ALBA   3

Safety information   1

⚠ Safety information

Important - Please read these instructions fully before installing or operating

```
⚠   CAUTION           ⚡
    RISK OF ELECTRIC SHOCK
    DO NOT OPEN
```

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER(OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

⚡ The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock of persons.

⚠ The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Power source

- The TV should be operated only from a 100-240V AC, 50 Hz outlet.
- **Warning:** Do not leave your TV in standby or operating mode when you leave your house.

Positioning the TV

- For ventilation, please leave a clear space of at least 10cm all around the TV.

```
        10cm
  10cm  [TV]  10cm
```
- **Do not** block the ventilation openings.
- Do not place the TV on sloping or unstable surfaces, the TV may tip over.
- To prevent damage to the TV, do not place any objects on top of the TV.
- Only use the TV in moderate climates.

Power cord and plug

- The power cord plug should be easily accessible. In case of storms and lightning, when going on holiday, or when the TV is not used for a long period of time disconnect the power cord from the mains power socket.
- **Do not** place the TV, furniture, etc. on the power cord or pinch the cord.
- Handle the power cord by the plug, do not unplug the TV by pulling the power cord.
- Never touch the power cord/plug with wet hands as this could cause a short circuit or electric shock.
- Never make a knot in the power cord or tie it with other cords.
- Power cords should be placed in such away that they are not likely to be stepped on or driven over.
- A damaged power cord/plug can cause fire or give you an electric shock. When damaged it must be replaced, this should only be done by qualified personnel.

Moisture and Water

- **Do not** use this TV in a humid or damp place (avoid bathrooms, the sink in the kitchen, and near the washing machine).
- **Do not** expose this TV to rain or water, as this may be dangerous.
- **Do not** place objects filled with liquids, such as flower vases, on top of the TV. Avoid from dripping or splashing.
- If any solid object or liquid falls into the cabinet, unplug the TV and have it checked by qualified personnel before operating it any further.

Ventilation

- The slots and openings on the TV set are intended for ventilation and to ensure reliable operation.
- To prevent overheating, these openings must not be blocked or covered in anyway.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,

ALBA

⚠ Safety information

Important - Please read these instructions fully before installing or operating

Headphone volume

- Excessive sound pressure from earphones and headphones can cause hearing loss, please take care.

Headphone volume

To prevent injury, this TV must be securely attached to the wall in accordance with the installation instructions (if the option is available).

LCD Screen

- The LCD screen is a very high technology product with about a million thin film transistors, giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as a fixed blue, green or red point. Please note that this does not affect the performance of your product.

- Take care not to scratch the screen with fingernails or other hard objects.

Cleaning

- Before cleaning, unplug the TV from the wall socket.

- **Do not** use liquid or aerosol cleaners. Only use a soft, dry cloth.

Batteries

- **Warning:** Incorrect installation of batteries may cause battery leakage and corrosion, resulting in damage to the remote control.

- **Do not** mix old and new batteries, or batteries of different types.

- **Do not** dispose of batteries in a fire.

- **Do not** dispose of batteries with normal household waste, take to a local recycling centre.

Replacement parts

When replacement parts are required, make sure that the service technician has used replacement parts, which are specified by the manufacturer or have the same specifications as the original one. Unauthorised substitutions may result in fire, electrical shock or other hazards.

Servicing

Warning: Risk of exposure to radiation from class 1/class 3b visible and invisible laser beams. **Do not** open the TV and stare directly into beam.

Warning: Risk of electric shock, do not attempt to repair, service or modify this TV yourself. Contact the manufacturer, their approved service agent or the **Customer Helpline: 0345 604 0105 .**

▣ This equipment is a Class II or double insulated electrical appliance. It has been designed in such a way that it does not require a safety connection to electrical earth.

⚕ Warning: To prevent the spread of fire, keep candles or other open flames away from this product at all times.

or online at **www.argos-support.co.uk** If you still require further assistance, call one of our experts on **0345 604 0105.**

Quick start guide

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,
Getting Started
You'll be up and running in no time

Installing / Removing the Base Stand

Base Stand Assembly Instruction

1. Place the TV with the display side down on a flat surface.Use a cloth to protect. Locate the bottom at the stand.
2. Fix the bottom with turning the screw (4PCS)tightly on the stand.

