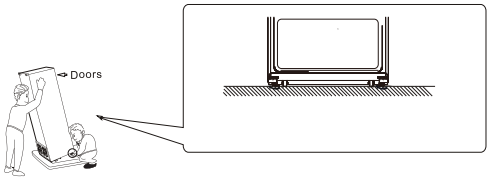

FIGURE 9

be tilted more than45 degree to access the bottom hinge. It is advised to leave the unit for 4 hours to allow the cooling to settle before switch on.

Levelling the appliance

1. Rotate feet clockwise to heighten.
2. Rotate feet anti clock wise to lower.

Installing your refrigerator

Bringing it all together

Electrical connection

Any electrical work that is required to install this appliance MUST be carried out by a qualified electrician.

Warning: THIS APPLIANCE MUST BE EARTHED

Before making any electrical connections, ensure that:

- Electrical safety is only guaranteed when the earth system of your house is in accordance with the related local regulations.
- Do not damage the refrigerant circuit.
- Do not bend, stretch or pull the supply cable to avoid electric shock.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Ensure the power socket is suitable for the maximum power of the machine (fuses in the power circuit must be 13 amp).
- The supply voltage should be the same as that indicated in the technical specifications and the appliance rating plate.
- The appliance should be earthed and in compliance with the applicable law.
- When installed, the power socket must be within easy reach.
- If the socket outlets in your home are not suitable for the plug supplied with this unit check with a qualified electrician for replacement.
- To avoid the risk of overloading your plug socket, do not use adapters, multiple connectors or extension cables.
- The appliance must be connected to a 220-240 volt 50Hz AC supply by means of a three pin socket, suitably earthed and protected by a 13 amp fuse.
- Should the fuse need to be replaced, a 13 amp fuse approved to BS1362 must be used.
- The plug contains a removable fuse cover that must be refitted when the fuse is replaced. If the fuse cover is lost or damaged, the plug must not be used until a replacement cover has been fitted or the plug is replaced.
- A damaged plug should be cut off as close to the plug body as possible, the fuse should be removed and the plug disposed of safely.

Plug replacement (UK & Ireland only)
Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue Neutral 'N'

Brown Live 'L'

Green & Yellow Earth 'E'

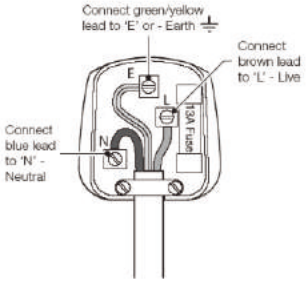

As the colours of the wires in the power cable may not correspond with the coloured markings identifying the terminals in your plug, and proceed as follows:

The green & yellow wire must be connected to the terminal in the plug that is marked with the letter E or by the earth symbol.

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If the power supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similar qualified person in order to avoid a hazard.

or online at **www.argos-support.co.uk** If you still require further assistance, call one of our experts on **0345 257 7271**.

4 Using your refrigerator

Using your refrigerator

Getting the most from your appliance

Before first use

Final checks before operating the appliance

1.Good air circulation around the appliance positioned.

2.The feet have been adjusted for perfect levelling.

3.Clean the compartment per recommendation in section “Care and Maintenance”.

4.Plug in the appliance

The compressor starts up and in operation may produce some background noise and it is normal, this is not a defect.

Using your appliance

1. Temperature adjustment

- The compartment temperature can be set by the thermostat between "1"and "7"(coldest setting), while the "0" means turn off. We recommend setting the thermostat midway first.
- To ensure the compartment is maintained at the desired temperature, it is advised to monitor the temperature periodically by a thermometer and adjust the temperature knob accordingly.
- Load the appliance after switch on for a while to allow the temperature reach the desired setting.

2. Storing frozen food

- Use the fridge compartment to store fresh food and drinks .
- Do not exceed the food capacity that the appliance able to handle .
- Do not put warm food to the appliance immediately as it may cause excessive cooling of the compartment .
- Set the temperature knob at medium position for storing fresh food .
- Do not mix already frozen food and fresh food

Useful information

The following guidelines and recommendations are suggested to obtain the best results and storage hygiene.

