Precautions:

Always follow safety advice.

Always switch off and unplug the appliance before attempting to remove any part.

Always wear appropriate protective equipment when carrying out any work.

Always use the correct tools for carrying out any work.

Some repairs may not be suitable for unqualified users to carry out. If in doubt seek the advice of a profession repairer.

SAFETY PRECAUTIONS

Before any disassembly/repair operation make sure appliance is unplugged, water tap is closed and heating elements are cooled down. There is electrical shock, burning and flood risk.

Please replace whole cable group even in case there is any minor failure with cables / terminals / sockets. Never try to repair nor to solder cable group. It may cause smoke, ignition and there is major risk of electrical shock.

Straightly pull out or insert the terminals.
Do not twist it. It may be the cause of damage or ignition.

Always use insulator gloves to prevent injury by metal edges or to prevent electrical shock during electrical tests.
Work with uniforms having long sleeves to protect your arms from metal edges.

Always use original spare parts. You may harm appliance, end user, environment or yourself using untested and unapproved 3rd party spare parts.

Use right tools to prevent any wear or damage to components during assembly/disassembly.

Do not touch any rotating object with hand unless it stops completely. Slow rotation may also roll in your hands and cause injury.

Rebuilding is prohibited. Do not rebuild machine parts and components when repairing service. It may be the cause of damage or ignition.

1. Necessary Tools

- A. Pliers
- B. Flat head thin screwdriver
- C. Cordless screwdriver or classic screwdriver with torx bits (T20)

2. Disconnection

2.1. Remove the plug

2.2. Turn off the tap and disconnect the hose from the valve