INSTALLATION NOTES

This TV can be connected to an AC 100-240 Volts, 50/60 Hz power supply. Never connect straight to a DC power supply.

Locate the TV in a room where light does not strike the screen directly. Total darkness or a reflection on the screen can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing.

Allow enough space between the TV and the wall to permit ventilation.

Avoid excessively warm locations to prevent possible damage to the cabinet or premature component failure.

WALL MOUNTING INSTALLATION GUIDELINES
This television can be wall mounted as follows:

1. Place the LED LCD Television onto a solid surface. Please place some soft material over the front of the screen to protect it from any damage.
2. Remove the stand base by undoing the 4 screws (retain the stand base for future use).
3. To prevent injury, this TV must be securely attached to the wall in accordance with the bracket installation instructions. Please note VESA size is 100 x 100mm. 4x M6*12 bolts are required to secure the bracket to the VESA standard holes on the back of the television.
100 x 100mm VESA mount

Aerial connection

Connect the "aerial" or "cable TV" plug to AERIAL INPUT (ANT.) socket located on the back of the TV .

Power connection

Please note: After unpacking, allow the TV to reach ambient room temperature before connecting the TV to the mains power socket.
Connect the power cord plug to the mains power socket.

Getting Started
You'll be up and running in no time

Remote control - Inserting batteries

Remove the battery cover on the back of the remote control, gently push down and pull backwards at the same time as shown.

Insert two AAA or equivalent type batteries. Ensure the batteries are inserted the correct way and replace the battery cover.

Note: When the remote control is not going to be used for long periods of time, the batteries should be removed. Otherwise the remote control may be damaged, caused by battery leakage and corrosion.

**AAA X2
Batteries**
Switching the TV On and Off

Switching the TV On
With power cord plug connected to the mains power socket and TV in '**Standby**' mode.
To switch the TV on from standby mode, either:

a: The Remote control; Press the " ⏻ " button.

b: The TV; Press the " ⏻ " button at the right of the TV.

Switching the TV Off
Either press the " ⏻ " button on the remote control or press the " ⏻ " button at the right of the TV, the TV will then switch to standby mode.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,

16   ALBA   Getting Started

Getting Started
You'll be up and running in no time

Operation using TV control buttons

The **VOL+/VOL-** buttons will function as volume up/ down as default. Even if you set other functions for these buttons, the **VOL+/VOL-** buttons will return to volume control after a short while.

Volume Setting

Press **VOL+/VOL-** buttons to increase or decrease volume.

Channel Selection

Press **CH+/CH-** buttons to select the next or previous channel.
The remote control is designed to control all the functions of the model you selected.

Volume Setting

Press **VOL+** button to increase the volume. Press **VOL-** button to decrease the volume. A volume level scale (slider) will be displayed on the screen.

Channel Selection (Previous or Next Channel)

Press **CH-** button to select the previous channel.
Press **CH+** button to select the next channel.

Channel Selection (Direct Access)

Press number buttons on the remote control to select programmes between 0 and 9. The TV will switch to the selected channel.

To Program Your SKY Remote For Your TV

Set up your Sky Q remote to control your TV
To set up your Sky Q remote to control the volume, power and input source on your new TV press Menu, select Settings, then Setup, then Remote control. Select your Sky Q remote and follow the on screen instructions.

1.Make sure your SKY box is connected to your TV
2.Turn your TV and SKY box on
3.Press TV on your SKY remote control handset
4.Hold down SELECT and the RED button together for about two seconds, until the red light on the SKY remote blinks twice.
5.Key in 3992 on your SKY remote. The light on the SKY remote should blink twice
6.Press the STANDBY button on your SKY remote control. Your TV should now switch off.
7.Press SELECT again. The light on your SKY remote control should now blink twice

You should now be able to control some basic functions on your TV from your SKY remote control (e.g. volume up/ down, programme up/down).
*If this number does not work, please go to SKY website to find the alternative number to operate the TV.

or online at **www.argos-support.co.uk** If you still require further assistance, call one of our experts on **0345 604 0105.**

How to use your TV   ALBA   27

How to use your TV
Let's get started

VIEWING TELETEXT
Digital TV (DTV) channels only

IMPORTANT: Before viewing Teletext, you need to turn the Subtitle function off if it is switched on.

