

Operating instructions

IMPORTANT SAFEGUARDS
When using an electrical appliance, basic precautions should always be followed, including the points listed below. Read all instructions and safeguards before using.

- DANGER**
- To reduce the risk of injury or death by electric shock:
 - 1. Do not reach for an appliance that has fallen into water. Unplug it immediately from the outlet.
 - 2. Do not use while bathing or in a shower.
 - 3. Do not place a store appliance where it can fall or be pulled into a hot sink. Do not place it in drop in water or other liquid.
 - 4. Except when charging, always unplug this appliance from the electrical outlet immediately after using.
 - 5. Always unplug this appliance before cleaning.

WARNING

- To reduce the risk of burns, fire, electric shock or injury to persons:
- This appliance can be used by children aged from 14 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Warning: Keep the Product Dry. It is essential to PREVENT electrical equipment from coming into contact with water or other liquids.

- Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- Keep the cord away from heated surfaces.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Do not use the appliance with a damaged or broken cord nor with teeth missing from the blades, as injury may occur.
- Do not crush, disassemble, heat above 100°C (212°F), or incinerate the appliance, due to risk of fire, explosion, or burns.

SAVE THESE INSTRUCTIONS

This clipper has been designed for household use.

- A- Bottom blade
- B- Blade side (on Multi-cut (MC) clipper only)
- C- Taper lever (on Multi-cut (MC) clipper only)

- D- Switch
- E- Top blade
- F- Power screw

CLIPPER MAINTENANCE
Your Wahl clipper heads were dried and aligned before leaving our factory; however, it is possible for blades to get bumped out of alignment. Blades must be realigned if they have been removed for cleaning or replacement. To determine if realignment is necessary, compare your clipper blades with diagram G.

- 1 If your clipper has a taper lever, position the taper lever in the close cut position. (H)
- 2 End of top blade teeth should be approximately 1/32" (84 mm) apart from the bottom blade. This is important so that the clipper does not cut too close or allow the moving cutter to touch the skin.
- 3 Extreme left-hand tooth of top blade must be covering or to the left of the first small tooth of bottom blade.
- 4 Extreme right-hand tooth of top blade must be touching the big tooth on the bottom blade.

If blade alignment is incorrect, add a few drops of Wahl Clipper Oil to the blades, turn clipper "On" for a few moments, turn "Off" and unplug. Loosen screws slightly and adjust (steps 2-4 listed above). Tighten screws after blades are aligned. Other than this blades this clipper has no user serviceable parts. (diagram I)

Oil. (J)

The blades of your new clipper should be oiled every few haircuts. Simply place a few drops of Wahl Clipper Oil on the back of the blades. Use only the Wahl Clipper Oil included in the pack. Due to the high speed of your Wahl clipper, the correct type of oil must be used. Do not use oil, grease or any oil mixed with kerosene or any solvent, as the solvent will evaporate and leave the thick oil, slowing down the blades. Wahl Clipper Oil is a very thin, natural oil which will not evaporate and will not slow down the blades.

POWER SCREW (Not found on all models of Wahl Clippers)

If your clipper has a power screw, it has been adjusted for peak efficiency before leaving the factory. However, if voltage in your home is low, you may need to readjust it.

To adjust power, use the plastic brush, a screwdriver or a thin coin to turn power screw in a clockwise direction until the arm strikes the coil, making a noise. Then, slowly turn power screw out (counterclockwise), just until noise stops. This is the maximum power setting. (K)

CORD

The cord should not be used to pull the clipper. Since freedom of movement needs to be maintained, care should be used to keep the cord untwisted and unobstructed. When stored, the cord should be coiled and the unit placed in its carrying case.

If your clipper has a polarized plug. To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug fits in a polarized outlet only one way. In the event the plug does not fit fully in the outlet, reverse the plug. In the event it still does not fit, contact a qualified electrician to install the proper plug for the back. Again, it is better to leave the hair longer than this does not help, your cutting blades may bend. Either replacement or return them to Wahl for sharpening.

