About This Manual

Introduction to the Manuals

The following manuals are supplied with your Epson printer. As well as the manuals, check the various types of help information available from the printer itself or from the Epson software applications.

❏ Start Here (paper manual)

Provides you with information on setting up the printer, installing the software, using the printer, solving problems, and so on.

❏ User's Guide (digital manual)

This manual. Provides overall information and instructions on using the printer, on network settings when using the printer on a network, and on solving problems.

You can obtain the latest versions of the above manuals with the following methods.

❏ Paper manual

Visit the Epson Europe support website at http://www.epson.eu/Support, or the Epson worldwide support website at http://support.epson.net/.

❏ Digital manual

Start EPSON Software Updater on your computer. EPSON Software Updater checks for available updates of Epson software applications and the digital manuals, and allows you to download the latest ones.

Related Information

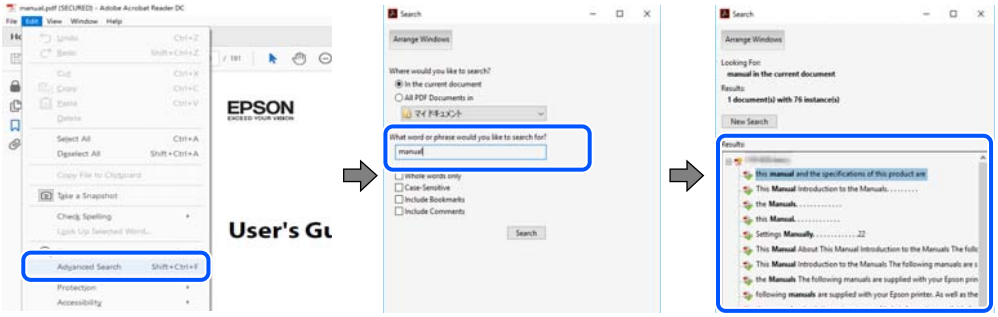

➡ "Application for Updating Software and Firmware (EPSON Software Updater)" on page 151

Using the Manual to Search for Information

The PDF manual allows you to search for information you are looking for by keyword, or jump directly to specific sections using the bookmarks. You can also print only the pages you need. This section explains how to use a PDF manual that has been opened in Adobe Reader X on your computer.

Searching by keyword

Click **Edit** > **Advanced Search**. Enter the keyword (text) for information you want to find in the search window, and then click **Search**. Hits are displayed as a list. Click one of the displayed hits to jump to that page.

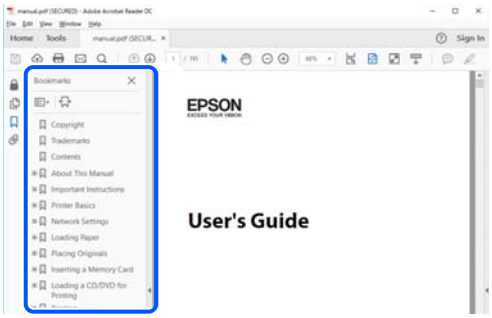

Jumping directly from bookmarks

Click a title to jump to that page. Click + or > to view the lower level titles in that section. To return to the previous page, perform the following operation on your keyboard.

❏ Windows: Hold down **Alt**, and then press ←.

❏ Mac OS: Hold down the command key, and then press ←.

Printing only the pages you need

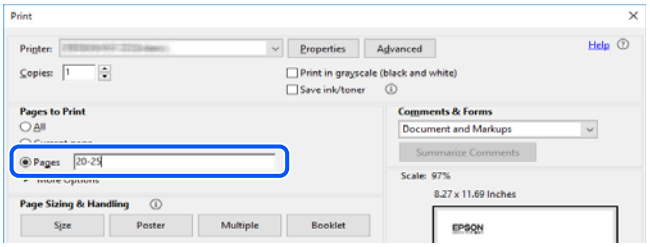

You can extract and print only the pages you need. Click **Print** in the **File** menu, and then specify the pages you want to print in **Pages** in **Pages to Print**.

❏ To specify a series of pages, enter a hyphen between the start page and the end page.

Example: 20-25

❏ To specify pages that are not in series, divide the pages with commas.

Example: 5, 10, 15

Marks and Symbols

> ***Caution:***
> *Instructions that must be followed carefully to avoid bodily injury.*

> ***Important:***
> *Instructions that must be observed to avoid damage to your equipment.*

Note:
Provides complementary and reference information.

Related Information

➡ Links to related sections.

Descriptions Used in this Manual

❏ Screenshots of the printer driver and the Epson Scan 2 (scanner driver) screens are from Windows 10 or macOS Mojave. The content displayed on the screens varies depending on the model and situation.

❏ Illustrations used in this manual are examples only. Although there may be slight differences depending on the model, the method of operation is the same.

❏ Some of the menu items on the LCD screen vary depending on the model and settings.

❏ You can read the QR code using dedicated app.

Operating System References

Windows

In this manual, terms such as "Windows 10", "Windows 8.1", "Windows 8", "Windows 7", "Windows Vista", "Windows XP" refer to the following operating systems. Additionally, "Windows" is used to refer to all versions.

❏ Microsoft® Windows® 10 operating system

❏ Microsoft® Windows® 8.1 operating system

❏ Microsoft® Windows® 8 operating system

❏ Microsoft® Windows® 7 operating system

❏ Microsoft® Windows Vista® operating system

❏ Microsoft® Windows® XP operating system

❏ Microsoft® Windows® XP Professional x64 Edition operating system

Mac OS

In this manual, "Mac OS" is used to refer to Mac OS X v10.6.8 or later as well as macOS 11 or later.

Important Instructions

Safety Instructions

Read and follow these instructions to ensure safe use of this printer. Make sure you keep this manual for future reference. Also, be sure to follow all warnings and instructions marked on the printer.

- ❏ Some of the symbols used on your printer are to ensure safety and proper use of the printer. Visit the following Web site to learn the meaning of the symbols.

  http://support.epson.net/symbols

- ❏ Use only the power cord supplied with the printer and do not use the cord with any other equipment. Use of other cords with this printer or the use of the supplied power cord with other equipment may result in fire or electric shock.
- ❏ Be sure your AC power cord meets the relevant local safety standard.
- ❏ Never disassemble, modify, or attempt to repair the power cord, plug, printer unit, scanner unit, or options by yourself, except as specifically explained in the printer's manuals.
- ❏ Unplug the printer and refer servicing to qualified service personnel under the following conditions:

  The power cord or plug is damaged; liquid has entered the printer; the printer has been dropped or the casing damaged; the printer does not operate normally or exhibits a distinct change in performance. Do not adjust controls that are not covered by the operating instructions.
- ❏ Place the printer near a wall outlet where the plug can be easily unplugged.
- ❏ Do not place or store the printer outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity.
- ❏ Take care not to spill liquid on the printer and not to handle the printer with wet hands.
- ❏ Keep the printer at least 22 cm away from cardiac pacemakers. Radio waves from this printer may adversely affect the operation of cardiac pacemakers.
- ❏ If the LCD screen is damaged, contact your dealer. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

Safety Instructions for Ink

- ❏ Be careful when you handle used ink cartridges, as there may be some ink around the ink supply port.
  - ❏ If ink gets on your skin, wash the area thoroughly with soap and water.
  - ❏ If ink gets into your eyes, flush them immediately with water. If discomfort or vision problems continue after a thorough flushing, see a doctor immediately.
  - ❏ If ink gets into your mouth, see a doctor right away.
- ❏ Do not disassemble the ink cartridge and the maintenance box; otherwise ink may get into your eyes or on your skin.
- ❏ Do not shake ink cartridges too vigorously and do not drop them. Also, be careful not to squeeze them or tear their labels. Doing so may cause ink leakage.
- ❏ Keep ink cartridges and maintenance box out of the reach of children.

Printer Advisories and Warnings

Read and follow these instructions to avoid damaging the printer or your property. Make sure you keep this manual for future reference.

Advisories and Warnings for Setting Up the Printer

- ❏ Do not block or cover the vents and openings in the printer.
- ❏ Use only the type of power source indicated on the printer's label.
- ❏ Avoid using outlets on the same circuit as photocopiers or air control systems that regularly switch on and off.
- ❏ Avoid electrical outlets controlled by wall switches or automatic timers.
- ❏ Keep the entire computer system away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- ❏ The power-supply cords should be placed to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of the power-supply cords and do not allow the power-supply cords to be stepped on or run over. Be particularly careful to keep all the power-supply cords straight at the ends and the points where they enter and leave the transformer.
- ❏ If you use an extension cord with the printer, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure that the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- ❏ If you plan to use the printer in Germany, the building installation must be protected by a 10 or 16 amp circuit breaker to provide adequate short-circuit protection and over-current protection for the printer.
- ❏ When connecting the printer to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.
- ❏ Place the printer on a flat, stable surface that extends beyond the base of the printer in all directions. The printer will not operate properly if it is tilted at an angle.
- ❏ Allow space above the printer so that you can fully raise the document cover.
- ❏ Leave enough space in front of the printer for the paper to be fully ejected.
- ❏ Avoid places subject to rapid changes in temperature and humidity. Also, keep the printer away from direct sunlight, strong light, or heat sources.

Advisories and Warnings for Using the Printer

- ❏ Do not insert objects through the slots in the printer.
- ❏ Do not put your hand inside the printer during printing.
- ❏ Do not touch the white flat cable inside the printer.
- ❏ Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- ❏ Do not move the print head by hand; otherwise, you may damage the printer.
- ❏ Be careful not to trap your fingers when closing the scanner unit.
- ❏ Do not press too hard on the scanner glass when placing the originals.

- ❏ Always turn the printer off using the ⏻ button. Do not unplug the printer or turn off the power at the outlet until the ⏻ light stops flashing.
- ❏ If you are not going to use the printer for a long period, be sure to unplug the power cord from the electrical outlet.

Advisories and Warnings for Transporting or Storing the Printer

- ❏ When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.
- ❏ Before transporting the printer, make sure that the print head is in the home (far right) position.

Advisories and Warnings for Using the Printer with a Wireless Connection

- ❏ Radio waves from this printer may negatively affect the operation of medical electronic equipment, causing them to malfunction. When using this printer inside medical facilities or near medical equipment, follow directions from the authorized personnel representing the medical facilities, and follow all posted warnings and directions on the medical equipment.
- ❏ Radio waves from this printer may negatively affect the operation of automatically controlled devices such as automatic doors or fire alarms, and could lead to accidents due to malfunction. When using this printer near automatically controlled devices, follow all posted warnings and directions on these devices.

Advisories and Warnings for Using the LCD Screen

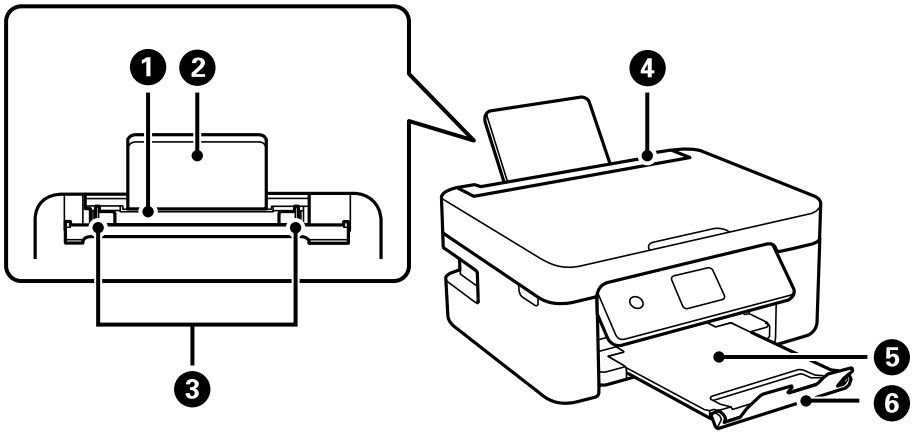

- ❏ The LCD screen may contain a few small bright or dark spots, and because of its features it may have an uneven brightness. These are normal and do not indicate that it is damaged in any way.
- ❏ Only use a dry, soft cloth for cleaning. Do not use liquid or chemical cleaners.
- ❏ The exterior cover of the LCD screen could break if it receives a heavy impact. Contact your dealer if the screen's surface chips or cracks, and do not touch or attempt to remove the broken pieces.

Protecting Your Personal Information

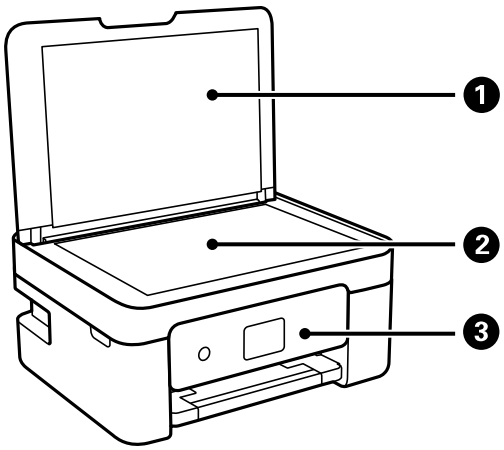

When you give the printer to someone else or dispose of it, erase all the personal information stored in the printer's memory by selecting **Settings** > **Restore Default Settings** > **All Settings** on the control panel.

Printer Basics

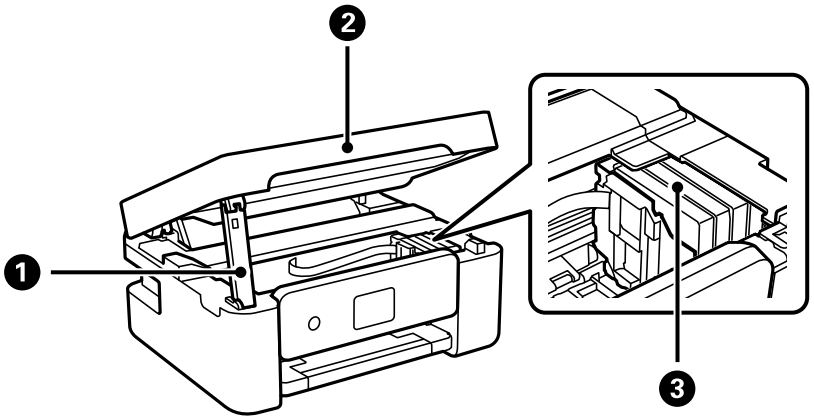

Part Names and Functions

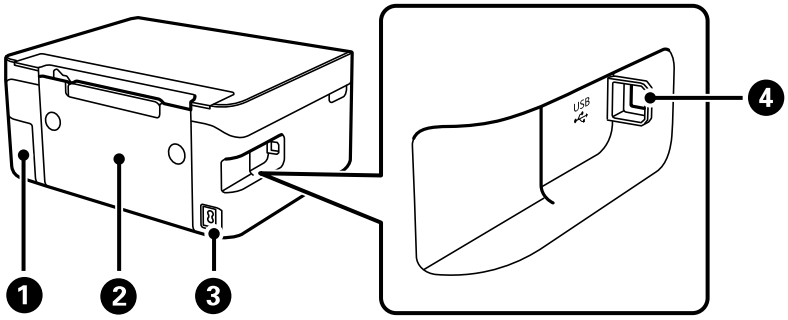

❶	Rear paper feed	Loads paper.
❷	Paper support	Supports loaded paper.
❸	Edge guide	Feeds the paper straight into the printer. Slide to the edges of the paper.
❹	Feeder guard	Prevents foreign substance from entering the printer. Usually keep this guard closed.
❺	Output tray	Holds the ejected paper.
❻	Stopper	Prevents printouts from falling from the output tray.

❶	Document cover	Blocks external light while scanning.
❷	Scanner glass	Place the originals.
❸	Control panel	Indicates the printer's status and allows you to make print settings.

❶	Scanner unit support	Supports the scanner unit.
❷	Scanner unit	Scans placed originals. Open when replacing ink cartridges or removing jammed paper inside the printer.
❸	Ink cartridge holder	Install the ink cartridges. Ink is ejected from the print head nozzles.

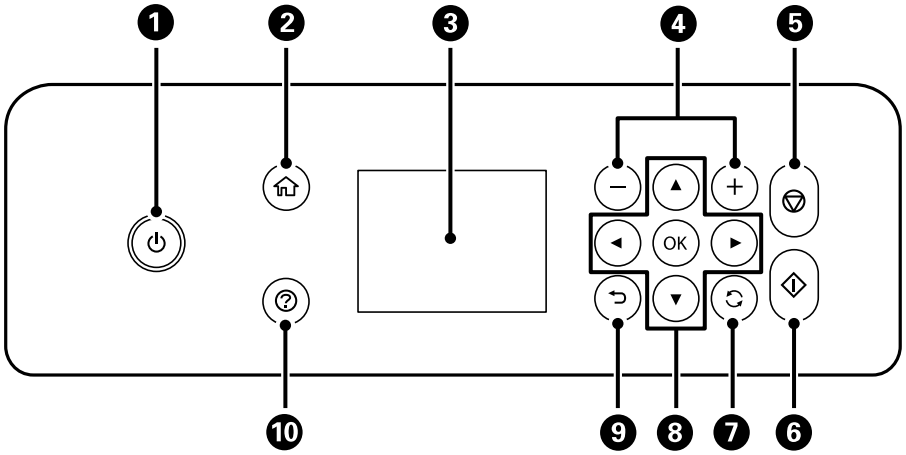

❶	Maintenance box cover	Remove when replacing the maintenance box. The maintenance box is a container that collects a very small amount of surplus ink during cleaning or printing.
❷	Rear cover	Remove when removing jammed paper.
❸	AC inlet	Connects the power cord.
❹	USB port	Connects a USB cable to connect with a computer.

Related Information

➡ “Control Panel” on page 16

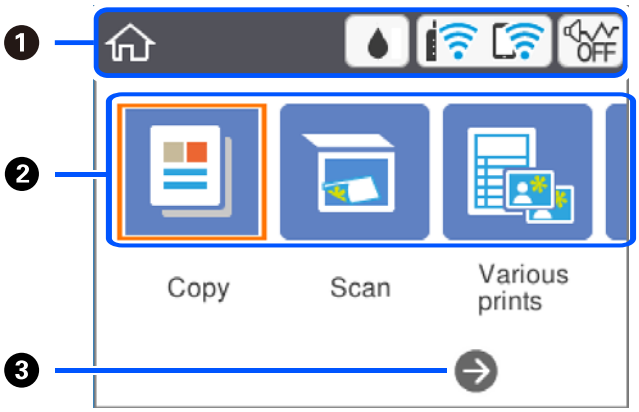

Guide to the Control Panel

Control Panel

❶	Turns the printer on or off. Unplug the power cord after checking that the power light is off.
❷	Displays the home screen.
❸	Displays menus and messages. Use buttons on the control panel to select a menu or to make settings.
❹	Selects the number of pages to print.
❺	Stops the current operation.
❻	Starts an operation such as printing or copying.
❼	Applies to a variety of functions depending on the situation.
❽	Use the ▲▼◀▶ buttons to select a menu, and then press the OK button to enter the selected menu.
❾	Returns to the previous screen.
❿	Displays the solutions when you are in trouble.

Guide to the Home Screen

1	Indicates items that have been setup for the printer as icons. Select the icon by pressing the ▲▼◀▶ buttons, and then press the OK button to check the current settings or access each setting menu.	
2	Displays each menu.	
	Copy	Allows you to copy a document.
	Scan	Allows you to scan a document or a photo.
	Various prints	Offers various printing features such as copying in various layouts and printing ruled paper or calendars.
	Settings	Allows you to make settings related to maintenance, printer setup, and network settings.
	Maintenance	Displays the menus recommended to improve the quality of your printouts such as unclogging nozzles by printing a nozzle check pattern and performing head cleaning, and improving blurring or banding in your printouts by aligning the print head.
	Smartphone connect	Allows you to connect the printer directly to your smart device without a wireless router.
3	You can scroll right by pressing the ▶ button.	

Icons displayed in the LCD Screen

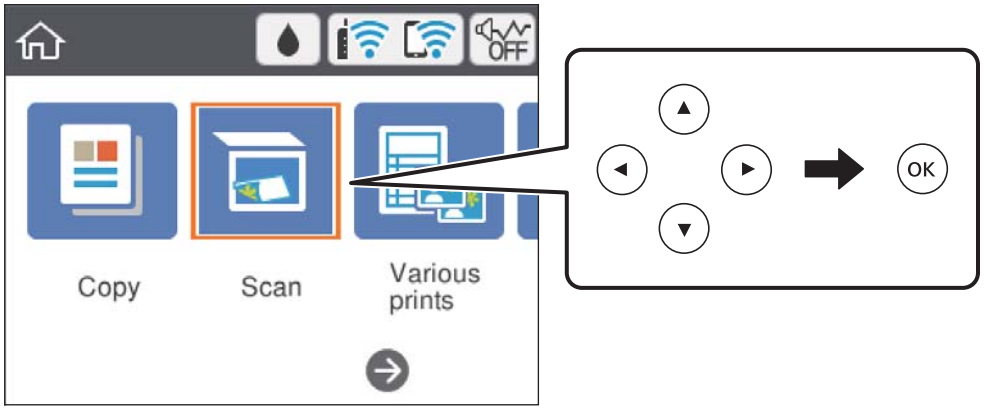

The following icons are displayed on the LCD screen depending on the printer's status.

	Displays the **Supply Status** screen. You can check the approximate ink levels and the approximate service life of the maintenance box.

	Indicates the network connection status. Select the icon to check and change the current settings. This is the shortcut for the following menu. **Settings** > **Network Settings** > **Wi-Fi Setup**	
		The printer is not connected to a wireless (Wi-Fi) network.
		The printer is searching for SSID, unset IP address, or having a problem with a wireless (Wi-Fi) network.
		The printer is connected to a wireless (Wi-Fi) network. The number of bars indicates the signal strength of the connection. The more bars there are, the stronger the connection.
		The printer is not connected to a wireless (Wi-Fi) network in Wi-Fi Direct (Simple AP) mode.
		The printer is connected to a wireless (Wi-Fi) network in Wi-Fi Direct (Simple AP) mode.
 	Indicates whether or not **Quiet Mode** is set for the printer. When this feature is enabled, the noise made by printer operations is reduced, but print speed may slow down. However, noises may not be reduced depending on the selected paper type and print quality.	
	Indicates that there is additional information. Select the icon to displays the message.	
	Indicates a problem with the items. Select the icon to check how to solve the problem.	

Basic Operations

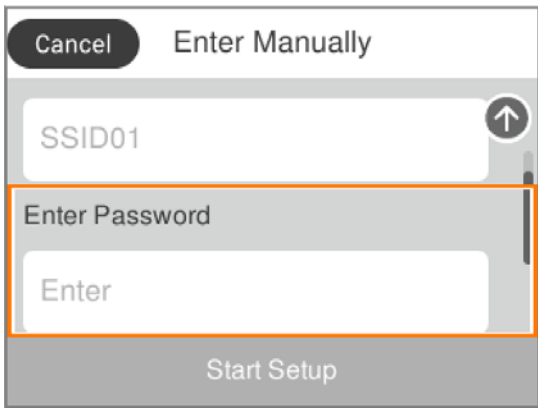

Move the focus using the ▲▼◀▶ buttons to select the items, and then press the OK button to confirm your selection or run the selected feature.

Move the focus to the setting item using the ▲▼◀▶ buttons, and then press the OK button to switch the item on or off.

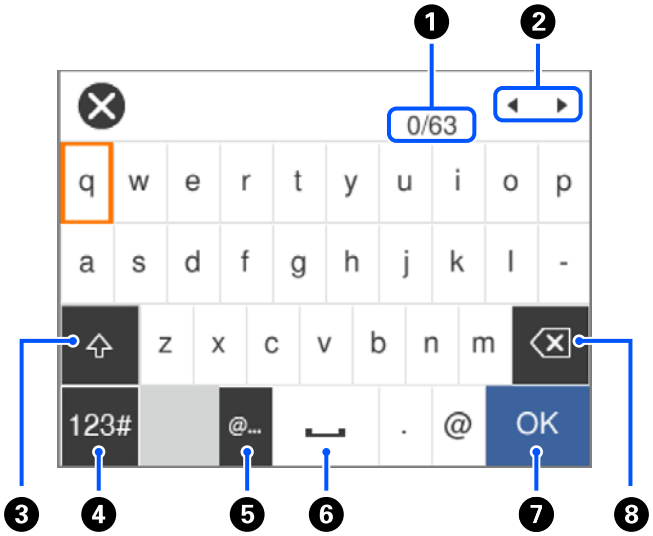

To enter the value, name, address, and so on, move the focus to the input field using the ▲▼◀▶ buttons, and then press the OK button to display the on-screen keyboard.

Entering Characters

On-screen Keyboard

You can enter characters and symbols by using on-screen keyboard when you make network settings and so on.

❶	Indicates the character count.
❷	Moves the cursor to the input position.
❸	Switches between upper case and lower case.
❹	Switches the character type. You can enter alphanumerics and symbols.
❺	Enters frequently used email domain addresses or URLs by simply selecting the item.
❻	Enters a space.
❼	Enters character.
❽	Deletes a character to the left.

Note:

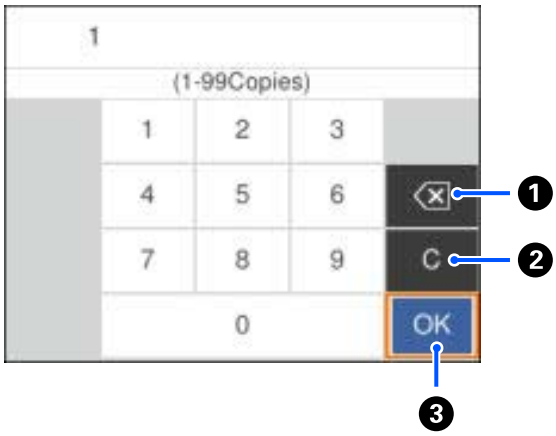

❏ *Available icons vary depending on the setting item.*

❏ *You can also switch the character type by using the* ↻ *button.*

On-screen Keypad

You can enter numbers by using the on-screen keypad when entering the number of copies and so on.

The on-screen keypad makes it easier to enter larger numbers. When entering a smaller number, use +/- buttons.

❶	Deletes the entered number to the left.
❷	Clears the entered number.
❸	Confirms the entered numbers and closes the on-screen keypad.

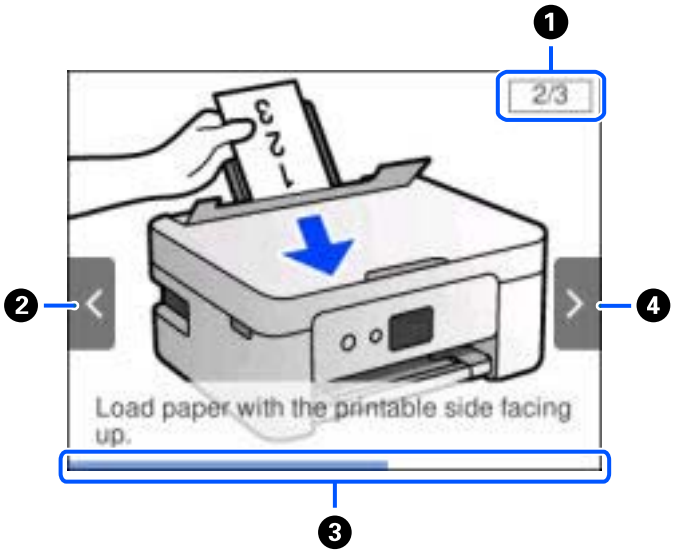

Note:
Press the ⮌ button to cancel entering and close the on-screen keypad.

Viewing Animations

You can view animations of operating instructions such as loading paper or removing jammed paper on the LCD screen.

❏ Press ⓘ button: Displays the help screen. Select **How To** and then select the items that you want to view.

❏ Select **How To** at the bottom of the operation screen: Displays the context-sensitive animation.

❶	Indicates the total number of steps and the current step number. In the example above, it shows step 2 from 3 steps.
❷	Press ◀ button to return to the previous step.
❸	Indicates your progress through the current step. The animation repeats when the progress bar reaches the end.
❹	Press ▶ button to move to the next step.

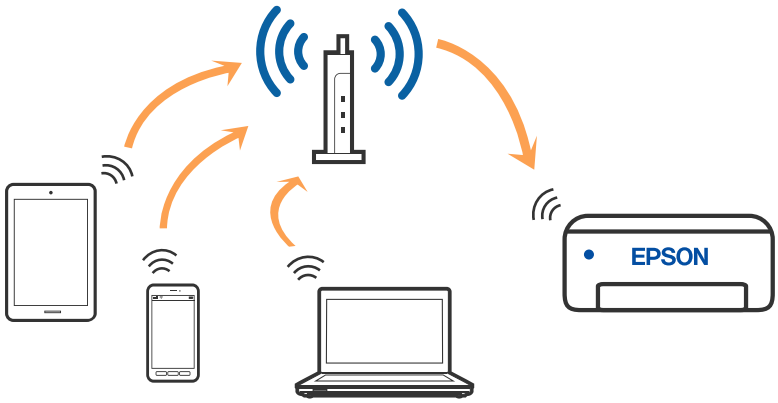

Network Settings

Network Connection Types

You can use the following connection methods.

Wi-Fi Connection

Connect the printer and the computer or smart device to the wireless router. This is the typical connection method for home or office networks where computers are connected by Wi-Fi through the wireless router.

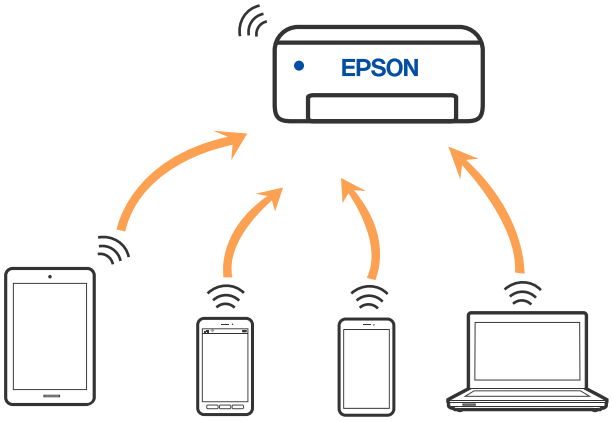

Related Information

➡ “Connecting to a Computer” on page 24
➡ “Connecting to a Smart Device” on page 25
➡ “Making Wi-Fi Settings from the Printer” on page 35

Wi-Fi Direct (Simple AP) Connection

Use this connection method when you are not using Wi-Fi at home or at the office, or when you want to connect the printer and the computer or smart device directly. In this mode, the printer acts as an wireless router and you

can connect the devices to the printer without having to use a standard wireless router. However, devices directly connected to the printer cannot communicate with each other through the printer.

The printer can be connected by Wi-Fi and Wi-Fi Direct (Simple AP) connection simultaneously. However, if you start a network connection in Wi-Fi Direct (Simple AP) connection when the printer is connected by Wi-Fi, the Wi-Fi is temporarily disconnected.

Related Information

➡ "Connecting to an iPhone, iPad, or iPod touch using Wi-Fi Direct" on page 25
➡ "Connecting to Android Devices Using Wi-Fi Direct" on page 29
➡ "Connecting to Devices other than iOS and Android Using Wi-Fi Direct" on page 31

Connecting to a Computer

We recommend using the installer to connect the printer to a computer. You can run the installer using one of the following methods.

❏ Setting up from the website

Access the following website, and then enter the product name. Go to **Setup**, and then start setting up.

http://epson.sn

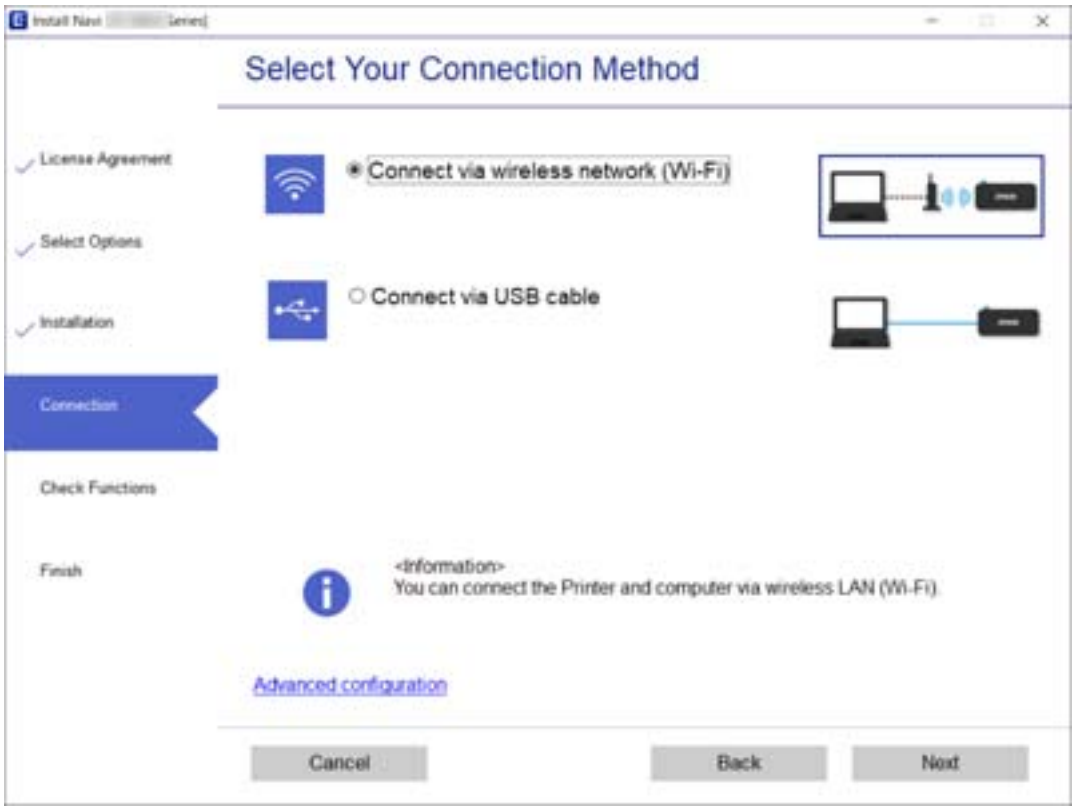

❏ Setting up using the software disc (only for the models that come with a software disc and users with Windows computers with disc drives.)

Insert the software disc into the computer, and then follow the on-screen instructions.

Selecting the Connection Methods

Follow the on-screen instructions until the following screen is displayed, and then select the connection method of the printer to the computer.

Select the connection type and then click **Next**.

Follow the on-screen instructions.

Connecting to a Smart Device

Connecting to a smart device over a wireless router

You can use the printer from a smart device when you connect the printer to the same Wi-Fi network (SSID) as the smart device. To use the printer from a smart device, set up from the following website. Access to the website from the smart device that you want to connect to the printer.

http://epson.sn > **Setup**

Note:
If you want to connect a computer and a smart device to the printer at the same time, we recommend setting up from the computer first by using the installer.

Related Information

➡ "Printing from Smart Devices" on page 87

Connecting to an iPhone, iPad, or iPod touch using Wi-Fi Direct

This method allows you to connect the printer directly to an iPhone, iPad, or iPod touch without a wireless router. The following conditions are required to connect using this method. If your environment does not match these

conditions, you can connect by selecting **Other OS Devices**. See "Related Information" below for details on connecting.

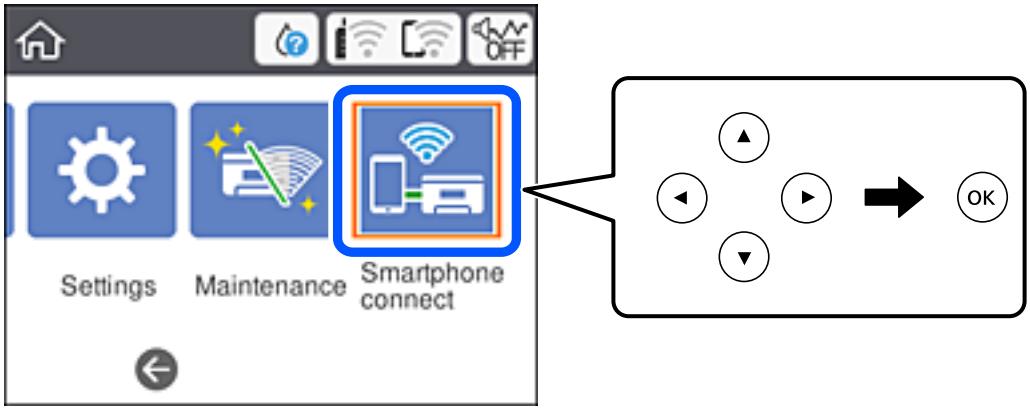

- ❏ iOS 11 or later
- ❏ Using the standard camera application to scan the QR code
- ❏ Epson iPrint version 7.0 or later

Epson iPrint is used to print from a smart device. Install Epson iPrint on the smart device in advance.

Note:
You only need to make these settings for the printer and the smart device that you want to connect to once. Unless you disable Wi-Fi Direct or restore the network settings to their defaults, you do not need to make these settings again.

