Model variations may differ in appearance from the example above.

World Time	Displays the current time in major cities and specific areas	Press button C until display shows WT. Scroll through the pre-set cities using button D .
Stop Watch	Elapsed time, split time and final time are measured with 1/100-sec accuracy.	Press button C until display shows stopwatch function (STW) Start and stop the stop watch using button D .
4 Daily Alarms	The daily alarm reminds you about recurring events with an acoustic signal at the time you have set. You can also activate hourly time signals (each hour). This model has 5 independent alarms.	Press button C until you reach alarm mode (AL) Choose which of the 4 alarms to set using button D . Once chosen, press and hold button A to unlock the setting function. Press C to chose whether to set the hours or the minutes etc, and set that section with button D . Press button A to lock your settings and then again to turn the alarm on or off.
Digital Compass	A built-in direction sensor detects the magnetic north.	In timekeeping mode, press button D . Point the 12 o'clock position of the watch in the direction you want to measure and the digital compass will indicate that direction while showing North on digital display.
Altimeter	A pressure sensor detects changes in the air pressure and converts the result into an altitude up to 10,000 m.	In timekeeping mode, press button D . This will then display the current height above sea level in units of 5 metres.
Thermometre	Temperature and air pressure measurement which monitors changing weather patterns.	In timekeeping mode press button E . The current air pressure will be displayed as a graph and as a measurement along with the current temperature.
Full Auto Light	In low light levels, an LED automatically illuminates the watch face each time the watch is tilted 40 degrees.	
Mineral Glass	Artificially manufactured glass with improved level of hardness and scratch resistance	
Water resistant 200m	Perfect for swimming and snorkelling.
