

GPS mini Watch User Manual

Introduction

Thank you for purchasing the GPS mini Watch. This GPS Watch is packed with personal Training features like speed, trip time, laps, etc. Watch features include but not limited to the following:

- ➤ 12/24H Time format
- World time
- Dual Time T1 and T2
- > 5 daily Alarms
- > RUN mode
- Chronograph mode
- Data mode
- Set modes
 - This Watch can communicate with a PC to store and review your performance.
 - This Watch uses a rechargeable battery that can be charged through USB port of your PC.

Caring for your GPS Watch:

Clean your GPS Watch with a dampened cloth preferably with mild detergent solution. Wipe dry using a dry cloth. Do not use chemical cleaners and solvents that may damage plastic components.

Do not store your GPS Watch to prolonged exposure to extreme temperatures as this may result to permanent damage to your unit.

About GPS:

Global Positioning System (GPS) is a satellite- based navigation system made up of a network of 24 or more satellites. GPS works best in clear weather condition, anywhere in the world, 24 hours a day. Tall buildings may interfere with GPS accuracy. When 3 satellite signals are received, the Watch will have 2D GPS fixed (Latitude and Longitude). When 4 or more satellite signals are received, the Watch will have 3D GPS Fixed.

Water immersion:

This GPS Watch is designed to be water resistant up to 3 ATM. It can resist water pressure up to 30 meters. After submersion to water, please make sure to wipe dry and air dry the unit before using or charging.

Caution:

Prolonged water submersion may cause electronic shorting in the unit which may cause minor skin burn or irritation.

Getting Started

Step 1) Know your Watch:

Push button location:

Push button Main function:

S1 - Start / Stop / Save / Increase adjust (+)

S5 - View / OK

S7 – Change Mode / Exit

S11 - Light / Set / Save / Lap / Decrease adjust (-)

Step 2) Charging the Battery:

Charge the unit for at least 4.5 hours before first use. The length of time for a fully charged battery will last depending on the actual usage. It is recommended to regularly re-charge your battery every 1-2 months even if it is not used to maintain good battery condition.

- 2.1) Plug your Watch to your PC USB port.
- 2.2) Make sure the contact pins of the watch are properly connected to your PC.

Note: Please thoroughly dry the charging contacts and surrounding area to ensure proper electrical contact and prevent corrosion.

When the battery is low, it is time to charge the watch.

Battery low condition:

You cannot turn ON the GPS when the battery is low. The watch will display LOW BATT. You need to recharge the battery in order to use the GPS again.

When the battery is almost low and you still perform your exercise, your data may not be saved. Please make sure the battery have enough battery power before doing your exercise in order not to lose your data.

Step 3) Configure your Watch:

Before using your watch, please set your Watch.

3.1) Go to **SET** mode and set the following parameters: **AUTO LAP**, **TIME**, **UNITS**, **USER**, **NIGHT**, **Contrast**, **CHIME**, **ALARM**, and **VIEW**.

- Press S1 or S11 to change the values of the blinking digit.
- Press S5 to enter and set the selected parameter.

 The watch will auto exit setting mode if there is no push button operation in 3 to 4 minutes.

How to set the AUTOLAP:

Auto Lap setting range: 0.4, 1, 2, 3, 4, 5, and OFF

- Outside the Start time / End Time, only press S11 will turn ON the EL for 10 seconds.
- When the chronograph is running within the Start Time/ End Time, the EL will be always ON. It will turn OFF 10 seconds after the chronograph is stopped.

TIME mode

How to enter TIME mode:

TIME set on GPS:

TIME set on MANUAL:

Travelling between different Time zones

- When you are traveling to a different Time zone, you have to set your GPS Watch to
 your destination Time zone. We recommend setting Time 1 to your current location and
 Time 2 set to your destination Time zone.
- When you arrive to your destination Time zone, press & hold S1 for 2-3 seconds to change the time to **Time 2**.
- When you go back to your original location (Time 1), press & hold S1 for 2-3 seconds to change the time back to Time 1.
- The Time of the Watch will be synchronized with GPS TIME when you turn ON the GPS.
- Make sure that the Watch is set to the correct CITY CODE and DST ON or OFF setting so that it can display the correct time.

DATA mode

How to enter DATA mode, view details, and delete Data:

Data numbering system/ Legend:

Sample data number: **D03 03 1031 - 1 02 G**

D	Data
03	Total number of files
03	File number counter
10	Month
31	Date
1	Refer to Time 1 or 2 for time 2
02	File number of the day
G	GPS workout, H for INDOOR workout

ALARM mode

- Alarm will sound for 20 seconds at alarm time. Pressing any button will stop the alarm sound without the button function. When Alarm is ON, the alarm icon is displayed in all modes.
- How to enter ALARM mode (ALARM setting):

Battery:

The Watch is using a rechargeable Lithium Ion battery that will require about 4.5 hours charging time. While battery is charging, the Watch cannot be used and all buttons are disabled. User needs to recharge the battery when the Watch indicates a "low batt".

Battery Life (full charge): 8 hrs typical (continuous GPS).

GPS watch troubleshooting guide:

PROBLEM/ QUESTION	SOLUTION/ ANSWER			
I cannot get a GPS signal	Take your GPS Watch outdoors and away from trees and tall buildings. Remain stationary and try acquiring GPS signal again. Be sure that the antenna is pointing towards the sky for better signal reception.			
Can I reset the Watch?	You can reset the Watch by pressing S1, S5, S7, and S11 together. The date and time will be reset to default values. You can set it again manually or automatically thru GPS.			
Will my data and personal settings be lost after Watch reset?	Your data and personal settings are saved in the flash memory and will not be lost after Watch reset.			
The battery indicator does not seem to be accurate	Allow your GPS Watch to fully discharge and then fully charge it without interruption. It is recommended to regularly re-charge your battery every 1-2 months even if it is not used to maintain good battery condition.