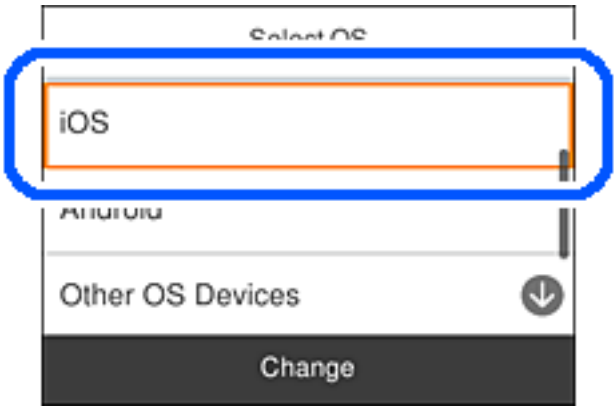

1. Select **Smartphone connect** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

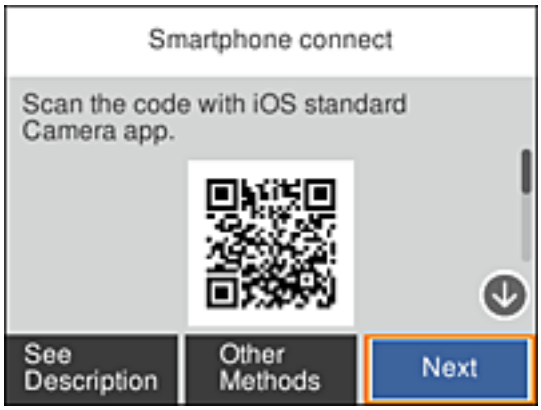

2. Select **Start Setup**.

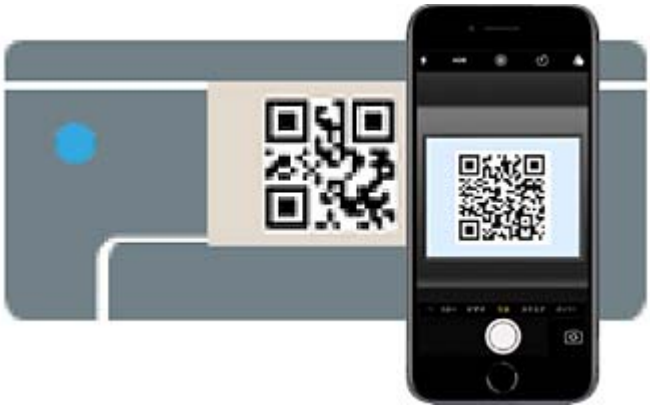

3. Select **iOS**.

The QR code is displayed on the printer's control panel.

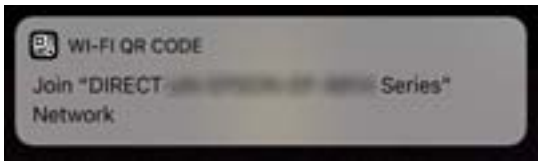

4. On your iPhone, iPad, or iPod touch, start the standard Camera app, and then scan the QR code displayed on the printer's control panel in PHOTO mode.

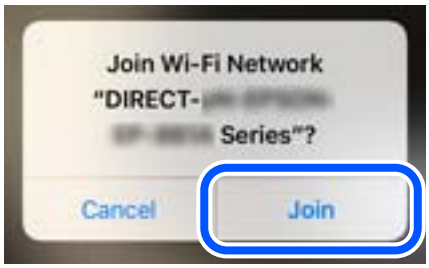

Use the Camera app for iOS 11 or later. You cannot connect to the printer using the Camera app for iOS 10 or earlier. Also, you cannot connect using an app for scanning QR codes. If you cannot connect, select **Other Methods** on the printer's control panel. See "Related Information" below for details on connecting.

5. Tap the notification displayed on the screen of the iPhone, iPad, or iPod touch.

6. Tap **Join**.

7. On the printer's control panel, select **Next**.

8. On the iPhone, iPad, or iPod touch, start Epson printing app.

   Examples of Epson printing apps

Epson iPrint

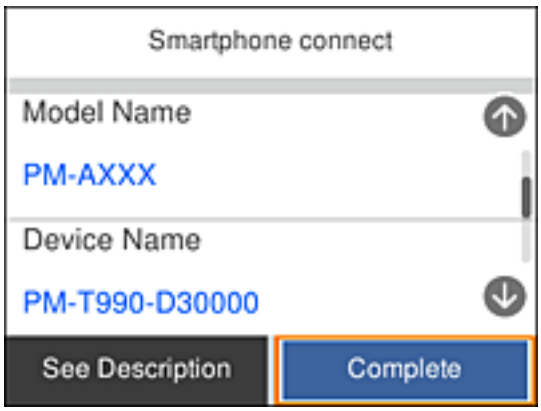

Epson Creative Print

9. On the Epson printing app screen, tap **Printer is not selected.**.

10. Select the printer that you want to connect to.

   See the information displayed on the printer's control panel to select the printer.

11. On the printer's control panel, select **Complete**.

For smart devices that have been connected to the printer before, select the network name (SSID) on the smart device's Wi-Fi screen to connect them again.

Related Information

➡ "Connecting to Devices other than iOS and Android Using Wi-Fi Direct" on page 31

➡ "Printing from Smart Devices" on page 87

Connecting to Android Devices Using Wi-Fi Direct

This method allows you to connect the printer directly to your Android device without a wireless router. The following conditions are required to use this function.

❏ Android 4.4 or later

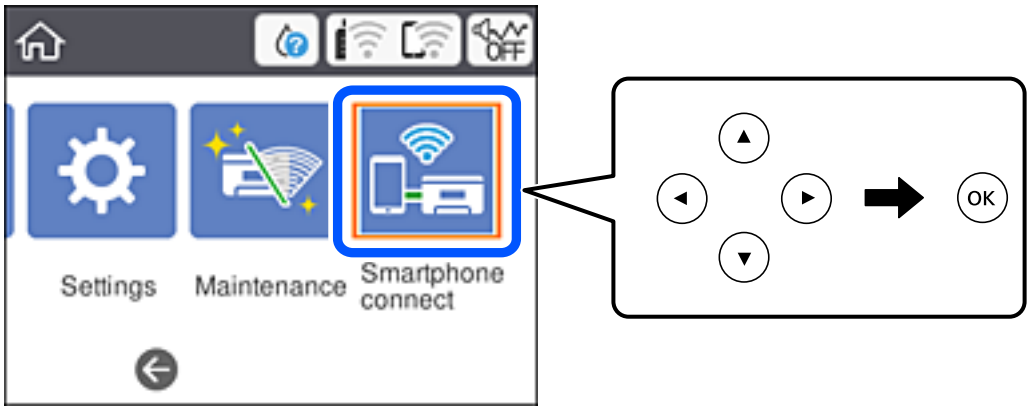

❏ Epson iPrint version 7.0 or later

Epson iPrint is used to print from a smart device. Install Epson iPrint on the smart device in advance.

Note:
You only need to make these settings for the printer and the smart device that you want to connect to once. Unless you disable Wi-Fi Direct or restore the network settings to their defaults, you do not need to make these settings again.

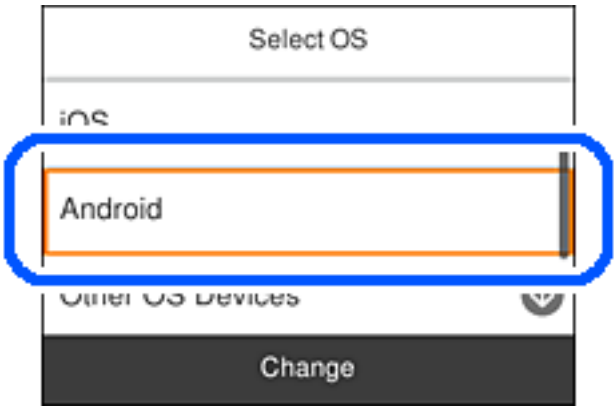

1. Select **Smartphone connect** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Start Setup**.

3. Select **Android**.

4. On the smart device, start Epson iPrint.

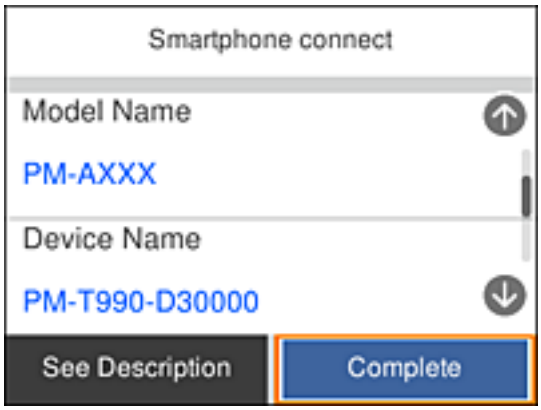

5. On the Epson iPrint screen, tap **Printer is not selected.**.

6. On the Epson iPrint screen, select the printer that you want to connect to.

See the information displayed on the printer's control panel to select the printer.

Note:
Printers may not been displayed depending on the Android device. If printers are not displayed, connect by selecting ***Other OS Devices****. See the related information link below for connecting.*

7. When the device connection approval screen is displayed, select **Approve**.

8. On the printer's control panel, select **Complete**.

For smart devices that have been connected to the printer before, select the network name (SSID) on the smart device's Wi-Fi screen to connect them again.

Related Information

Connecting to Devices other than iOS and Android Using Wi-Fi Direct

This method allows you to connect the printer directly to smart devices without a wireless router.

Note:
You only need to make these settings for the printer and the smart device that you want to connect to once. Unless you disable Wi-Fi Direct or restore the network settings to their defaults, you do not need to make these settings again.

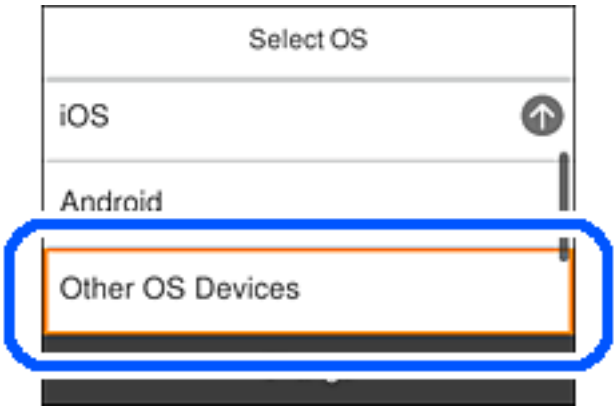

1. Select **Smartphone connect** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Start Setup**.

3. Select **Other OS Devices**.

   The SSID and Password for Wi-Fi Direct for the printer are displayed.

4. On the smart device's Wi-Fi screen, select the SSID shown on the printer's control panel, and then enter the password.

   The screenshot is an example on iPhone.

5. On the printer's control panel, select **Next**.

6. On the smart device, start Epson printing app.

   Examples of Epson printing apps

Epson iPrint

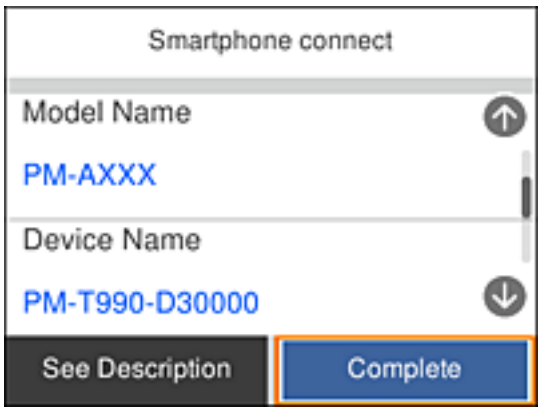

Epson Creative Print

7. On the Epson printing app screen, tap **Printer is not selected.**.

8. Select the printer that you want to connect to.

   See the information displayed on the printer's control panel to select the printer.

9. On the printer's control panel, select **Complete**.

For smart devices that have been connected to the printer before, select the network name (SSID) on the smart device's Wi-Fi screen to connect them again.

Related Information

➡ "Printing from Smart Devices" on page 87

Making Wi-Fi Settings from the Printer

You can make network settings from the printer's control panel in several ways. Choose the connection method that matches the environment and conditions that you are using.

If you know the information for the wireless router such as SSID and password, you can make settings manually.

If the wireless router supports WPS, you can make settings by using push button setup.

After connecting the printer to the network, connect to the printer from the device that you want to use (computer, smart device, tablet, and so on.)

Make advanced network settings to use a static IP address.

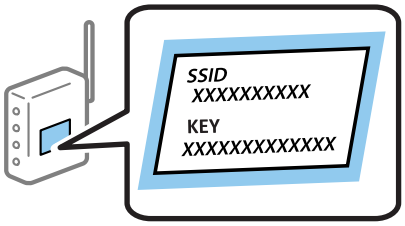

Related Information

➡ "Making Wi-Fi Settings by Entering the SSID and Password" on page 35
➡ "Making Wi-Fi Settings by Push Button Setup (WPS)" on page 37
➡ "Making Wi-Fi Settings by PIN Code Setup (WPS)" on page 38
➡ "Making Advanced Network Settings" on page 40

Making Wi-Fi Settings by Entering the SSID and Password

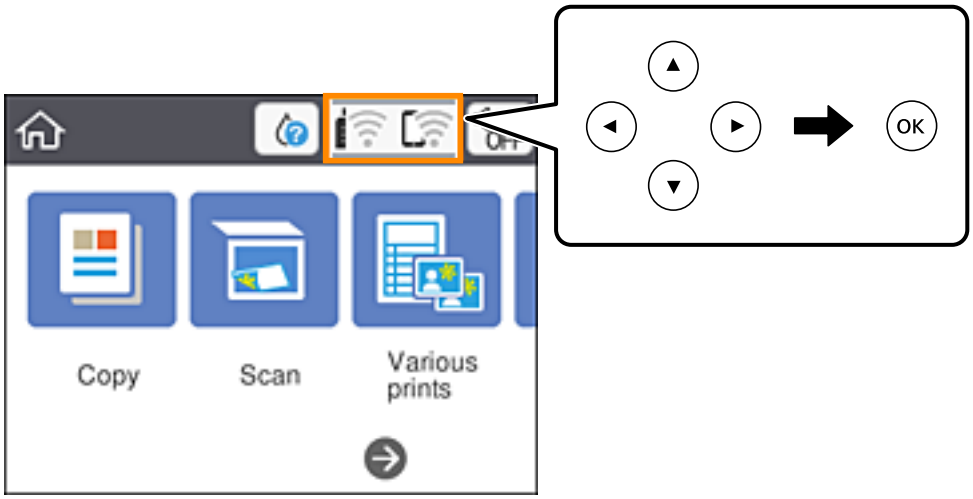

You can set up a Wi-Fi network by entering the information necessary to connect to a wireless router from the printer's control panel. To set up using this method, you need the SSID and password for a wireless router.

Note:
If you are using a wireless router with its default settings, the SSID and password are on the label. If you do not know the SSID and password, see the documentation provided with the wireless router.

1. Select  on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Wi-Fi (Recommended)**.

3. Press the OK button to display the next screen.

   If the network connection is already set up, the connection details are displayed. Select **Change Settings** to change the settings.

4. Select **Wi-Fi Setup Wizard**.

5. Select the SSID for the wireless router.

   Note:

   ❏ *If the SSID you want to connect to is not displayed on the printer's control panel, press the ↻ button to update the list. If it is still not displayed, press the + button, and then enter the SSID directly.*

   ❏ *If you do not know the network name (SSID) check if the information is written on the label of the wireless router. If you are using the wireless router with its default settings, use the SSID on the label. If you cannot find any information, see the documentation provided with the wireless router.*

6. Press the OK button, and then enter the password.

   Note:

   ❏ *The password is case-sensitive.*

   ❏ *If you do not know the password, check if the information is written on the label of the wireless router. On the label, the password may be written "Network Key", "Wireless Password", and so on. If you are using the wireless router with its default settings, use the password written on the label.*

7. When you have finished, select **OK**.

8. Check the settings, and then select **Start Setup**.

9. Select **Dismiss** to finish.

   Note:
   *If you fail to connect, load A4 size plain paper, and then select **Print Check Report** to print a connection report.*

10. Press the home button.

Related Information

Making Wi-Fi Settings by Push Button Setup (WPS)

You can automatically set up a Wi-Fi network by pressing a button on the wireless router. If the following conditions are met, you can set up by using this method.

- ❏ The wireless router is compatible with WPS (Wi-Fi Protected Setup).
- ❏ The current Wi-Fi connection was established by pressing a button on the wireless router.

1. Select  on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.

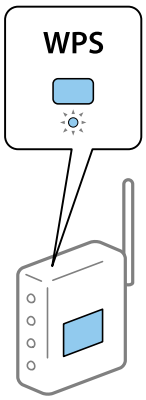

2. Select **Wi-Fi (Recommended)**.

3. Press the OK button.

   If the network connection is already set up, the connection details are displayed. Select **Change Settings** to change the settings.

4. Select **Push Button Setup (WPS)**.

5. Hold down the [WPS] button on the wireless router until the security light flashes.

If you do not know where the [WPS] button is, or there are no buttons on the wireless router, see the documentation provided with your wireless router for details.

6. Press the OK button on the printer.

7. Close the screen.

The screen automatically closes after a specific length of time.

Note:
If connection fails, restart the wireless router, move it closer to the printer, and try again. If it still does not work, print a network connection report and check the solution.

8. Press the ⌂ button.

Related Information

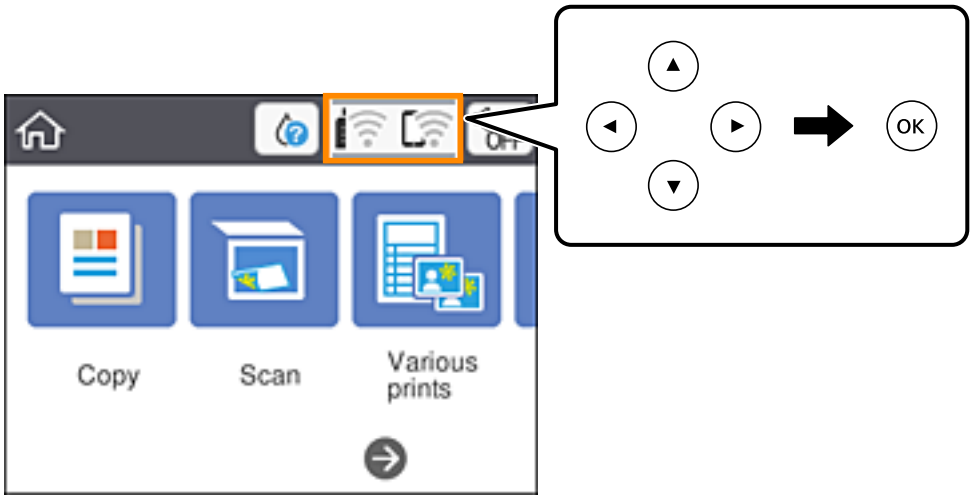

➡ "Checking the Network Connection Status" on page 41
➡ "When You Cannot Make Network Settings" on page 167

Making Wi-Fi Settings by PIN Code Setup (WPS)

You can automatically connect to a wireless router by using a PIN code. You can use this method to set up if a wireless router is capable of WPS (Wi-Fi Protected Setup). Use a computer to enter a PIN code into the wireless router.

1. Select  on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Wi-Fi (Recommended)**.

3. Press the OK button.

   If the network connection is already set up, the connection details are displayed. Select **Change Settings** to change the settings.

4. Select **Others** > **PIN Code Setup (WPS)**.

5. Use your computer to enter the PIN code (an eight digit number) displayed on the printer's control panel into the wireless router within two minutes.

   Note:
   See the documentation provided with your wireless router for details on entering a PIN code.

6. Press the OK button on the printer.

7. Close the screen.

   The screen automatically closes after a specific length of time.

   Note:
   If connection fails, restart the wireless router, move it closer to the printer, and try again. If it still does not work, print a connection report and check the solution.

8. Press the button.

Related Information

➡ "When You Cannot Make Network Settings" on page 167

Making Advanced Network Settings

You can change the network device name, TCP/IP setup, proxy server and so on. Check your network environment before making changes.

1. Select **Settings** on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.

2. Select **Network Settings** > **Advanced**.

3. Select the menu item for settings, and then select or specify the setting values.

4. Select **Start Setup**.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40

Setting Items for Advanced Network Settings

Select the menu item for settings, and then select or specify the setting values.

❏ Device Name

You can enter the following characters.

- ❏ Character limits: 2 to 15 (you must enter at least 2 characters)
- ❏ Usable characters: A to Z, a to z, 0 to 9, -.
- ❏ Characters you cannot use at the top: 0 to 9, -.
- ❏ Characters you cannot use at the bottom: -

❏ TCP/IP

- ❏ Auto

  Select when you are using a wireless router at home or you are allowing the IP address to be acquired automatically by DHCP.

- ❏ Manual

  Select when you do not want the printer's IP address to be changed. Enter the addresses for IP Address, Subnet Mask, and Default Gateway, and make DNS Server settings according to your network environment.

When you select **Auto** for the IP address assignment settings, you can select the DNS server settings from **Manual** or **Auto**. If you cannot obtain the DNS server address automatically, select **Manual**, and then enter the primary DNS server and secondary DNS server address directly.

❏ Proxy Server

- ❏ Do Not Use

  Select when you are using the printer in a home network environment.

- ❏ Use

  Select when you are using a proxy server in your network environment and you want to set it to the printer. Enter the proxy server address and port number.

Checking the Network Connection Status

You can check the network connection status in the following way.

Network Icon

You can check the network connection status and strength of the radio wave using the network icon on the printer's home screen.

Related Information

➡ "Icons displayed in the LCD Screen" on page 17

Checking Detailed Network Information from the Control Panel

When your printer is connected to the network, you can also view other network-related information by selecting the network menus you want to check.

1. Select **Settings** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Network Settings** > **Network Status**.

3. To check the information, select the menus that you want to check.

   ❏ Wi-Fi Status

   Displays the network information (device name, connection, signal strength, obtain IP address, and so on) for Wi-Fi connections.

   ❏ Wi-Fi Direct Status

   Displays whether Wi-Fi Direct (Simple AP) is enabled or disabled for Wi-Fi Direct (Simple AP) connections.

   ❏ Print Status Sheet

   Prints a network status sheet. The information for Wi-Fi, Wi-Fi Direct (Simple AP), and so on is printed on two or more pages.

Related Information

➡ "Printing a Network Status Sheet" on page 48

Printing a Network Connection Report

You can print a network connection report to check the status between the printer and the wireless router.

1. Load papers.
2. Select **Settings** on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
3. Select **Network Settings** > **Connection Check**.

   The connection check starts.
4. Select **Print Check Report**.
5. Follow the instructions on the printer's screen to print the network connection report.

   If an error has occurred, check the network connection report, and then follow the printed solutions.
6. Press the OK button.

Related Information

➡ "Messages and Solutions on the Network Connection Report" on page 43

Messages and Solutions on the Network Connection Report

Check the messages and error codes on the network connection report, and then follow the solutions.

E-1

Solutions:

❏ Make sure your hub or other network device is turned on.

❏ If you want to connect the printer by Wi-Fi, make Wi-Fi settings for the printer again because it is disabled.

E-2, E-3, E-7

Solutions:

❏ Make sure your wireless router is turned on.

❏ Confirm that your computer or device is connected correctly to the wireless router.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Place the printer closer to your wireless router and remove any obstacles between them.

❏ If you have entered the SSID manually, check if it is correct. Check the SSID from the **Network Status** part on the network connection report.

❏ If an wireless router has multiple SSIDs, select the SSID that is displayed. When the SSID is using a non-compliant frequency, the printer does not display them.

❏ If you are using push button setup to establish a network connection, make sure your wireless router supports WPS. You cannot use push button setup if your wireless router does not support WPS.

❏ Makes sure your SSID uses only ASCII characters (alphanumeric characters and symbols). The printer cannot display an SSID that contains non-ASCII characters.

❏ Makes sure you know your SSID and password before connecting to the wireless router. If you are using a wireless router with its default settings, the SSID and password are located on a label on the wireless router. If you do not know your SSID and password, contact the person who set up the wireless router, or see the documentation provided with the wireless router.

❏ If you are connecting to an SSID generated from a tethering smart device, check for the SSID and password in the documentation provided with the smart device.

❏ If your Wi-Fi connection suddenly disconnects, check for the conditions below. If any of these conditions are applicable, reset your network settings by downloading and running the software from the following website.

http://epson.sn > **Setup**

- ❏ Another smart device was added to the network using push button setup.
- ❏ The Wi-Fi network was set up using any method other than push button setup.

Related Information

➡ "Connecting to a Computer" on page 24

➡ "Making Wi-Fi Settings from the Printer" on page 35

E-5

Solutions:

Make sure the wireless router's security type is set to one of the following. If it is not, change the security type on the wireless router, and then reset the printer's network settings.

- ❏ WEP-64 bit (40 bit)
- ❏ WEP-128 bit (104 bit)
- ❏ WPA PSK (TKIP/AES)*
- ❏ WPA2 PSK (TKIP/AES)*
- ❏ WPA (TKIP/AES)
- ❏ WPA2 (TKIP/AES)

* WPA PSK is also known as WPA Personal. WPA2 PSK is also known as WPA2 Personal.

E-6

Solutions:

- ❏ Check if MAC address filtering is disabled. If it is enabled, register the printer's MAC address so that it is not filtered. See the documentation provided with the wireless router for details. You can check the printer's MAC address from the **Network Status** part on the network connection report.
- ❏ If your wireless router is using shared authentication with WEP security, make sure the authentication key and index are correct.
- ❏ If the number of connectable devices on the wireless router is less than the number of network devices that you want to connect, make settings on the wireless router to increase the number of connectable devices. See the documentation provided with the wireless router to make settings.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40
➡ "Printing a Network Status Sheet" on page 48

E-8

Solutions:

- ❏ Enable DHCP on the wireless router if the printer's Obtain IP Address setting is set to **Auto**.
- ❏ If the printer's Obtain IP Address setting is set to Manual, the IP address you manually set is invalid due to out of range (for example: 0.0.0.0). Set a valid IP address from the printer's control panel or by using Web Config.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40

E-9

Solutions:

Check the following.

❏ Devices are turned on.

❏ You can access the Internet and other computers or network devices on the same network from the devices you want to connect to the printer.

If still does not connect your printer and network devices after confirming the above, turn off the wireless router. Wait for about 10 seconds, and then turn it on. Then reset your network settings by downloading and running the installer from the following website.

http://epson.sn > **Setup**

Related Information

➡ "Connecting to a Computer" on page 24

E-10

Solutions:

Check the following.

❏ Other devices on the network are turned on.

❏ Network addresses (IP address, subnet mask, and default gateway) are correct if you have set the printer's Obtain IP Address to Manual.

Reset the network address if they are incorrect. You can check the IP address, subnet mask, and default gateway from the **Network Status** part on the network connection report.

If DHCP is enabled, change the printer's Obtain IP Address setting to **Auto**. If you want to set the IP address manually, check the printer's IP address from the **Network Status** part on the network connection report, and then select Manual on the network settings screen. Set the subnet mask to [255.255.255.0].

If still does not connect your printer and network devices, turn off the wireless router. Wait for about 10 seconds, and then turn it on.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40

E-11

Solutions:

Check the following.

❏ The default gateway address is correct if you set the printer's TCP/IP Setup setting to Manual.

❏ The device that is set as the default gateway is turned on.

Set the correct default gateway address. You can check the default gateway address from the **Network Status** part on the network connection report.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40

E-12

Solutions:

Check the following.

❏ Other devices on the network are turned on.

❏ The network addresses (IP address, subnet mask, and default gateway) are correct if you are entering them manually.

❏ The network addresses for other devices (subnet mask and default gateway) are the same.

❏ The IP address does not conflict with other devices.

If still does not connect your printer and network devices after confirming the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Make network settings again using the installer. You can run it from the following website.

http://epson.sn > **Setup**

❏ You can register several passwords on a wireless router that uses WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

Related Information

➡ "Setting Items for Advanced Network Settings" on page 40

➡ "Connecting to a Computer" on page 24

E-13

Solutions:

Check the following.

❏ Network devices such as a wireless router, hub, and router are turned on.

❏ The TCP/IP Setup for network devices has not been set up manually. (If the printer's TCP/IP Setup is set automatically while the TCP/IP Setup for other network devices is performed manually, the printer's network may differ from the network for other devices.)

If it still does not work after checking the above, try the following.

❏ Turn off the wireless router. Wait for about 10 seconds, and then turn it on.

❏ Make network settings on the computer that is on the same network as the printer using the installer. You can run it from the following website.

http://epson.sn > **Setup**

❏ You can register several passwords on a wireless router that uses the WEP security type. If several passwords are registered, check if the first registered password is set on the printer.

Related Information

Message on the Network Environment

Message	Solution
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	After moving the printer closer to the wireless router and removing any obstacles between them, turn off the wireless router. Wait for about 10 seconds, and then turn it on. If it still does not connect, see the documentation supplied with the wireless router.
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	Computer and smart devices that can be connected simultaneously are connected in full in the Wi-Fi Direct (Simple AP) connection. To add another computer or smart device, disconnect one of the connected devices or connect it to the other network first. You can confirm the number of wireless devices which can be connected simultaneously and the number of connected devices by checking the network status sheet or the printer's control panel.
The same SSID as Wi-Fi Direct exists in the environment. Change the Wi-Fi Direct SSID if you cannot connect a smart device to the printer.	On the printer's control panel, go to Wi-Fi Direct Setup screen and select the menu to change the setting. You can change the network name following after DIRECT-XX-. Enter within 32 characters.

Printing a Network Status Sheet

You can check the detailed network information by printing it.

1. Load papers.
2. Select **Settings**.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
3. Select **Network Settings** > **Network Status**.
4. Select **Print Status Sheet**.
5. Check the message, and then print the network status sheet.
6. Press the OK button.

Replacing or Adding New Wireless Routers

If the SSID changes due to the replacement of a wireless router, or a wireless router is added and a new network environment is established, re-set the Wi-Fi settings.

Related Information

➡ "Changing the Connection Method to a Computer" on page 49

Changing the Connection Method to a Computer

Using the installer and re-set up in a different connection method.

❏ Setting up from the website

Access the following website, and then enter the product name. Go to **Setup**, and then start setting up.

http://epson.sn

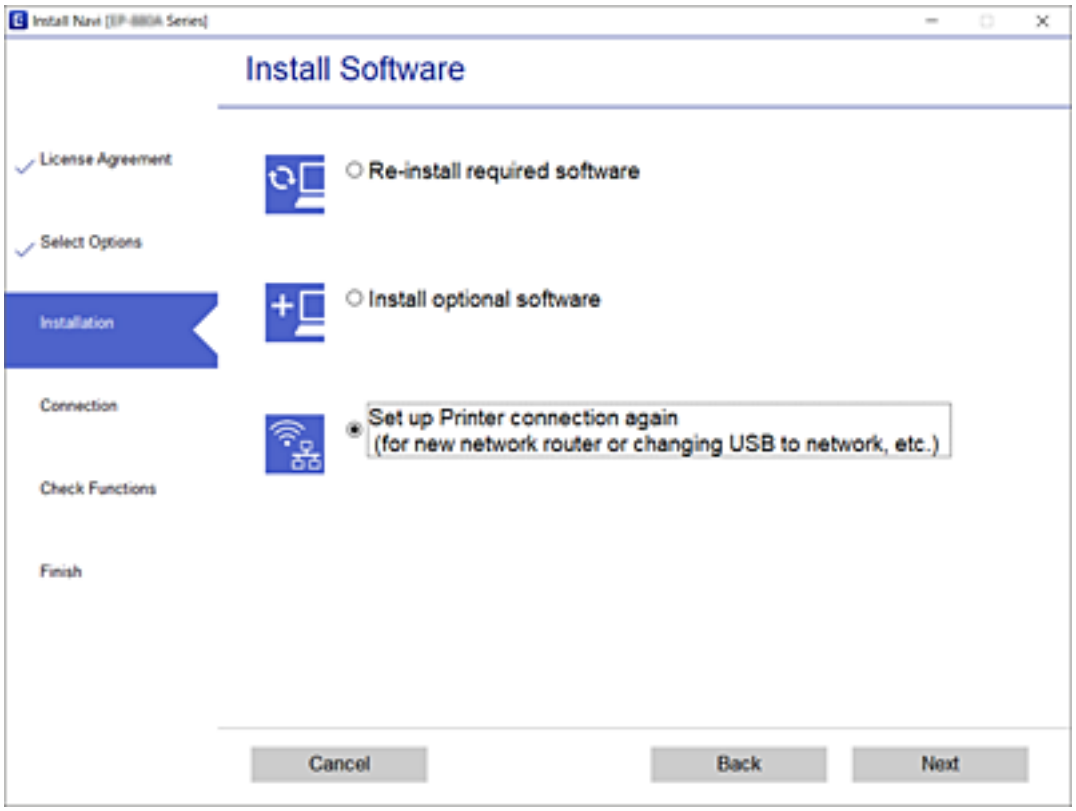

❏ Setting up using the software disc (only for the models that come with a software disc and users with Windows computers with disc drives.)

Insert the software disc into the computer, and then follow the on-screen instructions.

Selecting Change the Connection Methods

Follow the on-screen instructions until the following screen is displayed.

Select **Set up Printer connection again (for new network router or changing USB to network, etc.)** on the Install Software screen, and then click **Next**.

Changing the Wi-Fi Direct (Simple AP) Settings

When Wi-Fi Direct (simple AP) connection is enabled, you can change the settings from  > **Wi-Fi Direct** > **Start Setup** > **Change**, and then the following menu items are displayed.

Change Network Name

Change the Wi-Fi Direct (simple AP) network name (SSID) used for connecting to the printer to your arbitrary name. You can set the network name (SSID) in ASCII characters that is displayed on the software keyboard on the control panel.

When changing the network name (SSID), all connected devices are disconnected. Use the new network name (SSID) if you want to re-connect the device.

Change Password

Change the Wi-Fi Direct (simple AP) password for connecting to the printer to your arbitrary value. You can set the password in ASCII characters that is displayed on the software keyboard on the control panel.

When changing the password, all connected devices are disconnected. Use the new password if you want to re-connect the device.

Disable Wi-Fi Direct

Disable Wi-Fi Direct (simple AP) settings of the printer. When disabling it, all devices connected to the printer in Wi-Fi Direct (Simple AP) connection are disconnected.

Restore Default Settings

Restore all Wi-Fi Direct (simple AP) settings to their defaults.

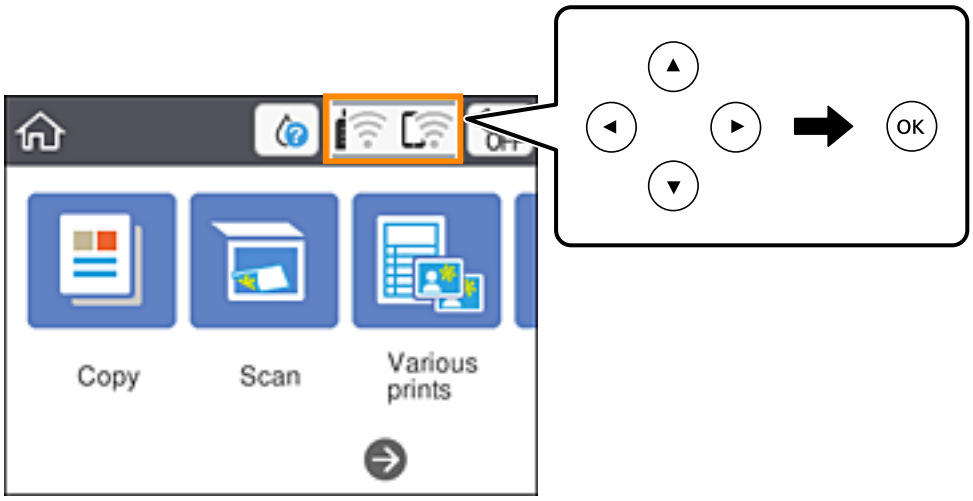

The Wi-Fi Direct (simple AP) connection information of the smart device saved to the printer is deleted.

Disabling Wi-Fi from the Control Panel

When Wi-Fi is disabled, the Wi-Fi connection is disconnected.

1. Select  on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Wi-Fi (Recommended)**.

   The network status is displayed.

3. Select **Change Settings**.

4. Select **Others** > **Disable Wi-Fi**.

5. Check the message, and then start setup.

6. When a completion message is displayed, close the screen.

   The screen automatically closes after a specific length of time.

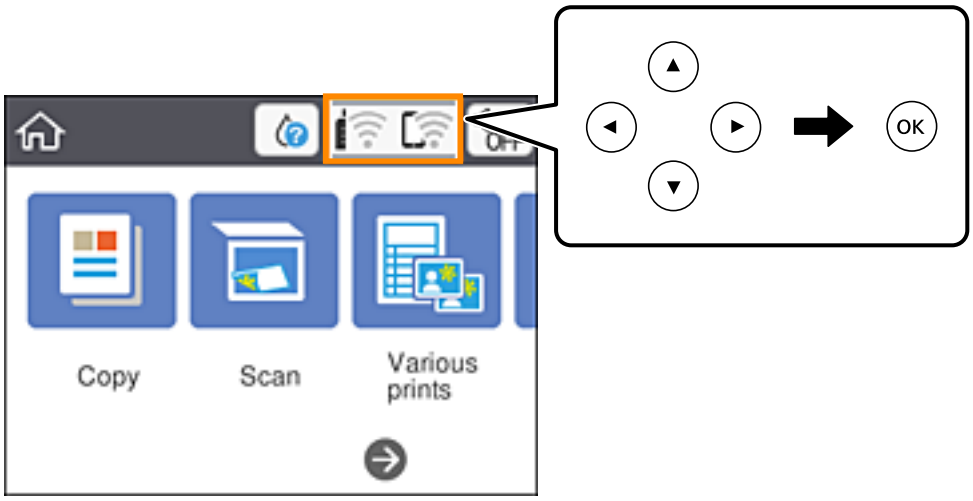

7. Press the  button.

Disconnecting Wi-Fi Direct (Simple AP) Connection from the Control Panel

Note:
When Wi-Fi Direct (Simple AP) connection disabled, all computers and smart devices connected to the printer in Wi-Fi Direct (Simple AP) connection are disconnected. If you want to disconnect a specific device, disconnect from the device instead of the printer.

