## Safety information

**Important**-Please read these instructions fully before installing or operating

### Before use

The installation of this appliance is best carried out by 2 people.

- Dispose of all packaging carefully and responsibly.
- The appliance is designed for **indoor use only** and must be protected from rain, moisture and extreme temperature variations.
- This appliance is designed for house hold use. **Do not** use the appliance for industrial and commercial use, or any other purpose.
- The appliance **MUST** be positioned on a firm level base.
- **Do not** splash water on the appliance. It may cause electrical parts to fail and result in an electric shock.
- Leave the appliance in its intended place of installation and in its correct orientation for at least 4 hours before switching on to allow the cooling system to settle before first use or after any transportation.
- Your appliance is an environmental friendly product and it contains non CFC/HFC gas substances in the cooling system (Called R600a) and in the insulation (Called cyclopentane) which are potentially flammable if exposed to fire. Therefore, take care not to damage, the cooling circuit/pipes of the appliance in transportation and in use. In case of damage do not expose the appliance to fire,

## Safety information

**Important**-Please read these instructions fully before installing or operating

potential ignition source and immediately ventilate the room where the appliance is situated.

- **Do not** sit, stand or place any other heavy objects on top of the appliance. This could result in injury or damage to the appliance.
- **Do not** allow children to play with the appliance to avoid the risk of entrapment and suffocation.
- Keep ventilation opening, in the appliance enclosure or in the built-in structure, clear of obstruction.

During use

- This appliance is not intended for use by persons (including

children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.

- This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely. Young children should be supervised to ensure that they do not play with the appliance.
- **Do not** use mechanical,

## Safety information

**Important**-Please read these instructions fully before installing or operating

electrical or chemical methods to speed up the defrost process not recommended by the manufacturer.

- **Do not** use or place other electrical products inside the appliance not recommended by the manufacturer.
- **Do not** store liquids in glass containers in the freezer compartment as these may shatter.
- **Do not** store flammable materials such as alcohol, gasoline, LP gas or glue etc in the appliance.
- In case there is an inflammable gas leaking, open the window for air circulation and do not pull out the plug or turn the temperature knob. **Do not** touch the appliance until the valve of gas is turned off. Otherwise, sparks may happen.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- **Do not** attempt to repair the appliance yourself. Contact the Customer Helpline:0345 257 7271.

### Transportation

**Caution:** 2 people are required to unpack and handle the appliance, it is recommended that gloves are worn.

- The appliance should be transported only in an upright position. Do not tilt the appliance greater than 45 degrees. The packaging as supplied must be intact during transportation.
- After transporting the appliance, leave it for at least 4 hours before switching on to allow the cooling system to settle. Failure to comply could result in damage to the appliance.
- Do not move the appliance by pulling the door or handle as it may damage your flooring and wall coverings etc.
- Empty any water in the drain tray before moving.
- Make sure that the defrost water pipe at the back of the product is fixed to the plastic evaporating pan on the top of the compressor, to avoid defrost water spillage on the floor.
- Ensure the supply cable is not caught under the appliance during and after moving.
- Carefully remove all packaging materials including the foam base, dispose of correctly

### Installation

- Ensure sufficient spacing is provided for the appliance to be installed. Leave space on both sides (15cm), back (20cm) and above the appliance (30cm) to ensure proper ventilation.
- Screw in the two spacers at the back of the appliance.
- Do not place the appliance near a heat source or in direct sunlight.
- Do not put any heavy objects on top of the appliance. It will damage the appliance.
- Do not install the appliance in a moist and wet place.
- Adjust the feet at front to level the appliance. It should be installed on a smooth surface to avoid excessive vibration and noise.
- Each appliance has a climate class (shown on the rating plate) where it indicates the temperature range of the appliance operation in place. The appliance may not work properly if it is left for a long period at a temperature outside the specified range.

