Assembly Instructions

4 Tier Shelving Unit

Ensure you read the instructions before assembly and keep for future reference.

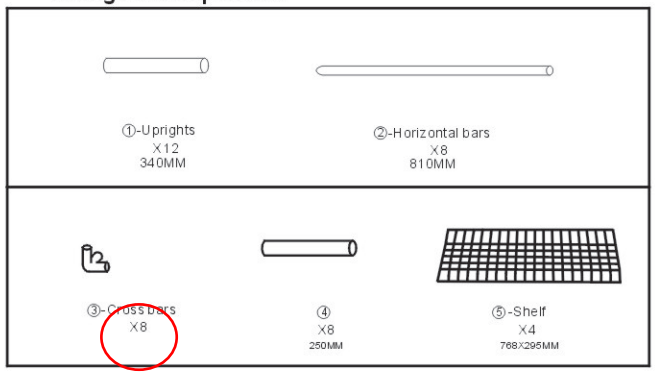

Before you begin

Before you begin you should read through these instructions and familiarise yourself with each step of assembly. Do not discard any of the packaging until you have checked that you have all the parts and the pack of fittings.

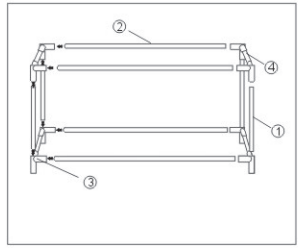

To avoid damaging any of the components,lay out and assemble the unit on a floor. Keep fittings and plastic packaging out of children's reach.

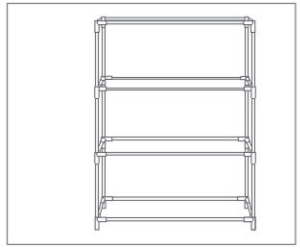

If any of the components are dusty,clean with a duster or damp cloth,do not use abrasive cleaners.

Fixings & Components

Assembly

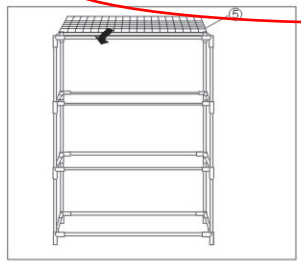

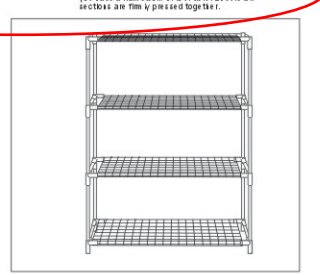

Assembly Step 1

To assemble the framework, take components ① and join to a second ① using two slide pokes ⑦. Repeat. Now join these two sections together using long poles ⑧. Join the resulting sections together.....

Assembly Step 2

....By firmly securing each on top of each other connecting using the short poles ⑦. Repeat until you have a framework of four tiers. Ensure all sections are firmly pressed together.

Assembly Step 3

Now place each shelf section ⑤ by hooking over the top of each tiers framework. Firmly press down to lock into position. Repeat for each tier.

Assembly Step 4

Finally, double check that all sections are secure and firmly pressed together.

Warning

Ensure you place the item on a level surface in a sheltered area to avoiding toppling over due to the surface or the wind. Occasionally check that all fixings are tight, The shelving is not designed for heavy loading.

Care

To clean, use a damp cloth and mild detergent, do not use bleach or abrasive products.