1. Select  on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Wi-Fi Direct**.

   The Wi-Fi Direct information is displayed.

3. Press the OK button.

4. Select **Change**.

5. Select **Disable Wi-Fi Direct**.

6. Press the OK button.

7. When a completion message is displayed, close the screen.

   The screen automatically closes after a specific length of time.

8. Press the button.

Restoring the Network Settings from the Control Panel

You can restore all network settings to their defaults.

1. Select **Settings** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Restore Default Settings** > **Network Settings**.

3. Check the message, and then select **Yes**.

4. When a completion message is displayed, close the screen.

   The screen automatically closes after a specific length of time.

Loading Paper

Paper Handling Precautions

❏ Read the instruction sheets supplied with the paper.

❏ Fan and align the edges of the paper before loading. Do not fan or curl photo paper. Doing so may damage the printable side.

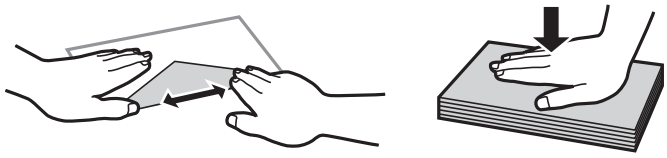

❏ If the paper is curled, flatten it or curl it slightly in the opposite direction before loading. Printing on curled paper may cause paper jams and smears on the printout.

❏ Do not use paper that is wavy, torn, cut, folded, damp, too thick, too thin, or paper that has stickers stuck to it. Using these types of paper causes paper jams and smears on the printout.

❏ Fan and align the edges of the envelopes before loading. When the stacked envelopes are puffed up with air, press them down to flatten them before loading.

❏ Do not use envelopes that are curled or folded. Using these envelopes causes paper jams and smears on the printout.

❏ Do not use envelopes with adhesive surfaces on the flaps or window envelopes.

❏ Avoid using envelopes that are too thin, as they may curl during printing.

Loading Paper in the Rear Paper Feed

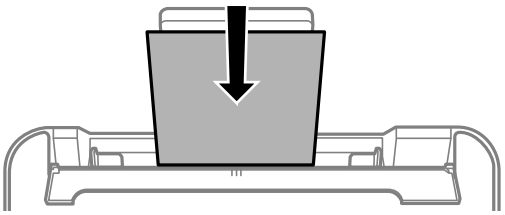

1. Open the feeder guard and pull out the paper support.

2. Slide the edge guides.

3. Load paper at the center of the paper support with the printable side facing up.

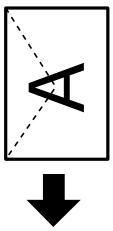

Important:

- ❏ *Do not load more than the maximum number of sheets specified for the paper. For plain paper, do not load above the line just under the ▼ symbol inside the edge guide.*
- ❏ *Load paper short edge first. However, when you have set the long edge as the width of the user defined size, load paper long edge first.*

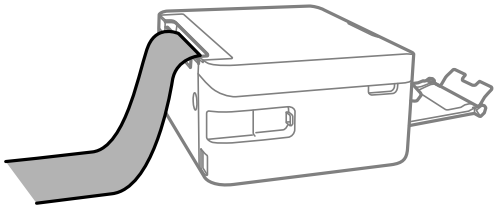

❏ Envelope

Load envelopes with the flap on the left side.

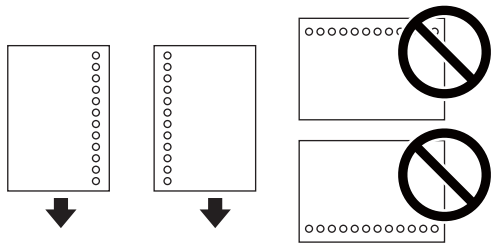

❏ Long Papers

When loading paper longer than legal size, store the paper support, and then flatten the leading edge of the paper.

❏ Pre-punched paper

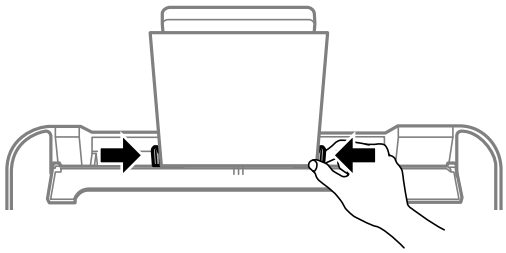

Note:

❏ *Load a single sheet of defined size plain paper with binding holes at the left or right.*

❏ *Adjust the print position of your file to avoid printing over the holes.*

❏ *Automatic 2-sided printing is not available for pre-punched paper.*

4. Slide the edge guides to the edges of the paper, and then close the feeder guard.

> ***Important:***
> *Do not place objects on the feeder guard. Doing so may prevent paper from feeding.*

5. On the control panel, set the size and type of the paper you loaded in the rear paper feed.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

   Note:

   ❏ *You can also display the paper size and paper type settings screen by selecting* ***Settings*** *>* ***Printer Settings*** *>* ***Paper Source Setting*** *>* ***Paper Setup****.*

   ❏ *For letterhead paper, select* ***Letterhead*** *as the paper type.*

   ❏ *For letterhead paper, if you print on paper that is smaller than the setting in the printer driver, the printer may print beyond the edges of the paper which can lead to ink smears on your printouts and excess ink building up inside the printer. Make sure you select the correct paper size setting.*

   ❏ *2-sided printing and borderless printing are not available for letterhead paper. Also, the print speed may be slower.*

6. Slide out the output tray.

Note:
Return the remaining paper to its package. If you leave it in the printer, the paper may curl or the print quality may decline.

Placing Originals

Placing Originals on the Scanner Glass

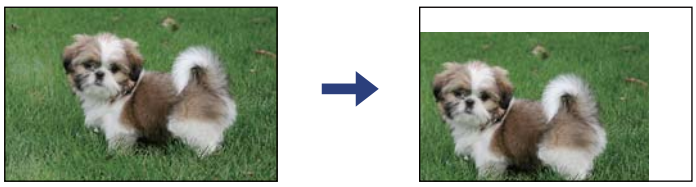

Important:
When placing bulky originals such as books, prevent exterior light from shining directly onto the scanner glass.

1. Open the document cover.

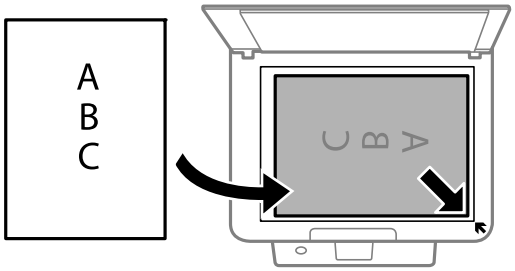

2. Remove any dust or stains on the surface of the scanner glass using a soft, dry, clean cloth.

   Note:
   If there is any trash or dirt on the scanner glass, the scanning range may expand to include it, so the image of the original may be displaced or reduced.

3. Place the original face-down and slide it to the corner mark.

   Note:
   A range of 1.5 mm from the corner of the scanner glass is not scanned.

4. Close the cover gently.

> ***Important:***
> *Do not apply too much force to the scanner glass or the document cover. Otherwise, they may be damaged.*

5. Remove the originals after scanning.

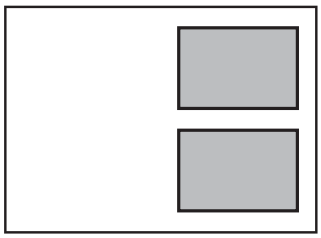

Note:
If you leave the originals on the scanner glass for a long time, they may stick to the surface of the glass.

How to Place Various Originals

Placing Photos for Copying

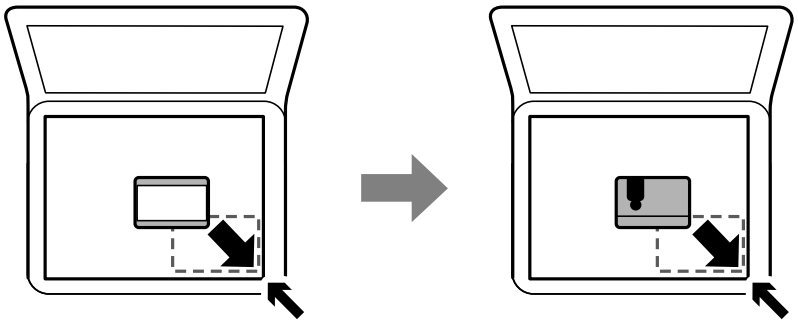

You can place multiple photos at a time to make separate copies. The photos should be larger than 30×40 mm. Place a photo 5 mm away from the corner mark of the scanner glass, and leave 5 mm between photos. You can place photos of different sizes at the same time.

Maximum size: 10×15 cm (4×6 in.)

Placing an ID Card for Copying

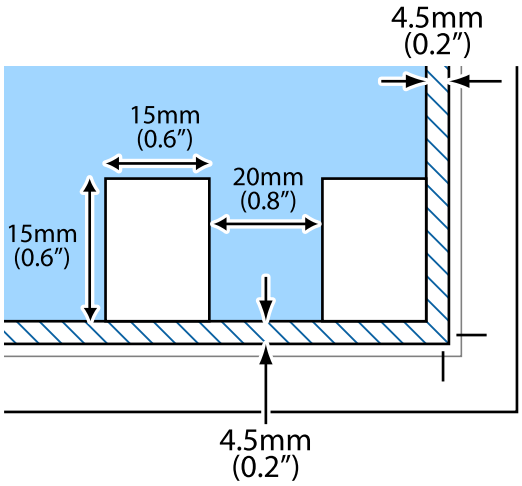

Place an ID card 5 mm away from the corner mark of the scanner glass.

Placing Multiple Photos for Scanning at the Same Time

You can scan multiple photos at the same time and save each image, using **Photo Mode** in Epson Scan 2. Place the photos 4.5 mm away from the horizontal and vertical edges of the scanner glass, and place them at least 20 mm apart from each other. The photos should be larger than 15×15 mm.

Note:
*Enable the **Thumbnail** check box at the top of the preview window.*

Printing

Printing from the Control Panel

Printing a Schedule

You can easily print a Monthly or Weekly schedule.

1. Load paper in the printer.
2. Select **Various prints** on the control panel.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
3. Select **Schedule**.
4. Select the type of schedule.
5. Make the paper settings, and then press the ▶ button.
6. When you select **Monthly**, set the date, and then select **Done**.
7. Enter the number of copies, and then press the ⓥ button.

Related Information

➡ "List of Paper Type" on page 57

Printing Lined Paper

You can print some types of lined paper, graph paper, or music paper and create your own, original notebook or loose-leaf.

1. Load paper in the printer.
2. Select **Various prints** on the control panel.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
3. Select **Ruled Paper**.
4. Select the type of ruled line.
5. Make the paper settings.
6. Press the ▶ button.
7. Enter the number of copies, and then press the ⓘ button.

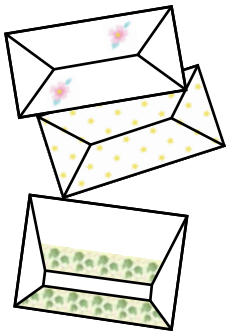

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57
➡ "List of Paper Type" on page 57

Printing Envelopes

You can print some types of envelopes.

First print a diagram of an envelope on A4 size paper, and then fold it to create an envelope.

1. Load A4 size paper in the printer.
2. Select **Various prints** on the control panel.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.
3. Select **Origami**.
4. Select **Origami Envelope**.
5. Select the size of the envelope.
6. Select the design of the envelope.
7. Select the layout of the envelope.
8. Select whether or not to print fold lines.
9. Enter the number of copies, and then press the ⓘ button.

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57
➡ "List of Paper Type" on page 57

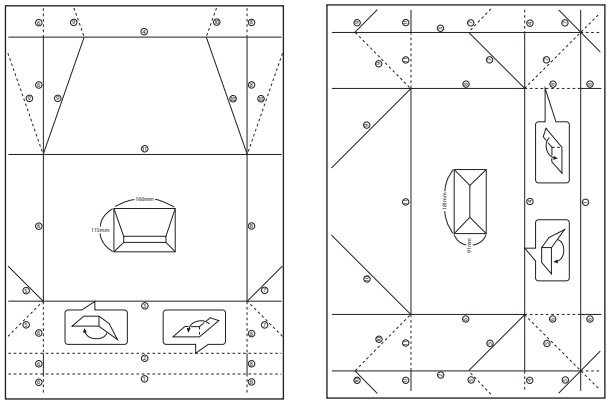

Folding Envelopes

After printing a diagram of an envelope, print an instruction sheet that shows you how to fold the envelope, and then lay the instruction sheet on top of the diagram and fold them together.

1. Select **Origami Envelope Instruction** from the **Origami** menu.
2. Select the envelope size that you selected to print the envelope diagram.
3. Load A4 plain paper in the printer, and then press the OK button.

4. Enter the number of copies, and then press the ⓘ button.

   The following instruction sheet is printed.

5. Lay the instruction sheet on top of the envelope diagram, and then fold them together following the instructions on the instruction sheet.

6. When finished, unfold them and remove the instruction sheet, and then fold only the envelope diagram again along its creases.

Printing from a Computer

Printing Basics - Windows

Note:

❏ *See the online help for explanations of the setting items. Right-click an item, and then click* ***Help****.*

❏ *Operations differ depending on the application. See the application's help for details.*

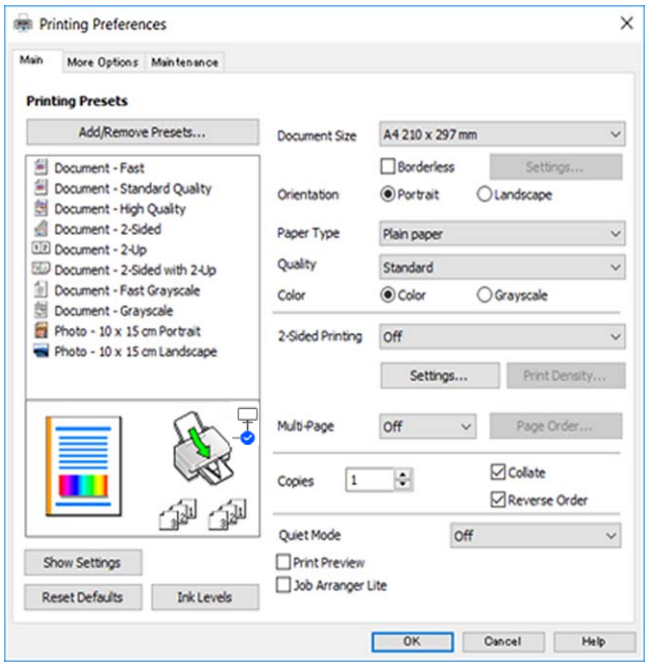

1. Load paper in the printer.

2. Open the file you want to print.

3. Select **Print** or **Print Setup** from the **File** menu.

4. Select your printer.

5. Select **Preferences** or **Properties** to access the printer driver window.

6. Make the following settings.

   ❏ Document Size: Select the paper size you loaded in the printer.

   ❏ Borderless: Select to print with no margins around the image.

   In borderless printing, the print data is enlarged slightly more than the paper size so that no margins are printed around the edges of the paper. Click **Settings** to select the amount of enlargement.

   ❏ Orientation: Select the orientation you set in the application.

   ❏ Paper Type: Select the type of paper you loaded.

   ❏ Quality: Select the print quality.

   Selecting **High** provides higher quality printing, but the printing speed may be slower.

   ❏ Color: Select **Grayscale** when you want to print in black or shades of gray.

   Note:
   *When printing on envelopes, select **Landscape** as the **Orientation** setting.*

7. Click **OK** to close the printer driver window.

8. Click **Print**.

Related Information

➡ "Available Paper and Capacities" on page 55

➡ "List of Paper Type" on page 57

Printing Basics - Mac OS

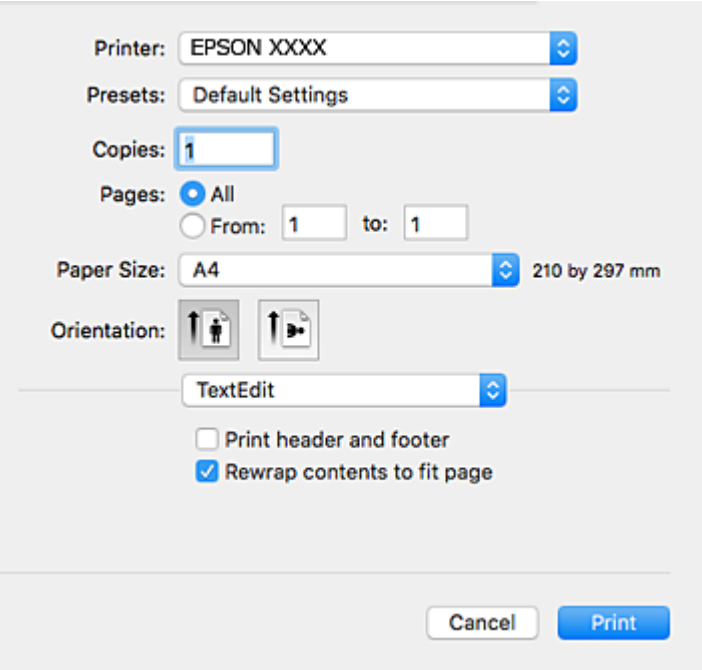

Note:
Explanations in the section use TextEdit as an example. Operations and screens differ depending on the application. See the application's help for details.

1. Load paper in the printer.

2. Open the file you want to print.

3. Select **Print** from the **File** menu or another command to access the print dialog.

   If necessary, click **Show Details** or ▼ to expand the print window.

4. Make the following settings.

   ❏ Printer: Select your printer.

   ❏ Presets: Select when you want to use the registered settings.

   ❏ Paper Size: Select the paper size you loaded in the printer.

   When printing with no margins, select a "borderless" paper size.

   ❏ Orientation: Select the orientation you set in the application.

   Note:

   ❏ *If the above setting menus are not displayed, close the print window, select **Page Setup** from the **File** menu, and then make settings.*

   ❏ *When printing on envelopes, select landscape orientation.*

5. Select **Print Settings** from the pop-up menu.

Note:
*If the **Print Settings** menu is not displayed on macOS Catalina (10.15) or later, macOS High Sierra (10.13), macOS Sierra (10.12), OS X El Capitan (10.11), OS X Yosemite (10.10), OS X Mavericks (10.9), OS X Mountain Lion (10.8), the Epson printer driver has not been installed correctly. Enable it from the following menu.*

*Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), remove the printer, and then add the printer again.*

*macOS Mojave (10.14) cannot access **Print Settings** in applications made by Apple such as TextEdit.*

6. Make the following settings.

- ❏ Media Type: Select the type of paper you loaded.
- ❏ Print Quality: Select the print quality.

  Selecting **Fine** provides higher quality printing, but the printing speed may be slower.
- ❏ Expansion: Available when selecting a borderless paper size.

  In borderless printing, the print data is enlarged slightly more than the paper size so that no margins are printed around the edges of the paper. Select the amount of enlargement.
- ❏ Grayscale: Select to print in black or shades of gray.

7. Click **Print**.

Printing on 2-Sides

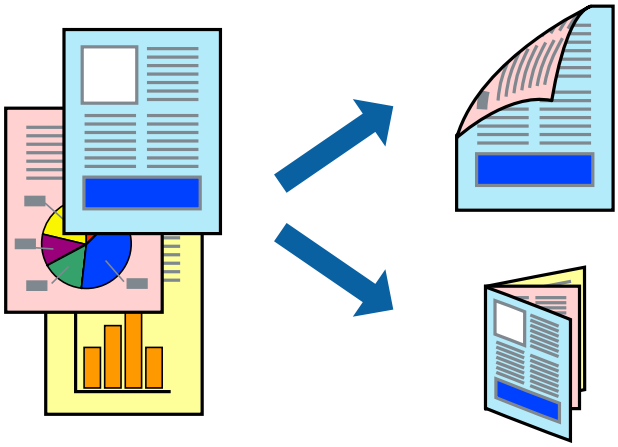

You can use either of the following methods to print on both sides of the paper.

❏ Automatic 2-sided printing

❏ Manual 2-sided printing (for Windows only)

When the printer has finished printing the first side, flip the paper over to print on the other side.

You can also print a booklet that can be created by folding the printout. (For Windows only)

Note:

❏ *This feature is not available for borderless printing.*

❏ *If you do not use paper that is suitable for 2-sided printing, the print quality may decline and paper jams may occur.*

❏ *Depending on the paper and the data, ink may bleed through to the other side of the paper.*

Related Information

➡ "Available Paper and Capacities" on page 55

Printing on 2-Sides - Windows

Note:

❏ *Manual 2-sided printing is available when **EPSON Status Monitor 3** is enabled. If **EPSON Status Monitor 3** is disabled, access the printer driver, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*

❏ *Manual 2-sided printing may not be available when the printer is accessed over a network or is used as a shared printer.*

1. Load paper in the printer.

2. Open the file you want to print.

3. Access the printer driver window.

4. Select **Auto (Long-edge binding)**, **Auto (Short-edge binding)**, **Manual (Long-edge binding)**, or **Manual (Short-edge binding)** from **2-Sided Printing** on the **Main** tab.

5. Click **Settings**, make the appropriate settings, and then click **OK**.

   Note:
   *To print a folded booklet, select **Booklet**.*

6. Click **Print Density**, select the document type from **Select Document Type**, and then click **OK**.

   The printer driver automatically sets the **Adjustments** options for that document type.

   Note:
   - *Printing may be slow depending on the combination of options selected for **Select Document Type** in the **Print Density Adjustment** window and for **Quality** on the **Main** tab.*
   - *For manual 2-sided printing, the **Print Density Adjustment** setting is not available.*

7. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.

8. Click **Print**.

   For manual 2-sided printing, when the first side has finished printing, a pop-up window is displayed on the computer. Follow the on-screen instructions.

Printing on 2-Sides (for Windows only)

The printer driver prints automatically separating even pages and odd pages. When the printer has finished printing the odd pages, flip the paper over following the instructions to print the even pages. You can also print a booklet that can be created by folding the printout.

Note:

- ❏ *This feature is not available for borderless printing.*
- ❏ *If you do not use paper that is suitable for 2-sided printing, the print quality may decline and paper jams may occur.*
- ❏ *Depending on the paper and the data, ink may bleed through to the other side of the paper.*
- ❏ *If **EPSON Status Monitor 3** is disabled, access the printer driver, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*
- ❏ *2-sided printing may not be available when the printer is accessed over a network or is used as a shared printer.*

1. Load paper in the printer.
2. Open the file you want to print.
3. Access the printer driver window.
4. Select **Manual (Long-edge binding)** or **Manual (Short-edge binding)** from **2-Sided Printing** on the **Main** tab.
5. Click **Settings**, make the appropriate settings, and then click **OK**.

   Note:
   *To print as a booklet, select **Booklet**.*
6. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.

7. Click **Print**.

   When the first side has finished printing, a pop-up window is displayed on the computer. Follow the on-screen instructions.

Printing Several Pages on One Sheet

You can print two or four pages of data on a single sheet of paper.

Printing Several Pages on One Sheet - Windows

Note:
This feature is not available for borderless printing.

1. Load paper in the printer.
2. Open the file you want to print.
3. Access the printer driver window.
4. Select **2-Up** or **4-Up** as the **Multi-Page** setting on the **Main** tab.
5. Click **Page Order**, make the appropriate settings, and then click **OK** to close the window.
6. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.
7. Click **Print**.

Making Posters Using Overlapping Alignment Marks

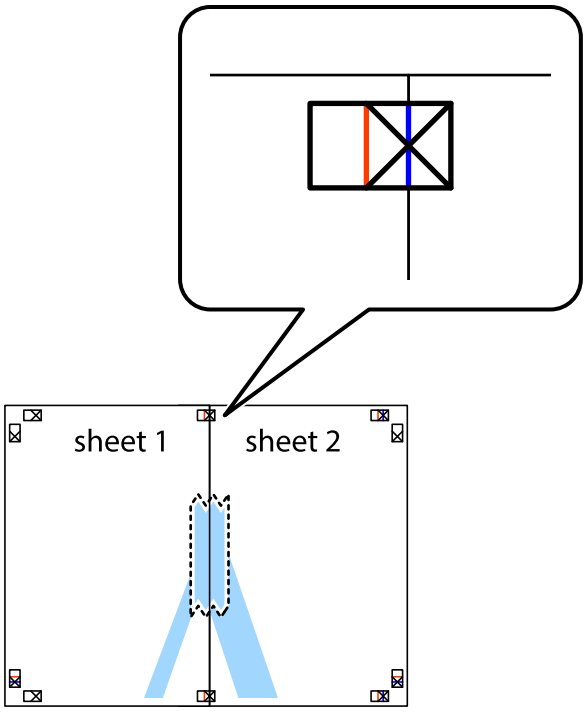

Here is an example of how to make a poster when **2x2 Poster** is selected, and **Overlapping Alignment Marks** is selected in **Print Cutting Guides**.

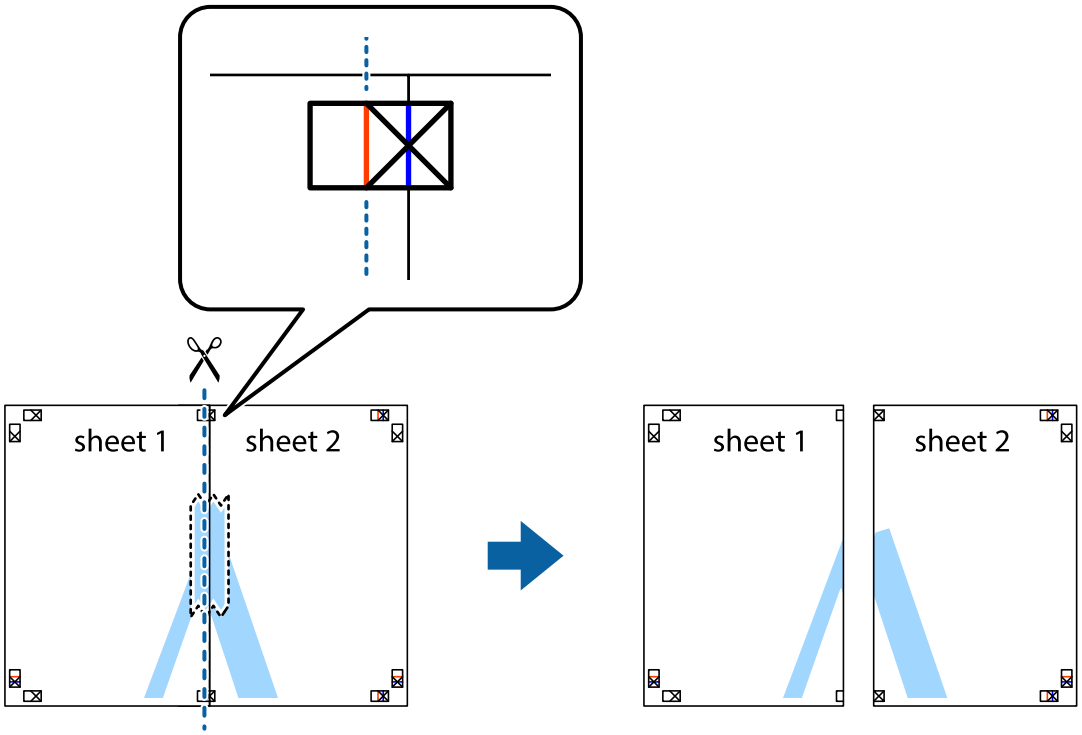

1. Prepare Sheet 1 and Sheet 2. Cut off the margins of Sheet 1 along the vertical blue line through the center of the top and bottom cross marks.

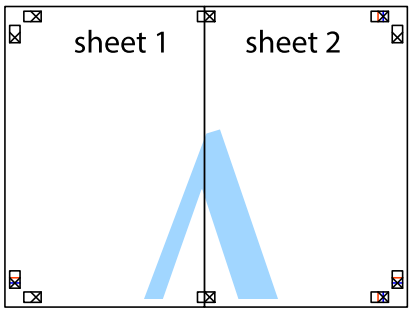

2. Place the edge of Sheet 1 on top of Sheet 2 and align the cross marks, then temporarily tape the two sheets together from the back.

3. Cut the taped sheets in two along the vertical red line through the alignment markers (this time, the line to the left of the cross marks).

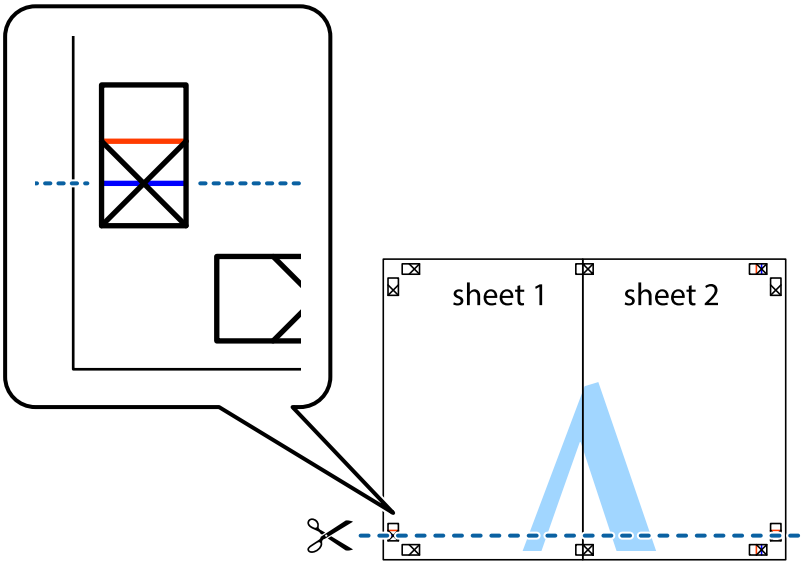

4. Tape the sheets together from the back.

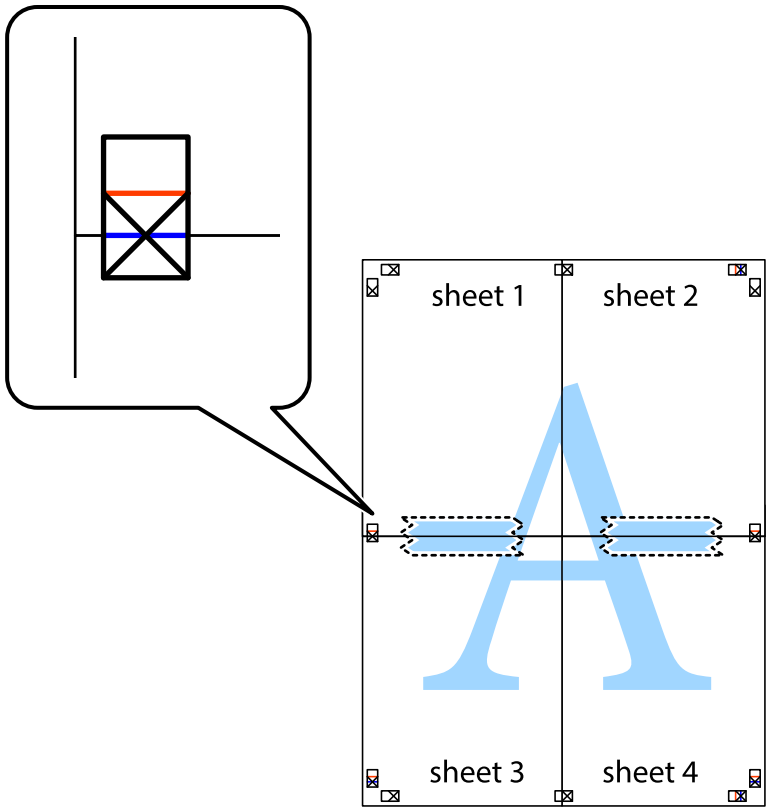

5. Repeat steps 1 to 4 to tape Sheet 3 and Sheet 4 together.

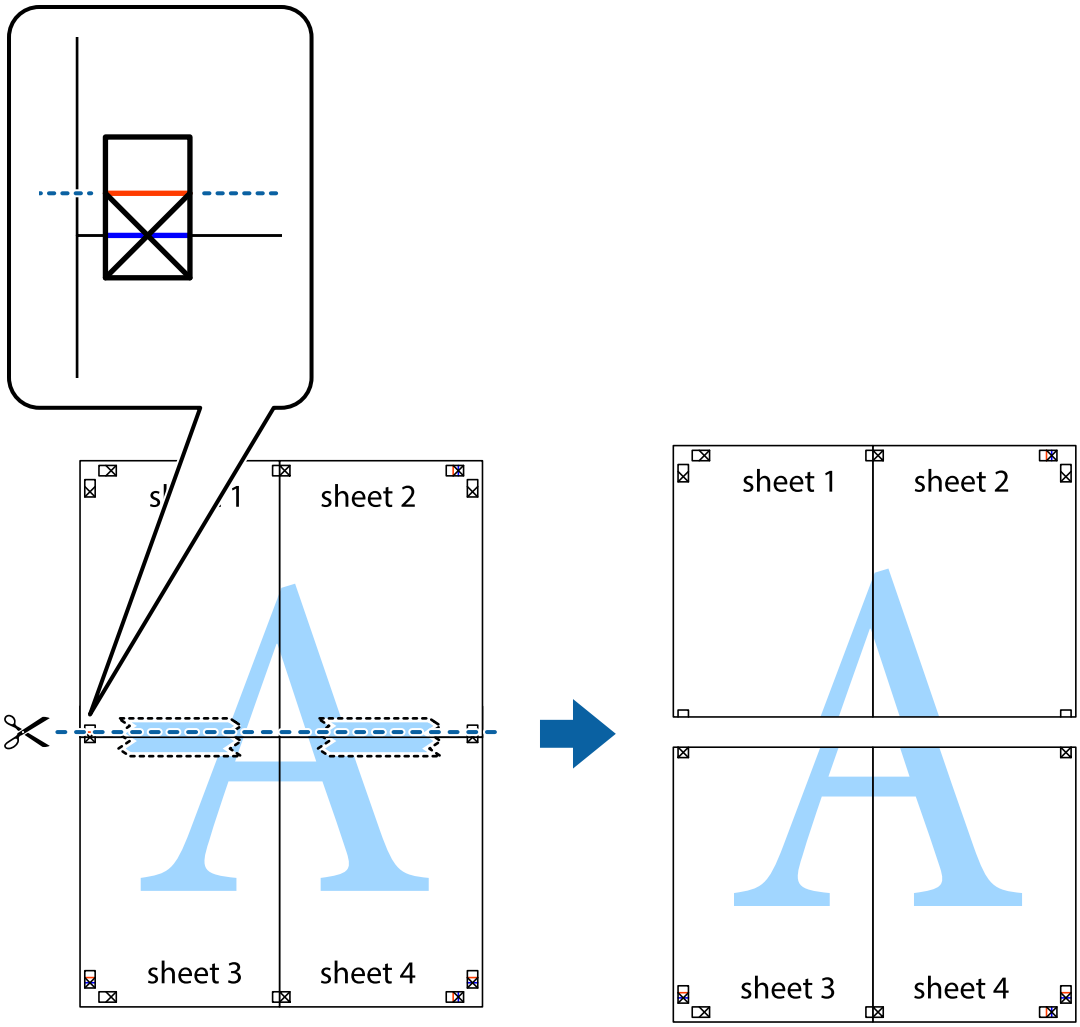

6. Cut off the margins of Sheet 1 and Sheet 2 along the horizontal blue line through the center of the left and right side cross marks.

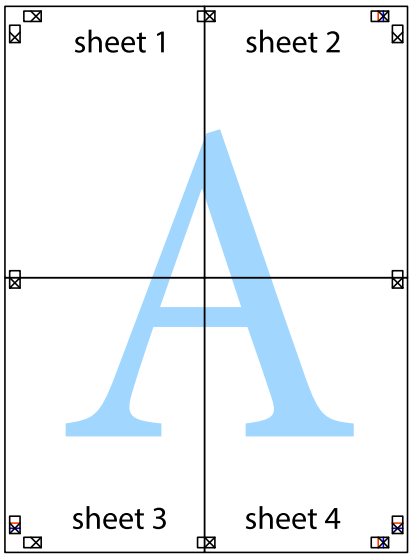

7. Place the edge of Sheet 1 and Sheet 2 on top of Sheet 3 and Sheet 4 and align the cross marks, and then temporarily tape them together from the back.