Climate Class	Amb.T.(°C)	Amb.T.(°F)
SN	10~32°C	50~90°F
N	16~32°C	51~90°F
ST	16~38°C	61~100°F
T	16~43°C	61~110°F

### Door Reverse

**Warning:** Remove the mainplug before reversing the door. 2 people may be required to reverse the door. The refrigerator has the capability of opening the door from either the left or the right side. The unit is delivered to you with the door opening from the left side. To change the opening direction, please follow these instructions.

**Note:** Before reversing the doorswing, unplug the appliance from the mains or disconnect the electrical power supply.

1. Unscrew and remove the hinge cover.
2. Unscrew and remove the hinge.
3. Unscrew middle hinge. Then lift lower door and place it on a soft pad to avoid scratching.
4. Move the hinge hole covers from left side to right side.
5. Unscrew bottom hinge. Then remove the adjustable feet from both sides.
6. Unscrew and remove the bottom hinge pin, turn the bracket over and replace it.
7. Refit the bracket fitting the bottom hinge pin. Replace both adjustable feet. Transfer the lower door onto the lower hinge pin.
8. Make the middle hinge reverse the direction 180°, then transfer it to the left property position. Make the middle hinge pin in the upper hole of the lower door, then tight the bolts.
9. Place the upper door back on. Ensure the door is aligned horizontally and vertically so that the seal are closed on all sides before finally tightening the top hinge. Then insert the hinge and screw it to the front of the unit.
10. Unscrew the hinge pin and reverse the hinge, then reinstall the hinge pin.
11. Prise the hinge hole cover.
12. Fix the hinge on the left.
13. Fix the hinge cover on the left and the hinge hole cover on the right.

### Levelling the appliance

1. Rotate feet clockwise to heighten.
2. Rotate feet anti clockwise to lower.

# Installing your refrigerator

## Bringing it all together

### Electrical connection

Any electrical work that is required to install this appliance **MUST** be carried out by a qualified electrician.

**Warning: THIS APPLIANCE MUST BE EARTHED**

Before making any electrical connections, ensure that:

- Electrical safety is only guaranteed when the earth system of your house is in accordance with the related local regulations.
- Do not damage the refrigerant circuit.
- Do not bend, stretch or pull the supply cable to avoid electric shock.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Ensure the power socket is suitable for the maximum power of the machine (fuses in the power circuit must be 13 amp).
- The supply voltage should be the same as that indicated in the technical specifications and the appliance rating plate.
- The appliance should be earthed and in compliance with the applicable law.
- When installed, the power socket must be within easy reach.
- If the socket outlets in your home are not suitable for the plugs supplied with this unit check with a qualified electrician for replacement.
- The use of adapters, multiple connectors or extension cables are not recommended.
- The appliance must be connected to a 220-240 volt 50Hz AC supply by means of a three pin socket, suitably earthed and protected by a 13 amp fuse.
- Should the fuse need to be replaced, a 13 amp fuse approved to BS1362 must be used.
- The plug contains a removable fuse cover that must be refitted when the fuse is replaced. If the fuse cover is lost or damaged, the plug must not be used until a replacement cover has been fitted or the plug is replaced.
- A damaged plug should be cut off as close to the plug body as possible, the fuse should be removed and the plug disposed of safely.

### Plug replacement (UK & Ireland only)

Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue Neutral 'N'

Brown Live 'L'

Green & Yellow Earth 'E'

As the colours of the wires in the power cable may not correspond with the coloured markings identifying the terminals in your plug, and proceed as follows:

The green & yellow wire must be connected to the terminal in the plug that is marked with the letter E or by the earth symbol.

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If the power supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similar qualified person in order to avoid a hazard.

# Using your refrigerator 4

# Using your refrigerator

## Getting the most from your appliance

### Before first use

#### Final checks before operating the appliance

1. Good air circulation around the appliance in position.
2. The feet have been adjusted for perfect levelling.
3. Clean the compartment per recommendation in section "Care and Maintenance".
4. Plug in the appliance

The compressor starts up and in operation may produce some background noise this is normal, this is not a defect.