- Frequent door openings can cause the internal temperature rise so the door shall be closed as soon as possible after use.
- For hygiene reasons, it is always a good practise to pack, wrap and cover the food before storing.
- Use a polythene bag to store raw meat and place on the lowest shelf. Avoid contact with cooked food to prevent contamination. For safety reason, store raw meat for two to three days only.
- Cooked dishes must be stored in airtight covered containers.
- Food and beverages shall cool to room temperature before freezing.
- Most vegetables should be blanched and chilled before freezing.
- Some fruits and vegetables like pineapples , melons, tomatoes, and cucumbers shall be wrapped in polythene bags .
- Do not leave frozen food at room temperature to thaw. You could defrost the food by putting it in the fridge to thaw slowly. Make sure you avoid defrosting food from dropping food juices on to other food.

Using your refrigerator

Getting the most from your appliance

Position different food in different compartments according to be below table

Refrigerator compartments	Type of food
Door or balconies of fridge compartment	• Foods with natural preservatives, such as jams, juices, drinks, condiments. • Do not store perishable foods.
Crisper drawer (salad drawer)	• Fruits, herbs and vegetables should be placed separately in the crisper bin. • Do not store bananas, onions, potatoes, garlic in the refrigerator.
Fridge shelf – bottom	• Raw meat, poultry, fish (for short-term storage)
Chiller (box/drawer)	• Raw meat, poultry, fish (for short-term storage)
Fridge shelf – middle	• Dairy products, eggs
Fridge shelf – top	• Foods that do not need cooking, such as ready-to-eat foods, deli meats, leftovers.

Energy saving tips

- Place your fridge away from direct sunlight, your oven or any other heat sources. Allow 20 cm clear space on both sides and above, and at least 5 cm behind.
- Cover all food stored, and arrange it so that cold air can circulate freely.
- Higher cold setting will use more energy. Do not set to maximum cold if it is not necessary.
- Cool the hot/warm food to room temperature before put them into your fridge.
- Frequently opening and closing the door will cause the internal temperature to rise and it will consume more energy.
- Close the door(s) properly, and make sure the seals and hinges are airtight. Check the seals by putting a sheet of paper between the door and the main body of the fridge. If the paper moves, your seals need replacing.
- Defrost regularly if your refrigerator is not a frost-free or cyclic defrost model. Accumulated ice layer should not be more than 5 mm thick.
- The pre-set combination of drawers, baskets and shelves have already been set in the most efficient way for the use of this product.

. Defrosting

Frost might build up in the unit after it has been used for a period of time. Scrape away the frost using a plastic scraper (not supplied).

Do not use a metal or sharp instrument to scrape away the frost, nor should you used any electrical appliances to aid defrosting!

Choose a time when the stock of food is low, follow these procedures:

· Take out the good, turn the thermostat to off position and leave the door open. Ideally, the goof should be put into another refrigerator. If this is not possible, wrap the food in several sheets of newspaper or large towels and then a thick blanket to keep it cool.

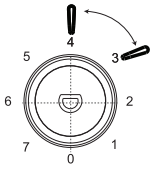

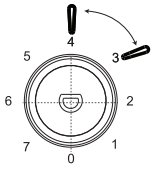

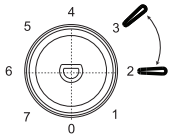

· Place a dry towel at the foot of the unit or drip tray. After the frost has melted, discard the water and clean up. Wring out the soaked towel as needed.

· When defrosting is complete, clean your unit's interior and exterior and restart by turning it's thermostat to desired setting.

Using your refrigerator

Getting the most from your appliance

Temperature setting recommendation

Temperature Setting Recommendation		
Environment Temperature	Freezer compartment	Fridge compartment
Summer	/	 Set on 3~4
Normal	/	 Set on 3~4
Winter	/	 Set on 2~3

Impact on Food Storage

To avoid food waste, please refer to the recommended setting and storage times.

- Under Recommended setting, the best storage time of fridge is no more than 3 days.
- The best storage time may reduce under other settings.

Tips for Storing Foodstuffs

- Load limits are determined by baskets, flaps, drawers, shelves etc. Make sure that these components can still close easily after loading.

5 Care and Maintenance

Care and maintenance

Looking after your appliance

General

Important: Always unplug the appliance from the power socket during cleaning and maintenance.