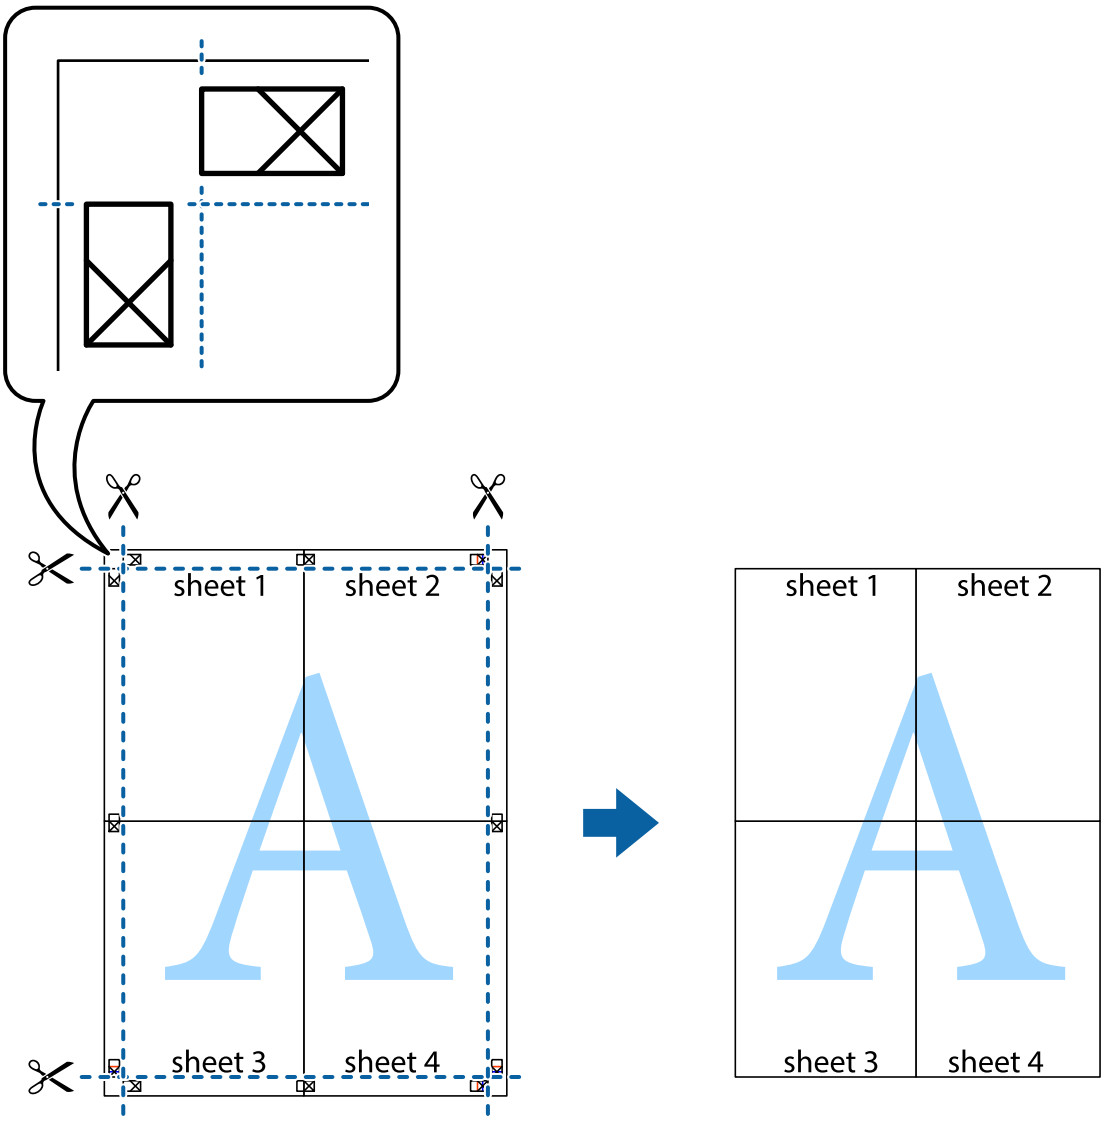

8. Cut the taped sheets in two along the horizontal red line through the alignment markers (this time, the line above the cross marks).

9. Tape the sheets together from the back.

10. Cut off the remaining margins along the outer guide.

Printing Using Advanced Features

This section introduces a variety of additional layout and printing features available on the printer driver.

Related Information

➡ "Windows Printer Driver" on page 142
➡ "Mac OS Printer Driver" on page 145

Adding a Printing Preset to Print Easily

If you create your own preset of frequently used print settings on the printer driver, you can print easily by selecting the preset from the list.

Windows

To add your own preset, set items such as the **Document Size** and **Paper Type** on the **Main** or **More Options** tab, and then click **Add/Remove Presets** in **Printing Presets**.

Note:
*To delete an added preset, click **Add/Remove Presets**, select the preset name you want to delete from the list, and then delete it.*

Mac OS

Access the print dialog. To add your own preset, set items such as the **Paper Size** and **Media Type**, and then save the current settings as the preset in the **Presets** setting.

Note:
*To delete an added preset, click **Presets** > **Show Presets**, select the preset name you want to delete from the list, and then delete it.*

Printing a Reduced or Enlarged Document

You can reduce or enlarge the size of a document by a specific percentage.

Windows

Note:
This feature is not available for borderless printing.

Set the **Document Size** on the **More Options** tab. Select **Reduce/Enlarge Document**, **Zoom to**, and then enter a percentage.

Mac OS

Note:
Operations differ depending on the application. See the application's help for details.

Select **Page Setup** (or **Print**) from the **File** menu. Select the printer from **Format For**, select the paper size, and then enter a percentage in **Scale**. Close the window, and then print following the basic printing instructions.

Adjusting the Print Color

You can adjust the colors used in the print job. These adjustments are not applied to the original data.

PhotoEnhance produces sharper images and more vivid colors by automatically adjusting the contrast, saturation, and brightness of the original image data.

Note:
***PhotoEnhance** adjusts the color by analyzing the location of the subject. Therefore, if you have changed the location of the subject by reducing, enlarging, cropping, or rotating the image, the color may change unexpectedly. Selecting the borderless setting also changes the location of the subject resulting in changes in color. If the image is out of focus, the tone may be unnatural. If the color is changed or becomes unnatural, print in a mode other than **PhotoEnhance**.*

Windows

Select the method of color correction from **Color Correction** on the **More Options** tab.

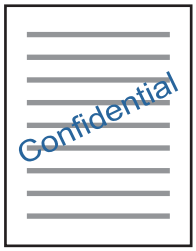

If you select **Automatic**, the colors are automatically adjusted to match the paper type and print quality settings. If you select **Custom** and click **Advanced**, you can make your own settings.

Mac OS

Access the print dialog. Select **Color Matching** from the pop-up menu, and then select **EPSON Color Controls**. Select **Color Options** from the pop-up menu, and then select one of the available options. Click the arrow next to **Advanced Settings** and make the appropriate settings.

Printing a Watermark (for Windows Only)

You can print a watermark such as "Confidential" on your printouts. You can also add your own watermark.

Note:
This feature is not available with borderless printing.

Click **Watermark Features** on the **More Options** tab, and then select a watermark. Click **Settings** to change details such as the density and position of the watermark.

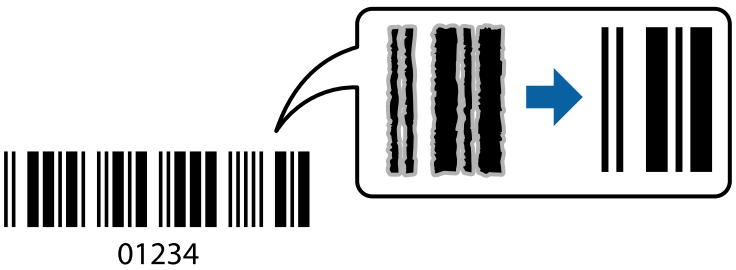

Printing a Header and Footer (for Windows Only)

You can print information such as a user name and printing date as headers or footers.

Click **Watermark Features** in the **More Options** tab, and then select **Header/Footer**. Click **Settings** and select necessary items from the drop-down list.

Printing Clear Bar Codes (for Windows Only)

You can print a bar code clearly and make it easy to scan. Only enable this feature if the bar code you printed cannot be scanned.

You can use this feature under the following conditions.

❏ Paper: Plain paper, Copy paper, Letterhead, or Envelope

❏ Quality: **Standard**

The print quality may be changed when printing. The print speed may become slower and print density may become higher.

Note:
Deblurring may not always be possible depending on the circumstances.

On the printer driver's **Maintenance** tab, click **Extended Settings**, and then select **Barcode mode**.

Printing from Smart Devices

Using Epson iPrint

Epson iPrint is an application that allows you to print photos, documents, and web pages from a smart device such as a smartphone or tablet. You can use local print, printing from a smart device that is connected to the same wireless network as your printer, or remote print, printing from a remote location over the Internet. To use remote print, register your printer in the Epson Connect service.

If you start Epson iPrint when the printer is not connected to the network, a message is displayed instructing you to connect to the printer. Follow the instructions to complete the connection. See the URL below for the operating conditions.

http://epson.sn

Related Information

➡ "Epson Connect Service" on page 140

Installing Epson iPrint

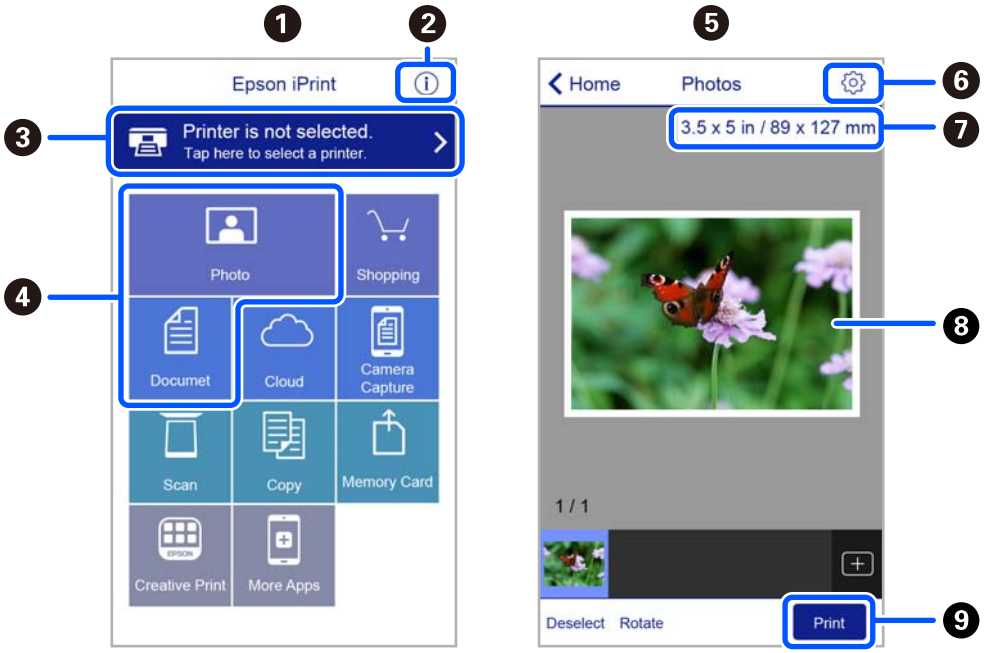

You can install Epson iPrint on your smart device from the following URL or QR code.

http://ipr.to/a

Printing Using Epson iPrint

Start Epson iPrint from your smart device and select the item you want to use from the home screen.

The following screens are subject to change without notice. The contents may vary depending on the product.

❶	Home screen displayed when the application is started.
❷	Displays information on how to setup the printer and a FAQ.
❸	Displays the screen where you can select the printer and make printer settings. Once you have selected the printer, you do not need to select it again from the next time.
❹	Select what you want to print such as photos and documents.
❺	The print photos screen displayed when the photo menu is selected.
❻	Displays the screen to make print settings such as paper size and paper type.
❼	Displays the paper size. When this is displayed as a button, tap it to display the paper settings currently set on the printer.
❽	Displays photos and documents you selected.
❾	Starts printing.

Note:
To print from the document menu using iPhone, iPad, and iPod touch running iOS, start Epson iPrint after transferring the document you want to print using the file sharing function in iTunes.

Using Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover an Epson printer that is connected to the same wireless network.

Note:
Operations may differ depending on the device.

1. Load paper in the printer.
2. Set up your printer for wireless printing.
3. On your Android device, install the Epson Print Enabler plug-in from Google Play.
4. Connect your Android device to the same wireless network as your printer.
5. Go to **Settings** on your Android device, select **Connected devices** > **Printing**, and then enable Epson Print Enabler.
6. From an Android application such as Chrome, tap the menu icon and print whatever is on the screen.

   Note:
   *If you do not see your printer, tap **All Printers** and select your printer.*

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, iPod touch, and Mac without the need to install drivers or download software.

Note:
If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

1. Load paper in your product.
2. Set up your product for wireless printing. See the link below.

   http://epson.sn
3. Connect your Apple device to the same wireless network that your product is using.
4. Print from your device to your product.

   Note:
   For details, see the AirPrint page on the Apple website.

Canceling Printing

Note:

- ❏ *In Windows, you cannot cancel a print job from the computer once it has been completely sent to the printer. In this case, cancel the print job by using the printer's control panel.*
- ❏ *When printing several pages from Mac OS, you cannot cancel all of the jobs by using the control panel. In this case, cancel the print job from the computer.*
- ❏ *If you have sent a print job from Mac OS X v10.6.8 through the network, you may not be able to cancel printing from the computer. In this case, cancel the print job by using the printer's control panel.*

Canceling Printing - Control Panel

Press the ⊘ button on the printer's control panel to cancel the print job in progress.

Canceling Printing - Windows

1. Access the printer driver window.
2. Select the **Maintenance** tab.
3. Click **Print Queue**.
4. Right-click on the job you want to cancel and then select **Cancel**.

Related Information

➡ "Windows Printer Driver" on page 142

Canceling Printing - Mac OS

1. Click the printer icon in the **Dock**.
2. Select the job you want to cancel.
3. Cancel the job.
   - ❏ OS X Mountain Lion or later

     Click ⊗ next to the progress meter.
   - ❏ Mac OS X v10.6.8 to v10.7.x

     Click **Delete**.

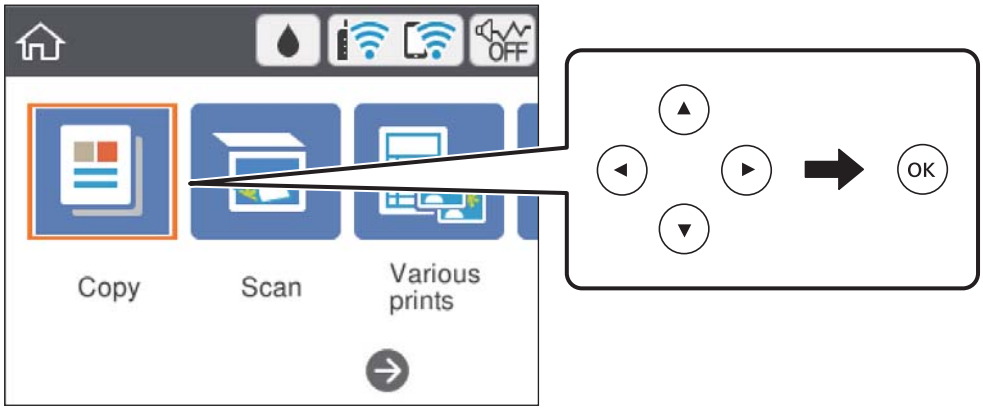

Copying

Copying Basics

This section explains the steps for copying from the **Copy** menu on the control panel.

1. Load paper in the printer.
2. Place the originals.
3. Select **Copy** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

4. Make the settings on the **Copy** tab.
   - ❏ B&W/Color: Select color copy or monochrome copy.
   - ❏ (2-Sided Copying): When making 2-sided copies, select the item, select **1→2-Sided**, and then make settings for **Original Orientation** and **Binding Margin**. Select **Done** to confirm.
   - ❏ (Density): Select the item to make settings for copy density. Press the + button to increase the density, and press the - button to decrease the density. Select **Done** to confirm.
5. Select the **Advanced Settings** tab, and then change the settings as necessary.
6. Select the **Copy** tab, and then set the number of copies.
7. Press the ⊙ button.

   Note:
   The color, size, and border of the copied image are slightly different from the original.

Related Information

➡ "Loading Paper" on page 54
➡ "Placing Originals" on page 61

➡ "Menu Options for Copying" on page 94

Various Copying Methods

Copying in Various Layout

You can copy easily by selecting a menu for your purpose such as copying both sides of an ID card onto one side of A4 size paper, or copying two facing pages of a book onto a single sheet of paper.

1. Load paper in the printer.
2. Select **Various prints** on the control panel.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.
3. Select **Various copies**, and then select a copy menu.

   ❏ ID Card

   Scans both sides of an ID card and copies onto one side of A4 size paper.

   ❏ Book Copy

   Copies two A4 facing pages of a book and so on onto a single sheet of paper.

   ❏ Borderless Copy

   Copies without margins around the edges. The image is enlarged a little to remove margins from the edges of the paper.
4. Place the originals.

   For **Book Copy**, place the first page of the originals following the instructions displayed on the screen, and then press the OK button.
5. Make the settings on the **Copy** tab.

   Available items vary depending on the copy menu.
6. Make the settings for each item on the **Advanced Settings** tab as necessary.
7. Select the **Copy** tab, and then set the number of copies.
8. Press the ⊙ button.
9. For **ID Card** or **Book Copy**, follow the on-screen instructions to place the rest of the originals, and then select **Start Scanning**.

Copying Photos

You can copy multiple photos at the same time. You can also restore the colors in faded photos.

The smallest size of original you can copy is 30×40 mm.

Note:
White space around the photo may not be detected.

1. Load paper in the printer.
2. Select **Various prints** on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
3. Select **Various copies** > **Copy/Restore Photos**.
4. Change the print settings as necessary, and then press the ▶ button.
5. Place the photos on the scanner glass, and then select **Start Scanning**.

   The photos are scanned and displayed on the screen.
6. Press the ↻ button if necessary to make settings such as photo adjustments.

   Note:
   *If you want to print by enlarging part of a photo, select **Crop/Zoom**, and then make settings. Slide the print area frame using the ▲ ▼ ◀ ▶ buttons, and then change the frame size using the + or - button.*
7. Set the number of copies as necessary, and then press the ⊙ button.

Menu Options for Paper and Print Settings for Copying Photos

Restore Color

Restores the color of faded photos.

Paper Setting

Set the size and type of the paper you loaded in the printer.

Border Setting

- ❏ Borderless

  Copies without margins around the edges. The image is enlarged a little to remove margins from the edges of the paper. Select how much to enlarge in the Expansion setting.
- ❏ With Border

  Copies with margins around the edges.

Clear All Settings:

Resets the copy settings to their defaults.

Menu Options for Copying

Available items on the **Copy** tab and **Advanced Settings** tab vary depending on the menu you selected.

B&W

Copies the original in black and white (monochrome).

Color

Copies the original in color.

(2-Sided)

❏ 1→1-Sided

Copies one side of an original onto a single side of paper.

❏ 1→2-Sided

Copies two single-sided originals onto both sides of a single sheet of paper. Select the orientation of your original and the binding position of the paper.

(Density)

Increase the level of density by using + when the copying results are faint. Decrease the level of density by using - when ink smears.

Reduce/Enlarge

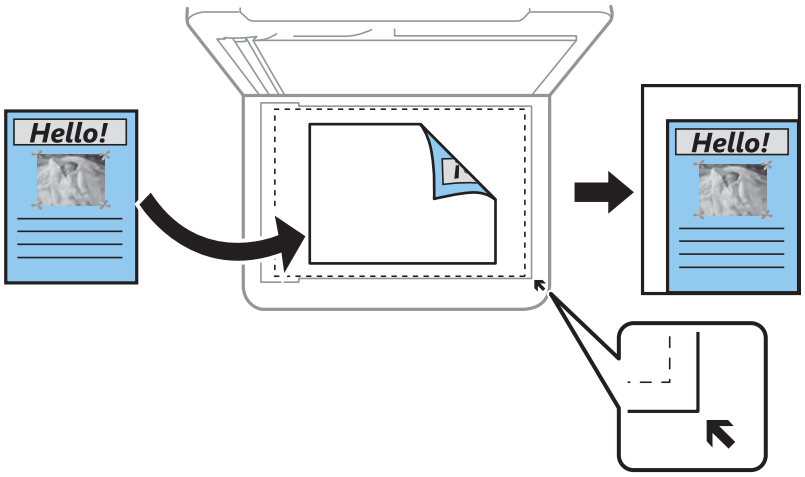

Enlarges or reduces the originals. Select the value and specify the magnification used to enlarge or reduce the original within a range of 25 to 400%.

❏ Actual Size

Copies at 100 % magnification.

❏ Auto Fit Page

Detects the scan area and automatically enlarges or reduces the original to fit to the paper size you selected. When there are white margins around the original, the white margins from the corner mark of the scanner glass are detected as the scan area, but the margins at the opposite side may be cropped.

❏ 10x15cm→A4, A4→10x15cm, and so on

Automatically enlarges or reduces the original to fit to a specific paper size.

Paper Setting

Set the size and type of the paper you loaded in the printer.

Multi-Page

❏ Single Page

Copies a single-sided original onto a single sheet.

❏ 2-up

Copies two single-sided originals onto a single sheet in 2-up layout. You can select the orientation and the size of your original. Check the image on the right side to select Original Orientation.

Quality

Select the quality for copying. Selecting **Best** provides higher quality printing, but the printing speed may be slower.

Clear All Settings

Resets the copy settings to their defaults.

Scanning

Scanning Using the Control Panel

Scanning to a Computer

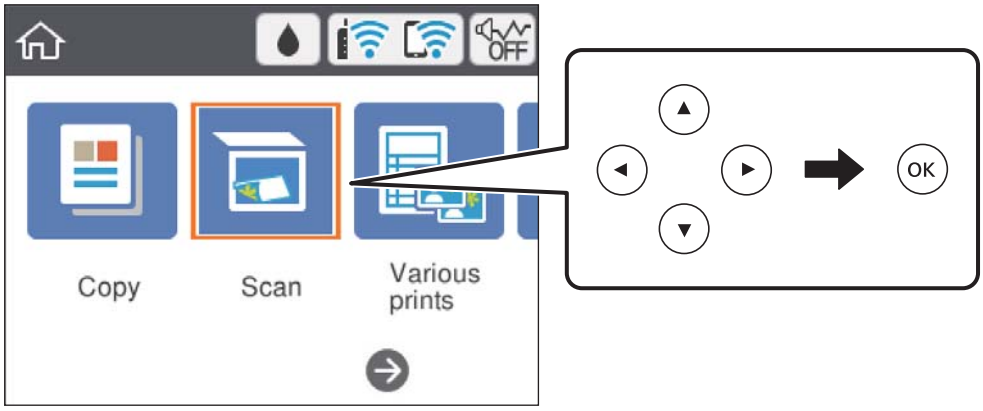

> ***Important:***
> *Before scanning, install Epson Scan 2 and Epson Event Manager on your computer.*

Note:
You cannot save multiple originals as one PDF file when scanning from the control panel. By using Epson Scan 2 and setting ***Add or edit pages after scanning*** *on the* ***Document Mode****, you can scan additional originals after you scanned the original, and then save as one file.*

1. Place the originals.

2. Select **Scan** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

3. Select **Computer**.

4. Select the computer to which you want to save the scanned images.

   ❏ If the **Select Computer** screen is displayed, select the computer from the screen.

   ❏ If the **Scan to Computer** screen is displayed and the computer is already selected, make sure the selected computer is correct. If not, select to reselect the computer.

   Note:
   ❏ *When the printer is connected to a network, you can select the computer to which you want to save the scanned image. You can display up to 20 computers on the printer's control panel. If you set* ***Network Scan Name (Alphanumeric)*** *on Epson Event Manager, it is displayed on the control panel.*

5. Select to select how to save the scanned image to a computer.
   - ❏ Save as JPEG: Saves the scanned image in JPEG format.
   - ❏ Save as PDF: Saves the scanned image in PDF format.
   - ❏ Attach to e-mail: Starts the email client on your computer, and then automatically attaches it to an email.
   - ❏ Follow custom setting: Saves the scanned image using the settings on the Epson Event Manager. You can change the scan settings such as the scanning size, folder to save to, or save format.

6. Press the ⓘ button.

   Note:
   The color, size, and border of the scanned image will not be exactly the same as the original.

Related Information

Making Custom Settings in Epson Event Manager

You can set the scan settings for **Follow custom setting** in Epson Event Manager.

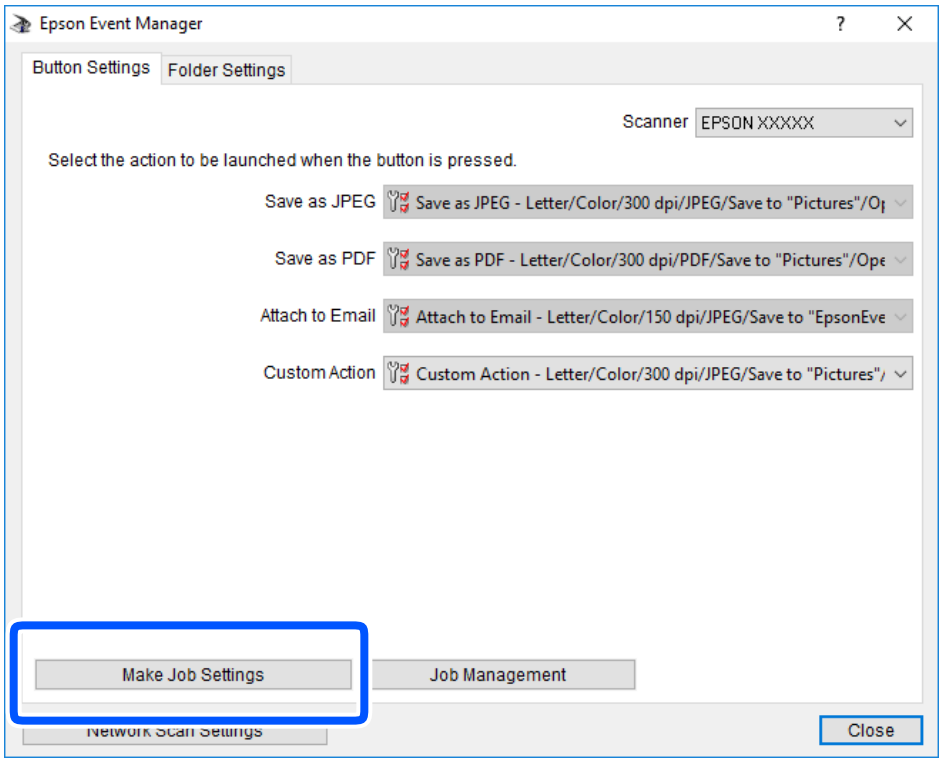

See the Epson Event Manager help for details.

1. Start Epson Event Manager.

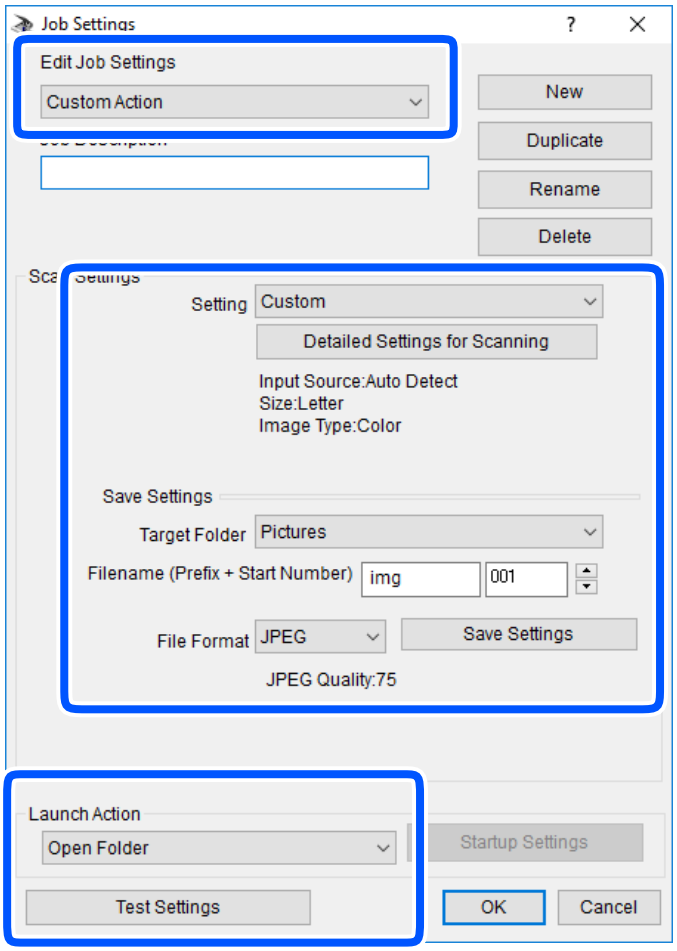

2. Make sure that your scanner is selected as the **Scanner** on the **Button Settings** tab on the main screen.

3. Click **Make Job Settings**.

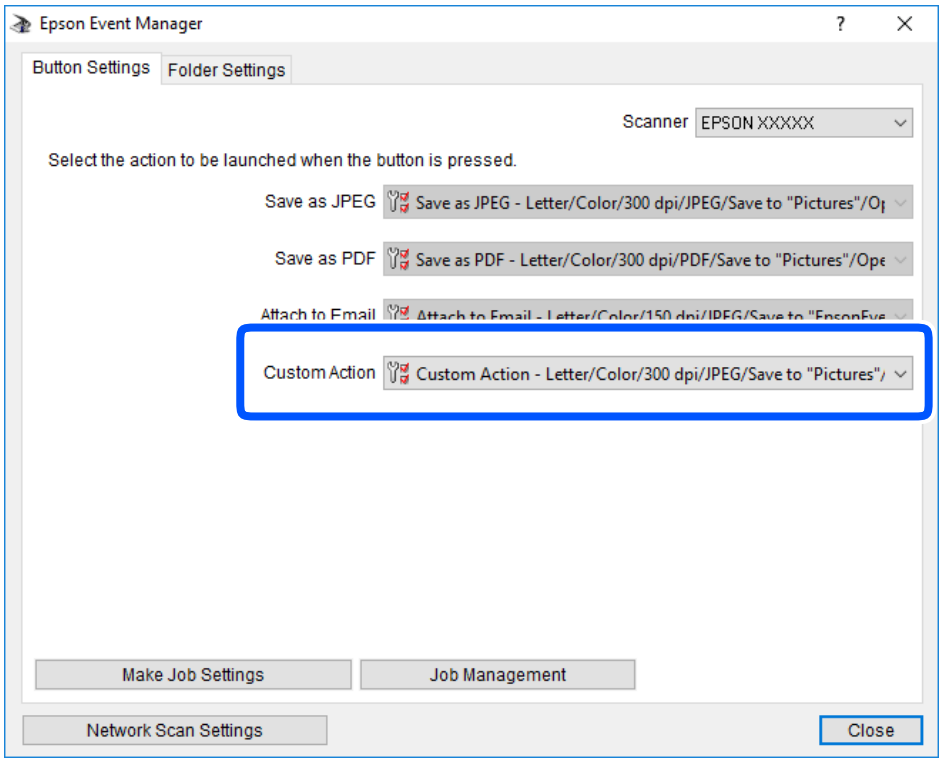

4. Make scan settings on the **Job Settings** screen.

- ❏ Edit Job Settings: Select **Custom Action**.
- ❏ Setting: Scan using the best settings for the selected type of original. Click **Detailed Settings for Scanning** to set the items such as the resolution or the color for saving the scanned image.
- ❏ Target Folder: Select the save folder for the scanned image.
- ❏ Filename (Prefix + Start Number): Change the settings for the file name you want to save.
- ❏ File Format: Select the save format.
- ❏ Launch Action: Select the action when scanning.
- ❏ Test Settings: Starts test scanning using current settings.

5. Click **OK** to return to the main screen.

6. Make sure that the **Custom Action** is selected on the **Custom Action** list.

7. Click **Close** to close Epson Event Manager.

Scanning to the Cloud

You can send scanned images to cloud services. Before using this feature, make settings using Epson Connect. See the following Epson Connect portal website for details.

https://www.epsonconnect.com/

http://www.epsonconnect.eu (Europe only)

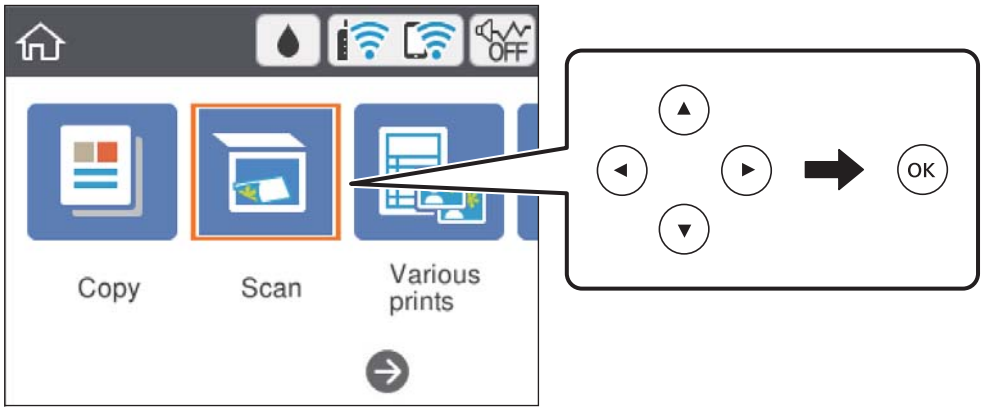

Note:
You cannot save multiple originals as one PDF file when scanning from the control panel. By using Epson Scan 2 and setting ***Add or edit pages after scanning*** *on the* ***Document Mode****, you can scan additional originals after you scanned the original, and then save as one file.*

1. Make sure that you have made settings using Epson Connect.

2. Place the originals.

3. Select **Scan** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

4. Select **Cloud**.

5. Select ⊕ on the top of the screen, and then select a destination.

6. Set items on **Scan** tab, such as the save format.

   ❏ B&W/Color: Select whether to scan in color or in monochrome.

   ❏ JPEG/PDF: Select the format in which to save the scanned image.

7. Select **Advanced Settings** tab, and then check settings, and change them if necessary.

8. Select **Scan** tab, and then press the ◇ button.

   Note:
   The color, size, and border of the scanned image will not be exactly the same as the original.

Related Information

➡ "Placing Originals" on page 61

Resets the scan settings to their defaults.

Scanning Using WSD

Note:

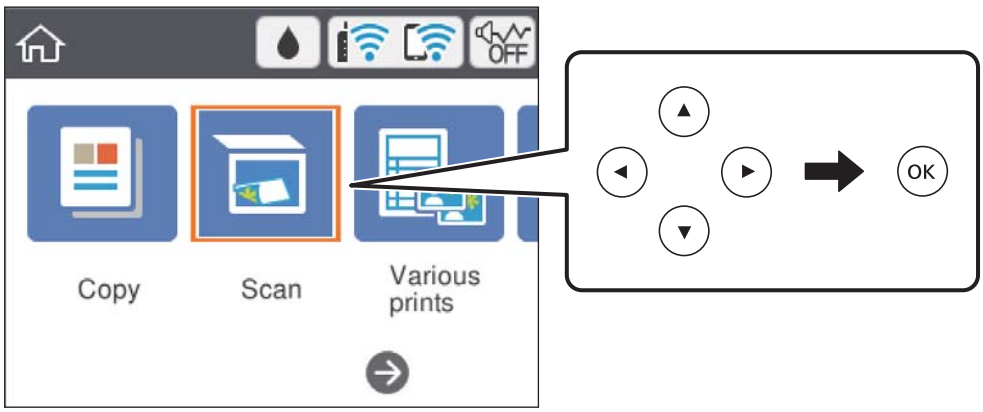

❏ *This feature is only available for computers running Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista.*

❏ *If you are using Windows 7/Windows Vista, you need to setup your computer in advance using this feature.*

1. Place the originals.

2. Select **Scan** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

3. Select **WSD**.

4. Select a computer.

5. Press the ⓘ button.

   Note:
   The color, size, and border of the scanned image will not be exactly the same as the original.

Related Information

➡ "Placing Originals" on page 61

Setting Up a WSD Port

This section explains how to set up a WSD port for Windows 7/Windows Vista.

Note:
For Windows 10/Windows 8.1/Windows 8, the WSD port is set up automatically.

The following is necessary to set up a WSD port.

❏ The printer and the computer are connected to the network.

❏ The printer driver is installed on the computer.

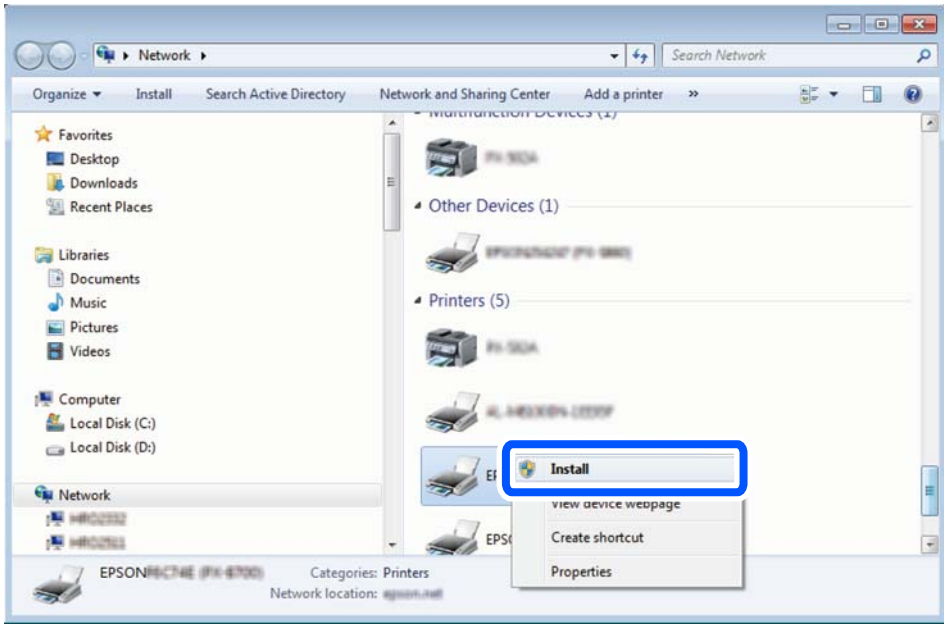

1. Turn the printer on.

2. Click start, and then click **Network** on the computer.

3. Right-click the printer, and then click **Install**.

   Click **Continue** when the **User Account Control** screen is displayed.