TAPER LEVER (Not found on all models of Wahl Clippers)

If your clipper has an adjustable taper lever, it is conveniently located near your thumb (if you're right-handed), so it can easily be adjusted while the clipper is in your hand.

The taper lever adds versatility to your clipper by allowing you to gradually change the closeness of your cut without having to change the blades. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, it will help you remove hair that has become very short. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, it will help you remove hair that has become very short. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, it will help you remove hair that has become very short. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)

Gebrauchsanweisung

WICHTIGE SICHERHEITSHINWEISE
Beim Gebrauch eines Elektrogerätes sollten immer grundlegende Vorsichtsmaßnahmen beachtet werden, insbesondere die in Folgenden aufgeführten. Lesen Sie vor Gebrauch alle Anweisungen und Sicherheitshefte sorgfältig durch.

- GEFÄHR**
- Vermeiden Sie das Risiko einer Verletzung oder des Todes durch einen elektrischen Schlag.
 - Greifen Sie nicht nach einem ins Wasser gefallenem Gerät. Ziehen Sie sofort den Stecker aus der Steckdose.
 - Verwenden Sie das Gerät nicht in der Badewanne oder unter der Dusche.
 - Platzieren Sie das Gerät nicht an einer Wasserleitung oder in einer Waschküche oder eine Wärme felder oder gezeugen werden könnte. Tauchen Sie das Gerät nicht in Wasser oder andere Flüssigkeiten und lassen Sie es nicht dort hängen fallen.
 - Ziehen Sie, außer wenn Sie das Gerät aufladen, nach jedem Gebrauch den Stecker des Gerätes aus der Steckdose.
 - Ziehen Sie vor dem Reinigen des Gerätes immer den Stecker aus der Steckdose.

WARNING

- Zur Reduzierung des Risikos von Verbrennungen, Bränden, Stromschlägen und Verletzungen:
- Dieses Gerät kann von Jugendlichen ab 14 Jahren und Personen mit eingeschränkter physischer, sensorischer oder geistigen Fähigkeiten oder Personen mit mangelnder Erfahrung und Wissen verwendet werden, solange dies unter Beaufsichtigung erfolgt oder sie die notwendige Anleitung zum sicheren Umgang mit diesem Gerät erhalten haben und über die damit verbundenen Risiken und Gefahren informiert sind. Das Gerät darf von Kindern nicht als Spielzeug verwendet werden. Reinigung und Wartung dürfen von Kindern nur unter angemessener Aufsicht durchgeführt werden.
- Warnung: Halten Sie das Gerät trocken. Es ist äußerst wichtig zu VERHINDERN, dass Elektrogeräte in Kontakt mit Wasser oder anderen Flüssigkeiten kommen.

- Aufgrund der Gefahr eines Feuers, einer Explosion oder Verbrennungen sollten Sie das Gerät nicht zerlegen, auseinander nehmen, auf mehr als 100 °C erhitzen oder verbrennen.
- Verwenden Sie dieses Gerät ausschließlich zum vorgesehenen und in dieser Gebrauchsanweisung beschriebenen Zweck.
- Verwenden Sie ausschließlich vom Hersteller empfohlenes Zubehör.
- Verwenden Sie dieses Gerät nie, wenn sein Netzstecker oder -stecker beschädigt ist, das Gerät nicht ordnungsgemäß funktioniert, fallen gelassen oder beschädigt worden ist oder ins Wasser gefallen ist. Senden Sie das Gerät zum Testen und zur Reparatur an die Wahl Clipper Corporation.
- Schneiden Sie ausschließlich das Kabel des Ladegerätes in die entsprechende Bohrung des Gerätes an.
- Gebrauchen Sie dieses Gerät nicht im Freien und nicht in Räumen, in denen Aerosole (Sprays) oder Sauerstoff verwendet werden.
- Schneiden Sie das Kabel immer zuerst am Gerät, anschließend an der Steckdose an. Am Sprung oder Stromnetz zu trennen, schneiden Sie das Kabel am Stecker aus der Steckdose.

