## Product Description

---

One base for two car seats - the perfect solution. On the iPro Base you can fix both the iPro Baby and the following iPro Kids car seat.

The iPro Base can be used in cars with ISOFIX attachments, or in those who are equipped with i-Size seats. In order to fix the base you need to engage the individually adjustable ISOFIX connectors in the car's Isofix hooks. As soon as the safety indicator switches to green, the base is correctly fixed. The support leg is height-adjustable and can be unlocked with one hand only and after reaching the car's floor, it engages automatically. Once again, the green indicator shows whether it has engaged in the correct position.

The same applies for the fixing of both car seats on the iPro Base. The iPro Baby, as well as the iPro Kids are to be put on the middle of the base via the Easy Slide function. Special guiding rails ensure that the car seats always reach the correct position and then engage correctly. Here too, colored safety indicators show whether the installation, or rather the engaging was successful. In order to remove the car seats from the base, you need to push the button on the middle of its front side.

## iPro Base Data

**Product net weight** 8,50 kg

**Age Information** 0 - 13 kg

**Features**  
Quick release button  
Coloured indicators  
Guide rails

### **Dimensions**

---

**Dimensions** 34 x 63 x 32 cm