   Click **Uninstall** and start again if the **Uninstall** screen is displayed.

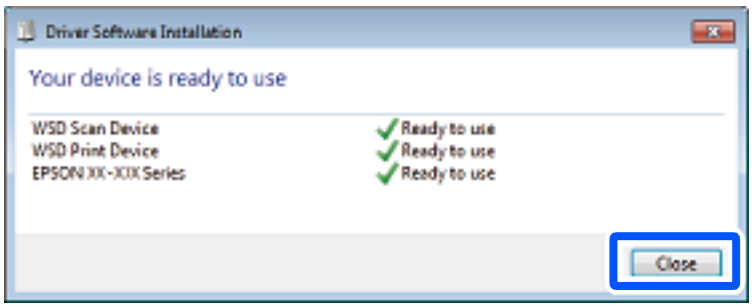

Note:
The printer name you set on the network and model name (EPSON XXXXXX (XX-XXXX)) are displayed on the network screen. You can check the printer's name set on the network from the printer's control panel or by printing a network status sheet.

4. Click **Your device is ready to use**.

5. Check the message, and then click **Close**.

6. Open the **Devices and Printers** screen.

   ❏ Windows 7

   Click start > **Control Panel** > **Hardware and Sound** (or **Hardware**) > **Devices and Printers**.

   ❏ Windows Vista

   Click start > **Control Panel** > **Hardware and Sound** > **Printers**.

7. Check that an icon with the printer's name on the network is displayed.

   Select the printer name when using with WSD.

Scanning from a Computer

Scanning Using Epson Scan 2

You can scan by using the scanner driver "Epson Scan 2". See the Epson Scan 2 help for an explanation of each setting item.

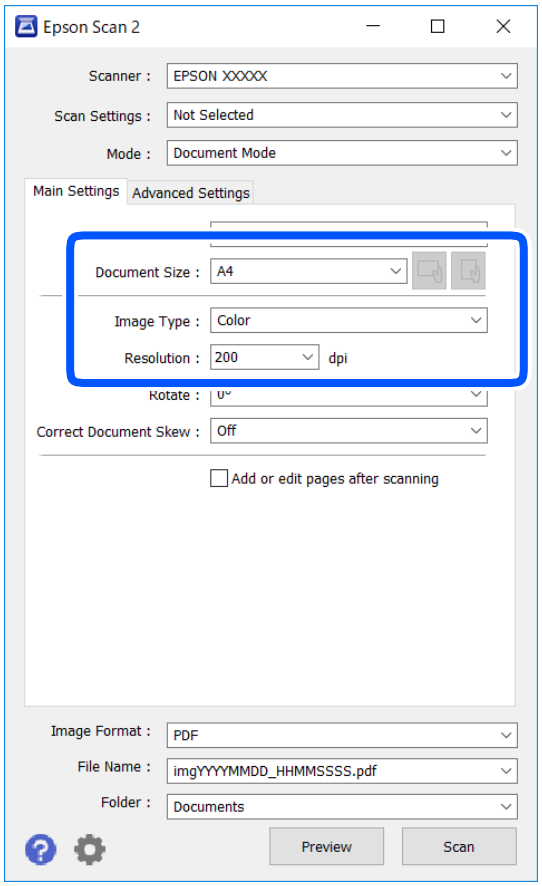

Related Information

➡ "Application for Scanning Documents and Images (Epson Scan 2)" on page 148

Scanning Documents (Document Mode)

Using **Document Mode** in Epson Scan 2, you can scan originals using detailed settings that are suitable for text documents.

1. Place the originals.
2. Start Epson Scan 2.
3. Select **Document Mode** from the **Mode** list.
4. Make the following settings on the **Main Settings** tab.

❏ Document Size: Select the size of the original you placed.

❏ / (Original orientation) buttons: Select the set orientation of the original you placed. Depending on the size of the original, this item may be set automatically and cannot be changed.

❏ Image Type: Select the color for saving the scanned image.

❏ Resolution: Select the resolution.

Note:

❏ *The **Document Source** setting is fixed as **Scanner Glass**. You cannot change this setting.*

❏ *If you set **Add or edit pages after scanning**, you can scan additional originals after scanning the original. In addition, if you set the **Image Format** as PDF or Multi-TIFF, you can save the scanned images as one file.*

5. Make other scan settings if necessary.

   ❏ You can preview the scanned image by clicking the **Preview** button. The preview window opens, and the previewed image is displayed.

   ❏ On the **Advanced Settings** tab, you can make detailed image adjustment settings that are suitable for text documents, such as the following.

      ❏ Remove Background: Remove the background of the originals.

      ❏ Text Enhancement: You can make blurred letters in the original clear and sharp.

      ❏ Auto Area Segmentation: You can make letters clear and images smooth when performing black and white scanning for a document that contains images.

      ❏ Color Enhance: You can enhance the color specified for the scanned image, and then save it in grayscale or black and white.

      ❏ Brightness: You can adjust the brightness for the scanned image.

      ❏ Contrast: You can adjust the contrast for the scanned image.

      ❏ Gamma: You can adjust the gamma (brightness of the intermediate range) for the scanned image.

      ❏ Threshold: You can adjust the border for monochrome binary (black and white).

      ❏ Unsharp Mask: You can enhance and sharpen the outlines of the image.

      ❏ Descreening: You can remove moiré patterns (web-like shadows) that appear when scanning printed papers such as a magazine.

      ❏ Edge Fill: You can remove the shadow created around the scanned image.

      ❏ Dual Image Output (Windows Only): You can scan once and save two images with different output settings at the same time.

   Note:
   The items may not be available depending on other settings you made.

6. Set the file saving settings.

❏ Image Format: Select the save format from the list.

You can make detailed settings for each save format except BITMAP and PNG. Select **Options** from the list after selecting the save format.

❏ File Name: Confirm the save file name displayed.

You can change settings for the file name by selecting **Settings** from the list.

❏ Folder: Select the save folder for the scanned image from the list.

You can select another folder or create a new folder by selecting **Select** from the list.

7. Click **Scan**.

Related Information

➡ "Placing Originals" on page 61

Scanning Photos or Pictures (Photo Mode)

Using **Photo Mode** in Epson Scan 2, you can scan originals with wide variety of image adjustment features that are suitable for photos or pictures.

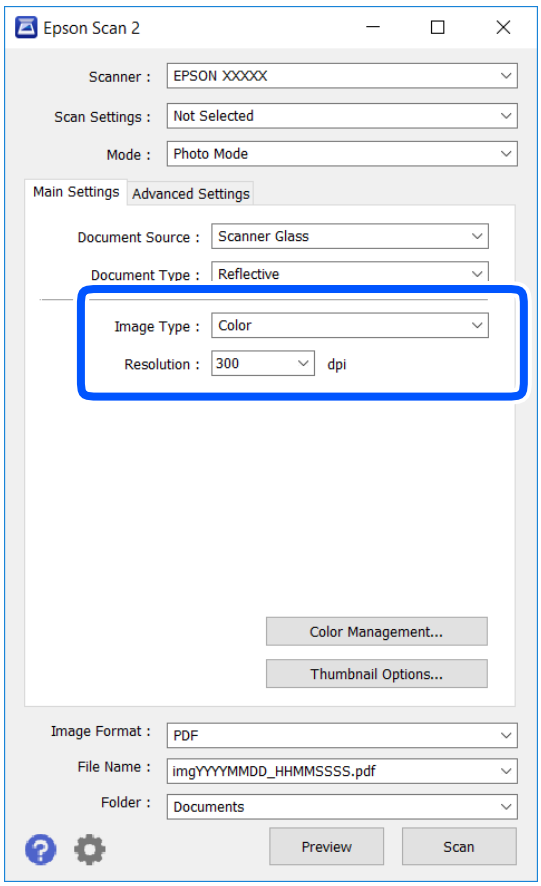

1. Place the originals.

   By placing multiple originals on the scanner glass, you can scan them all at the same time. Make sure there is a gap of at least 20 mm between the originals.

2. Start Epson Scan 2.

3. Select **Photo Mode** from the **Mode** list.

4. Make the following settings on the **Main Settings** tab.

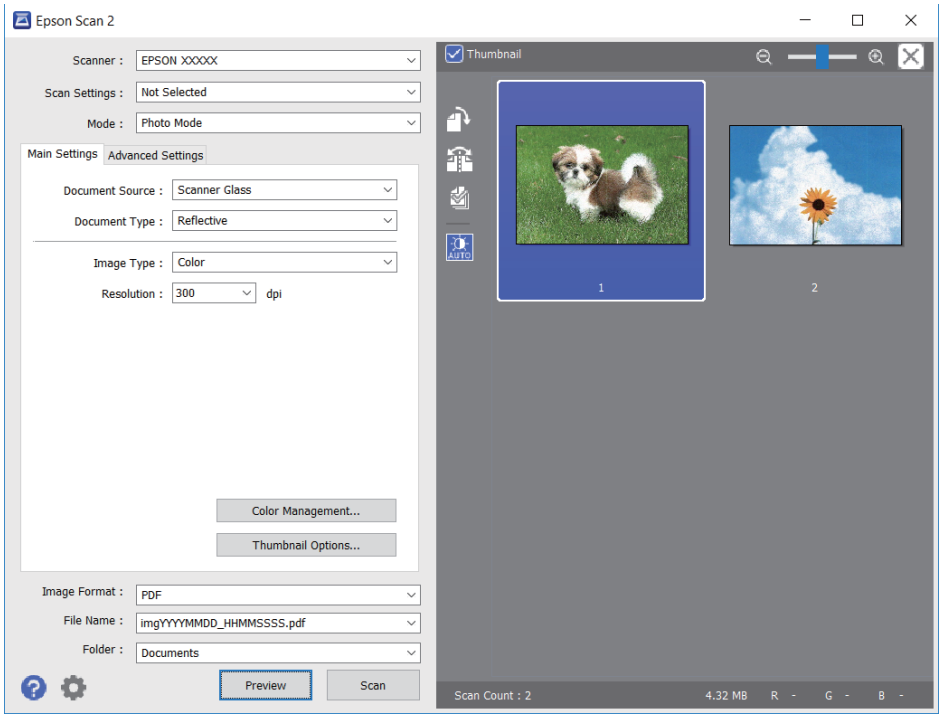

❏ Image Type: Select the color for saving the scanned image.

❏ Resolution: Select the resolution.

Note:
*The **Document Source** setting is fixed as **Scanner Glass**, and the **Document Type** setting is fixed as **Reflective**. (**Reflective** means originals which are not transparent, for example ordinary papers or photos.) You cannot change these settings.*

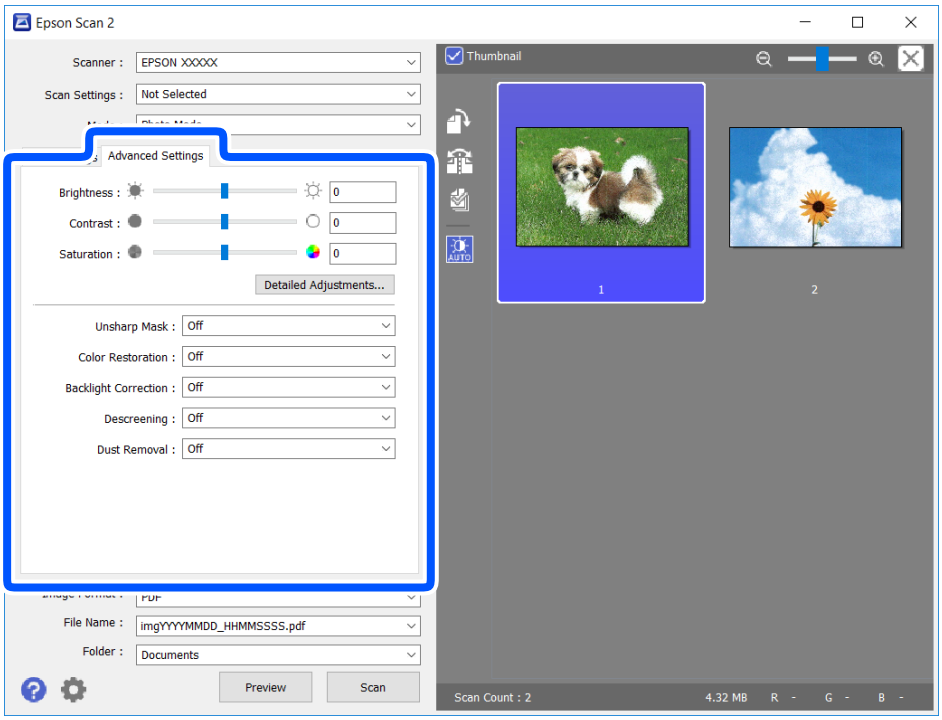

5. Click **Preview**.

   The preview window opens, and the previewed images are displayed as thumbnails.

Note:
To preview the entire scanned area, clear the ***Thumbnail*** *check box at the top of the preview widow.*

6. Confirm the preview, and make image adjustment settings on the **Advanced Settings** tab if necessary.

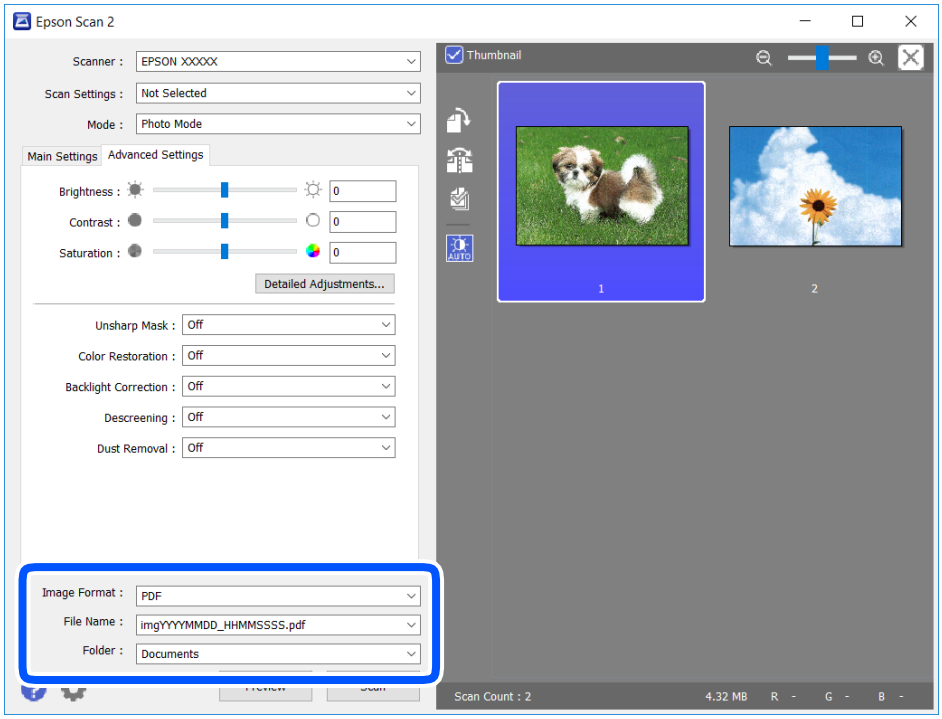

You can adjust the scanned image using detailed settings that are suitable for photos or pictures, such as the following.

- ❏ Brightness: You can adjust the brightness for the scanned image.
- ❏ Contrast: You can adjust the contrast for the scanned image.
- ❏ Saturation: You can adjust the saturation (color vividness) for the scanned image.
- ❏ Unsharp Mask: You can enhance and sharpen the outlines of the scanned image.
- ❏ Color Restoration: You can correct images that have faded to return them to their original colors.
- ❏ Backlight Correction: You can lighten scanned images that are dark due to backlight.
- ❏ Descreening: You can remove moiré patterns (web-like shadows) that appear when scanning printed papers such as a magazine.
- ❏ Dust Removal: You can remove dust on the scanned image.

Note:

- ❏ *The items may not be available depending on other settings you made.*
- ❏ *Depending on the original, the scanned image may not be adjusted correctly.*
- ❏ *When multiple thumbnails are created, you can adjust the image quality for each thumbnail. Depending on the adjustment items, you can adjust the quality of scanned images all together by selecting multiple thumbnails.*

7. Set the file saving settings.

- ❏ Image Format: Select the save format from the list.

  You can make detailed settings for each save format except BITMAP and PNG. Select **Options** from the list after selecting the save format.

- ❏ File Name: Confirm the save file name displayed.

  You can change settings for the file name by selecting **Settings** from the list.

❏ Folder: Select the save folder for the scanned image from the list.
You can select another folder or create a new folder by selecting **Select** from the list.

8. Click **Scan**.

Replacing Ink Cartridges and Other Consumables

Checking the Status of the Remaining Ink and the Maintenance Box

You can check the approximate ink levels and the approximate service life of the maintenance box from the control panel or the computer.

Note:
You can continue printing while the ink low message is displayed. Replace the ink cartridges when required.

Checking the Status of the Remaining Ink and the Maintenance Box - Control Panel

Select on the home screen.

Checking the Status of the Remaining Ink and the Maintenance Box - Windows

1. Access the printer driver window.
2. Click **EPSON Status Monitor 3** on the **Maintenance** tab.

   Note:
   *If **EPSON Status Monitor 3** is disabled, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*

Related Information

➡ "Windows Printer Driver" on page 142

Checking the Status of the Remaining Ink and the Maintenance Box - Mac OS X

1. Start the printer driver utility:

   ❏ Mac OS X v10.6.x to v10.9.x

   Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**) and then select the printer. Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

❏ Mac OS X v10.5.8

Select **System Preferences** from the menu > **Print & Fax**, and then select the printer. Click **Open Print Queue** > **Utility**.

2. Click **EPSON Status Monitor**.

Ink Cartridge Codes

The following are the codes for genuine Epson ink cartridges.

Note:

❏ *Ink cartridge codes may vary by location. For the correct codes in your area,contact Epson support.*

❏ *Although the ink cartridges may contain recycled materials, this does not affect printer function or performance.*

❏ *Specifications and appearance of the ink cartridge are subject to change without prior notice for improvement.*

For Europe

Icon	BK: Black	C: Cyan	M: Magenta	Y: Yellow
Starfish 	603 603XL*	603 603XL*	603 603XL*	603 603XL*

* "XL" indicates a large cartridge.

Note:

For users in Europe, visit the following website for information on Epson's ink cartridge yields.

http://www.epson.eu/pageyield

Epson recommends the use of genuine Epson ink cartridges. Epson cannot guarantee the quality or reliability of non-genuine ink. The use of non-genuine ink may cause damage that is not covered by Epson's warranties, and under certain circumstances, may cause erratic printer behavior. Information about non-genuine ink levels may not be displayed.

Ink Cartridge Handling Precautions

Read the following instructions before replacing ink cartridges.

Storing precautions for ink

❏ Keep the ink cartridges out of direct sunlight.

❏ Do not store the ink cartridges in high or freezing temperatures.

❏ For best results, Epson recommends using up ink cartridges before the best before date printed on the package, or within six months of opening the package, whichever is earlier.

❏ For best results, store ink cartridge packages with their bottom down.

❏ After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

❏ Do not open the ink cartridge package until you are ready to install it in the printer. The cartridge is vacuum packed to maintain its reliability. If you leave a cartridge unpacked for a long time before using it, normal printing may not be possible.

Handling precautions for replacing ink cartridges

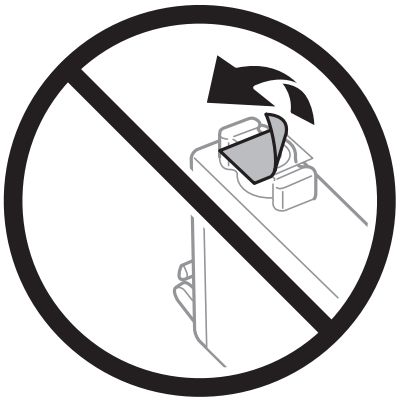

❏ Be careful not to break the hooks on the side of the ink cartridge when you remove it from the package.

❏ Do not shake cartridges after opening the package, as they may leak.

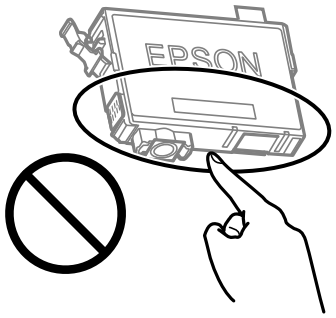

❏ You must remove the yellow tape from the cartridge before installing it; otherwise, print quality may decline or you may not be able to print. Do not remove or tear the label on the cartridge; this can cause leakage.

❏ Do not remove the transparent seal from the bottom of the cartridge; otherwise, the cartridge may become unusable.

❏ Do not touch the sections shown in the illustration. Doing so may prevent normal operation and printing.

❏ Install all ink cartridges; otherwise you cannot print.

❏ Do not replace ink cartridges with the power off. Do not move the print head by hand; otherwise, you may damage the printer.

❏ Do not turn off the printer during ink charging. If the ink charging is incomplete, you may not be able to print.

❏ Do not leave the printer with the ink cartridges removed or do not turn off the printer during cartridge replacement. Otherwise, ink remaining in the print head nozzles will dry out and you may not be able to print.

❏ If you need to remove an ink cartridge temporarily, make sure you protect the ink supply area from dirt and dust. Store the ink cartridge in the same environment as the printer, with the ink supply port facing down or sideways. Do not store ink cartridges with the ink supply port facing up. Because the ink supply port is equipped with a valve designed to contain the release of excess ink, there is no need to supply your own covers or plugs.

❏ Removed ink cartridges may have ink around the ink supply port, so be careful not to get any ink on the surrounding area when removing the cartridges.

❏ This printer uses ink cartridges equipped with a green chip that monitors information such as the amount of remaining ink for each cartridge. This means that even if the cartridge is removed from the printer before it is expended, you can still use the cartridge after reinserting it back into the printer. However, when reinserting a cartridge, some ink may be consumed to guarantee printer performance.

❏ For maximum ink efficiency, only remove an ink cartridge when you are ready to replace it. Ink cartridges with low ink status may not be used when reinserted.

❏ To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the cartridge when your printer indicates to replace the cartridge. The yields quoted for you do not include this reserve.

❏ Do not disassemble or remodel the ink cartridge, otherwise you may not be able to print normally.

❏ You cannot use the cartridges that came with the printer for the replacement.

Ink consumption

❏ To maintain optimum print head performance, some ink is consumed from all cartridges during maintenance operations. Ink may also be consumed when you replace ink cartridge or turn the printer on.

❏ When printing in monochrome or grayscale, color inks instead of black ink may be used depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

❏ The ink in the ink cartridges supplied with your printer is partly used during initial setup. In order to produce high quality printouts, the print head in your printer will be fully charged with ink. This one-off process consumes a quantity of ink and therefore these cartridges may print fewer pages compared to subsequent ink cartridges.

❏ Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature.

Replacing Ink Cartridges

> ⚠ ***Caution:***
>
> *Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.*

Note:

If you replace the ink cartridges while copying, the originals may move out of place. Press the ⊜ button to cancel and replace the originals.

1. Do one of the following.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

   ❏ When prompted to replace ink cartridges

   Check which ink cartridge needs to be replaced, and then press the OK button. Confirm the message, select **Yes, replace now** on the home screen.

   ❏ When replacing ink cartridges before they are expended

   Select **Maintenance** > **Ink Cartridge Replacement** on the home screen.

2. When replacing the black ink cartridge, gently shake the new black ink cartridge four or five times and then remove it from its package. When replacing other color cartridges, remove the new color cartridges from their package without shaking.

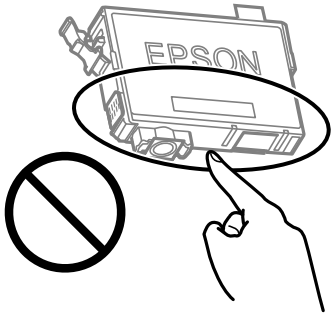

> ***Important:***
>
> *Do not shake cartridges after opening the package, as they may leak.*

3. Remove only the yellow tape.

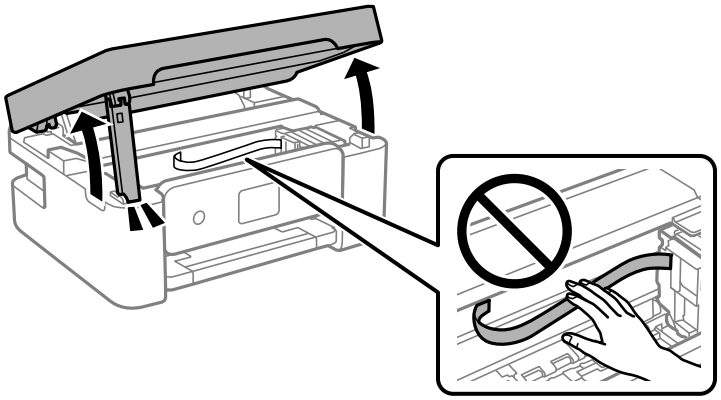

Important:

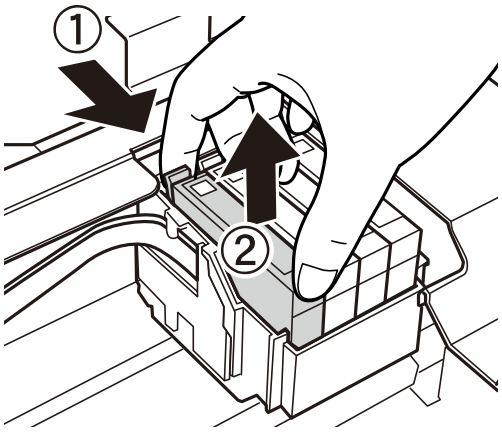

Do not touch the sections shown in the illustration. Doing so may prevent normal operation and printing.

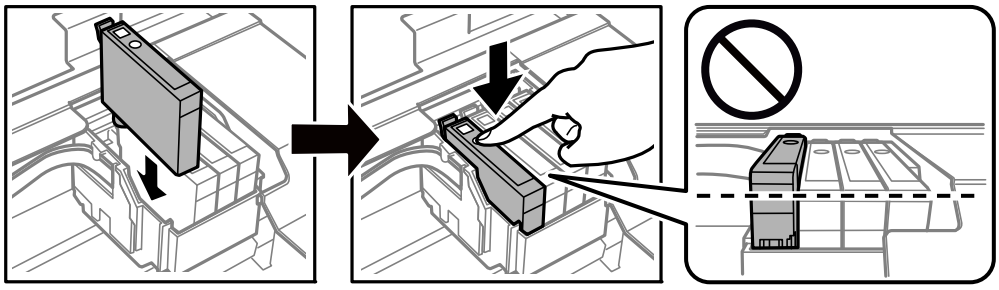

4. Open the scanner unit with the document cover closed.

5. Squeeze the tab on the ink cartridge and pull it straight up. If you cannot remove the ink cartridge, pull it firmly.

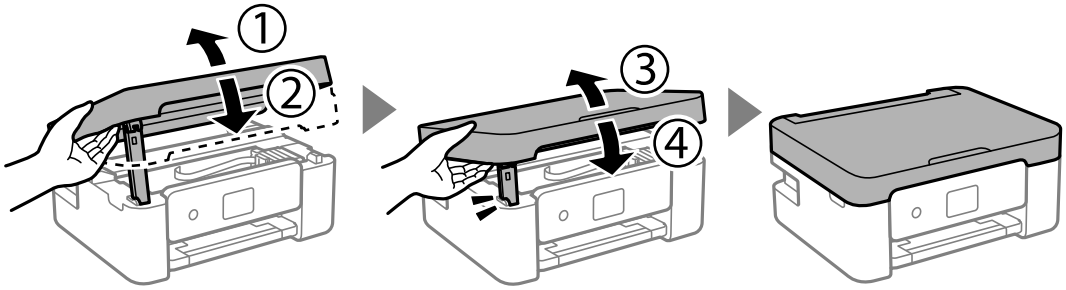

6. Insert the new ink cartridge, and then press it down firmly.

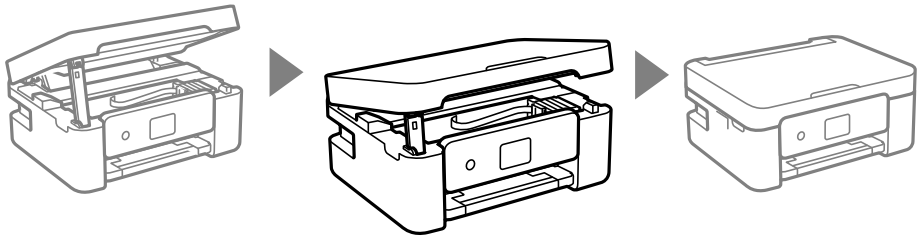

7. Close the scanner unit.

   For safety, the scanner unit is closed in two steps.

Note:
The scanner unit cannot be opened from the position shown below. Close it completely before opening it.

8. Press the ⓘ button.

   Ink charging starts.

> **Important:**
> *Do not turn off the printer during ink charging. If the ink charging is incomplete, you may not be able to print.*

Related Information

➡ "Ink Cartridge Codes" on page 114
➡ "Ink Cartridge Handling Precautions" on page 114

Maintenance Box Code

Epson recommends the use of a genuine Epson maintenance box.

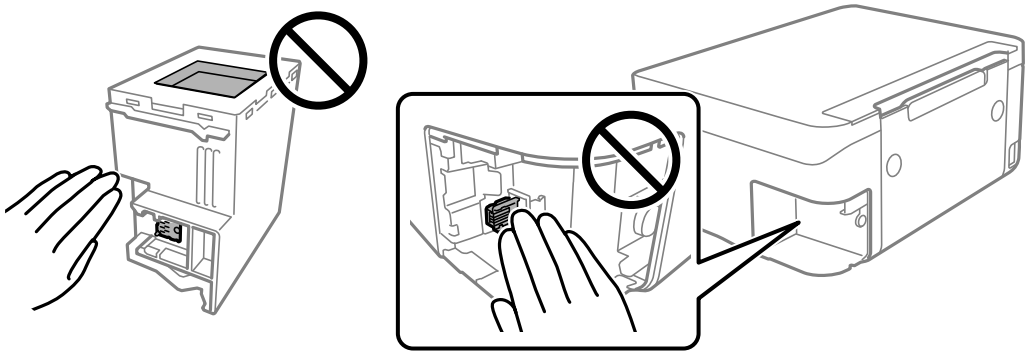

Maintenance box code: C9344

> **Important:**
> *Once a maintenance box has been installed in a printer it cannot be used with other printers.*

Maintenance Box Handling Precautions

Read the following instructions before replacing the maintenance box.

❏ Do not touch the sections shown in the illustration. Doing so may prevent normal operation and you may get smeared with ink.

❏ Do not drop the maintenance box or subject it to strong shocks.

❏ Do not replace the maintenance box during printing; otherwise, ink may leak.

❏ Do not remove the maintenance box and its cover except when replacing the maintenance box; otherwise ink may leak.

❏ When the cover cannot be reattached, the maintenance box may not be installed correctly. Remove the maintenance box, and re-install it.

❏ Do not tilt the used maintenance box until after it is sealed in the plastic bag; otherwise ink may leak.

❏ Do not touch the openings in the maintenance box as you may get smeared with ink.

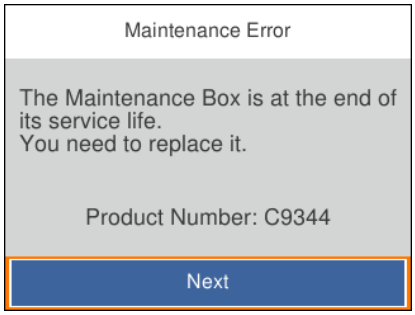

❏ Do not reuse a maintenance box which has been removed and left detached for a long period. Ink inside the box will have solidified and no more ink can be absorbed.

❏ Keep the maintenance box out of direct sunlight.

❏ Do not store the maintenance box in high or freezing temperatures.

Replacing a Maintenance Box

In some print cycles a very small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the printer is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material that you print and the number of cleaning cycles that the printer performs. Replace the maintenance box when you are promoted to do so. The Epson Status Monitor, your LCD, or lights on the control panel will advise you when this part needs replacing. The need for replacement of the box does not mean that your printer has ceased to operate in accordance with its specifications. The Epson warranty does not cover the cost of this replacement. It is a user-serviceable part.

Note:

❏ *When the maintenance box is full, you cannot print and clean the print head until it is replaced to avoid ink leakage. However, you can perform operations that do not use ink such as scanning.*

❏ *When the following screen is displayed, the part cannot be replaced by users. Contact Epson support.*

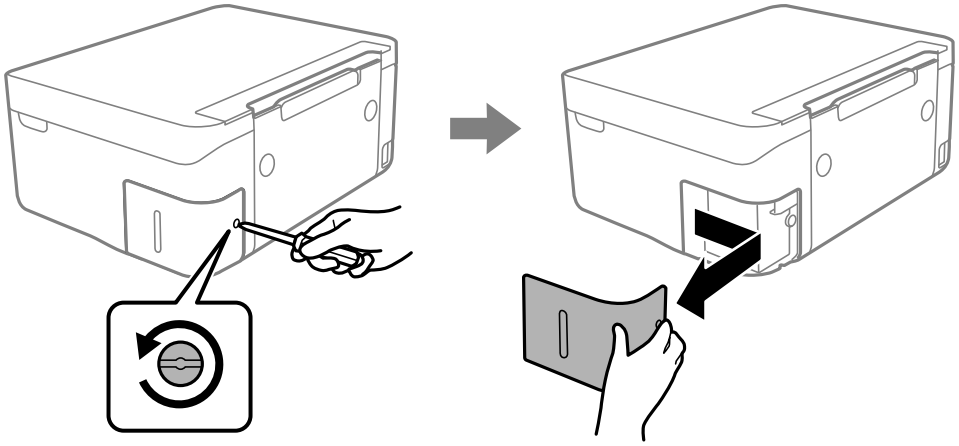

1. Remove the new maintenance box from its package.

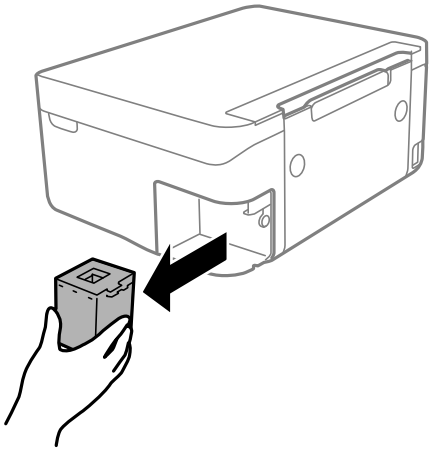

> ***Important:***
>
> *Do not touch the green chip on the side of the maintenance box. Doing so may prevent normal operation and printing.*

Note:
A transparent bag for the used maintenance box is provided with the new maintenance box.

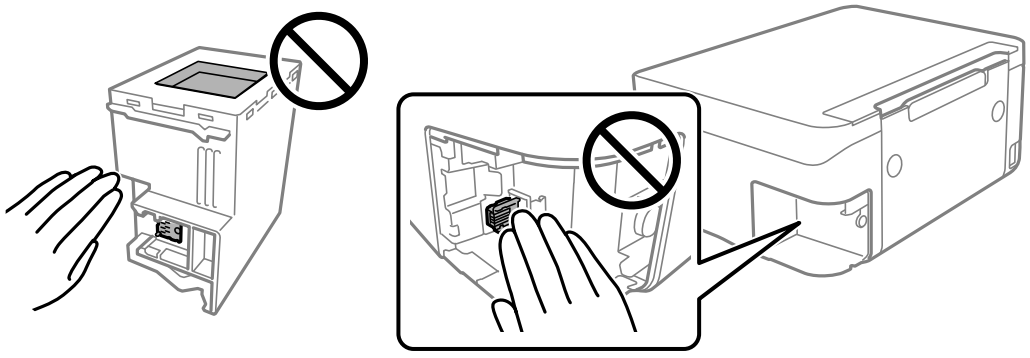

2. Loosen the screw with a flat-head screwdriver, and then remove the cover.

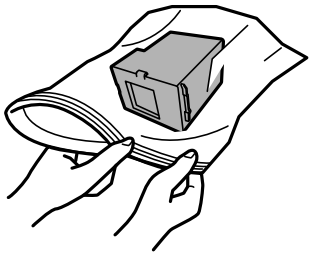

3. Remove the used maintenance box.

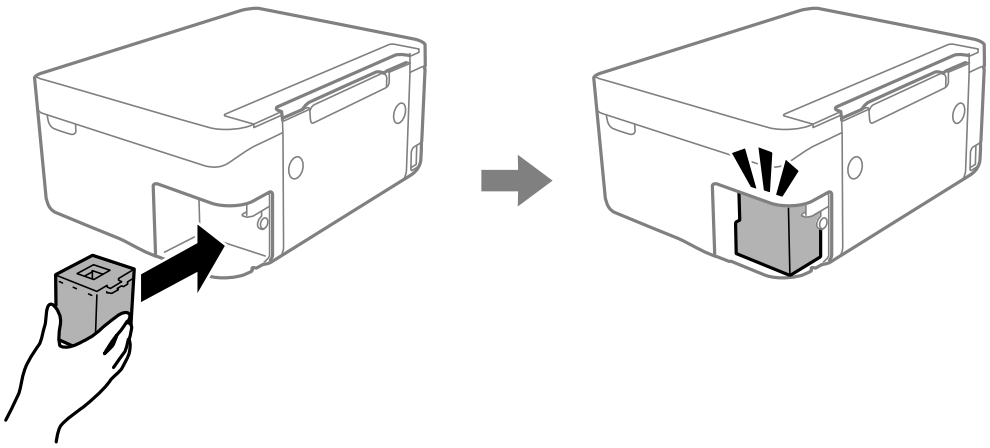

Important:
Do not touch the sections shown in the illustration. Doing so may prevent normal operation and you may get smeared with ink.

