

## **HERCULES / GHZ+ Models – content update for Argos 11.05.2016**

### **1013GHZ+ (240/9410)**

#### Product Summary

This attractive Hercules apex metal shed provides the perfect means for storing your garden items, including equipment such as lawnmowers and tools. Made exclusively from superior grade hot dipped galvanised steel for long lasting good looks, this shed also incorporates a bespoke ground framework for supporting a floor.

#### Product description / spec

The Hercules shed has lockable double sliding doors which overlap when closed to keep out wind and rain and to give added strength. A strong ramp provides easy access, whilst extra tall gables offer more headroom to stand comfortably inside. With components individually numbered and pre-drilled for easy assembly, a free anchor kit is also included for safely fixing the building to a firm base. Includes ventilation slots along the eaves and roof ridge, all panels have folded edges for safety and are painted white inside to produce a brighter shed interior. Rust, rot and rodent proof. No maintenance is ever required.

The floor support frame section comes complete with special steel piercing screws to simplify the laying of a wooden floor. The resulting raised floor prevents possible surface water ingress if the site has an unfavourable gradient.

- H202, W303, D396 cm.
- UK manufacturer's 12 year guarantee and Helpline