- Never use any sharp instruments or abrasive substances, soap, household cleaner, detergent or wax polish for cleaning.
- Use luke warm water to clean the cabinet of the appliance and wipe it dry.
- Never clean the appliance with flammable fluids. It could cause damage and a fire hazard.
- Clean the exterior of the appliance and door seal with a damp cloth and dry it through.
- Avoid water going into the temperature control box.. Clean with a dry cloth only.
- Clean the condenser (located at the back of the appliance) with a vacuum cleaner. It is suggested to remove the dust every year.
- Shelves are all removable for cleaning purpose.

Important: Care must be taken while cleaning/carrying the appliance not to touch the bottom of the condenser metal wires at the back of the appliance, as this could cause injury to fingers and hands.

Light bulb replacement

This appliance is equipped with LED light bulb. It can be used for long time. In case, the LED bulb is blown, it must be replaced by the qualified person to avoid any hazard. Contact the service agent at 0345 257 7271.

· Dusts behind the refrigerator and on the ground shall be timely cleaned to improve the cooling effect and energy saving.

The interior of the refrigerator should be cleaned regularly to avoid odor.

· Check the door gasket regularly to make sure there are no debris.

· Please turn off the power before cleaning, remove all food, shelves, drawers, etc.

· Clean the door gasket with mild soap and water.

· Use a soft cloth or sponge to clean the inside of the refrigerator, with two tablespoons of baking soda and a quart of warm water. Then rinse with water and wipe clean, and open the door and dry it naturally before the power is turned on.

· For areas that are difficult to clean in the refrigerator (such as narrow sandwiches, gaps or corners), it is recommended to wipe them regularly with a soft rag etc. and when necessary, combined with some auxiliary tools(such as thin sticks) to ensure no contaminant accumulation in these areas.

· Do not use soap, detergent, scrub powder, spray cleaner, etc., as these may cause odors in the interior of the refrigerator.

· Clean the bottom shelves and drawers with a mild detergent and dry with a soft cloth.

· Wipe the outer surface of the refrigerator with a so cloth damp and with soapy water, detergent etc., and then wipe dry.

· Do not use hard brushes, clean steel balls, wire brushes, abrasives, such as toothpastes, organic solvents (such as alcohol, acetone, banana oil, etc.), boiling water, acid or alkaline items clean refrigerator considering that this may damage the fridge surface and interior.

· Do not rinse with water so as not to affect the electrical insulation properties.

Vacation

Short vacation

There is no need to disconnect the appliance from the mains if you will be away for two to three weeks. Use up the perishable food.

Long vacation

Remove all the food if you are away for three weeks or more. Unplug the appliance and leave the doors open to provide air circulation to prevent odour and mould.

Moving your appliance

Help is always at hand

Troubleshooting

If you have a problem with your product, these questions may be able to assist you?

Question- Appliance does not work.
Answer
Appliance is not switched on - Turn on the appliances.
Mains plug is not plugged in or is loose. -Insert mains plug.
Fuse has blown or is defective - Check fuse, replace if necessary.
Socket is defective - Mains malfunctions are to be corrected by an electrician.

Question - Appliance cools too much.
Answer
Temperature is too cold - adjust to a warmer setting.

Question - The food is too warm.
Answer
Temperature is not properly adjusted - adjust to a cooler setting.
Door was open for an extended period - Open the door only as long as necessary.
A large quantity of warm food was placed in the appliance - adjust to a cooler setting.
Cool warm food before placing in the refrigerator.
The appliance is near a heat source - Position the refrigerator away from a heat source.

Question- Interior light does not work.
Answer
If the LED light is broken, please contact qualified technician.

Question-Heavy build up of frost, possibly also on the door seal.
Answer
Door seal is not air tight - Carefully warm the leaking sections of the door seal with a hair dryer(not hotter than approx 50 degree). At the same time shape the warmed door seal by hand such that it sits correctly.

Question - Water on the floor or on storage shelves.
Answer
Water drain hole is blocked - Remove food residue or ice from the entrance of the drain hole.

Question - Appliance is making unusual noises
Answers
Appliance is not level - Readjust the front levelling feet.
Appliance is in contact with wall or other objects. - Push appliance away a short distance
A part at the back of the appliance,e.g.a tube, is in contact with another appliance part or wall - - Gently bend this part away carefully if necessary
