Fixings are not supplied as they will need to suit the wall type, and the length of screw will depend on the distance of the back of the unit to the wall.

**Warning:** Take care when drilling the wall that you do not drill into any pipes, wires etc. If in doubt, consult an expert.

## Step 13

### Joining units together

Fittings have been supplied so you are able to join units together.

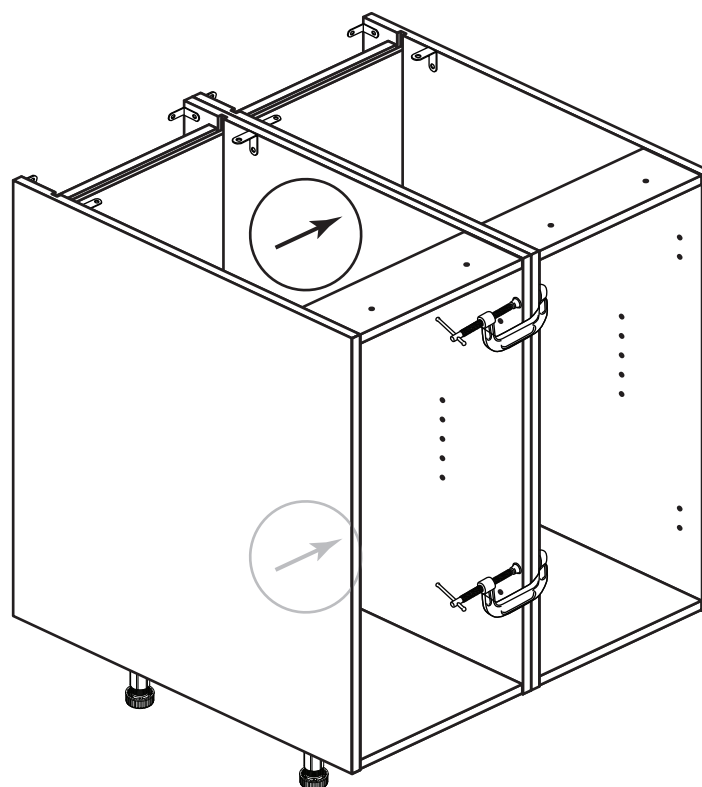

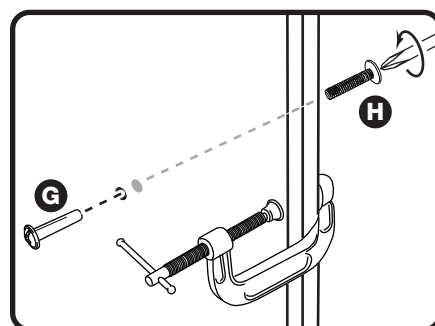

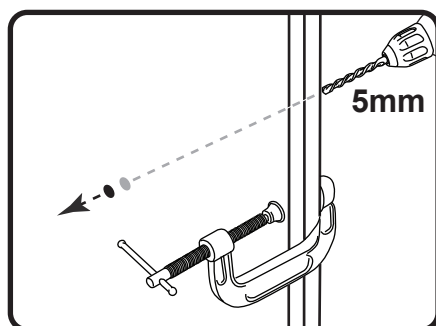

Make sure that your first unit is level.

Push the other unit up against first unit and ensure both units are level.

This will depend on which side **1** or **2** you fitted the hinge plates **K**.

Check that the holes and hinges are in the same place as the diagrams.

**Note:** We recommend the use of a small piece of waste wood, placed behind the hole while drilling, to reduce the possibility of any breakout.

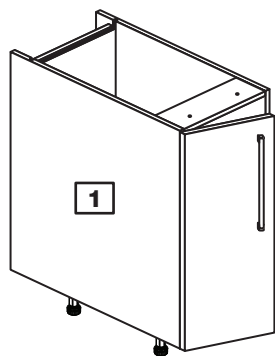

Using the pilot hole in the rear face of the door, **7** drill through the holes indicated opposite, using a 2.5mm diameter drill.

Turn the door **7** over and open out the 2.5mm holes that you have just drilled by drilling back through them with a 5mm drill.