### Using your appliance

#### 1. Temperature adjustment

- The compartment temperature can be set by the thermostat between "1" and "7" (coldest setting), while the "0" means turn off. We recommend setting the thermostat midway first.
- To ensure the compartment is maintained at the desired temperature, it is advised to monitor the temperature periodically by a thermometer and adjust the thermostat accordingly.
- Load the appliance after switch on for a while to allow the temperature to reach the desired setting.

#### 2. Storing fresh food

- Use the fridge compartment to store fresh food and drinks.
- Do not exceed the food capacity that the appliance is unable to handle.
- Do not put warm food in the appliance immediately as it may cause excessive cooling of the compartment.
- Set the temperature knob at medium position for storing fresh food.
- Do not mix already frozen food and fresh food.

#### 3. Storing frozen food

- The freezer compartment is  4 Star rated and suitable for the freezing and storage of pre-frozen food.
- Check the food packaging for  suggestion before storage.

#### Useful information

The following guidelines and recommendations are suggested to obtain the best results and storage hygiene.

- To stop any excess rise in temperatures the door should be closed as soon as possible.
- For hygiene reasons, it is always a good practise to pack, wrap and cover the food before storing.
- Use a polythene bag to store raw meat and place on the lowest shelf. Avoid contact with cooked food to prevent contamination. For safety reason, store raw meat for two to three days only.
- Cooked dishes must be stored in airtight covered containers.
- Food should cool to room temperature.
- Most vegetables should be blanched and chilled before freezing.
- Bottles can be placed in the door section.
- Some fruits and vegetables like pineapples, melons, tomatoes, and cucumbers should be wrapped in polythene bags.
- Do not leave frozen food at room temperature to thaw. You could defrost the food by putting it in the fridge to thaw slowly. Make sure you avoid defrosting food dropping food juices on to other food.

# Using your refrigerator

## Getting the most from your appliance

**Before using the water dispenser for the first time, remove and clean the water tank located inside the refrigeration compartment.**

1. Lift and remove the tank balcony.

2. Remove the water tank. Detach the top cover and wash and clean both the tank and the cover.

3. After cleaning, reposition water tank, cover and tank balcony as below:

4. Clean the dispenser lever outside the refrigerator door.

### Fill the water tank

1. Open the small lid in the top of the tank balcony.
2. Fill the water tank with drinkable water up to the max. line. Do not over fill.
3. Close the lid. Ensure it is firmly shut.

### Dispensing water

Push the dispenser lever gently with a glass or container. To stop the flow, pull the glass away from the lever.

# Using your refrigerator

## Getting the most from your appliance

### Energy saving tips

- Place your fridge away from direct sunlight, your oven or any other heat sources. Allow 20 cm clear space on both sides and above, and at least 5 cm behind.
- Cover all food stored, and arrange it so that cold air can circulate freely.
- Higher cold setting will use more energy. Do not set to maximum cold if it is not necessary.
- Cool the hot/warm food to room temperature before put them into your fridge.
- Frequently opening and closing the door will cause the internal temperature to rise and it will consume more energy.
- Close the door(s) properly, and make sure the seals and hinges are airtight. Check the seals by putting a sheet of paper between the door and the main body of the fridge. If the paper moves, your seals need replacing.
- Defrost regularly if your refrigerator is not a frost-free or cyclic defrost model. Accumulated ice layers should not be more than 5 mm thick.
- The pre-set combination of drawers, baskets and shelves have already been set in the most efficient way for the use of this product.

### **Defrosting**

#### Fridge Compartment

- The fridge compartment defrosts automatically. The defrosting water runs through the drain port to the drain tray at the back of the appliance.
- Some droplets may remain inside the compartment and re-freeze, after the defrosting cycle, this is normal. Do not use pointed or sharp objects, i.e. knives or forks, to remove the
- Check the collection channel to ensure that no food particles have blocked the drain channel.

#### Freezer Compartment

- The freezer compartment defrosts automatically.

The fan inside the freezer compartment circulates cold air. Never insert any object through the holes for circulation. Do not cover the hole with any material which may obstruct air circulation.

