Please ensure the correct wall plugs are used to suit your wall type. Wall fixing kit supplied for solids walls only. When drilling into walls check that there are no hidden electrical wires or water pipes. If a non-solid wall use appropriate wall fixings. Please refer to the guide on the reverse of these instruction. If in doubt seek professional advice.

Installation & Assembly

1. Carefully remove packaging.
2. Hold pole up to the window and centralise over width to determine correct position and length. The ideal position for the brackets is 10cm (4") above the window and 10cm (4") out from the edge of the window (fig.1). Remember to allow sufficient length either side to accommodate the curtains when opened.

3. Mark bracket positions on the wall, use a spirit level to ensure brackets will be level. Hold pole up against the marks to double check positions before drilling.
4. Position the brackets on the wall and mark the two holes on the wall and drill the holes
5. Using the wall plugs and screws provided fix the brackets securely (Fig. 2). Alternative wall fixings should be used where necessary.
