Safety and Care Advice

Important – Please read these instructions fully before starting assembly

Check you have all the components and tools listed on pages 2 and 3.

Remove all fittings from the plastic bags and separate them into their groups.

Keep children and animals away from the work area, small parts could choke if swallowed. Make sure you have enough space to layout the parts before starting.

Assemble the item as close to its final position (in the same room) as possible.

Assemble on a soft level surface to avoid damaging the unit or your floor.

Assembly requires 2 people.

Do not stand or put excessive weight on the product, this could cause damage.

We do not recommend the use of power drill/drivers for inserti

as this could damage the unit. Only use hand screwdrivers and Allen keys.

Dispose of all packaging carefully and responsibly.

Solid wood / Real wood veneers

This product has been finished using natural materials. As a living material, you may notice some variation in the grain and colour shade between the different components.

Unlike a synthetic or man-made material which has a uniform finish, a feature of natural wood is its variation in grain and colour. We wish to reassure you that this is quite normal and is not the result of any manufacturing fault.

Where sheets of wood are joined together, a line may be detected. Again, this is normal and is not an imperfection.

The natural finish should be cared for by the periodic application of a good quality 'wax' based domestic furniture polish (Not silicone!!). Occasional / small spills should be removed immediately using a damp cloth.

Do not allow hot articles to come into contact with the surface, as damage will occur!

Care and maintenance

Only clean using a damp cloth and mild detergent, do not use bleach or abrasive cleaners.

From time to time check that there are no loose screws on this unit.

This product should not be discarded with household waste. Take to your local authority waste disposal centre.