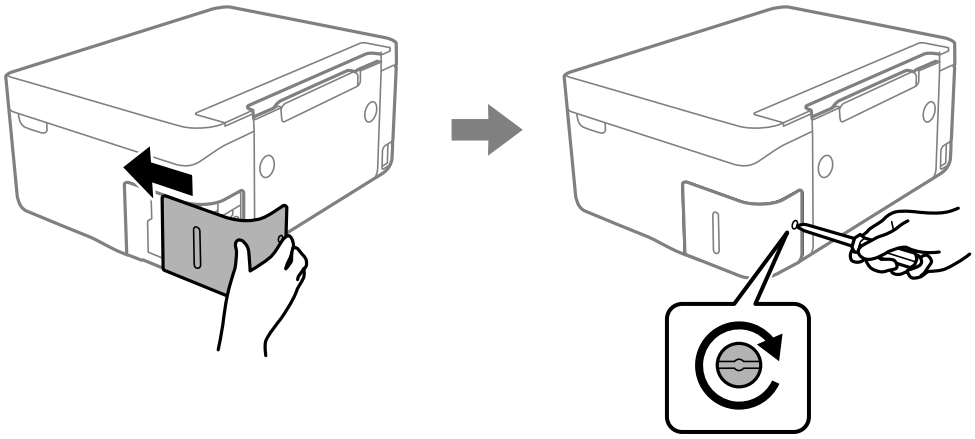

4. Put the used maintenance box in the transparent bag that came with the new maintenance box and seal the bag shut.

5. Insert the new maintenance box all the way into the printer. Make sure you insert the box in the correct direction.

6. Reattach the cover.

7. Check the message, and then press the OK button.

Temporarily Printing with Black Ink

When color ink is expended and black ink still remains, you can use the following settings to continue printing for a short time using only black ink.

- ❏ Type of paper: plain papers, Envelope
- ❏ Color: B&W or Grayscale
- ❏ Borderless: Not selected
- ❏ EPSON Status Monitor 3: Enabled (When printing from the printer driver on Windows.)

Because this feature is only available for approximately five days, replace the expended ink cartridge as soon as possible.

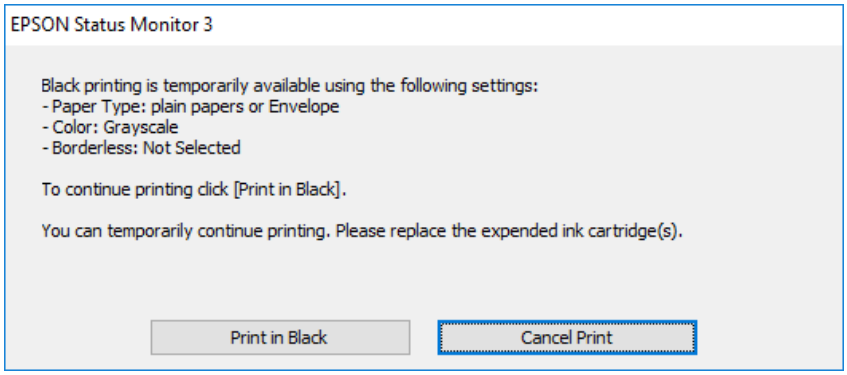

Note:

- ❏ *If **EPSON Status Monitor 3** is disabled, access the printer driver, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*
- ❏ *The available period varies depending on the usage conditions.*

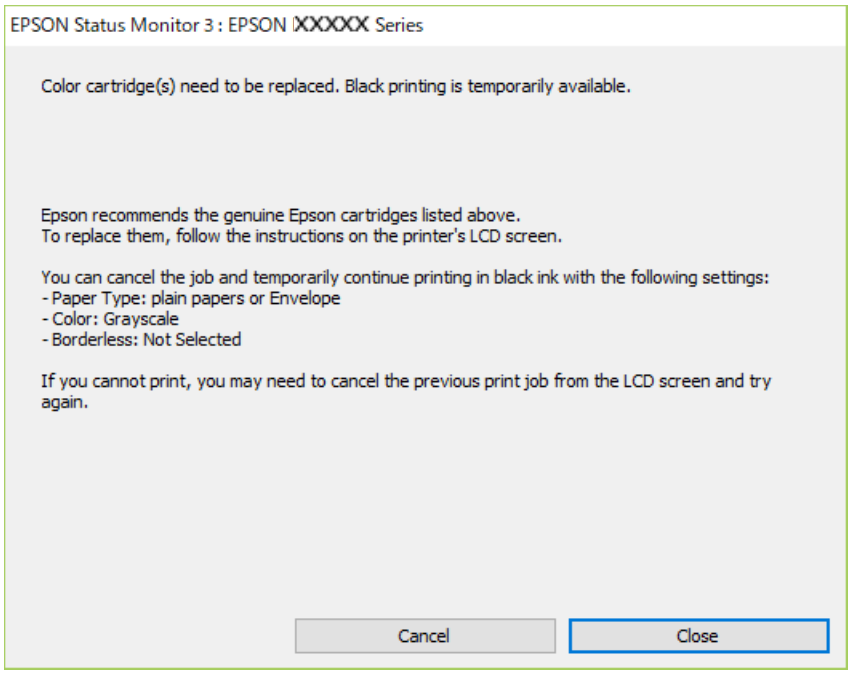

Temporarily Printing with Black Ink - Windows

Do one of the following.

- ❏ When the following window is displayed, select **Print in Black**.

❏ When the following window is displayed, cancel printing. And then, printing again.

Note:
If you cannot cancel printing from the computer, cancel using the printer's control panel.

Follow the steps below when printing again.

1. Access the printer driver window.
2. Clear **Borderless** on the **Main** tab.
3. Select **plain papers** or **Envelope** as the **Paper Type** setting on the **Main** tab.
4. Select **Grayscale**.
5. Set the other items on the **Main** and **More Options** tabs as necessary, and then click **OK**.
6. Click **Print**.
7. Click **Print in Black** in the window displayed.

Related Information

➡ "Canceling Printing - Windows" on page 90
➡ "Loading Paper in the Rear Paper Feed" on page 57
➡ "Printing Basics - Windows" on page 67

Temporarily Printing with Black Ink - Mac OS

Note:
*To use this feature through a network, connect with **Bonjour**.*

1. Click the printer icon in the **Dock**.
2. Cancel the job.

   Note:
   If you cannot cancel printing from the computer, cancel using the printer's control panel.
3. Select **System Preferences** from the  menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**).
4. Select **On** as the **Permit temporary black printing** setting.
5. Access the print dialog.
6. Select **Print Settings** from the pop-up menu.
7. Select any paper size except for a borderless size as the **Paper Size** setting.
8. Select **plain papers** or **Envelope** as the **Media Type** setting.
9. Select **Grayscale**.
10. Set the other items as necessary.
11. Click **Print**.

Conserving Black Ink when the Black Ink Is Low (for Windows Only)

When black ink is running low and there is enough color ink remaining, you can use a mixture of color inks to create black. You can continue printing while preparing a replacement black ink cartridge.

This feature is only available when you select the following settings in the printer driver.

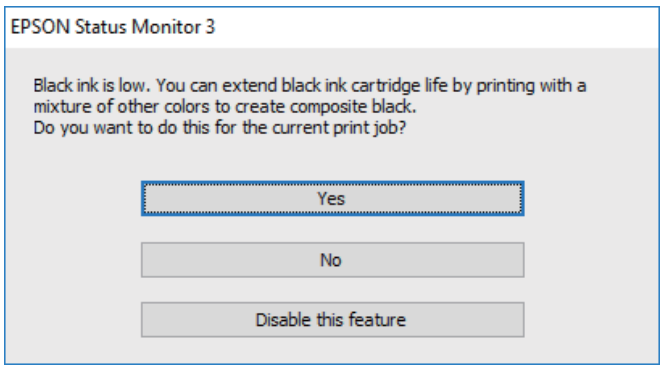

❏ Paper Type: **plain papers**

❏ Quality: **Standard**

❏ EPSON Status Monitor 3: Enabled

Note:

- ❏ *If **EPSON Status Monitor 3** is disabled, access the printer driver, click **Extended Settings** on the **Maintenance** tab, and then select **Enable EPSON Status Monitor 3**.*
- ❏ *Composite black looks slightly different from pure black. In addition, the print speed is reduced.*
- ❏ *To maintain the quality of the print head, black ink is also consumed.*

Options	Description
Yes	Select to use a mixture of color inks to create black. This window is displayed the next time you print a similar job.
No	Select to continue using the remaining black ink. This window is displayed the next time you print a similar job.
Disable this feature	Select to continue using the remaining black ink. This window is not displayed until you replace the black ink cartridge and it runs low again.

Maintaining the Printer

Preventing the Print Head from Drying

Always use the power button when turning the printer on and off.

Check that the power light is off before you disconnect the power cord.

The ink itself can dry out if it is not covered. Just like placing a cap on a fountain pen or an oil pen to prevent it from drying, make sure the print head is capped properly to prevent the ink from drying.

When the power cord is unplugged or a power outage occurs while the printer is in operation, the print head may not be capped properly. If the print head is left as it is, it will dry out causing nozzles (ink outlets) to clog.

In these cases, turn the printer on and off again as soon as possible to cap the print head.

Checking and Cleaning the Print Head

If the nozzles are clogged, the printouts become faint, there is visible banding, or unexpected colors appear. When print quality has declined, use the nozzle check feature and check if the nozzles are clogged. If the nozzles are clogged, clean the print head.

Important:

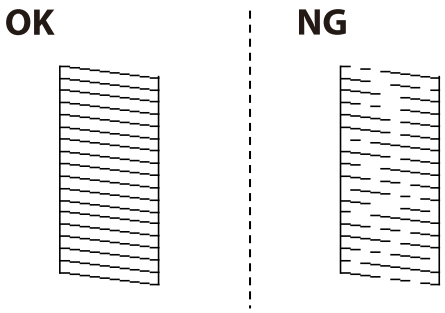

- ❏ *Do not open the scanner unit or turn off the printer during head cleaning. If the head cleaning is incomplete, you may not be able to print.*
- ❏ *Head cleaning consumes ink and should not be performed more than necessary.*
- ❏ *When ink is low, you may not be able to clean the print head.*
- ❏ *If print quality has not improved after repeating nozzle check and head cleaning about four times, wait for at least six hours without printing, and then run the nozzle check again and repeat the head cleaning if necessary. We recommend to turn off the printer. If print quality has still not improved, contact Epson support.*
- ❏ *To prevent the print head from drying out, do not unplug the printer while the power is on.*

Checking and Cleaning the Print Head - Control Panel

1. Load A4-size plain paper in the printer.
2. Select **Maintenance** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.
3. Select **Print Head Nozzle Check**.
4. Follow the on-screen instructions to print the nozzle check pattern.

5. Examine the printed pattern. If there are broken lines or missing segments as shown in the "NG" pattern, the print head nozzles may be clogged. Go to the next step. If you cannot see any broken lines or missing segments as in the following "OK" pattern, the nozzles are not clogged. Select to close the nozzle check feature.

6. Select , and then follow the on-screen instructions to clean the print head.

7. When cleaning is finished, print the nozzle check pattern again. Repeat cleaning and printing the pattern until all lines are printed completely.

Aligning the Print Head

If print results contain the following problems, align the print head to improve the printouts.

❏ Vertical lines look misaligned or the printouts look blurry

❏ Horizontal banding occurs at regular intervals

Aligning the Print Head - Control Panel

1. Select **Maintenance** on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.
2. Select **Print Head Alignment**.
3. Select the adjustment menu you want to adjust to improve the printouts according to the status of the print results.

   ❏ Vertical lines look misaligned or the printouts look blurry : Select **Vertical Alignment**.

   ❏ Horizontal banding occurs at regular intervals: Select **Horizontal Alignment**.
4. Follow the on-screen instructions.

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57

Cleaning the Paper Path for Ink Smears

When the printouts are smeared or scuffed, clean the roller inside.

> ***Important:***
> *Do not use tissue paper to clean the inside of the printer. The print head nozzles may be clogged with lint.*

1. Load A4-size plain paper in the printer.
2. Select **Maintenance** on the home screen.

   To select an item, use the ▲ ▼ ◀ ▶ buttons, and then press the OK button.

3. Select **Paper Guide Cleaning**.

4. Follow the on-screen instructions to clean the paper path.

   Note:
   Repeat this procedure until the paper is not smeared with ink.

Related Information

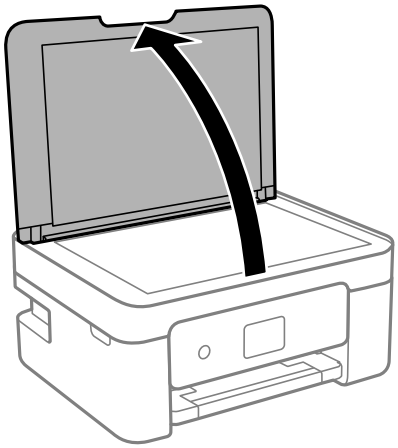

➡ "Loading Paper in the Rear Paper Feed" on page 57

Cleaning the Scanner Glass

When the copies or scanned images are smeared, clean the scanner glass.

> ***Important:***
> *Never use alcohol or thinner to clean the printer. These chemicals can damage the printer.*

1. Open the document cover.

2. Use a soft, dry, clean cloth to clean the surface of the scanner glass.

   > ***Important:***
   > ❏ *If the glass surface is stained with grease or some other hard-to-remove material, use a small amount of glass cleaner and a soft cloth to remove it. Wipe off all remaining liquid.*
   > ❏ *Do not press the glass surface too hard.*
   > ❏ *Be careful not to scratch or damage the surface of the glass. A damaged glass surface can decrease the scan quality.*

Cleaning the Translucent Film

When the printout is not improved after aligning the print head or cleaning the paper path, the translucent film inside the printer may be smeared.

Items required:

❏ Cotton swabs (several)

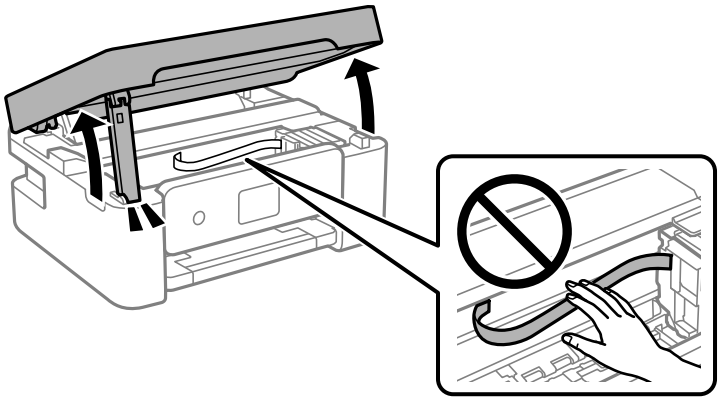

❏ Water with a few drops of detergent (2 to 3 drops of detergent in 1/4 cup of tap water)

❏ Light for checking smears

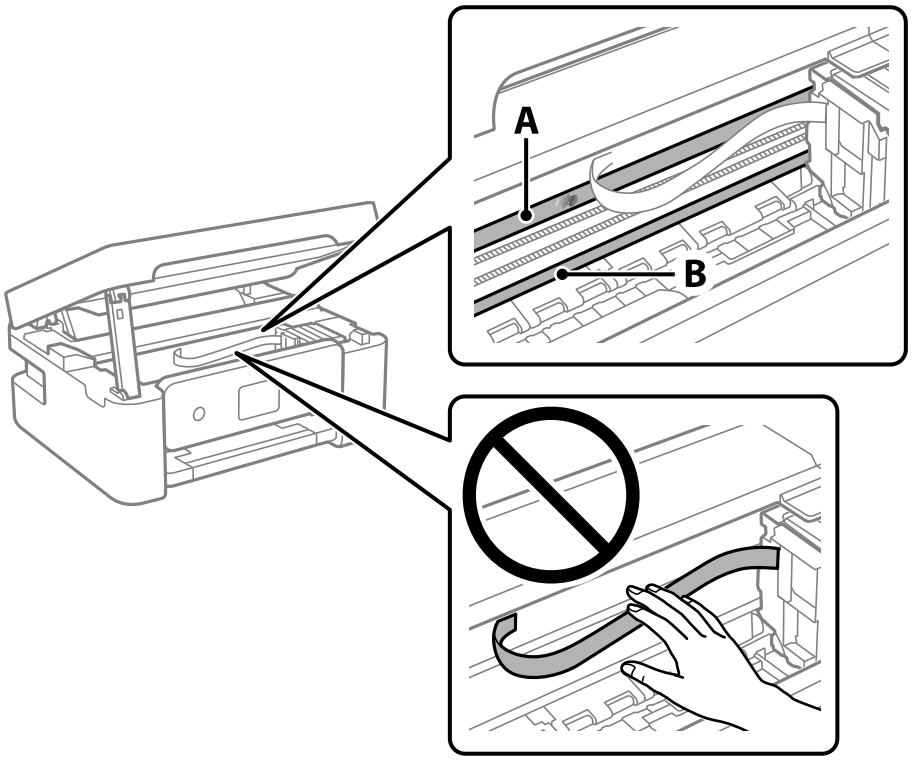

> ***Important:***
> *Do not use cleaning liquid other than water with a few drops of detergent.*

1. Turn off the printer by pressing the ⏻ button.

2. Open the scanner unit.

3. Check if the translucent film is smeared. Smears are easier to see if you use a light.
   If there are smears (such as finger marks or grease) on the translucent film (A), go to the next step.

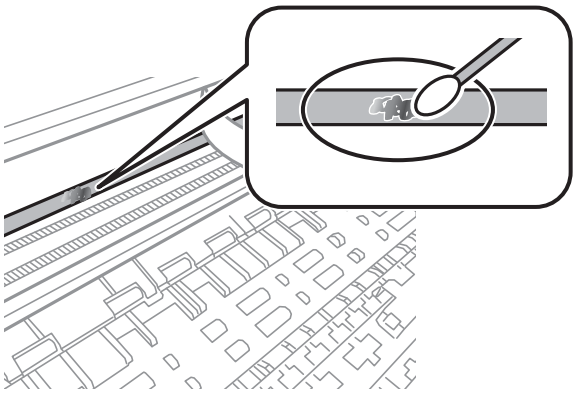

A: Translucent film

B: Rail

> ***Important:***
> *Be careful not to touch the rail (B). Otherwise, you may not be able to print. Do not wipe off the grease on the rail, because this is necessary for operations.*

4. Moisten a cotton swab with the water with a few drops of detergent so that it is not dripping water, and then wipe the smeared part.

> ***Important:***
> *Wipe off the smear gently. If you press the cotton swab too hard to the film, the springs of the film may be dislocated and the printer may be damaged.*

5. Use a new dry cotton swab to wipe the film.

> ***Important:***
> *Do not leave any fibers on the film.*

Note:
To prevent the smear from spreading, frequently replace the cotton swab with a new one.

6. Repeat steps 4 and 5 until the film is not smeared.

7. Visually check that the film is not smeared.

Saving Power

The printer enters sleep mode or turns off automatically if no operations are performed for a set period. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Depending on the location of purchase, the printer may have a feature that turns it off automatically if it is not connected to the network for 30 minutes.

Saving Power - Control Panel

1. Select **Settings** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **General Settings** > **Basic Settings**.

3. Do one of the following.

   Note:
   *Your product may have the **Power Off Settings** or **Power Off Timer** feature depending on the location of purchase.*

   ❏ Select **Sleep Timer** or **Power Off Settings** > **Power Off If Inactive** or **Power Off If Disconnected**, and then make settings.

   ❏ Select **Sleep Timer** or **Power Off Timer**, and then make settings.

Menu Options for Settings

Select **Settings** on the home screen of the printer to make various settings.

Menu Options for Supply Status

Select the menu on the control panel as described below.

Settings > **Supply Status**

Displays the approximate level of the ink and service life of the maintenance box.

When is displayed, ink is running low or the maintenance box is nearly full. When is displayed, you need to replace the item as ink is expended or the maintenance box is full.

You can replace ink cartridges or print supply status information from this screen.

Menu Options for Basic Settings

Select the menus on the control panel as described below.

Settings> **Basic Settings**

Power Off Timer:

Your product may have this feature or the **Power Off Settings** feature depending on the location of purchase.

Select this setting to turn the printer off automatically when it is not used for a specified period of time. You can adjust the time before power management is applied. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

Power Off Settings:

Your product may have this feature or the **Power Off Timer** feature depending on the location of purchase.

❏ Power Off If Inactive

Select this setting to turn the printer off automatically if it is not used for a specified period of time. Any increase will affect the product's energy efficiency. Please consider the environment before making any change.

❏ Power Off If Disconnected

Select this setting to turn the printer off after 30 minutes when all ports including the USB port are disconnected. This feature may not be available depending on your region.

Sleep Timer:

Adjust the time period to enter a sleep mode (energy saving mode) when the printer has not performed any operations. The LCD screen turns black when the setting time passes.

Language:

Select the language used on the LCD screen.

Keyboard

Change the layout of the keyboard on the LCD screen.

Clear All Settings:

Resets the **Basic Settings** to their defaults.

Menu Options for Printer Settings

Select the menus on the control panel as described below.

Settings > **Printer Settings**

Paper Source Setting:

Paper Setup:

Select the paper size and paper type you loaded in the paper source. You can make **Favorite Paper Settings** in paper size and paper type. Select  to return to the last settings you made.

Paper Configuration:

Select **On** to display the paper settings screen automatically by referring to **Settings** > **Printer Settings** > **Paper Source Setting** > **Paper Setup** when paper is loaded in the paper source. If you disable this feature, you cannot print from an iPhone, iPad or iPod touch using AirPrint.

Quiet Mode:

Select **On** to reduce noise during printing, however, this may lower the print speed. Depending on the paper type and print quality settings you selected, there may be no difference in the printer's noise level.

Ink Drying Time:

Select the ink drying time you want to use when performing 2-sided printing. The printer prints the other side after printing one side. If your printout is smeared, increase the time setting.

Clear All Settings

Resets the **Printer Settings** to their defaults.

Menu Options for Network Settings

Select the menus on the control panel as described below.

Settings > Network Settings

Wi-Fi Setup:

Set up or change wireless network settings. Choose the connection method from following and then follow the instructions on the control panel.

❏ Wi-Fi (Recommended):

❏ Wi-Fi Direct

Network Status:

Displays the current network connections.

❏ Wi-Fi Status

❏ Wi-Fi Direct Status

❏ Print Status Sheet

Connection Check:

Checks the current network connection and prints the report. If there are any problems with the connection, see the report to solve the problem.

Advanced:

Make the following detailed settings.

❏ Device Name

❏ TCP/IP

❏ Proxy Server

http://www.epsonconnect.eu (Europe only)

Application for Configuring Printer Operations (Web Config)

Web Config is an application that runs in a web browser, such as Internet Explorer and Safari, on a computer or smart device. You can confirm the printer status or change the network service and printer settings. To use the Web Config, connect the printer and the computer or device to the same network.

The following browsers are supported.

Microsoft Edge, Internet Explorer 8 or later, Firefox*, Chrome*, Safari*

* Use the latest version.

Note:
If the administrator password has not been set when accessing Web Config, the password must be set on the administrator password setting page.

Do not forget the user name and the password. If you forget them, you will need to contact Epson service support.

Running Web Config on a Web Browser

1. Check the printer's IP address.

   Select the network icon on the printer's home screen, and then select the active connection method to confirm the printer's IP address.

Note:
You can also check the IP address by printing the network connection report.

2. Launch a Web browser from a computer or smart device, and then enter the printer's IP address.

   Format:

   IPv4: http://the printer's IP address/

   IPv6: http://[the printer's IP address]/

   Examples:

   IPv4: http://192.168.100.201/

   IPv6: http://[2001:db8::1000:1]/

   Note:
   Using the smart device, you can also run Web Config from the maintenance screen of Epson iPrint.

   Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Related Information

➡ "Printing a Network Connection Report" on page 42

➡ "Using Epson iPrint" on page 87

Running Web Config on Windows

When connecting a computer to the printer using WSD, follow the steps below to run Web Config.

1. Open the printer list on the computer.

   ❏ Windows 10

   Click on the start button, and then select **Windows System** > **Control Panel** > **View devices and printers** in **Hardware and Sound**.

   ❏ Windows 8.1/Windows 8

   Select **Desktop** > **Settings** > **Control Panel** > **View devices and printers** in **Hardware and Sound** (or **Hardware**).

   ❏ Windows 7

   Click the start button, and select **Control Panel** > **View devices and printers** in **Hardware and Sound**.

   ❏ Windows Vista

   Click the start button, and select **Control Panel** > **Printers** in **Hardware and Sound**.

2. Right-click on your printer and select **Properties**.

3. Select the **Web Service** tab and click the URL.

   Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Running Web Config on Mac OS

1. Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer.

2. Click **Options & Supplies**> **Show Printer Webpage**.

   Since the printer uses a self-signed certificate when accessing HTTPS, a warning is displayed on the browser when you start Web Config; this does not indicate a problem and can be safely ignored.

Windows Printer Driver

The printer driver controls the printer according to the commands from an application. Making settings on the printer driver provides the best printing results. You can also check the status of the printer or keep it in top operating condition using the printer driver utility.

Note:
*You can change the language of the printer driver. Select the language you want to use from the **Language** setting on the **Maintenance** tab.*

Accessing the printer driver from applications

To make settings that apply only to the application you are using, access from that application.

Select **Print** or **Print Setup** from the **File** menu. Select your printer, and then click **Preferences** or **Properties**.

Note:
Operations differ depending on the application. See the application's help for details.

Accessing the printer driver from the control panel

To make settings that apply to all of the applications, access from the control panel.

❏ Windows 10

Click on the start button, and then select **Windows System** > **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer, or press and hold it and then select **Printing preferences**

❏ Windows 8.1/Windows 8

Select **Desktop** > **Settings** > **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer, or press and hold it and then select **Printing preferences**.

❏ Windows 7

Click the start button, and select **Control Panel** > **View devices and printers** in **Hardware and Sound**. Right-click on your printer and select **Printing preferences**.

❏ Windows Vista

Click the start button, and select **Control Panel** > **Printers** in **Hardware and Sound**. Right-click on your printer and select **Select printing preferences**.

❏ Windows XP

Click the start button, and select **Control Panel** > **Printers and Other Hardware** > **Printers and Faxes**. Right-click on your printer and select **Printing preferences**.

Accessing the printer driver from the printer icon on the task bar

The printer icon on the desktop task bar is a shortcut icon allowing you to quickly access the printer driver.

If you click the printer icon and select **Printer Settings**, you can access the same printer settings window as the one displayed from the control panel. If you double-click this icon, you can check the status of the printer.

Note:
If the printer icon is not displayed on the task bar, access the printer driver window, click ***Monitoring Preferences*** *on the* ***Maintenance*** *tab, and then select* ***Register the shortcut icon to the taskbar****.*

Starting the utility

Access the printer driver window. Click the **Maintenance** tab.

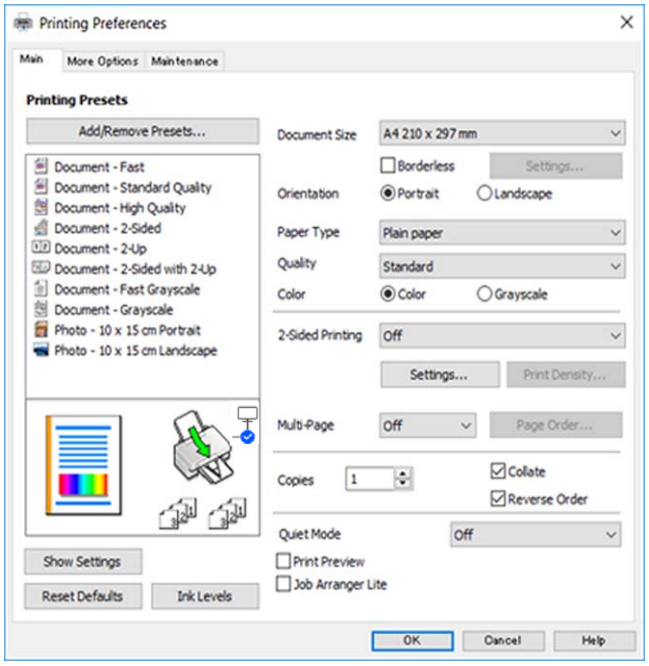

Guide to Windows Printer Driver

Help is available in the printer driver for Windows. To view explanations of the setting items, right-click on each item, and then click **Help**.

Main Tab

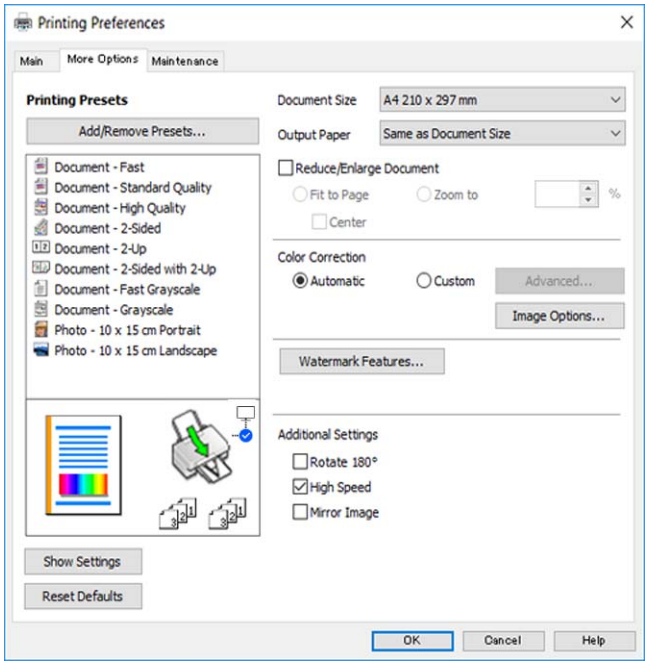

You can make basic settings for printing, such as paper type or paper size.

You can also make settings for printing both sides of the paper or printing multiple pages on one sheet.

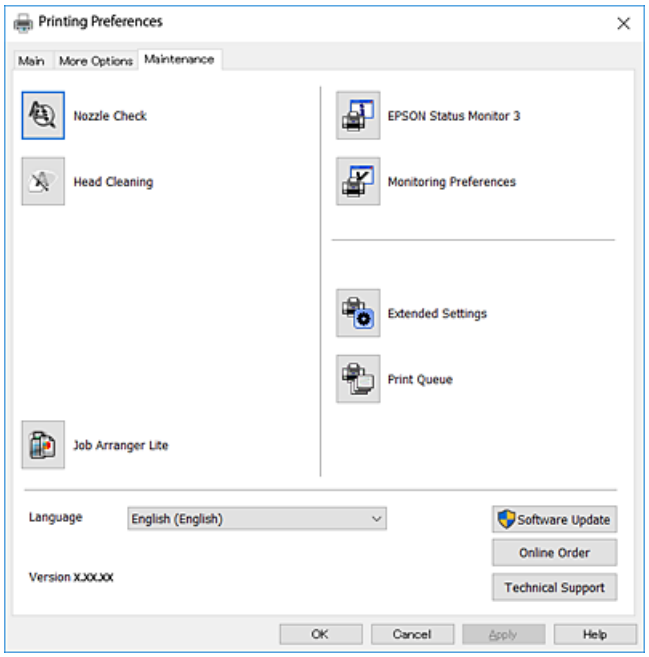

More Options Tab

You can select additional layout and printing options such as changing the size of a printout or making color corrections.

Maintenance Tab

You can run maintenance features such as nozzle check and print head cleaning, and by starting **EPSON Status Monitor 3**, you can check printer status and error information.

Making Operation Settings for the Windows Printer Driver

You can make settings such as enabling **EPSON Status Monitor 3**.

1. Access the printer driver window.
2. Click **Extended Settings** on the **Maintenance** tab.
3. Make the appropriate settings, and then click **OK**.

   See the online help for explanations of the setting items.

Mac OS Printer Driver

The printer driver controls the printer according to the commands from an application. Making settings on the printer driver provides the best printing results. You can also check the status of the printer or keep it in top operating condition using the printer driver utility.

Accessing the printer driver from applications

Click **Page Setup** or **Print** on the **File** menu of your application. If necessary, click **Show Details** (or ▼) to expand the print window.

Note:
Depending on the application being used, ***Page Setup*** *may not be displayed in the* ***File*** *menu, and the operations for displaying the print screen may differ. See the application's help for details.*

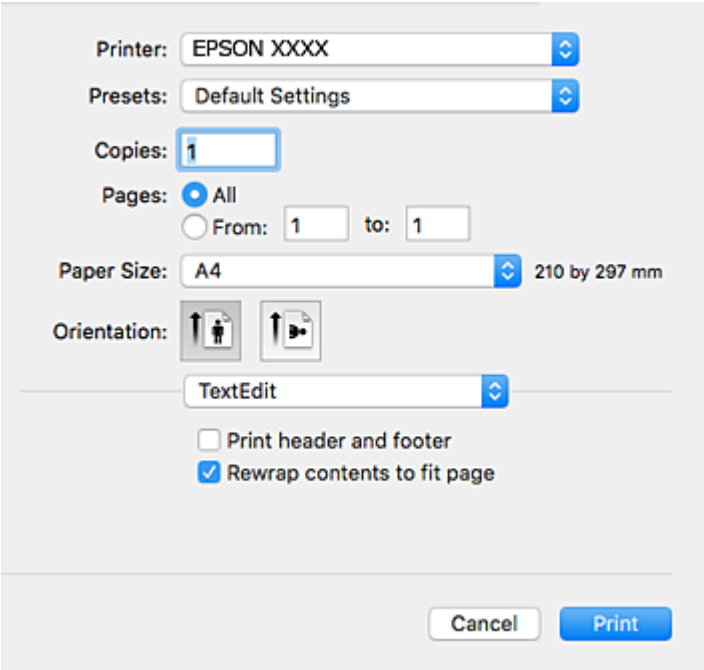

Starting the utility

Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Utility** > **Open Printer Utility**.

Guide to Mac OS Printer Driver

Print dialog

Switch the pop-up menu on the center of the screen to show more items.

Pop-up Menu	Descriptions
Layout	You can select a layout for printing several pages on one sheet or select to print a border.
Color Matching	You can adjust the colors.
Paper Handling	You can reduce or enlarge the size of the print job to automatically fit the paper size you loaded.
Cover Page	You can select a cover for your documents. Select **Cover Page Type** to set the contents to be printed on the cover.
Print Settings	You can make the basic print settings such as paper type and print quality.
Color Options	When you select **EPSON Color Controls** from the **Color Matching** menu, you can select a color correction method.
Two-sided Printing Settings	You can select a binding direction for 2-sided printing or select a document type.

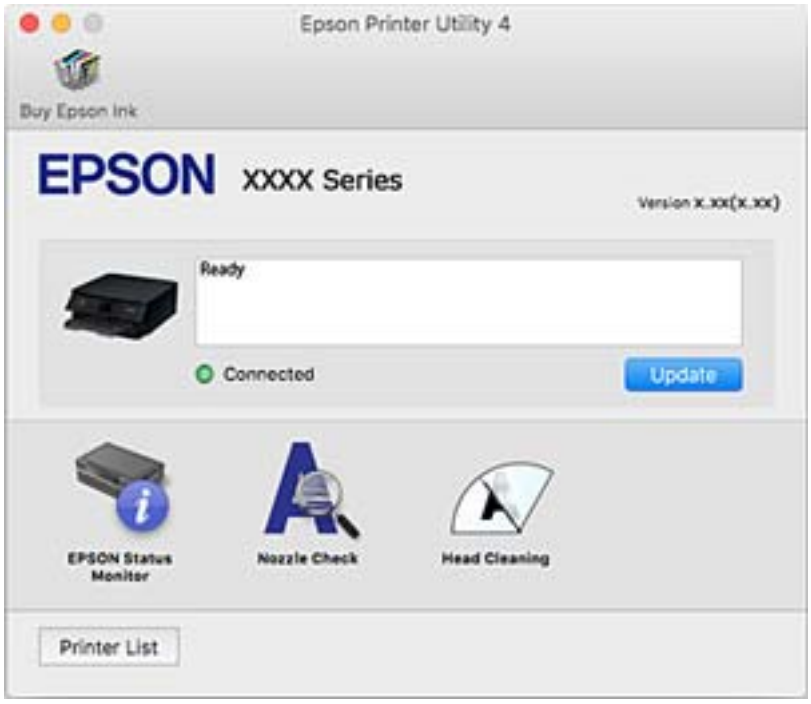

Note:
*On OS X Mountain Lion or later, if **Print Settings** menu is not displayed, Epson printer driver has not been installed correctly.*

*Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), remove the printer, and then add the printer again. Access the following website, and then enter the product name. Go to **Support**, and then see Tips.*

http://epson.sn

Epson Printer Utility

You can run a maintenance feature such as nozzle check and print head cleaning, and by starting **EPSON Status Monitor**, you can check printer status and error information.