Note: Before turning Teletext on, check that the TV channel you are watching transmits Teletext. If it does not, **NO Teletext** will be shown on the screen.

1. Press the ◄◄ /TTX button on the remote control to display the Teletext menu.

2. Follow the information on the Teletext page to access the page you want to view. You can also use the **0** to **9** buttons on the remote control to enter the page number you want to view.
3. You can also press the **RED** button on the remote control instead of the ◄◄ /**TTX** button when the red Teletext logo is shown on the TV screen.
4. Press the ◄◄ /**TTX** button again to exit the Teletext menu.

How to select a page of text

1. Find the number of the page you wish to view and enter it in the search panel using the **0** to **9** buttons on the remote control then press the **OK** button.
2. The page counter will search for your page you wish to view. When the page is found it will automatically be displayed.
3. To move to the next or previous page use the ▲▼ buttons on the remote control.
4. To return to the index page, enter **100** into the search panel using the **0** to **9** buttons on the remote control and press the **OK** button or press the **INDEX** button.

How to use Fast Text
At the bottom of the Teletext page, there is a row of subject headings coloured in Red, Green, Yellow and Blue. To access these pages, simply press the correspondingly coloured buttons on the remote control.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,
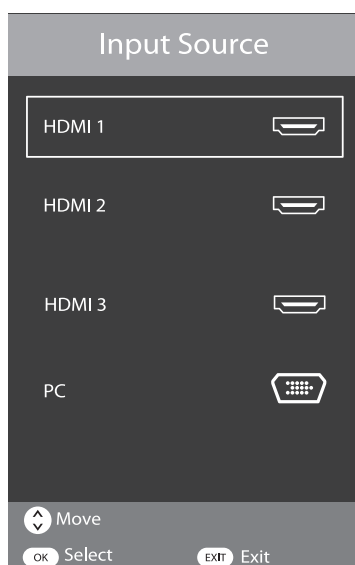

28   ALBA   How to use your TV

How to use your TV
Let's get started

USING THE TIME SHIFT FUNCTION

Digital (DTV) channels only
This function lets you quickly record the TV programme you are watching if you have to leave the room.

IMPORTANT: Please make sure a USB storage device has been attached to your TV before using the Time Shift function.

IMPORTANT: If the transfer rate of the attached USB storage device is too slow for the Time Shift function, a warning statement will be shown on the TV's screen. If this happens, please upgrade your USB storage device.

IMPORTANT: Time Shift mode may not work if the stations signal strength is too weak.

NOTE: Always stop the Time Shift function by pressing the ■ button before switching to another input source.

Using the Time Shift function
1. To start Time Shift, press the **TIMESHIFT** button on the remote control to pause the programme you are watching. The Time Shift symbol will be displayed

2. When you wish to resume watching the programme, press the ▶II button on the remote control to show the PVR Time Shift progress bar.

3. Use the ◀▶ buttons to select the button on the progress bar then press the OK button to start watching the programme. ▶ will be displayed in the top left of the TV screen showing you are watching a programme in Time Shift.

4. Press the ■ button to stop the Time Shift recording and return to the live TV broadcast.

Alternatively: You can press the ● (red dot) button on the remote control to display the PVR Time Shift progress bar and then use the ◀▶ buttons to select ▶II on the bar then press the **OK** button to start playback.

Note: There may be a slight delay with the video and the sound may be slightly out of sync for a few seconds when you start watching the recorded programme. This will soon stop and the programme will play correctly.
The Time Shift progress bar
Use the ◀▶ buttons to navigate through the progress bar. Once you have selected the feature you wish to use press the **OK** button.

1. Shows the channel and name of the recorded programme.

2. **PLAY:** Select to play your recording.

3. **STOP:** Select to stop play back.

4. **PAUSE:** Select to pause the recording.

5. **FB:**Select to rewind your recording at x2 / x4 / x8 / x16 / x32 speed.

6. **FF:** Select to fast forward the recording at x1 / x2 / x4 / x8 / x16 / x32 speed.

7. **Slow:** Select to view the recording in slow motion. Press the OK button multiple times choose between 2 /4 / 8 / 16 / 32 playback speeds..

8. **Time Play:** Select to enter a time you wish to view the recording from using the 0 to 9 buttons on the remote control.

