Model variations may differ in appearance from the example above.

Radio Controlled	A built-in radio signal receiver ensures that the exact time is displayed across the UK, Europe, America, Japan and China.	To set home time, press button C until the time and day are displayed. Press and hold button A until the LCD starts to flash. Press button C to scroll through the fields correcting each with button D as you go. Once all fields are corrected, press button A to exit setting mode.
World Time	Displays the current time in major cities and specific areas	Press button C until display shows WT. Scroll through the pre-set cities using button D .
Stop Watch	Elapsed time, split time and final time are measured with 1/100-sec accuracy.	Press button C until display shows stopwatch function (STW) Start and stop the stop watch using button D .
5 Daily Alarms	The daily alarm reminds you about recurring events with an acoustic signal at the time you have set. You can also activate hourly time signals (each hour). This model has 5 independent alarms.	Press button C until you reach alarm mode (AL) Choose which of the 5 alarms to set using button D . Once chosen, press and hold button A to unlock the setting function. Press C to choose whether to set the hours or the minutes etc, and set that section with button D . Press button A to lock your settings and then again to turn the alarm on or off.
Full Auto Light	In low light levels, an LED automatically illuminates the watch face each time the watch is tilted 40 degrees.	
Mineral Glass	Artificially manufactured glass with improved level of hardness and scratch resistance	
Water resistant 200M	Perfect for swimming and snorkelling.