Making Operation Settings for the Mac OS Printer Driver

Accessing the Operation Settings Window of the Mac OS Printer Driver

Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**).

Operation Settings of the Mac OS Printer Driver

- ❏ Skip Blank Page: Avoids printing blank pages.
- ❏ Quiet Mode: Prints quietly. However, the print speed may be slower.
- ❏ Permit temporary black printing: Prints only with black ink temporarily.
- ❏ High Speed Printing: Prints when the print head moves in both directions. The print speed is faster, but the quality may decline.
- ❏ Output documents for filing: Feed the paper so that it is easy to file when printing landscape data or 2-sided printing. Envelope printing is not supported.
- ❏ Remove white borders: Removes unnecessary margins during borderless printing.
- ❏ Warning Notifications: Allows the printer driver to display warning notifications.
- ❏ Establish bidirectional communication: Usually, this should be set to **On**. Select **Off** when acquiring the printer information is impossible because the printer is shared with Windows computers on a network or for any other reason.

Application for Scanning Documents and Images (Epson Scan 2)

Epson Scan 2 is an application for controlling scanning. You can adjust the size, resolution, brightness, contrast, and quality of the scanned image. You can also start Epson Scan 2 from a TWAIN-compliant scanning application. See the application's help for details.

Starting on Windows

❏ Windows 10

Click the start button, and then select **EPSON** > **Epson Scan 2**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7/Windows Vista/Windows XP

Click the start button, and then select **All Programs** or **Programs** > **EPSON** > **Epson Scan 2**> **Epson Scan 2**.

Starting on Mac OS

Note:
Epson Scan 2 does not support the Mac OS fast user switching feature. Turn off fast user switching.

Select **Go** > **Applications** > **Epson Software** > **Epson Scan 2**.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104
➡ "Installing Applications" on page 151

Adding the Network Scanner

Before using Epson Scan 2, you need to add the network scanner.

1. Start the software, and then click **Add** on the **Scanner Settings** screen.

   Note:
   ❏ *If **Add** is grayed out, click **Enable Editing**.*
   ❏ *If the main screen of Epson Scan 2 is displayed, it has already been connected to the scanner. If you want to connect to another network, select **Scanner** > **Settings** to open the **Scanner Settings** screen.*

2. Add the network scanner. Enter the following items, and then click **Add**.

   ❏ **Model**: Select the scanner you want to connect to.
   ❏ **Name**: Enter the scanner name within 32 characters.
   ❏ **Search for Network**: When the computer and the scanner are on the same network, the IP address is displayed. If it is not displayed, click the button. If the IP address is still not displayed, click **Enter address**, and then enter the IP address directly.

3. Select the scanner on the **Scanner Settings**screen, and then click **OK**.

Application for Configuring Scanning Operations from the Control Panel (Epson Event Manager)

Epson Event Manager is an application that allows you to manage scanning from the control panel and save images to a computer. You can add your own settings as presets, such as the document type, the save folder location, and the image format. See the application's help for details.

Starting on Windows

❏ Windows 10

Click the start button, and then select **Epson Software** > **Event Manager**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7/Windows Vista/Windows XP

Click the start button, and then select **All Programs** or **Programs** > **Epson Software** > **Event Manager**.

Starting on Mac OS

Go > **Applications** > **Epson Software** > **Event Manager**.

Related Information

➡ "Installing Applications" on page 151

Application for Scanning from a Computer (Epson ScanSmart)

This application allows you to scan documents and photos easily, and then save the scanned images in simple steps.

See the Epson ScanSmart help for details on using the features.

Starting on Windows

❏ Windows 10

Click the start button, and then select **Epson Software** > **Epson ScanSmart**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7

Click the start button, and then select **All Programs** > **Epson Software** > **Epson ScanSmart**.

Starting on Mac OS

Select **Go** > **Applications** > **Epson Software** > **Epson ScanSmart**.

Application for Quick and Fun Printing from a Computer (Epson Photo+)

Epson Photo+ is an application that allows you to easily print images with a variety of layouts. You can use a variety of templates and perform image correction and adjust the position while viewing a preview of your document. You can also brighten up your images by adding text and stamps wherever you like. When printing on genuine Epson photo paper, the ink performance is maximized creating a beautiful finish with excellent coloring.

It also comes with the following features. See the application's help for details. You can download the latest applications from the Epson website.

http://www.epson.com

- ❏ Printing disc labels (supported models only)
- ❏ Printing created QR codes
- ❏ Printing photos showing the shooting date and time

Note:
To use this application the printer driver for this printer must be installed.

Starting on Windows

- ❏ Windows 10

  Click the start button, and then select **Epson Software** > **Epson Photo+**.
- ❏ Windows 8.1/Windows 8

  Enter the application name in the search charm, and then select the displayed icon.
- ❏ Windows 7

  Click the start button, and select **All Programs** or **Programs** > **Epson Software** > **Epson Photo+**.

Starting on Mac OS

Select **Go** > **Applications** > **Epson Software** > **Epson Photo+**.

Related Information

➡ "Installing Applications" on page 151

Application for Easily Operating the Printer from a Smart device (Epson Smart Panel)

Epson Smart Panel is an application that allows you to perform printer operations easily including printing, copying, or scanning from a smart device such as a smartphone or tablet. You can connect the printer and smart device over a wireless network, check the ink levels and printer status, and check for solutions if an error occurs. You can also copy easily by registering a copy favorite.

Search for and install Epson Smart Panel from App Store or Google Play.

Application for Updating Software and Firmware (EPSON Software Updater)

EPSON Software Updater is an application that installs new software, and updates firmware over the Internet. If you want to check for update information regularly, you can set the interval for checking for updates in EPSON Software Updater's Auto Update Settings.

Starting on Windows

❏ Windows 10

Click the start button, and then select **Epson Software** > **EPSON Software Updater**.

❏ Windows 8.1/Windows 8

Enter the application name in the search charm, and then select the displayed icon.

❏ Windows 7/Windows Vista/Windows XP

Click the start button, and then select **All Programs** (or **Programs**) > **Epson Software** > **EPSON Software Updater**.

Note:
You can also start EPSON Software Updater by clicking the printer icon on the task bar on the desktop, and then selecting ***Software Update****.*

Starting on Mac OS

Select **Go** > **Applications** > **Epson Software** > **EPSON Software Updater**.

Installing Applications

Connect your computer to the network and install the latest version of applications from the website.

Note:
❏ *Log on to your computer as an administrator. Enter the administrator password if the computer prompts you.*

❏ *When reinstalling an application, you need to uninstall it first.*

1. Quit all running applications.

2. When installing the printer driver or Epson Scan 2, disconnect the printer and the computer temporarily.

   Note:
   Do not connect the printer and the computer until you are instructed to do so.

3. Access to the following website, and then enter the product name.

   http://epson.sn

4. Select **Setup**, and then click **Download**.

5. Click or double-click the downloaded file, and then follow the on-screen instructions.

Note:
If you are using a Windows computer and you cannot download applications from the website, install them from the software disc that came with the printer.

Related Information

➡ "Application for Updating Software and Firmware (EPSON Software Updater)" on page 151
➡ "Uninstalling Applications" on page 153

Adding the Printer (for Mac OS Only)

1. Select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**).

2. Click +, and then select your printer on the screen displayed.

3. Select your printer from **Use**.

4. Click **Add**.

   Note:
   If your printer is not listed, check that it is correctly connected to the computer and that the printer is on.

Updating Applications and Firmware

You may be able to clear certain problems and improve or add functions by updating the applications and the firmware. Make sure you use the latest version of the applications and firmware.

1. Make sure that the printer and the computer are connected, and the computer is connected to the internet.

2. Start EPSON Software Updater, and update the applications or the firmware.

   > ***Important:***
   > *Do not turn off the computer or the printer until the update is complete; otherwise, the printer may malfunction.*

   Note:
   If you cannot find the application you want to update in the list, you cannot update using the EPSON Software Updater. Check for the latest versions of the applications from your local Epson website.

   http://www.epson.com

Updating the Printer's Firmware using the Control Panel

If the printer is connected to the Internet, you can update the printer's firmware using the control panel. You can also set the printer to regularly check for firmware updates and notify you if any are available.

1. Select **Settings** on the home screen.

   To select an item, use the ▲▼◀▶ buttons, and then press the OK button.

2. Select **Firmware Update** > **Update**.

   Note:
   *Enable **Notification** to set the printer to regularly check for available firmware updates.*

3. Check the message displayed on the screen and press **Start Checking** to start searching for available updates.

4. If a message is displayed on the LCD screen informing you that a firmware update is available, follow the on-screen instructions to start the update.

   Important:
   - ❏ *Do not turn off or unplug the printer until the update is complete; otherwise, the printer may malfunction.*
   - ❏ *If the firmware update is not completed or is unsuccessful, the printer does not start up normally and "Recovery Mode" is displayed on the LCD screen the next time the printer is turned on. In this situation, you need to update the firmware again using a computer. Connect the printer to the computer with a USB cable. While "Recovery Mode" is displayed on the printer, you cannot update the firmware over a network connection. On the computer, access your local Epson website, and then download the latest printer firmware. See the instructions on the website for the next steps.*

Uninstalling Applications

Log in to your computer as an administrator. Enter the administrator password if the computer prompts you.

Uninstalling Applications - Windows

1. Press the ⏻ button to turn off the printer.

2. Quit all running applications.

3. Open **Control Panel**:
   - ❏ Windows 10
     Click on the start button, and then select **Windows System** > **Control Panel**.
   - ❏ Windows 8.1/Windows 8
     Select **Desktop** > **Settings** > **Control Panel**.
   - ❏ Windows 7/Windows Vista/Windows XP
     Click the start button and select **Control Panel**.

4. Open **Uninstall a program** (or **Add or Remove Programs**):
   - ❏ Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista
     Select **Uninstall a program** in **Programs**.
   - ❏ Windows XP
     Click **Add or Remove Programs**.
5. Select the application you want to uninstall.
   You cannot uninstall the printer driver if there is any print jobs. Delete or wait to be printed the jobs before uninstalling.
6. Uninstall the applications:
   - ❏ Windows 10/Windows 8.1/Windows 8/Windows 7/Windows Vista
     Click **Uninstall/Change** or **Uninstall**.
   - ❏ Windows XP
     Click **Change/Remove** or **Remove**.

   Note:
   *If the **User Account Control** window is displayed, click **Continue**.*
7. Follow the on-screen instructions.

Uninstalling Applications - Mac OS

1. Download the Uninstaller using EPSON Software Updater.
   Once you have downloaded the Uninstaller, you do not need to download it again each time you uninstall the application.
2. Press the ⏻ button to turn off the printer.
3. To uninstall the printer driver, select **System Preferences** from the Apple menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then remove the printer from the enabled printers list.
4. Quit all running applications.
5. Select **Go** > **Applications** > **Epson Software** > **Uninstaller**.
6. Select the application you want to uninstall, and then click **Uninstall**.

   Important:
   The Uninstaller removes all drivers for Epson inkjet printers on the computer. If you use multiple Epson inkjet printers and you only want to delete some drivers, delete all of them first, and then install the necessary printer driver again.

   Note:
   *If you cannot find the application you want to uninstall in the application list, you cannot uninstall using the Uninstaller. In this situation, select **Go** > **Applications** > **Epson Software**, select the application you want to uninstall, and then drag it to the trash icon.*

Solving Problems

Checking the Printer Status

Checking Messages on the LCD Screen

If an error message is displayed on the LCD screen, follow the on-screen instructions or the solutions below to solve the problem.

Error Messages	Solutions
Printer Error Turn on the printer again. See your documentation for more details.	Remove any paper or protective material in the printer. If the error message is still displayed, contact Epson support.
You need to replace Ink Cartridge.	To ensure you receive premium print quality and to help protect your print head, a variable ink safety reserve remains in the cartridge when your printer indicates it is time to replace the cartridge. Replace the cartridge when you are prompted to do so.
The printer's borderless printing ink pad is nearing the end of its service life. It is not a user-replaceable part. Please contact Epson support.	Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. The message will be displayed until the ink pad is replaced. Select **Dismiss** to resume printing.
The printer's borderless printing ink pad has reached the end of its service life. It is not a user-replaceable part. Please contact Epson support.	Contact Epson or an authorised Epson service provider to replace the borderless printing ink pad*. It is not a user-serviceable part. Borderless printing is not available, but printing with a border is available.
Paper Configuration is set to Off. Some features may not be available. For details, see your documentation.	If **Paper Configuration** is disabled, you cannot use AirPrint.
The combination of the IP address and the subnet mask is invalid. See your documentation for more details.	Enter the correct IP address or default gateway. Contact the person who setup the network for assistance.
To use cloud services, update the root certificate from the Epson Web Config utility.	Run Web Config, and then update the root certificate.
Check that the printer driver is installed on the computer and that the port settings for the printer are correct.	Click **Print Queue** on the printer driver's **Maintenance** tab. Make sure the printer port is selected correctly in **Property** > **Port** from the **Printer** menu as follows. Select "**USBXXX**" for a USB connection, or "**EpsonNet Print Port**" for a network connection.
Check that the printer driver is installed on the computer and that the USB port settings for the printer are correct.	

Error Messages	Solutions
Recovery Mode	The printer has started in recovery mode because the firmware update failed. Follow the steps below to try to update the firmware again. 1. Connect the computer and the printer with a USB cable. (During recovery mode, you cannot update the firmware over a network connection.) 2. Visit your local Epson website for further instructions.

* In some print cycles a very small amount of surplus ink may be collected in the ink pad. To prevent ink leakage from the pad, the product is designed to stop printing when the pad has reached its limit. Whether and how often this is required will vary according to the number of pages you print using the borderless print option. The need for replacement of the pad does not mean that your printer has ceased to operate in accordance with its specifications. The printer will advise you when the pad requires replacing and this can only be performed by an authorised Epson Service provider. The Epson warranty does not cover the cost of this replacement.

Removing Jammed Paper

Check the error displayed on the control panel and follow the instructions to remove the jammed paper including any torn pieces. Next, clear the error.

> ***Important:***
> *Remove the jammed paper carefully. Removing the paper vigorously may cause damage to the printer.*

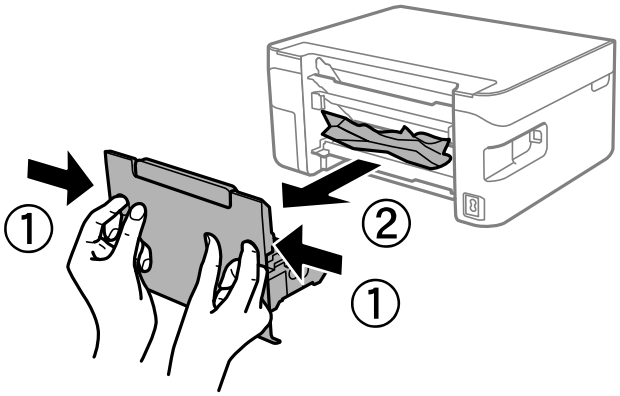

Removing Jammed Paper from the Rear Paper Feed

Remove the jammed paper.

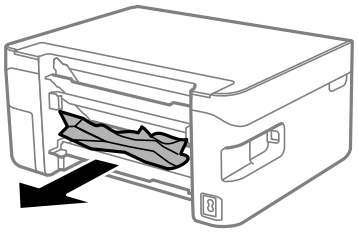

Removing Jammed Paper from Rear Cover

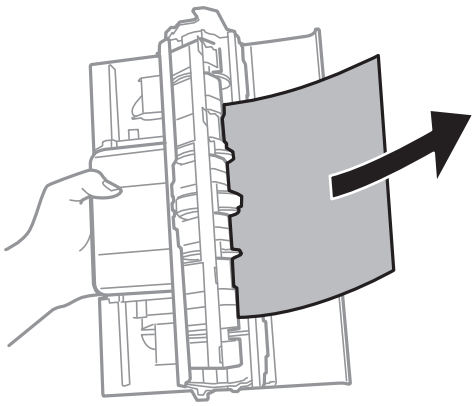

1. Remove the rear cover.

2. Remove the jammed paper.

3. Remove jammed paper from the rear cover.

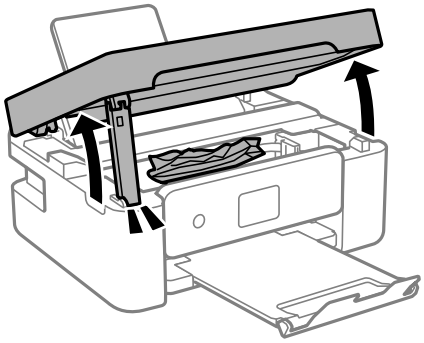

4. Insert the rear cover in the printer.

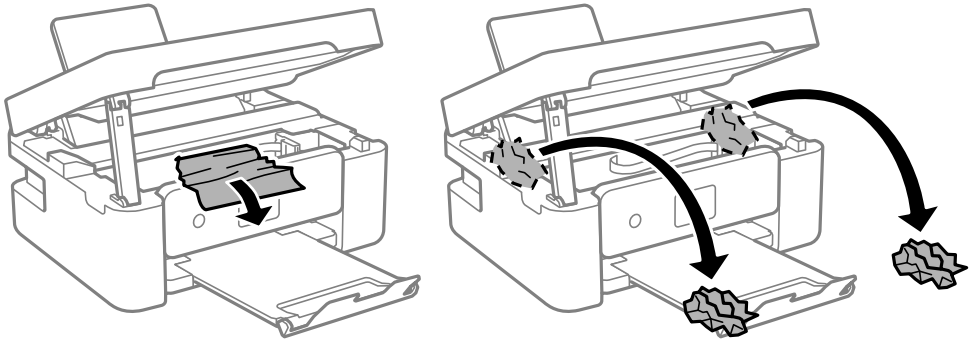

Removing Jammed Paper from Inside the Printer

> ⚠ ***Caution:***
>
> ❏ *Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.*
>
> ❏ *Never touch the buttons on the control panel while your hand is inside the printer. If the printer starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury.*

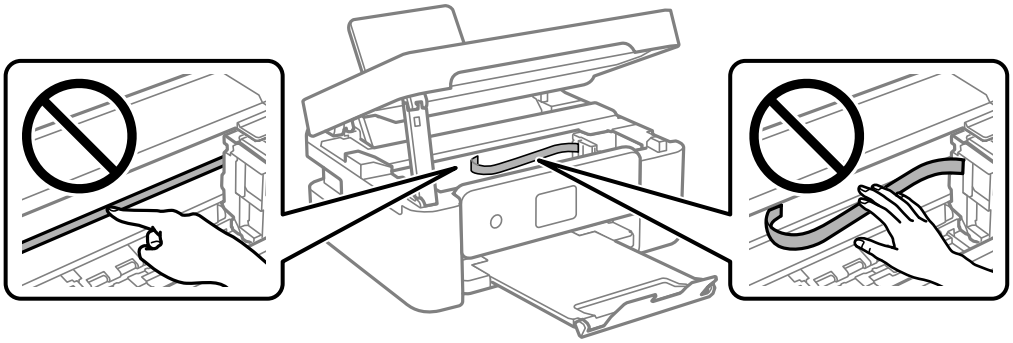

1. Open the scanner unit with the document cover closed.

2. Remove the jammed paper.

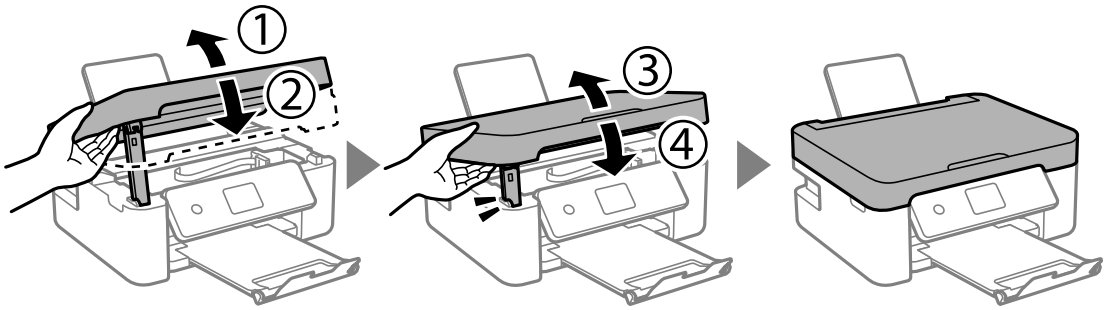

> **Important:**
>
> *Do not touch the white flat cable or translucent film inside the printer. Doing so may cause a malfunction.*

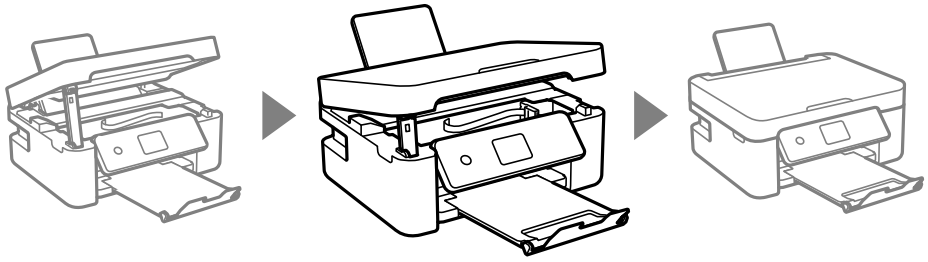

3. Close the scanner unit.

   For safety, the scanner unit is closed in two steps.

Note:
The scanner unit cannot be opened from the position shown below. Close it completely before opening it.

Paper Does Not Feed Correctly

Check the following points, and then take the appropriate actions to solve the problem.

- ❏ Place the printer on a flat surface and operate in the recommended environmental conditions.
- ❏ Use paper supported by this printer.
- ❏ Follow the paper handling precautions.
- ❏ Do not load more than the maximum number of sheets specified for the paper. For plain paper, do not load above the line indicated by the triangle symbol on the edge guide.
- ❏ Make sure the paper size and paper type settings match the actual paper size and paper type loaded in the printer.
- ❏ Do not place objects on the feeder guard.

Related Information

- ➡ "Environmental Specifications" on page 189

➡ "Loading Paper in the Rear Paper Feed" on page 57

Paper Feeds at a Slant

Load paper in the correct direction, and slide the edge guides against the edges of the paper.

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57

Several Sheets of Paper are Fed at a Time

❏ Load one sheet of paper at a time.

❏ When several sheets of paper are fed at a time during manual 2-sided printing, remove any paper which is loaded in the printer before you reload the paper.

Paper Out Error Occurs

When a paper out error occurs although paper is loaded in the rear paper feed, reload paper in the center of the rear paper feed.

Paper is Ejected During Printing

When you load letterhead paper (paper on which information such as the sender's name or corporation name are pre-printed in the header), select **Letterhead** as the paper type setting.

Power and Control Panel Problems

Power Does Not Turn On

❏ Make sure the power cord is securely plugged in.

❏ Hold down the ⏻ button for a little longer.

Power Does Not Turn Off

Hold down the ⏻ button for a little longer. If you still cannot turn off the printer, unplug the power cord. To prevent the print head from drying out, turn the printer back on and turn it off by pressing the ⏻ button.

Power Turns Off Automatically

❏ Select **Settings** > **Basic Settings** > **Power Off Settings**, and then disable the **Power Off If Inactive** and **Power Off If Disconnected** settings.

❏ Select **Settings** > **Basic Settings**, and then disable the **Power Off Timer** Setting.

Note:
*Your product may have the **Power Off Settings** or **Power Off Timer** feature depending on the location of purchase.*

LCD Screen Gets Dark

The printer is in sleep mode. Press any button on the control panel to return the LCD screen to its former state.

Cannot Print from a Computer

Checking the Connection (USB)

❏ Connect the USB cable securely to the printer and the computer.

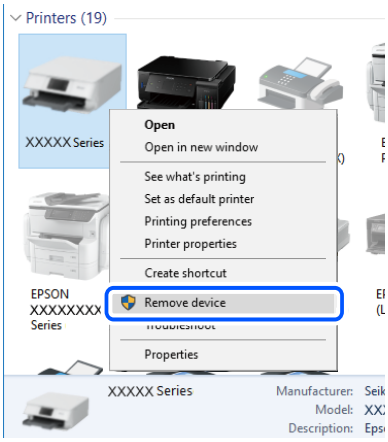

❏ If you are using a USB hub, try to connect the printer directly to the computer.

❏ If the USB cable cannot be recognized, change the port, or change the USB cable.

❏ If the printer cannot print using a USB connection, try the following.

Disconnect the USB cable from the computer. Right-click on the printer icon displayed on the computer, and then select **Remove Device**. Next, connect the USB cable to the computer and try a test print.

Re-set the USB connection by following the steps in this manual for changing the connection method to a computer. See the related information link below for details.

Related Information

➡ "Changing the Connection Method to a Computer" on page 49

Checking the Connection (Network)

- ❏ When you have changed your wireless router or provider, try making network settings for the printer again. Connect the computer or smart device to the same SSID as the printer.
- ❏ Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; wireless router, computer or smart device, and then printer. Move the printer and computer or smart device closer to the wireless router to help with radio wave communication, and then try to make network settings again.
- ❏ Print the network connection report. See the related information link below for details. If the report shows that the network connection failed, check the network connection report and then follow the printed solutions.
- ❏ If the IP address assigned to the printer is 169.254.XXX.XXX, and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Restart the wireless router or reset the network settings for the printer. If this does not solve the problem, see the documentation for the wireless router.
- ❏ Try accessing any website from your computer to make sure that your computer's network settings are correct. If you cannot access any website, there is a problem on the computer. Check the network connection of the computer.

Related Information

➡ "Connecting to a Computer" on page 24
➡ "Printing a Network Connection Report" on page 42

Checking the Software and Data

- ❏ Make sure that a genuine Epson printer driver is installed. If a genuine Epson printer driver is not installed, the available functions are limited. We recommend using a genuine Epson printer driver. See the related information link below for details.
- ❏ If you are printing a large data size image, the computer may run out of memory. Print the image at a lower resolution or a smaller size.

Related Information

➡ "Checking for Genuine Epson Printer Drivers" on page 164
➡ "Installing Applications" on page 151

Checking for Genuine Epson Printer Drivers

You can check if a genuine Epson printer driver is installed on your computer by using one of the following methods.

Windows

Select **Control Panel** > **View devices and printers** (**Printers**, **Printers and Faxes**), and then do the following to open the print server properties window.

- ❏ Windows 10/Windows 8.1/Windows 8/Windows 7

  Click the printer icon, and then click **Print server properties** at the top of the window.

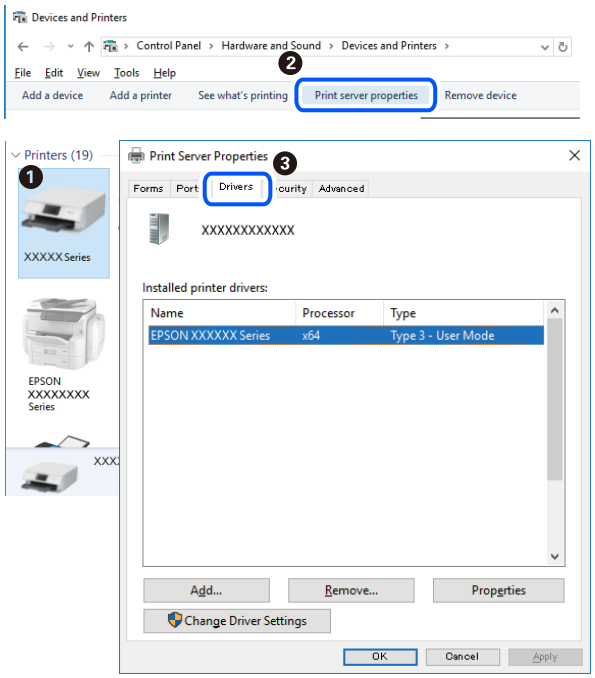

- ❏ Windows Vista

  Right-click on the **Printers** folder, and then click **Run as administrator** > **Server Properties**.

❏ Windows XP

From the **File** menu, select **Server Properties**.

Click the **Driver** tab. If your printer name is displayed in the list, a genuine Epson printer driver is installed on your computer.

Mac OS

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies**, and if the **Options** tab and **Utility** tab are displayed on the window, a genuine Epson printer driver is installed on your computer.

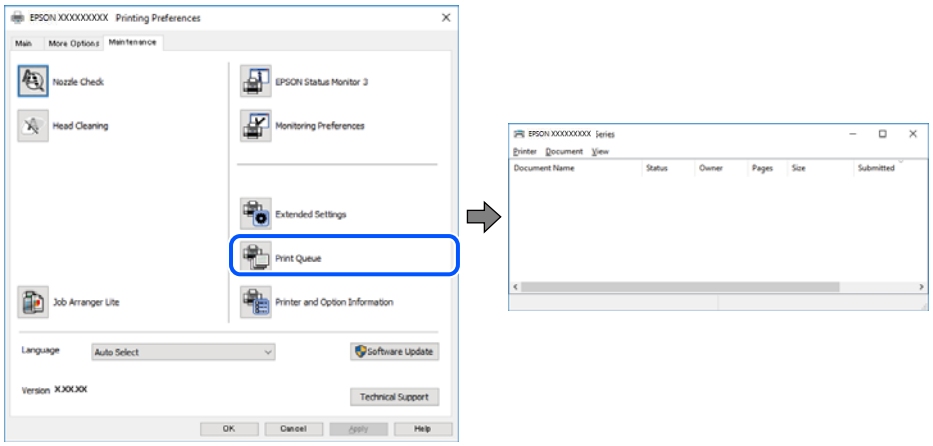

Related Information

➡ "Installing Applications" on page 151

Checking the Printer Status from the Computer (Windows)

Click **Print Queue** on the printer driver's **Maintenance** tab, and then check the following.

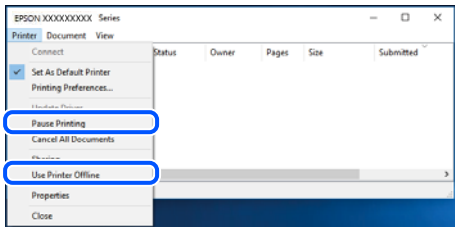

❏ Check if there are any paused print jobs.

If unnecessary data remains, select **Cancel all documents** from the **Printer** menu.

❏ Make sure the printer is not offline or pending.

If the printer is offline or pending, clear the offline or pending setting from the **Printer** menu.

❏ Make sure the printer is selected as the default printer from the **Printer** menu (there should be a check mark on the menu item).

If the printer is not selected as the default printer, set it as the default printer. If there are multiple icons in **Control Panel** > **View devices and printers** (**Printers**, **Printers and Faxes**), see the following to select the icon.

Example)

USB connection: EPSON XXXX Series

Network connection: EPSON XXXX Series (network)

If you install the printer driver multiple times, copies of printer driver may be created. If copies such as "EPSON XXXX Series (copy 1)" are created, right-click the copied driver icon, and then click **Remove Device**.

❏ Make sure the printer port is selected correctly in **Property** > **Port** from the **Printer** menu as follows.

Select "**USBXXX**" for a USB connection, or "**EpsonNet Print Port**" for a network connection.

Checking the Printer Status from the Computer (Mac OS)

Make sure the printer status is not **Pause**.

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then double-click the printer. If the printer is paused, click **Resume** (or **Resume Printer**).

When You Cannot Make Network Settings

❏ Turn off the devices you want to connect to the network. Wait for about 10 seconds, and then turn on the devices in the following order; wireless router, computer or smart device, and then printer. Move the printer and computer or smart device closer to the wireless router to help with radio wave communication, and then try to make network settings again.

❏ Select **Settings** > **Network Settings** > **Connection Check**, and then print the network connection report. If an error has occurred, check the network connection report and then follow the printed solutions.

Related Information

➡ "Printing a Network Connection Report" on page 42

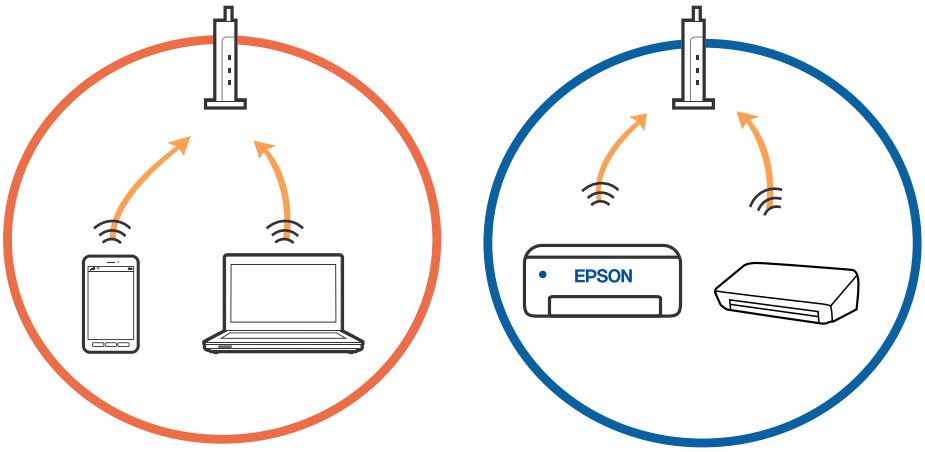

➡ "Messages and Solutions on the Network Connection Report" on page 43

Cannot Connect from Devices Even Though Network Settings are No Problems

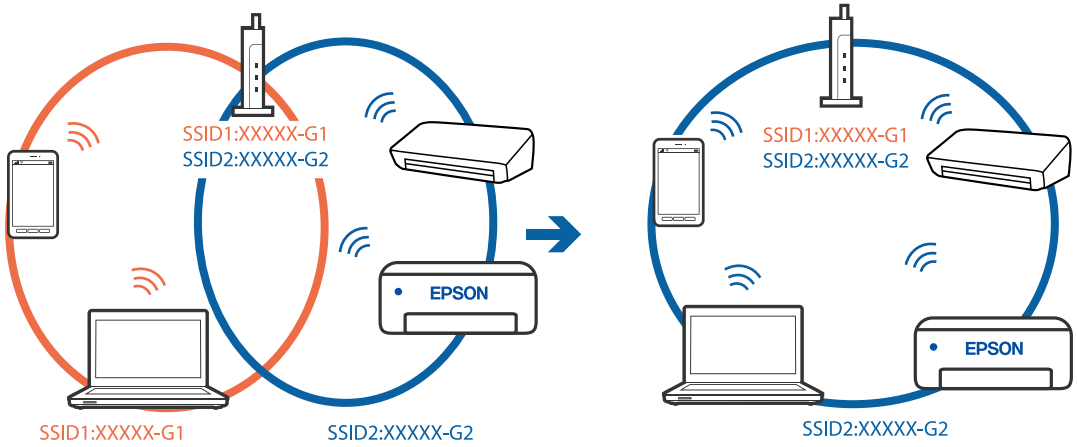

If you cannot connect from the computer or smart device to the printer even though the network connection report does not show any problems, see the following.

❏ When you are using multiple wireless routers at the same time, you may not be able to use the printer from the computer or smart device depending on the settings of the wireless routers. Connect the computer or smart device to the same wireless router as the printer.

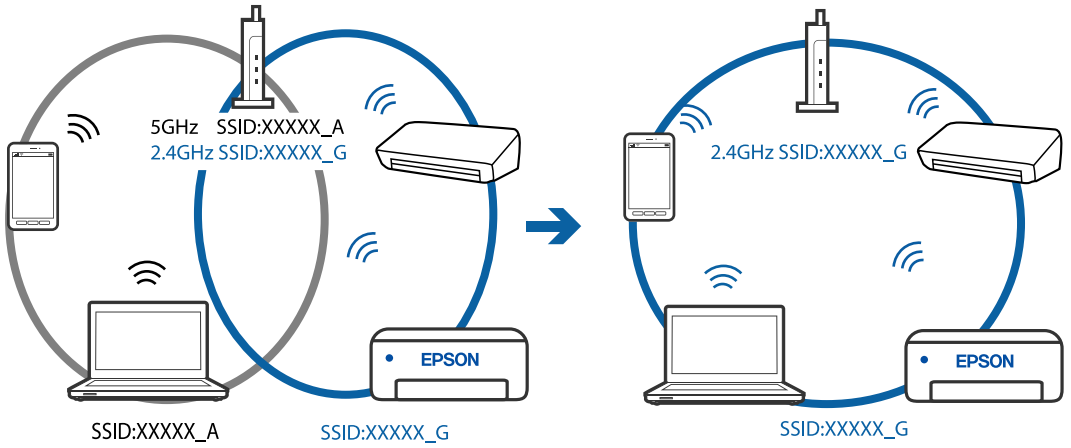

Disable the tethering function on the smart device if it is enabled.

