Use as a remote control
- Wireless switch and remote control in one

Powered by your touch
- Kinetic energy — no batteries needed

Easy, reliable and future-proof system
- Connect up to 50 Philips Hue lights

PHILIPS

Highlights

Activate 4 different scenes

You can preset your 4 favourite Philips Hue light settings in Philips Hue tap switch. Select a scene that you have created yourself, one of the scenes that Philips has created for you or program a button to switch all lights off. You can easily make the desired configuration via the Philips Hue app. It's all up to you.

Fast and simple installation

Philips Hue Tap switch can be placed and used anywhere in the home — from being mounted on the wall by the front door, to sitting beside your favourite armchair or even on your bedside table. Philips Hue Tap switch is a way to make functional, day-to-day connected lighting even more convenient. Because it's wireless, you can place it anywhere you want, using screws or the adhesive tape on the back plate of the switch.

Easy wireless control

Philips Hue Tap puts your favourite scenes always within reach. It can be twisted out from the back plate, so you can also use the Philips Hue Tap switch as a remote control for your comfort.

Powered by kinetic energy

Philips Hue Tap uses kinetic energy and is powered by your touch. So no batteries needed. This means Philips Hue Tap has a remarkable zero watts of power consumption, making it smarter, greener, with no battery waste and is hassle-free.

Expand your ecosystem

You can connect up to 50 lights and 10 accessories to the Philips Hue Bridge (not included). Simply begin with any of the available starter kits or a separate bridge and start adding Philips Hue products. You can then control your lights at the swipe of a finger with the intuitive Philips Hue app. Philips Hue is based on ZigBee, a low power, safe and reliable technology for controlling your lights. New features and improvements are continuously added to the system. Updates to both software and firmware are done wirelessly and seamlessly directly to your Philips Hue products.
