Product Information

Yale EasyFit Telecommunicating Wireless Alarm Kit

## Product Summary

### Yale Easy Fit Telecommunicating Wireless Alarm Kit

The Telecommunicating Alarm Kit is a feature packed and easy to install home alarm system.
The touch screen control panel offers a number of easy to use system control setting with the added feature of alerting you by telephone when the alarm is activated. The Alarm can store up to 3 telephone numbers, such as your mobile, work or a family member. The system can also be activated and deactivated using a touch-tone telephone for the ultimate peace of mind.

- No wires for a quick, easy installation and setup
- Contains 2 PIR & 2 Door/Window sensors and expandable up to 30 sensors
- Connect to a telephone line to automatically contact up to 3 phone numbers if the alarm is activated
- Long operating range of up to 30m
- Up to 30 zones can be programmed allowing you to arm/disarm the alarm in different parts of your property
- High intensity 104dB siren programmable for up to 10 minutes
- Rolling code system to provide greater security and peace of mind
- Arm and disarm your alarm remotely using a touch tone telephone

**Telecommunications**

When connected to a telephone line the Yale Easy Fit Telecommunicating Intruder Alarm can be programmed with up to three phone numbers to ensure that if the alarm is triggered you will be alerted. The telephone function will go through the phone numbers in order until it makes contact. The telephone connection also allows you to arm and disarm your alarm remotely.

**Easy to Setup and Ready to Go**

The Yale Easy Fit Telecommunicating Intruder Alarm comes supplied with everything you need to set it up in the box, including two sensors which can be used on either doors or windows, two PIR sensors as well as all the screws, fixings and batteries which are required. The sensors supplied with the Yale Easy Fit Telecommunicating Intruder Alarm are pre linked so they can be put up straight away.

**What do zones do?**

Programmable zones allow you to partially arm the alarm. For example using programmable zones you could arm the alarm for the downstairs of the property while you are in bed upstairs. The Yale Easy Fit Telecommunicating Intruder Alarm allows you to set up to thirty zones.

**Wireless Connectivity**

The Yale Easy Fit Telecommunicating Intruder Alarm can be connected to a range of additional sensors and accessories giving you the flexibility to protect every part of your property. The Alarm can be expanded to utilise up to thirty sensors and accessories up to 30m away from the control box.
