

INSTRUCTION MANUAL

PUMP 110 UK

Made in China.

CUSTOMER QUALITY ASSURANCE

APPLICATION DES GAZ has gone to every effort to ensure that your product is of superior quality and meets the highest standards for convenience comfort and durability. If for any reason your AeroBed® product is not working properly you will be entitled to a full repair in accordance with the warranty.

However, please note that you will be asked to return your product with your proof of purchase for testing and if a fault cannot be found you will be charged a service fee.

Thank you for purchasing our luxury AeroBed® product. You can expect premium quality, innovation and durability from every AeroBed® product.

You are about to enjoy the comfort of the AeroBed® product, the finest alternative sleeping system available anywhere. It is your responsibility to read and always follow the safety, care and maintenance instructions for your new product. Always instruct and supervise others on the proper use, maintenance and safety of your bed.

IMPORTANT: Preparation of your bed requires no tools. Use of tools may damage your bed.

Read, follow and retain this instruction manual for future reference.

WARNINGS AND IMPORTANT SAFETY NOTES **CAREFULLY READ THE INSTRUCTION MANUAL BEFORE USE.**

Bed

WARNING

- Adult supervision is required. This is not a lifesaving device. Do not leave children unattended in or around water.
- Do not use this airbed as a raft or a boat.
- Do not inflate with an air compressor.
- Keep away from fire.
- This product is delivered with a carry bag. Keep it away from children. Danger of suffocation!
- This bed is not designed for use by children under 3 years of age. Children under the age of 3 may suffer serious or fatal injury through suffocation, falling from the bed or becoming trapped between the bed and a wall or other objects.
- Product is for indoor use only.
- Fill with cold air only.

- Never use a hair dryer to inflate, this could cause melting.
- Do not over inflate.
- Bursting items can cause serious injury.
- Inflate the airbed until most of the wrinkles in the material are gone and the bed feels firm to the touch.
- Do not let inflatable products come in contact with sharp, pointed objects that may puncture the plastic material.
- This mattress is not intended for infants or persons with limited mobility. They may roll off of the mattress and become entrapped between the mattress and a wall.
- Product is intended for use as an indoor bed only. Do not step or jump on bed or use as a trampoline. Bed may puncture.
- Place bed in a safe area before use, making sure that there are no sharp edges, steps, drops, or breakable items nearby. Use on flat surfaces only. Bed may tip over on uneven surfaces.
- This bed is made of plastic and therefore may melt or burn if it comes in contact with any flame or heat source. Do not place it near or against heaters, open flame or other hot objects.
- This is not a water toy. Use as a mattress only.

Caution: Air temperature and weather do affect the air pressure in inflatable products. In cold weather your airbed will lose some pressure due to the fact that the air will contract. If this occurs, you may want to add a little air to improve your airbed's performance. However, in hot weather, the air will expand. You must let some air out to prevent the airbed from failing due to overpressure.

You should avoid exposing your airbed to extreme temperature (hot or cold).

WARNING

- Adult supervision required for inflation, deflation and maintenance. Follow all safety instructions to avoid serious injury.
- This is an electrical product - not a toy. To avoid risk of fire, burns, injury, and shock, it should not be played with or placed where small children can reach it. Do not use in or around water.
- The appliance can be used by children from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
- Children should be supervised to ensure that they do not play with the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Pump is not intended for continuous use. Pump may stop working or overheat if it is used for extended periods of time. Do not use pump continuously for more than 10 minutes. To avoid excessive heat build-up in the pump, let it rest for 5 minutes between complete inflation and deflation cycles.
- Do not attempt to repair the pump. Contact the Customer Service Department for repair or servicing information.
- Avoid splashing the pump with water.
- Never overinflate an inflatable item.
- Unplug product when not in use.
- Do not block air intake during operation; this could damage the motor.
- Always monitor the pump during use.

INFLATION

IMPORTANT: THE FIRMNESS OF YOUR AIRBED MAY DECREASE AFTER YOU INITIALLY INFLATE IT. YOUR AIRBED IS NOT LEAKING. THIS IS NORMAL AND IS CAUSED BY THE MATERIAL STRETCHING AFTER THE AIRBED IS INFLATED. ADD AIR TO MAINTAIN YOUR DESIRED FIRMNESS.

NOTE: BED MUST BE AT ROOM TEMPERATURE PRIOR TO INFLATING OR IT MAY CAUSE AIR LEAKS. PRESSURE CAN VARY DEPENDING ON ROOM TEMPERATURE AND CONSUMER WEIGHT.

1. Place your rolled-up bed on the floor or other surface free of obstructions or sharp objects.
2. Remove the AC plug and cord from the plastic bag and shrink wrap.
3. Plug into any standard polarized 230 Volt AC electrical outlet. UK Electrical rating: 230 VAC, 50 Hz, 0.5 A.