9. **Backward:** Select to move the recording backwards 30s of the recording.

10. **Forward:** Select to move the recording forwards 30s of the recording.

11. Shows the amount of playback time the recording has remaining.

12. Shows the amount of memory remaining on your USB drive.

Using the remote control with Time Shift

You can use the buttons on the remote control to control playback in Time Shift.

▶II Press to start and pause playback.

◀◀ Press repeatedly to rewind at x2 / x4 / x8 / x16 / x32 speed.

▶▶ Press repeatedly to fast forwards at x2 / x4 / x8 / x16 / x32 speed.

Important: To return to normal playback press the ▶II button.

I◀◀ Press to jump backwards approximately 30s of the recording time.

▶▶I Press to jump forwards approximately 30s of the recording time.

■ Press to stop the Time Shift recording.

RECORDING DTV PROGRAMMES

Digital (DTV) channels only

You can record digital TV programs onto a USB drive using either direct recording by pressing the red dot button or using the program timer function.

IMPORTANT: You must have a USB storage device attached to your TV to use the recording function.

IMPORTANT: If the transfer rate of the attached USB storage device is too slow for the recording function, a warning statement will be shown on the TV's screen. If this happens, please upgrade your USB storage device.

IMPORTANT: Recording mode may not work if the stations signal strength is too weak.

Instant recording

This option is used to record the Programme you are watching.

Press ● record button on the remote control to record the programme you are currently watching.
The recording progress bar will be displayed, press the EXIT button to close recording progress bar. The recording symbol in the top left of the screen will still be visible showing that the TV is still recording. If you want to view the recording progress bar again, press the ● button on the remote control.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,

Let's get started

USING THE USB FEATURES

1. Always switch the TV off before attaching a USB storage device to your TV.
2. Connect the USB storage device to one of the USB ports on your TV.
3. Press the ⏻ button on the remote control or TV to turn the TV on.
4. Press the **Menu** button on your remote control. Use the ▲▼◄ ► buttons to select **USB MEDIA** from menu then press the **OK** button to open.
IMPORTANT: Some portable USB hard disks may require more power than the TVs USB port can supply. To ensure the correct operation of the USB hard disk please use an appropriate power adapter with the hard disk. If you are using a USB Hub, please ensure its mains adapter is connected to the mains supply as the total current consumption may exceed 500mA, the maximum the TV can supply.

The file system only supports FAT32 format.
If you want to keep recorded DTV programmes the transfer rate of the storage device must not be less than 5MB/s, otherwise the picture and sound of the programme will be affected and a warning statement will be shown on the TVs screen. If this happens please upgrade your USB storage device.

Your TV screen will go temporarily blank when you start recording as it takes a few seconds to stabilize the connection to the USB storage device.
Always disconnect the USB storage device if it is not going to be used for extended periods.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions,

Plug replacement - UK and Ireland only

Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue – Neutral 'N'

Brown – Live 'L'

As the colours of the wires in the power cable may not correspond with the coloured markings identifying the terminals in your plug, and proceed as follows:

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If the power lead is damaged, it must be replaced by a qualified electrician.

Connect brown lead to 'L' - Live

Connect blue lead to 'N' - Neutral

5A Fuse
Energy label

This is called the product Fiche – the information needs to be presented in the following order, also this maybe in the form of a copy of the label, in colour or black and white – the label however must display all the information below:

- Supplier's name or trade mark
- Supplier's model product model no.
- The energy effi ciency class of the model
- The visible screen diagonal in centimetres and in inches
- The on-mode power consumption
- The annual energy consumption
- The screen resolution in physical horizontal and vertical pixel count

Trouble shooting

Image persistence - ghosting
Please note that ghosting may occur while displaying a persistent image (still or paused image). LCD TVs' image persistence may disappear after a short time. Try turning off the TV for a while. To avoid this, do not leave the screen in still picture mode for extended periods.

No power
If your TV has no power, please check the power cord plug is connect to the mains power socket.

Poor picture
1. Have you selected the correct TV system?
2. Is your TV or house aerial located too close to a non-earthed audio equipment or neon lights, etc.?
3. Mountains or high buildings can cause double pictures or ghost images. Sometimes you can improve the picture quality by changing the direction of the aerial. Is the picture or teletext unrecognisable?
4. Check if you have entered the correct frequency.
5. Please retune the channels.
6. The picture quality may degrade when two devices are connected to the TV at the same time. In such a case, disconnect one of the devices.

