Getting to know your Echo

Additional features: built-in smart home hub, temperature sensor

Alexa is designed to protect your privacy

Wake word and indicators

Alexa doesn't begin listening until your Echo device detects the wake word (for example, "Alexa") or you press the action button on the device. A blue light indicator lets you know when the device is recording your request to stream to Amazon's secure cloud. If you like, you can also enable an audio tone.

Microphone controls

You can electronically disconnect the microphones with one press of a button.

Voice History

Want to know exactly what Alexa heard? You can view and delete the voice recordings associated with your account in the Alexa app at any time.

These are just a few of the ways that you have transparency and control over your Alexa experience. Explore more at amazon.com/alexaprivacy or amazon.ca/alexaprivacy.

1. Download the Amazon Alexa app

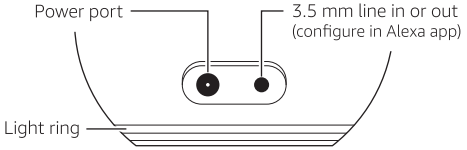

On your phone or tablet, download and install the latest version of the Alexa app from the app store.

Note: Before setting up your device, have your wifi network name and password ready.

2. Plug in your Echo

Plug your Echo into an outlet using the included power adapter. A blue light ring will spin around the bottom. In about a minute, Alexa will greet you and let you know to complete setup in the Alexa app.

Use the power adapter included in the original packaging for best performance.

3. Set up your Echo in the Alexa app

Open the Alexa app to set up your Echo. Log in with an existing Amazon account username and password, or create a new account. If you aren't prompted to set up your device after opening the Alexa app, tap the More icon to add your device manually.

The app helps you get more out of your Echo. It's where you set up calling and messaging, and manage music, lists, settings, and news.

For help and troubleshooting, go to Help & Feedback in the Alexa app or visit www.amazon.com/devicesupport.

Optional: Set up compatible smart home devices

You can easily connect and control compatible Zigbee devices with the built-in smart home hub. When ready to get started, open the Alexa app to add your device, or say, "Alexa, discover devices."

Things to try with your Echo

Enjoy music and audiobooks
Alexa, play today's hits on Amazon Music.
Alexa, play my book.

Get answers to your questions
Alexa, how many kilometers are in a mile?
Alexa, what can you do?

Get news, podcasts, weather, and sports
Alexa, play the news.
Alexa, what's the weather this weekend?

Voice control your smart home
Alexa, turn off the lamp.
Alexa, turn up the thermostat.

Stay connected
Alexa, call Mom.
Alexa, announce "dinner is ready."

Stay organized and manage your home
Alexa, reorder paper towels.
Alexa, set an egg timer for 6 minutes.

Some features may require customization in the Alexa app, a separate subscription, or an additional compatible smart home device.

You can find more examples and tips in the Alexa app.

Give us your feedback

Alexa is always getting smarter and adding new skills. To send us feedback about your experiences with Alexa, use the Alexa app, visit www.amazon.com/devicesupport, or simply say, "Alexa, I have feedback."
