Full product description

With its two connectors – a USB connector at one end and a Lightning connector at the other – SanDisk iXpand™ Flash Drive is the easiest way to transfer photos and videos between iPhone, iPad and computers. Not only does iXpand Flash Drive let you free up memory on your mobile devices, it also allows you to instantly expand storage by up to 64GB**.

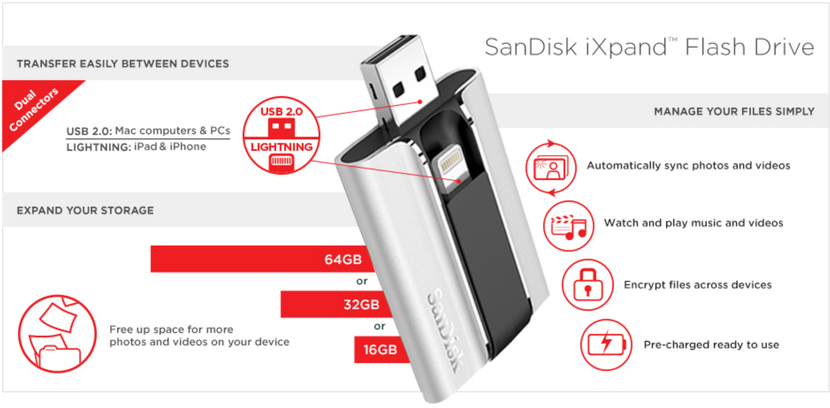

Simply use the USB connector to move photos and videos to your PC, Mac computer or tablet. The iXpand app auto-syncs your content to the drive whenever it's connected, and lets you watch videos and listen to music directly from the drive – no internet needed. iXpand Flash Drive lets you encrypt your files for secure transfer between devices.

Feature and benefits

- Transfer files easily between iPhone, iPad, PCs, and Mac computers
- Two-sided flash drive has USB and Lightning connectors
- Instantly expand storage capacity by 64GB**
- Automatically syncs photos and videos from the camera roll when connected
- Play most popular format videos directly from the drive with iXpand app (download from the App Store)[1]
- Password protection for secure file transfer[2]

Why choose the SanDisk iXpand Flash Drive?

HOW IT WORKS

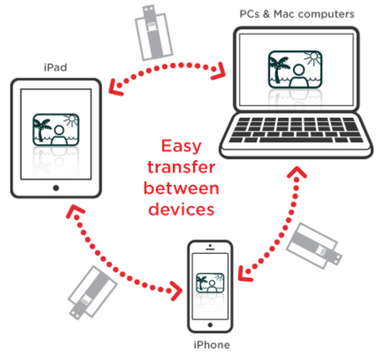

Need extra space on your iPad or iPhone, just in case?

Desperate to transfer videos and photos from iPhone to iPad – but can't get Internet connectivity?

Want to keep your files stored, secured and always with you?

Use an iPhone – but a Windows-based laptop?

It's easy with iXpand. Simply plug the Lightning connector into your iPhone or iPad and move the files onto iXpand Flash Drive. It's like having extra memory on-board. And from there, simply transfer them to the device you need, as soon as you want, via the Lightning connector or the handy USB connector. No cables, no cloud, no Internet connection needed.

Getting more from your device

Transfer content easily between iPhone, iPad, and computer

With a Lightning connector on one end and a USB connector on the other, the iXpand Flash Drive makes it easy to move photos, videos, music, and other files between your iPhone, iPad, PC, and Mac computers without cables, cloud, or an Internet connection. Its durable, flexible design works with most iPhone and iPad cases.

Free memory on your iPhone or iPad

The iXpand Flash Drive is ideal for iPhone and iPad users who need an easy way to move photos, videos and files from their devices to their computers. The drive offers fast transfer to any computer with a USB port, quickly freeing up space on your mobile device.

Auto-sync makes it easy to manage photos and videos

The iXpand app (available for download from the App Store) automatically syncs photos and videos from your iPhone or iPad camera roll whenever you connect the flash drive, so you spend less time moving your content.

64GB portable storage for videos, photos, and files

The iXpand Flash Drive instantly expands your storage capacity by up to 64GB, providing plenty of room for all the digital photos, videos, and files you keep on your iPhone or iPad. Plus, it fits in your pocket, so you can carry it anywhere.

Play music and videos directly from the drive

The drive also lets you enjoy your video and music collections without them taking up space on your mobile device. Using the iXpand app (download from the App Store), you can listen to your favorite artists and play most popular video formats such as WMV, AVI, MKV, MP4, and MOV straight from the drive.

Password protection for secure file transfer

The iXpand Flash Drive password protects your files with 128-bit AES encryption, ensuring your content stays private when it moves between devices and platforms.