Note: Because this is an electric device, ensure your hands are dry when connecting the cord set to the pump or plugging it into the wall outlet.

4. Manually slide lever to inflate position. Click to lock lever into position.
5. Push and hold button on remote control for approximately 60 seconds to inflate your AeroBed® product to the full (firmest) capacity. Bed will not over-inflate.
6. Bed is ready to use.
7. Lie on the bed to test the firmness. For a firmer bed, make sure the lever is in the inflate position and press the button on the remote control. For a softer bed, manually slide the lever to the middle position on the pump to expel air. Upon reaching the desired firmness level, make sure to lock the lever back into the inflate position.

DEFLATION AND STORAGE

Make sure product is completely dry and clean before deflating and storing.

1. Make sure the bed is plugged into an electrical outlet prior to deflation.
2. To deflate your AeroBed® product slide lever on pump until it locks into the deflate position. Then push and hold the button on the remote control until all air is expelled from the bed. Pump deflates bed in approximately 60 seconds.
3. Roll or fold the AC cord and wand cord and secure it. Fold the sides of the bed into the center along its length. Tightly roll and place the bed in the convenient carry bag for easy transport and storage.
4. Store your bed in a clean, dry place at room temperature (above 50 °F/10 °C). Storing your bed under 50 °F (10 °C) and over 100 °F (38 °C) may affect its performance and will not be covered under warranty.

CARE AND MAINTENANCE

1. Inspect your AeroBed® product prior to each use.
2. Keep your AeroBed® product away from any sharp objects. Large cuts or snags may not be repairable and will not be covered by your warranty.
3. When not in use, store your AeroBed® product in its duffel bag, in a clean, dry place out of extreme temperatures. Product must be at room temperature prior to inflating.
4. Do not store your AeroBed® product folded inside sofa beds or roll-aways. This may cause damage to your AeroBed® product that will not be covered under your warranty.
5. In case of incidental damage to your bed, a repair kit has been included. Please follow repair instructions carefully.

CLEANING

Bed

We recommend that you do not let the plush surface of your AeroBed® product get wet. Repeated exposure to water or other liquids may cause damage to the plush surface that will not be covered by your warranty. Should liquid come in contact with the plush surface, blot liquid dry and use a damp cloth to remove any stain. Let surface air dry completely.

You may clean the PVC on the sides and bottom of your AeroBed® product with a mild dishwashing detergent or household cleaner. Do not use strong chemicals or other compounds. Allow your bed to air dry completely after cleaning and before storing.

TROUBLESHOOTING

Very rarely, your AeroBed® product may fail to inflate properly. Should this occur, please use the following check list.

1. If your AeroBed® product doesn't appear to be inflating:

- Make sure your bed is plugged into an active electrical outlet.
- Insure the lever is locked in the inflate position. If the lever is not locked into position, manually slide the lever until it locks into place. Press and hold the button on the remote control to continue inflating.
- The pump power cord plug is protected by a 3A fuse. Check to see that the fuse has not melted.

2. If air leakage occurs:

Carefully inspect the bed for a puncture or tear. If damaged, contact our Customer Service Department to request a repair kit.

3. If trouble persists, please phone our Customer Service Department for assistance.

ENVIRONMENTAL PROTECTION

Recommendations for electric and electronic waste.

The symbol of a dust bin with a cross through it means that the pump is subject to selective sorting.

The pump must be scrapped correctly at the end of its service life.

It should not be placed with unsorted municipal waste.

Selective sorting encourages the re-use and all forms of recycling of recyclable materials in this waste.

Take the pump to a waste recycling centre organized specifically for this purpose (tip).

Find out about this from the local authorities.

Do not throw it away in the middle of nowhere and do not burn. Certain hazardous substances found in electrical equipment may harm the environment and have potentially adverse effects on human health.

WARRANTY

- The product is covered by a total parts and labor warranty for the following periods: the pump, one (1) year from date of purchase; the mattress one (1) year from the date of purchase. The warranty applies to products that do not conform to the order or that are defective. Within the warranty period, the product shall be either repaired, replaced or reimbursed - in full or in part. Liability under a claim shall in no event exceed the price of the product.
- The warranty is null and void and does not apply should the damage arise from (i) abuse of the product (ii) failure to operate and maintain the product in accordance with the instructions of use (iii) repair, service, alteration or modification of the product by unauthorized third parties (iv) original parts are not used.
- The warranty is excluded in case of professional use.
- Proof of the purchase date (ie. invoice, till receipt) and claim report are required to obtain a free warranty service.
- Service under the warranty does not affect the expiry date of the warranty.
- This warranty in no way affects a Buyer's statutory rights.
- Should you require additional information, please contact the Local Customer Service in your country. List of contacts is available in this leaflet.
