

Congratulations on your new furniture

To extend the life span of your furniture, please observe the care instructions below. Contact your retailer or dealer if you have questions.

Handling & Maintenance

Water and other liquids can cause discoloration and damage to the wooden surface. In case any liquids are spilled on the surface, remove immediately with a clean cloth. Avoid rubbing the spilled liquid into the surface, but wipe gently, using a clean, firmly wrung damp cloth. Dry afterwards using a clean, dry cloth. If stains or marks persist, seek professional help and advice.

Recommendations

- Wood expands and contracts according to the surrounding humidity and temperature. In case of large temperature and humidity fluctuations, the wood might warp and/or crack. To avoid this, indoor humidity should ideally be kept between 40% and 60%. During cold seasons, when indoor humidity is lower due to decreased ventilation and utilization of central heating, it is advised that water-filled reservoirs are placed on radiators.
- Do not place the furniture near a heat source, in hot surroundings, or in direct sunlight.
- Do not place the furniture near to an air-conditioning unit.
- Always place the furniture on an even or flat surface to prevent unnecessary pressures on connecting joints of the furniture.
- Take care when moving the furniture across the floor. Do not drag the furniture, as this can cause damage to both the furniture and the floor.
- Always use coasters/placements underneath hot objects, such as pans, plates or glassware to protect the surface of the furniture.
- It is advisable to protect the surface of the furniture when writing, drawing, etc, to prevent possible damage.
- To avoid damage to the floor, it is advisable to place felt-stickers or apply plastic caps on the legs of the furniture.
- New furniture may have an odour of wood and lacquer after coming out of its packaging. This is quite normal and will usually disappear after one or two weeks. Additional ventilation can speed up this process.

- Please note that this furniture is designed for indoor household use only, and therefore is not suitable for outdoor or commercial use. The warranty will be voided if furniture is used for commercial or outdoor purposes.

Special recommendations for tables

- For extendable tables, it is recommended that the table initially be used in its extended position, to avoid color variations on the table-top due to exposure to light.
