Advice/information

- For your safety, this appliance conforms to applicable standards and regulations : (Low Voltage Directive, Electromagnetic compatibility, Materials in contact with food, Environment.)
- This appliance is designed for domestic use only and not outdoor. In case of professional use, inappropriate use or failure to comply with the instructions, the manufacturer accepts no responsibility and the guarantee does not apply.
- For your own safety, use only accessories and spare parts which are suitable for your appliance.
- For models with a removable cord, only the original power cord can be used.
- In the event of fire, never try to extinguish the flames with water. Close the lid. Unplug the appliance. Smother the flames with a damp cloth.
- Before discarding your appliance you should remove the battery from the timer and dispose of it at a local civic waste collection centre (according to model).
- It is **essential** that you wait until the oil has cooled down before storing the fryer.
- If you use solid vegetable fat, cut it into pieces and melt it over a slow heat in a separate pan beforehand, then slowly pour it into the deep fryer bowl.
- If you have a removable anti-odour filter, change it after every 10 - 15 uses (foam filter) or after 30 - 40 uses (cartridge with saturation indicator), or 80 uses (carbon filter). Some models are equipped with a permanent metallic filter, which does not need to be changed.
- Use the basket for chips.
- Control the cooking: Do not eat burnt food.
- Filter your oil after every use to avoid burnt crumbs and change it regularly.
- Eat a balanced and varied diet which includes plenty of fruits and vegetables.
- Store your fresh potatoes in a room above 8°C.
- For best results and fast cooking, we recommend that you limit the quantity of chips to 1/2 basket per frying.
- For a larger quantity of food or potatoes, the temperature drops very fast just after having lowered the basket. This lowers the oil temperature considerably and it never reaches above 175°C, even if the thermostat is set at 190°C.
- No matter what the recipe, whether preparing fresh or frozen food, it must be perfectly dry. Dry the food thoroughly with paper kitchen towel or a clean tea towel before frying. This will prevent the oil from splattering and/or overflowing, will extend the life of the oil and give crispier results.
- For frozen food, place the food into the basket and then shake the basket over the sink to remove any excess ice crystals.

Environment protection first!

① Your appliance contains valuable materials which can be recovered or recycled.

➡ Leave it at a local civic waste collection point.

Use oil recommended for deep frying: blended vegetable oil, corn oil, sunflower oil, rapeseed oil, etc. Do not use groundnut oil, soya oil or olive oil as they may cause overflowing, smoking or risk of fire.

Filter the oil after each use to avoid burnt crumbs.

Animal dripping or lard should NOT be used under any circumstances and may cause overflowing, smoking or risk of fire.

Do not mix different kinds of oils.

If you use solid vegetable fat, cut it into pieces and melt it in a separate pan then pour it inside the fryer (do not melt the blocks of fat in the basket, nor in the bowl).

Lower the basket of food gently into the hot oil. Lowering it too quickly could cause the fryer to overflow.

During frying it is normal for the light to switch on and off.