No picture
1. No Picture means that your TV is not receiving a transmission. Have you selected the correct button on the remote control? Try once more. Also make sure the correct input source has been selected.
2. Is the aerial connected properly?
3. Are the plugs connected tightly to the aerial socket?
4. Is the aerial cable damaged?
5. Are suitable plugs used to connect the aerial?
6. If you are in doubt, consult your dealer.

No sound
1. Has the TV been set to mute? To cancel mute, press the " ⊠ " button, or increase the volume level.
2. Sound is coming from only one speaker. Is the balance set to one extreme?

Remote control - does not operatea
Your TV no longer responds to the remote control. The batteries may be exhausted, if so you can still use the control buttons on the left side of the TV.

Input sources - can not be selected
1. If you cannot select an input source, it is possible that no device is connected.
2. Check the AV cables and connections if you have tried to connect a device.

The DVD picture quality is poor
1. Make sure the DVD disc surface is not damaged (no scratches,fingerprint etc.).
2. Clean the DVD disc and try again. See instructions in "Cleaning Discs" to clean your disc properly page 00.
3. Ensure that the DVD disc is in the loader with the label facing you when looking at the TV screen.
4. A damp DVD disc or condensation may effect the equipment. Wait for 1 to 2 hours in Stand-by mode to dry the equipment.

The Disc does not play
1. No disc in the machine - Place a disc into the loader.
2. Disc is incorrectly loaded - Ensure that the DVD disc is in the loader with the label facing you when looking at the TV screen.
3. Wrong type of disc. The DVD player cannot play CD-ROMS etc..
4. The region code of the DVD disc must match the player.

Wrong OSD language
1. Select the language in the setup menu.
2. The language for the sound or subtitles on a DVD disc cannot be changed.
3. Multilingual sound and/or subtitles are not recorded on the DVD disc.
4. Try to change the sound or subtitles using DVD's title menu. Some DVD's do not allow the user to change these settings without using the disc's menu.

Definition of terms
Angle

Recorded onto some DVD discs are scenes, which have been simultaneously shot from a number of different angles (the same scene is shot from the front, from the left side, from the right side, etc.). With such discs, the ANGLE button can be used to view the scene from different angles.

Chapter Number

These numbers are recorded on DVD discs. A title is subdivided into many sections, each of which are numberd,and specific parts of video persentations can be searched quickly using these numbers.

Chapter Number

This refers to a high-density optical disc on which highquality pictures and sound have been recordedm by means of digital signals. Incorporating a new video compression technology (MPEG II) and high-density recording technology. DVD discs enables aesthetically pleasing fullmotion video to be recorded over long period of time (for instance, a whole movie can be recorded).

DVD discs have a structure consisting of two 0.6mm thin discs, which are adhered to each other. Since the thinner the disc, the higher the density at which the information can be recorded, a DVD disc has a greater capacity than a single 1.2mm thick disc. Since the two thin discs are adhered to each other, there is the potential to achieve doule-sided play sometime in the future for even longer duration play.

Subtitles

These are lines of text appearing at the bottom of the screen, which translate or transcribe the dialogue.

They are recorded on the DVD discs.

Time Number

This indicates the playtime, which has elapsed from the start of a disc or a titile. It can be used to find a specific feature to be used. Availability is determined by the disc's manufacturer.)

Title Number

These numbers are recorded on DVD discs. When a disc contains two or more movies, these movies are numbered as title 1, title 2, etc.

Track Number

These numbers are assigned to the tracks, which are recorded on Audio CDs. They enable specific tracks to be located quickly.

LPCM

LPCM stands for Pulse Code Modulation and is digital audio.

MPEG

Short for Moving Picture Experts Group. This is an international standard for compression of moving images. On some DVDs digital audio has been compressed and recorded in this format.

- minimum 10cm distances around the apparatus for sufficient ventilation;
- the ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, table- cloths, curtains, etc.;
- no naked flame sources, such as lighted candles, should be placed on the apparatus;
- attention should be drawn to the environmental aspects of battery disposal.
