Place a runner **P** on the left side **1** as shown. Slide back the top of runner and use the 2nd hole from the front to fit the 1st screw **I**.

b: Slide the runner **P** back the other way and fit the 2nd screw **I** into the corresponding hole in the left side **1**.

Insert 2 large locking nuts **C** into the left side **1**.

Note: The arrow on the locking nut **must** point towards the hole in the edge of the panel.

c: Screw 4 metal dowels **A** into the left side **1**.

Fit 2 hinge plates **M** onto the left side **1**, making sure that the slot is facing towards the finished front edge.

Assembly Instructions

Step 10

Fit a fixed shelf to the right side

Push a fixed shelf **5** onto the right side **2**.

Use a screwdriver to tighten the 2 large locking nuts **C** fitted to the fixed shelf **5**.

Note: Turn the large locking nuts **C** as far as they will go - more than 1/2 a turn.

Step 11

Assembly Instructions

Step 19

Fit the loose shelves and the drawer

For each of the 2 loose shelves **6** insert 4 shelf studs **R**, as shown.

Lower the 2 loose shelves **6** down onto the shelf studs **R**.

Slide both the runners **P** forward and locate the drawer sides **9** and **10** between them, lining up the holes in the drawer wrap with the 2nd 'threaded' holes in the runners **P**.

Working from the inside of the drawer, insert 2 screws **J** through the drawer sides and out into the 2nd threaded hole in the runner.

Note: Do not overtighten the screws **J**. If they catch on the runner you may need to loosen them slightly.

Step 20

Prepare the door

Push fit 2 hinges **N** into door **13**.

Secure each hinge with 2 screws **K**.

Note: Before securing with the screws, make sure that the hinges are positioned at 90 degrees with the edge of the door.

Assembly Instructions

Step 21

Fit the door and door stop

Note: The easiest way to attach the door **13** is to fit the top hinge first, then align and fit the other hinge.

a: Push the hinge **N** onto the front part of the hinge plate **M**. The recess at the bottom of screw B goes into the slot in the hinge plate.

b: Keep the hinge **N** FLAT against the hinge plate **M** as you slide it across as far as it will go. Tighten screw A.

c: The hinge **N** must be flat against the hinge plate **M** prior to any adjustment.

d: The hinge **N** must NOT be AT AN ANGLE to the hinge plate **M** when assembled. This would indicate that the recess at the bottom of screw B had not located in the slot in the hinge plate and the hinge would not be secure. Remove the hinge from the hinge plate and then re-assemble being careful to follow instructions a-c.

e: Push the remaining shelf stud **R** down into the hole in the base **4** to act as a door stop.

Assembly Instructions

Step 22

Adjust the door if needed

a: Before adjusting the door, use a spirit level to check the top (or base) of the unit is level, front-to-back and side-to-side in the 3 positions shown. Use suitable packing pieces (not supplied) to make the unit level BEFORE making any adjustment to the hinges, as shown.

b: Height adjustment.

Loosen screws A on hinge plates and move door up or down as required. Retighten screw A.

c: Forward and Back adjustment.

Loosen screw B on hinge plate and move door in or out as required. Retighten screw B.

d: Sideways adjustment.

To move door 'out' loosen screw C. To move door 'in' tighten screw C.

Assembly Instructions

Step 23

Fit the overbalance protector

To prevent possible overbalancing we recommend that this unit is secured to a suitable wall by use of the overbalance protector kit **S** fitted to the unit or, an alternative fixing method of your choice.

Wall fixings are not supplied as they will need to suit the wall type.

Note: Take care when drilling the wall that you do not drill into any pipes, wires etc. If in doubt, consult an expert.