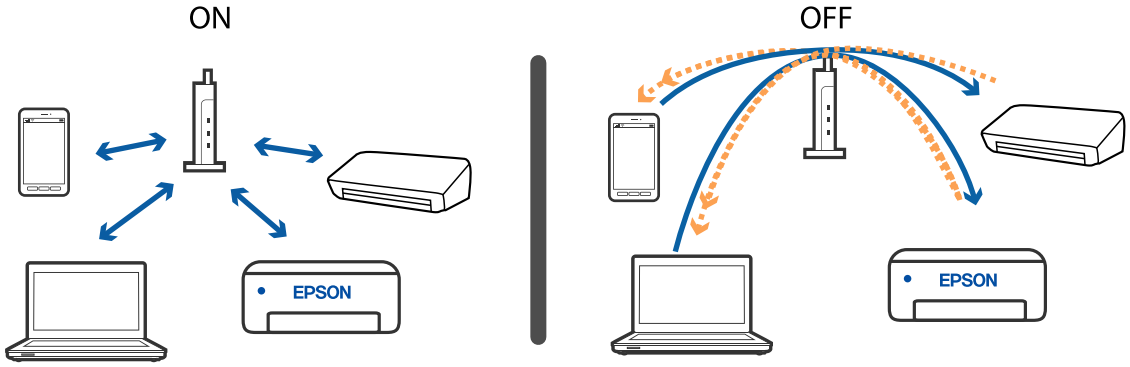

❏ You may not be able to connect to the wireless router when the wireless router has multiple SSIDs and devices are connected to different SSIDs on the same wireless router. Connect the computer or smart device to the same SSID as the printer.

❏ A wireless router that is compliant with both IEEE802.11a and IEEE802.11g has SSIDs of 2.4 GHz and 5 GHz. If you connect the computer or smart device to a 5 GHz SSID, you cannot connect to the printer because the printer only supports communication over 2.4 GHz. Connect the computer or smart device to the same SSID as the printer.

❏ Most wireless routers have a privacy separator feature that blocks communication between connected devices. If you cannot communicate between the printer and the computer or smart device even if they are connected to the same network, disable the privacy separator on the wireless router. See the manual provided with the wireless router for details.

Related Information

➡ "Checking the SSID Connected to the Printer" on page 169
➡ "Checking the SSID for the Computer" on page 169

Checking the SSID Connected to the Printer

Select **Settings** > **Network Settings** > **Network Status**. You can check the SSID for Wi-Fi and Wi-Fi Direct (Simple AP) from each menu.

Checking the SSID for the Computer

Windows

Click  in the task tray on the desktop. Check the name of the connected SSID from the list displayed.

Mac OS

Click the Wi-Fi icon at the top of the computer screen. A list of SSIDs is displayed and the connected SSID is indicated with a check mark.

Wireless LAN (Wi-Fi) Connections Become Unstable When Using USB 3.0 Devices on a Mac

When you connect a device to the USB 3.0 port on a Mac, radio frequency interference may occur. Try the following if you cannot connect to wireless LAN (Wi-Fi) or if operations become unstable.

❏ Place the device that is connected to the USB 3.0 port further away from the computer.

❏ If the printer supports the 5 GHz frequency range, connect to the SSID for the 5 GHz range.

Related Information

➡ "Wi-Fi Specifications" on page 187

Cannot Print from an iPhone, iPad, or iPod touch

❏ Connect the iPhone, iPad, or iPod touch to the same network (SSID) as the printer.

❏ Enable **Paper Configuration** in the following menus.

Settings > **Printer Settings** > **Paper Source Setting** > **Paper Configuration**

❏ Enable the AirPrint setting on Web Config.

Related Information

➡ "Connecting to a Smart Device" on page 25

➡ "Application for Configuring Printer Operations (Web Config)" on page 140

Printout Problems

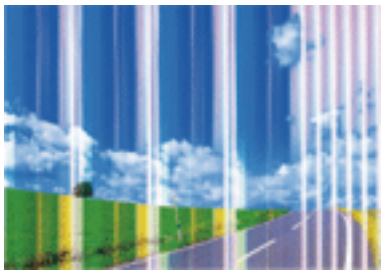

Printout is Scuffed or Color is Missing

If you have not used the printer for a long time, the print head nozzles may be clogged and ink drops may not be discharged. Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.

Related Information

➡ "Checking and Cleaning the Print Head" on page 128

Banding or Unexpected Colors Appear

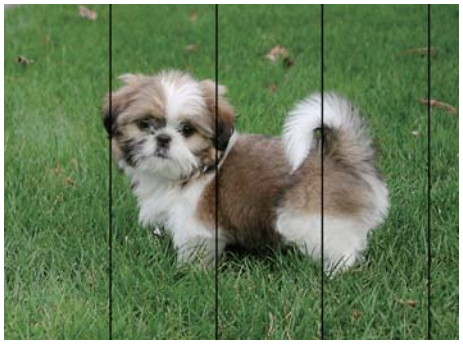

The print head nozzles may be clogged. Perform a nozzle check to check if the print head nozzles are clogged. Clean the print head if any of the print head nozzles are clogged.

Related Information

➡ "Checking and Cleaning the Print Head" on page 128

Colored Banding Appears at Intervals of Approximately 2.5 cm

❏ Select the appropriate paper type setting for the type of paper loaded in the printer.

❏ Align the print head using the **Horizontal Alignment** feature.

❏ When printing on plain paper, print using a higher quality setting.

Related Information

➡ "List of Paper Type" on page 57
➡ "Aligning the Print Head" on page 130

Blurry Prints, Vertical Banding, or Misalignment

Align the print head using the **Vertical Alignment** feature.

Related Information

➡ "Aligning the Print Head" on page 130

Print Quality Does Not Improve Even After Aligning the Print Head

During bidirectional (or high speed) printing, the print head prints while moving in both directions, and vertical lines may be misaligned. If print quality does not improve, disable the bidirectional (or high speed) setting. Disabling this setting may slow down printing speed.

❏ Windows

Clear **High Speed** on the printer driver's **More Options** tab.

❏ Mac OS

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **Off** as the **High Speed Printing** setting.

Print Quality is Poor

Check the following if the print quality is poor due to blurry prints, banding, missing colors, faded colors, and misalignment in the prints.

Checking the printer

❏ Perform a nozzle check, and then clean the print head if any of the print head nozzles are clogged.

❏ Align the print head.

Checking the paper

❏ Use paper supported by this printer.

❏ Do not print on paper that is damp, damaged, or too old.

- ❏ If the paper is curled or the envelope is puffed up, flatten it.
- ❏ Do not stack the paper immediately after printing.
- ❏ Dry the printouts completely before filing or displaying them. When drying the printouts, avoid direct sun light, do not use a dryer, and do not touch the printed side of paper.
- ❏ When printing images or photos, Epson recommends using genuine Epson paper rather than plain paper. Print on the printable side of the genuine Epson paper.

Checking the print settings

- ❏ Select the appropriate paper type setting for the type of paper loaded in the printer.
- ❏ Print using a higher quality setting.

Checking the ink cartridge

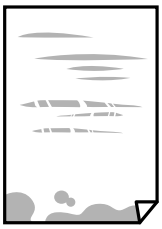

- ❏ Epson recommends using the ink cartridge before the date printed on the package.
- ❏ For best results, use up ink cartridge within six months of opening the package.
- ❏ Try to use genuine Epson ink cartridges. This product is designed to adjust colors based on the use of genuine Epson ink cartridges. The use of non-genuine ink cartridges may cause print quality to decline.

Related Information

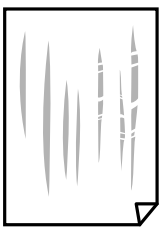

- ➡ "Checking and Cleaning the Print Head" on page 128
- ➡ "Aligning the Print Head" on page 130
- ➡ "Available Paper and Capacities" on page 55
- ➡ "List of Paper Type" on page 57
- ➡ "Paper Handling Precautions" on page 54

Paper Is Smeared or Scuffed

- ❏ When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.

- ❏ When vertical banding appears or the paper is smeared, clean the paper path.

❏ Place the paper on a flat surface to check if it is curled. If it is, flatten it.

❏ When performing manual 2-sided printing, make sure that the ink is completely dry before reloading the paper.

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57

➡ "Cleaning the Paper Path for Ink Smears" on page 130

Paper is Smeared During Automatic 2-Sided Printing

When using the automatic 2-sided printing feature and printing high density data such as images and graphs, set the print density to lower and the drying time to longer.

Related Information

➡ "Menu Options for Printer Settings" on page 136

Printed Photos are Sticky

You may be printing on the wrong side of the photo paper. Make sure you are printing on the printable side.

When printing on the wrong side of the photo paper, you need to clean the paper path.

Related Information

➡ "Cleaning the Paper Path for Ink Smears" on page 130

Images or Photos are Printed in Unexpected Colors

When printing from the Windows printer driver, the Epson auto photo adjustment setting is applied by default depending on the paper type. Try change the setting.

On the **More Options** tab, select **Custom** in **Color Correction**, and then click **Advanced**. Change the **Scene Correction** setting from **Auto Correct** to any other option. If changing the setting does not work, use any color correction method other than **PhotoEnhance** in **Color Management**.

Related Information

➡ "Adjusting the Print Color" on page 85

Colors Differ from What You See on the Display

❏ Display devices such as computer screens have their own display properties. If the display is unbalanced, the image are not displayed with proper brightness and colors. Adjust the properties of the device.

❏ Light shining into the display has an effect on how the image is seen on the display. Avoid direct sunlight and confirm the image where an appropriate illuminance is assured.

❏ Colors may differ from what you see on smart devices such as smart phones or tablets with high-resolution displays.

❏ Colors on a display are not quite identical to those on paper because the display device and the printer have a different process of producing colors.

Cannot Print Without Margins

Make borderless setting in the print settings. If you select a paper type that does not support borderless printing, you cannot select **Borderless**. Select a paper type that supports borderless printing.

Related Information

➡ "Menu Options for Paper and Print Settings for Copying Photos" on page 93
➡ "Printing Basics - Windows" on page 67
➡ "Printing Basics - Mac OS" on page 69

Edges of the Image are Cropped During Borderless Printing

During borderless printing, the image is slightly enlarged and the protruding area is cropped. Select a smaller enlargement setting.

❏ Control panel

Change the **Expansion** setting.

❏ Windows

Click **Settings** next to the **Borderless** checkbox on the printer driver's **Main** tab, and then change the settings.

❏ Mac OS

Change the **Expansion** setting from the print dialog's **Print Settings** menu.

Related Information

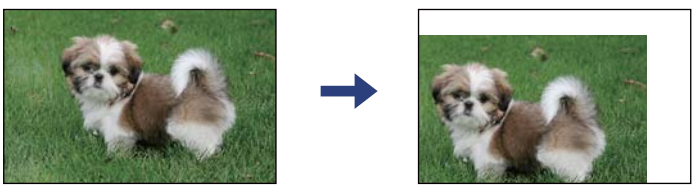

➡ "Menu Options for Paper and Print Settings for Copying Photos" on page 93

The Position, Size, or Margins of the Printout Are Incorrect

❏ Load paper in the correct direction, and slide the edge guides against the edges of the paper.

❏ When placing the originals on the scanner glass, align the corner of the original with the corner indicated by a symbol on the frame of the scanner glass. If the edges of the copy are cropped off, move the original slightly away from the corner.

❏ When placing the originals on the scanner glass, clean the scanner glass and the document cover using a dry, soft, clean cloth. If there is dust or stains on the glass, the copy area may extend to include the dust or stains, resulting in the wrong copying position or small images.

❏ Select the appropriate paper size setting.

❏ Adjust the margin setting in the application so that it falls within the printable area.

Related Information

➡ "Loading Paper in the Rear Paper Feed" on page 57
➡ "Placing Originals on the Scanner Glass" on page 61
➡ "Cleaning the Scanner Glass" on page 131
➡ "Printable Area" on page 185

Printed Characters Are Incorrect or Garbled

❏ Connect the USB cable securely to the printer and the computer.

❏ Cancel any paused print jobs.

❏ Do not put the computer manually into the **Hibernate** mode or the **Sleep** mode while printing. Pages of garbled text may be printed next time you start the computer.

❏ If you use the printer driver you had previously used, printed characters may be garbled. Make sure that the printer driver you are using is for this printer. Check the printer name on the top of the printer driver window.

The Printed Image Is Inverted

Clear any mirror image settings in the printer driver or the application.

❏ Windows

Clear **Mirror Image** on the printer driver's **More Options** tab.

❏ Mac OS

Clear **Mirror Image** from the print dialog's **Print Settings** menu.

Mosaic-Like Patterns in the Prints

When printing images or photos, print using high-resolution data. Images on websites are often low resolution although they look good enough on the display, and so print quality may decline.

Uneven Colors, Smears, Dots, or Straight Lines Appear in the Copied Image

❏ Clean the paper path.

❏ Clean the scanner glass.

❏ Do not press too hard on the original or the document cover when you are placing the originals on the scanner glass.

❏ When the paper is smeared, lower the copy density setting.

Related Information

➡ "Cleaning the Paper Path for Ink Smears" on page 130

➡ "Cleaning the Scanner Glass" on page 131

Moiré (Cross-Hatch) Patterns Appear in the Copied Image

Change the reduce and enlarge setting or place the original at a slightly different angle.

Related Information

➡ "Menu Options for Copying" on page 94

An Image of the Reverse Side of the Original Appears in the Copied Image

❏ For a thin original, place the original on the scanner glass and then place a piece of black paper over it.

❏ Lower the copy density setting on the control panel.

Related Information

➡ "Menu Options for Copying" on page 94

The Printout Problem Could Not be Cleared

If you have tried all of the solutions and have not solved the problem, try uninstalling and then reinstalling the printer driver.

Related Information

➡ "Uninstalling Applications" on page 153
➡ "Installing Applications" on page 151

Other Printing Problems

Printing Is Too Slow

❏ Close any unnecessary applications.

❏ Lower the quality setting. High quality printing slows down the printing speed.

❏ Enable the bidirectional (or high speed) setting. When this setting is enabled, the print head prints while moving in both directions, and the printing speed increases.

❏ Windows

Select **High Speed** on the printer driver's **More Options** tab.

❏ Mac OS

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **On** as the **High Speed Printing** setting.

❏ Disable quiet mode. This feature slows down the printing speed.

❏ Control Panel

Select on the home screen, and then disable **Quiet Mode**.

❏ Windows

Select **Off** as the **Quiet Mode** setting on the printer driver's **Main** tab.

❏ Mac OS

Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **Off** as the **Quiet Mode** setting.

Printing or Copying Slows Down Dramatically During Continuous Operation

Printing or Copying slows down to prevent the printer mechanism from overheating and being damaged. However, you can continue operation. To return to normal speed, leave the printer idle for at least 30 minutes. The speed does not return to normal if the power is off.

Cannot Cancel Printing from a Computer Running Mac OS X v10.6.8

If you want to stop printing from your computer, make the following settings.

Run Web Config, and then select **Port9100** as the **Top Priority Protocol** setting in **AirPrint Setup**. Select **System Preferences** from the menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), remove the printer, and then add the printer again.

Cannot Start Scanning

❏ Connect the USB cable securely to the printer and the computer. If you are using a USB hub, try to connect the printer directly to the computer.

❏ If you scan at a high resolution over a network, a communication error may occur. Lower the resolution.

❏ Make sure that the correct printer (scanner) is selected on Epson Scan 2.

Check whether or not the printer is recognized when using Windows

In Windows, make sure the printer (scanner) is displayed in **Scanner and Camera**. The printer (scanner) should be displayed as "EPSON XXXXX (printer name)". If the printer (scanner) is not displayed, uninstall and then re-install Epson Scan 2. See the following to access **Scanner and Camera**.

❏ Windows 10

Click on the start button, and then select **Windows System** > **Control Panel**, enter "Scanner and Camera" in the search charm, click **View scanners and cameras**, and then check if the printer is displayed.

❏ Windows 8.1/Windows 8

Select **Desktop** > **Settings** > **Control Panel**, enter "Scanner and Camera" in the search charm, click **Show Scanner and Camera**, and then check if the printer is displayed.

❏ Windows 7

Click the start button and select **Control Panel**, enter "Scanner and Camera" in the search charm, click **View scanners and cameras**, and then check if the printer is displayed.

❏ Windows Vista

Click the start button, select **Control Panel** > **Hardware and Sound** > **Scanners and Cameras**, and then check if the printer is displayed.

❏ Windows XP

Click the start button, select **Control Panel** > **Printers and Other Hardware** > **Scanner and Cameras**, and then check if the printer is displayed.

Related Information

➡ "Uninstalling Applications" on page 153

➡ "Installing Applications" on page 151

Cannot Start Scanning when Using the Control Panel

❏ Make sure Epson Scan 2 and Epson Event Manager are installed correctly.

❏ Check the scanning setting assigned in Epson Event Manager.

Scanned Image Problems

Uneven Colors, Dirt, Spots, and so on Appear when Scanning from the Scanner Glass

❏ Clean the scanner glass.

❏ Remove any trash or dirt that adheres to the original.

❏ Do not press with too much force on the original or the document cover. If you press with too much force, blurring, smudges, and spots may occur.

Related Information

➡ "Cleaning the Scanner Glass" on page 131

The Image Quality Is Rough

❏ Set the **Mode** in Epson Scan 2 according to the original you want to scan. Scan using the settings for documents in **Document Mode**, and the settings for photos in **Photo Mode**.

❏ In Epson Scan 2, adjust the image using items on the **Advanced Settings** tab, and then scan.

❏ If the resolution is low, try increasing the resolution and then scanning.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Offset Appears in the Background of Images

Images on the back of the original may appear in the scanned image.

❏ In Epson Scan 2, select the **Advanced Settings** tab, and then adjust the **Brightness**.

This feature may not be available depending on the settings on the **Main Settings** tab > **Image Type** or other settings on the **Advanced Settings** tab.

❏ In **Document Mode** in Epson Scan 2, select the **Advanced Settings** tab, and then **Image Option** > **Text Enhancement**.

❏ When scanning from the scanner glass, place black paper or a desk pad over the original.

Related Information

➡ "Placing Originals" on page 61

Text is Blurred

❏ In **Document Mode** in Epson Scan 2, select the **Advanced Settings** tab, and then **Image Option** > **Text Enhancement**.

❏ Select **Document Mode** as the **Mode** in Epson Scan 2. Scan using the settings for documents in **Document Mode**.

❏ In **Document Mode** in Epson Scan 2, when **Image Type** on the **Main Settings** tab is set to **Black & White**, adjust **Threshold** on the **Advanced Settings** tab. When you increase the **Threshold**, the black color area becomes larger.

❏ If the resolution is low, try increasing the resolution and then scanning.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Moiré Patterns (Web-Like Shadows) Appear

If the original is a printed document, moiré patterns (web-like shadows) may appear in the scanned image.

❏ On the **Advanced Settings** tab in Epson Scan 2, set **Descreening**.

❏ Change the resolution, and then scan again.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Cannot Scan the Correct Area on the Scanner Glass

❏ Make sure the original is placed correctly against the alignment marks.

❏ If the edge of the scanned image is missing, move the original slightly away from the edge of the scanner glass.

❏ When placing multiple originals on the scanner glass, make sure there is a gap of at least 20 mm (0.79 in.) between the originals.

❏ When scanning from the control panel and selecting the auto scan area cropping function, remove any trash or dirt from the scanner glass and document cover. If there is any trash or dirt around the original, the scanning range expands to include it.

Related Information

➡ "Placing Originals" on page 61

➡ "Cleaning the Scanner Glass" on page 131

Cannot Preview in Thumbnail

❏ When placing multiple originals on the scanner glass, make sure there is a gap of at least 20 mm (0.79 in.) between the originals.

❏ Check that the original is placed straight.

❏ Depending on the original, previewing may not be performed in **Thumbnail**. In this situation, clear the **Thumbnail** check box at the top of the preview widow to preview the entire scanned area, and then create marquees manually.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Text is Not Recognized Correctly when Saving as a Searchable PDF

❏ On the **Image Format Options** window in Epson Scan 2, check that **Text Language** is set correctly on the **Text** tab.

- ❏ Check that the original is placed straight.
- ❏ Use an original with clear text. Text recognition may decline for the following types of originals.
  - ❏ Originals that have been copied a number of times
  - ❏ Originals received by fax (at low resolutions)
  - ❏ Originals on which the letter spacing or line spacing is too small
  - ❏ Originals with ruled lines or underlining over the text
  - ❏ Originals with hand-written text
  - ❏ Originals with creases or wrinkles
- ❏ In **Document Mode** in Epson Scan 2, when **Image Type** on the **Main Settings** tab is set to **Black & White**, adjust **Threshold** on the **Advanced Settings** tab. When you increase the **Threshold**, black becomes stronger.
- ❏ In **Document Mode** in Epson Scan 2, select the **Advanced Settings** tab, and then **Image Option** > **Text Enhancement**.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Cannot Solve Problems in the Scanned Image

If you have tried all of the solutions and have not solved the problem, initialize the Epson Scan 2 settings using Epson Scan 2 Utility.

Note:
Epson Scan 2 Utility is an application that comes with Epson Scan 2.

1. Start Epson Scan 2 Utility.
   - ❏ Windows 10

     Click the start button, and then select **EPSON** > **Epson Scan 2 Utility**.
   - ❏ Windows 8.1/Windows 8

     Enter the application name in the search charm, and then select the displayed icon.
   - ❏ Windows 7/Windows Vista/Windows XP

     Click the start button, and then select **All Programs** or **Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**.
   - ❏ Mac OS

     Select **Go** > **Applications** > **Epson Software** > **Epson Scan 2 Utility**.
2. Select the **Other** tab.
3. Click **Reset**.

   Note:
   If initialization does not solve the problem, uninstall and re-install Epson Scan 2.

Related Information

➡ "Uninstalling Applications" on page 153

➡ "Installing Applications" on page 151

Other Scanning Problems

Scanning Is Too Slow

Lower the resolution.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Scanning Slows Down Dramatically During Continuous Scanning

Scanning slows down to prevent the printer mechanism from overheating and being damaged. However, you can continue scanning. To return to normal scanning speed, leave the printer idle for at least 30 minutes. Scanning speed does not return to normal if the power is off.

Scanning Stops when Scanning to PDF/Multi-TIFF

- ❏ When scanning using Epson Scan 2, you can continuously scan up to 999 pages in PDF format and up to 200 pages in Multi-TIFF format.
- ❏ When scanning large volumes, we recommend scanning in grayscale.
- ❏ Increase the free space on the computer's hard disk. Scanning may stop if there is not enough free space.
- ❏ Try scanning at a lower resolution. Scanning stops if the total data size reaches the limit.

Related Information

➡ "Scanning Using Epson Scan 2" on page 104

Other Problems

Slight Electric Shock when Touching the Printer

If many peripherals are connected to the computer, you may feel a slight electric shock when touching the printer. Install a ground wire to the computer that is connected to the printer.

Operation Sounds Are Loud

If operations sounds are too loud, enable **Quiet Mode**. Enabling this feature may reduce printing speed.

❏ Control panel

Select  on the home screen, and then enable **Quiet Mode**.

❏ Windows printer driver

Enable **Quiet Mode** on the **Main** tab.

❏ Mac OS printer driver

Select **System Preferences** from the  menu > **Printers & Scanners** (or **Print & Scan**, **Print & Fax**), and then select the printer. Click **Options & Supplies** > **Options** (or **Driver**). Select **On** as the **Quiet Mode** setting.

Application Is Blocked by a Firewall (for Windows Only)

Add the application to the Windows Firewall allowed program in security settings on the **Control Panel**.

Appendix

Technical Specifications

Printer Specifications

Print Head Nozzle Placement		Black ink nozzles: 180 Color ink nozzles: 59 for each color
Weight of Paper*	Plain Paper	64 to 90 g/m²(17 to 24lb)
	Envelopes	Envelope #10, DL, C6: 75 to 90 g/m² (20 to 24 lb)

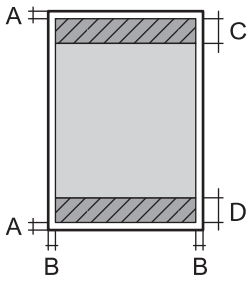

* Even when the paper thickness is within this range, the paper may not feed in the printer or the print quality may decline depending on the paper properties or quality.

Printable Area

Printable Area for Single Sheets

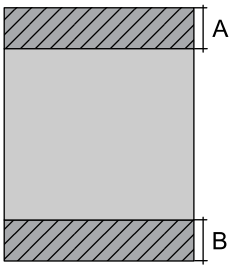

Print quality may decline in the shaded areas due to the printer's mechanism.

Printing with borders

A	3.0 mm (0.12 in.)
B	3.0 mm (0.12 in.)
C	41.0 mm (1.61 in.)
D	37.0 mm (1.46 in.)

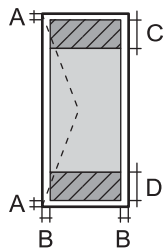

Borderless printing

A	44.0 mm (1.73 in.)
B	40.0 mm (1.57 in.)

Printable Area for Envelopes

Print quality may decline in the shaded areas due to the printer's mechanism.

A	3.0 mm (0.12 in.)
B	5.0 mm (0.20 in.)
C	18.0 mm (0.71 in.)
D	41.0 mm (1.61 in.)

Scanner Specifications

Scanner Type	Flatbed
Photoelectric Device	CIS
Maximum Document Size	216×297 mm (8.5×11.7 in.) A4, Letter
Resolution	1200 dpi (main scan) 2400 dpi (sub scan)
Color Depth	Color ❏ 48 bits per pixel internal (16 bits per pixel per color internal) ❏ 24 bits per pixel external (8 bits per pixel per color external) Grayscale ❏ 16 bits per pixel internal ❏ 8 bits per pixel external Black and white ❏ 16 bits per pixel internal ❏ 1 bits per pixel external
Light Source	LED

Interface Specifications

For Computer	Hi-Speed USB*

* USB 3.0 cables are not supported.

Network Function List

Network Functions and IPv4/IPv6

Functions			Supported	Remarks
Network Printing	EpsonNet Print (Windows)	IPv4	✓	-
	Standard TCP/IP (Windows)	IPv4, IPv6	✓	-

Wi-Fi Specifications

Standards	IEEE802.11b/g/n[*1]
Frequency Range	2.4 GHz
Maximum Radio-Frequency Power Transmitted	20 dBm (EIRP)
Coordination Modes	Infrastructure, Wi-Fi Direct (Simple AP)[*2][*3]
Wireless Securities[*4]	WEP (64/128bit), WPA2-PSK (AES)[*5]

*1 IEEE802.11n is only available for the HT20.

*2 Not supported for IEEE 802.11b.

*3 Simple AP mode is compatible with a Wi-Fi connection (infrastructure).

*4 Wi-Fi Direct supports WPA2-PSK (AES) only.

*5 Complies with WPA2 standards with support for WPA/WPA2 Personal.

Security Protocol

SSL/TLS	HTTPS Server/Client, IPPS

Supported Third Party Services

AirPrint	Print	iOS 5 or later/Mac OS X v10.7.x or later
	Scan	OS X Mavericks or later

Dimensions

Dimensions	Storage ❏ Width: 375 mm (14.8 in.) ❏ Depth: 300 mm (11.8 in.) ❏ Height: 170 mm (6.7 in.) Printing ❏ Width: 375 mm (14.8 in.) ❏ Depth: 578 mm (22.8 in.) ❏ Height: 242 mm (9.5 in.)
Weight*	Approx. 4.3 kg (9.5 lb)

* Without the ink cartridges and the power cord.

Electrical Specifications

Power Supply Rating	AC 100-240 V	AC 220-240 V
Rated Frequency Range	50-60 Hz	50-60 Hz
Rated Current	0.4-0.2 A	0.2 A

Power Consumption (with USB Connection)	Standalone copying: Approx. 12.0 W (ISO/IEC24712) Ready mode: Approx. 5.0 W Sleep mode: Approx. 0.8 W Power off: Approx. 0.3 W	Standalone copying: Approx. 12.0 W (ISO/IEC24712) Ready mode: Approx. 5.0 W Sleep mode: Approx. 0.8 W Power off: Approx. 0.3 W

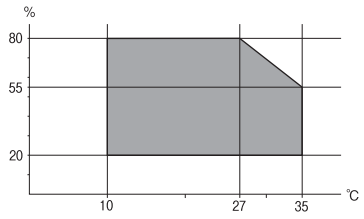

Note:

❏ *Check the label on the printer for its voltage.*

❏ *For European users, see the following Website for details on power consumption.*

http://www.epson.eu/energy-consumption

Environmental Specifications

Operation	Use the printer within the range shown in the following graph.  Temperature: 10 to 35°C (50 to 95°F) Humidity: 20 to 80% RH (without condensation)
Storage	Temperature: -20 to 40°C (-4 to 104°F)* Humidity: 5 to 85% RH (without condensation)

* You can store for one month at 40°C (104°F).

Environmental Specifications for Ink Cartridges

Storage Temperature	-30 to 40 °C (-22 to 104 °F)*
Freezing Temperature	-16 °C (3.2 °F) Ink thaws and is usable after approximately 3 hours at 25 °C (77 °F).

* You can store for one month at 40 °C (104 °F).

System Requirements

❏ Windows

Windows Vista, Windows 7, Windows 8/8.1, Windows 10 or later (32-bit, 64-bit)

Windows XP SP3 (32-bit)

Windows XP Professional x64 Edition SP2

❏ Mac OS

Mac OS X v10.6.8 or later, macOS 11 or later

Note:

❏ *Mac OS may not support some applications and features.*

❏ *The UNIX File System (UFS) for Mac OS is not supported.*

Regulatory Information

Standards and Approvals

Standards and Approvals for European Model

For European users

Hereby, Seiko Epson Corporation declares that the following radio equipment model is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following website.

http://www.epson.eu/conformity

C636B

For use only in Ireland, UK, Austria, Germany, Liechtenstein, Switzerland, France, Belgium, Luxemburg, Netherlands, Italy, Portugal, Spain, Denmark, Finland, Norway, Sweden, Iceland, Croatia, Cyprus, Greece, Slovenia, Malta, Bulgaria, Czech, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, and Slovakia.

Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the products.

CE

Restrictions on Copying

Observe the following restrictions to ensure the responsible and legal use of the printer.

Copying of the following items is prohibited by law:

❏ Bank bills, coins, government-issued marketable securities, government bond securities, and municipal securities

❏ Unused postage stamps, pre-stamped postcards, and other official postal items bearing valid postage

❏ Government-issued revenue stamps, and securities issued according to legal procedure

Exercise caution when copying the following items:

❏ Private marketable securities (stock certificates, negotiable notes, checks, etc.), monthly passes, concession tickets, etc.

❏ Passports, driver's licenses, warrants of fitness, road passes, food stamps, tickets, etc.

Note:

Copying these items may also be prohibited by law.

Responsible use of copyrighted materials:

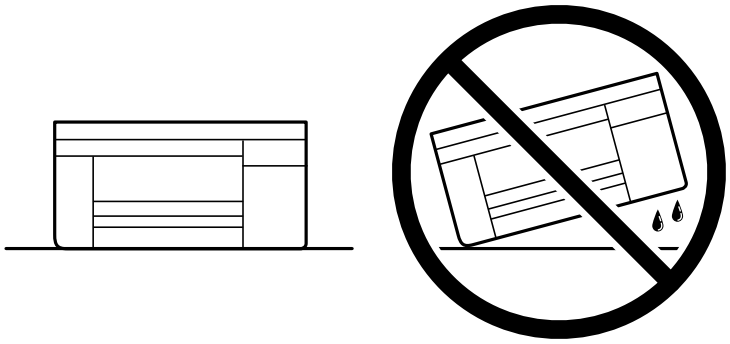

Printers can be misused by improperly copying copyrighted materials. Unless acting on the advice of a knowledgeable attorney, be responsible and respectful by obtaining the permission of the copyright holder before copying published material.

Transporting and Storing the Printer

When you need to transport the printer to move or for repairs, follow the steps below to pack the printer.

> ***Caution:***
> *Be careful not to trap your hand or fingers when opening or closing the scanner unit. Otherwise you may be injured.*

> ***Important:***
> ❏ *When storing or transporting the printer, avoid tilting it, placing it vertically, or turning it upside down; otherwise ink may leak.*

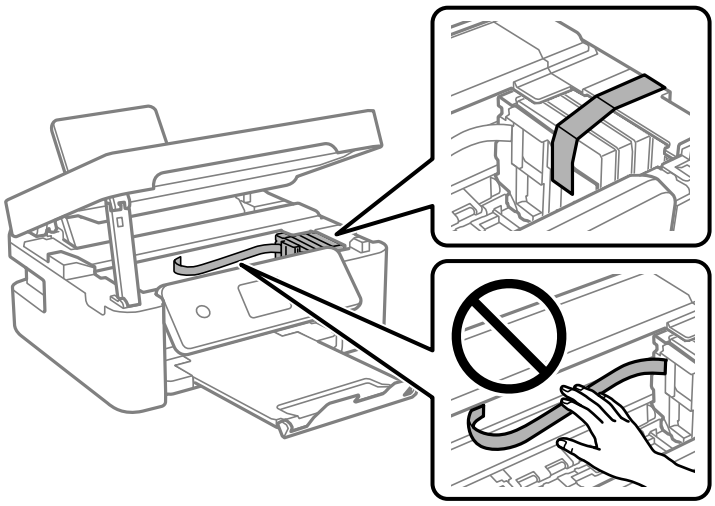

> ❏ *Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the printer from printing.*

1. Turn off the printer by pressing the ⏻ button.
2. Make sure the power light turns off, and then unplug the power cord.

> ***Important:***
> *Unplug the power cord when the power light is off. Otherwise, the print head does not return to the home position causing the ink to dry, and printing may become impossible.*

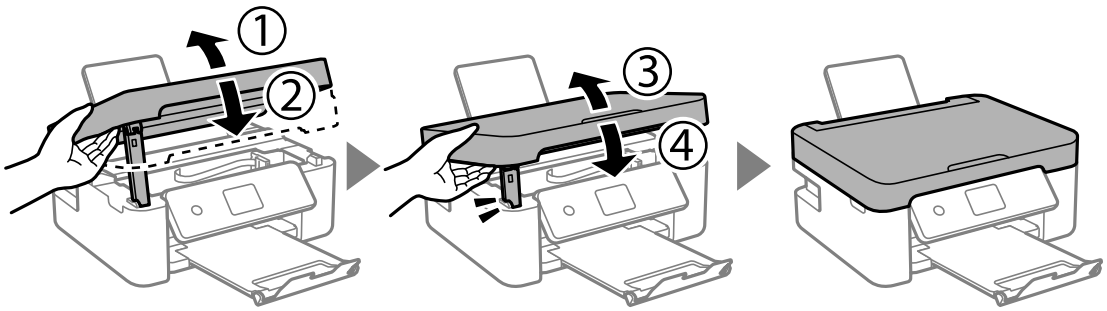

3. Disconnect all cables such as the power cord and USB cable.
4. Remove all of the paper from the printer.
5. Make sure there are no originals on the printer.

6. Open the scanner unit with the document cover closed. Secure the ink cartridge holder to the case with tape.

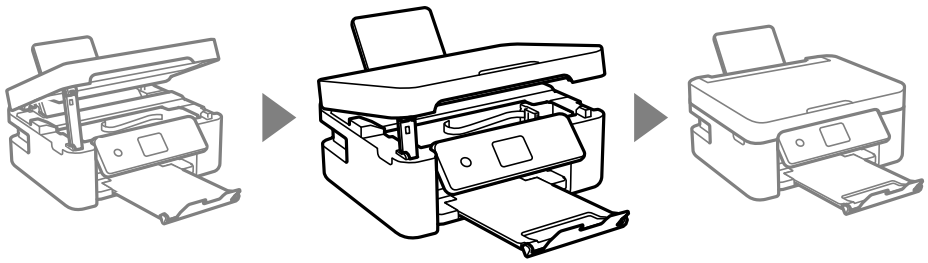

7. Close the scanner unit.

   For safety, the scanner unit is closed in two steps.

Note:
The scanner unit cannot be opened from the position shown below. Close it completely before opening it.

8. Prepare to pack the printer as shown below.

9. Pack the printer in its box, using the protective materials.

When you use the printer again, make sure you remove the tape securing the ink cartridge holder. If print quality has declined the next time you print, clean and align the print head.

Where to Get Help

Technical Support Web Site

If you need further help, visit the Epson support website shown below. Select your country or region and go to the support section of your local Epson website. The latest drivers, FAQs, manuals, or other downloadables are also available from the site.

http://support.epson.net/

http://www.epson.eu/Support (Europe)

If your Epson product is not operating properly and you cannot solve the problem, contact Epson support services for assistance.

Contacting Epson Support

Before Contacting Epson

If your Epson product is not operating properly and you cannot solve the problem using the troubleshooting information in your product manuals, contact Epson support services for assistance.

The following Epson support list is based on the country of sale. Some products may not be sold in your current location, so be sure to contact Epson support for the area in which you purchased your product.

If Epson support for your area is not listed below, contact the dealer where you purchased your product.

Epson support will be able to help you much more quickly if you give them the following information:

❏ Product serial number

(The serial number label is usually on the back of the product.)

❏ Product model

❏ Product software version

(Click **About**, **Version Info**, or a similar button in the product software.)

❏ Brand and model of your computer

❏ Your computer operating system name and version

❏ Names and versions of the software applications you normally use with your product

Note:
Depending on the product, network settings may be stored in the product's memory. Due to breakdown or repair of a product, settings may be lost. Epson shall not be responsible for the loss of any data, for backing up or recovering settings even during a warranty period. We recommend that you make your own backup data or take notes.

Help for Users in Europe

Check your Pan-European Warranty Document for information on how to contact Epson support.

Help for Users in Taiwan

Contacts for information, support, and services are:

World Wide Web

http://www.epson.com.tw

Information on product specifications, drivers for download, and products enquiry are available.

Epson HelpDesk

Phone: +886-2-80242008

Our HelpDesk team can help you with the following over the phone:

❏ Sales enquiries and product information

❏ Product usage questions or problems

❏ Enquiries on repair service and warranty
