Bluetooth®
with MULTIPAIR
CD, MP3-CD, USB Direct, FM

BTB2465

HiFi stereo sound that fits your home

Listen to your smartphone tunes, stream your music library over Bluetooth and play MP3-CDs on this compact, all-in-one Philips music system. Then tune in to your favorite radio shows with DAB+ and FM compatibility.

Enrich your sound experience

- Digital Sound Control
- Bass Reflex Speaker System delivers a powerful, deeper bass
- 15W RMS total output power

Enjoy your music from multiple sources

- Play MP3-CD, CD and CD-R/RW
- Audio-in for portable music playback
- USB Direct for easy MP3 music playback
- DAB+ and FM compatible for a complete radio experience
- Stream music over Bluetooth with multi-device pairing

Design that blends into your interior

- Compact design fits any space, any lifestyle
- Wall-mountable option for flexible placement

PHILIPS

Highlights

Multi-device pairing

Wireless Bluetooth® sound transmission is increasingly common in the world of sound systems, but most Bluetooth® compatible systems allow just one device to connect at a time. Multi-device pairing lets you pair up to two devices and switch between them instantly.

DAB+ and FM compatible

DAB+ and FM compatible for a complete radio experience

USB Direct for easy MP3 music

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more digital music via the built-in USB Direct.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

Audio-in

The Audio in connectivity allows direct playback of Audio in content from portable media players. Besides the benefit of enjoying your favorite music in the superior sound

quality delivered by the audio system, the Audio in is also extremely convenient as all you have to do is to plug your portable MP3 player to the audio system.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set balanced, clear, powerful, warm and bright controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Wall-mountable

The perfect combination of a slim and versatile design, your Philips audio system is cleverly designed to blend into your living space. The base of the audio system is a stand so the system can sit securely and nicely on any shelf or cabinet. When wall mounted you have all the same flexibility of the freestanding stand.

Specifications