# Care and Maintenance 5

# Care and maintenance

## Looking after your appliance

### General

**Important:** Always unplug the appliance from the power socket during cleaning and maintenance.

- Never use any sharp instruments or abrasive substances, soap, household cleaner, detergent or wax polish for cleaning.
- Use luke warm water to clean the cabinet of the appliance and wipe it dry.
- Never clean the appliance with flammable fluids. It could cause damage and a fire hazard.
- Clean the exterior of the appliance and door seal with a damp cloth and dry it through.
- Avoid water going into the temperature control box.. Clean with a dry cloth only.
- Clean the condenser (located at the back of the appliance) with a vacuum cleaner. It is suggested to remove the dust every year.
- Shelves are all removable for cleaning purpose.

**Important:** Care must be taken while cleaning/carrying the appliance not to touch the bottom of the condenser metal wires at the back of the appliance, as this could cause injury to fingers and hands.

### Light bulb replacement

This appliance is equipped with LED light bulb. It can be used for long time. In case, the LED bulb is blown, it must be replaced by the qualified person to avoid any hazard. Contact the service agent at 0345 257 7271.

### Power failure

In case there is a power failure, you should take the following actions:

If it lasts less than 24 hours, keep the doors closed. This will allow the stored food to stay cold as long as possible. If it lasts more than 24 hours, it is advised to empty the freezer compartment and temporarily store the food in a portable freezer or using artificial ice packs. Try to stay cold for as long as possible.

Remarks: Full appliance will stay cold longer than a partially filled one. If ice crystals are still visible on the food, it may be frozen again, although flavour and aroma may be affected. If food is found to be in a poor condition, it is best to throw it away.

### Short vacation

There is no need to disconnect the appliance from the mains if you will be away for two to three weeks. Use up the perishable food.

### Long vacation

Remove all the food if you are away for three weeks or more. Unplug the appliance and leave the doors open to provide air circulation to prevent odour and mould.

## Moving your appliance

### Moving

Refer to section “Transportation” under “Installation”

### Disposal information

The symbol on the product or its packaging indicates that this product may not be treated as household waste. Instead it should be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling this product, please contact your local council office, your household waste disposal service or the shop where the product was purchased.

**Remember : Old fridges must be disposed of carefully- older models contain CFC gases that are harmful- if in doubt , contact your local council for details on how to dispose of an old fridge.**

# Product support 6

# Product support

## Help is always at hand

### Troubleshooting

If you have a problem with your product, these questions may be able to assist you?

#### **Question- Appliance does not work.**

Answer

Appliance is not switched on - Switch on the appliance.

Mains plug is not plugged in or is loose. - Insert mains plug.

Fuse has blown or is defective - Check fuse, replace if necessary.

Socket is defective - Mains malfunctions are to be corrected by an electrician.

#### **Question - Appliance cools too much.**

Answer

Temperature is too cold - Adjust the thermostat dial to a warmer setting.

#### **Question - The food is too warm.**

Answer

Temperature is not properly adjusted - Adjust the thermostat to a cooler setting.

Door was open for an extended period - Open the door only as long as necessary.

A large quantity of warm food was placed in the appliance - Adjust the thermostat to a cooler setting. Cool warm food before placing in the refrigerator.

The appliance is near a heat source - Position the refrigerator away from a heat source.

#### **Question- Interior light does not work.**

Answer

If the LED light is broken, please contact qualified technician.

#### **Question- Heavy build up of frost, possibly also on the door seal.**

Answer

Door seal is not air tight - Carefully warm the leaking sections of the door seal with a

hair dryer (not hotter than approx 50 degree). At the same time shape the warmed door seal by hand such that it sits correctly.

#### **Question - Water on the floor or on storage shelves.**

Answer

Water drain hole is blocked - Remove food residue or ice from the entrance of the drain hole.

#### **Question - Appliance is making unusual noises**

Answers

Appliance is not level - Readjust the front levelling feet.

Appliance is in contact with wall or other objects. - Push appliance away a short distance

A part at the back of the appliance e.g. a tube, is in contact with another appliance part or wall - Gently bend this part away carefully if necessary