HEBEN SIE DIESE ANLEITUNG SORGFÄLTIG AUF
Diese Gebrauchsanweisung ist ein privates Gebrauchsdokument.

WARTUNG DER HAARSCHNEIDEMASCHINE
Die Klingen der Haarschneidemaschine von Wahl sind wesentlich geschliffen und ausgerichtet worden. Dennoch kann es vorkommen, dass die Ausrichtung der Klingen nicht mehr derart ist, wie sie sein sollte. Es ist äußerst wichtig, die Klingen immer wieder zu reinigen und auszuschaufeln. Wenn die Klingen nicht ausgereicht werden, wenn sie für Reinigungs- oder Austauschschneidemaschinen entfernt werden. Um festzustellen, ob eine Neuausrichtung erforderlich ist, vergleichen Sie die Klingen Ihrer Haarschneidemaschine mit dem Bild.

1 Wenn die Haarschneidemaschine mit einem Schüttlängeneinstellung ausgerichtet ist, stellen Sie den Schüttlängeneinstellung auf die Stufe mit der kürzesten Schüttlänge ein. (H)

2 Ende der top blade teeth should be approximately 1/32" (84 mm) apart from the bottom blade. This is important so that the clipper does not cut too close or allow the moving cutter to touch the skin.

3 Extreme left-hand tooth of top blade must be covering or to the left of the first small tooth of bottom blade.

4 Extreme right-hand tooth of top blade must be touching the big tooth on the bottom blade.

If blade alignment is incorrect, add a few drops of Wahl Clipper Oil to the blades, turn clipper "On" for a few moments, turn "Off" and unplug. Loosen screws slightly and adjust (steps 2-4 listed above). Tighten screws after blades are aligned. Other than this blades this clipper has no user serviceable parts. (diagram I)

Oil. (J)

The blades of your new clipper should be oiled every few haircuts. Simply place a few drops of Wahl Clipper Oil on the back of the blades. Use only the Wahl Clipper Oil included in the pack. Due to the high speed of your Wahl clipper, the correct type of oil must be used. Do not use oil, grease or any oil mixed with kerosene or any solvent, as the solvent will evaporate and leave the thick oil, slowing down the blades. Wahl Clipper Oil is a very thin, natural oil which will not evaporate and will not slow down the blades.

POWER SCREW (Not found on all models of Wahl Clippers)

If your clipper has a power screw, it has been adjusted for peak efficiency before leaving the factory. However, if voltage in your home is low, you may need to readjust it.

To adjust power, use the plastic brush, a screwdriver or a thin coin to turn power screw in a clockwise direction until the arm strikes the coil, making a noise. Then, slowly turn power screw out (counterclockwise), just until noise stops. This is the maximum power setting. (K)

CORD

The cord should not be used to pull the clipper. Since freedom of movement needs to be maintained, care should be used to keep the cord untwisted and unobstructed. When stored, the cord should be coiled and the unit placed in its carrying case.

If your clipper has a polarized plug. To reduce the risk of electric shock, this appliance has a polarized plug (one blade is wider than the other). This plug fits in a polarized outlet only one way. In the event the plug does not fit fully in the outlet, reverse the plug. In the event it still does not fit, contact a qualified electrician to install the proper plug for the back. Again, it is better to leave the hair longer than this does not help, your cutting blades may bend. Either replacement or return them to Wahl for sharpening.

TAPER LEVER (Not found on all models of Wahl Clippers)

If your clipper has an adjustable taper lever, it is conveniently located near your thumb (if you're right-handed), so it can easily be adjusted while the clipper is in your hand.

The taper lever adds versatility to your clipper by allowing you to gradually change the closeness of your cut without having to change the blades. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, it will help you remove hair that has become very short. Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram I)
