Fire Legend

# AOPEN HD LED Projector QH15s/L21/CD21/U7P2402 Series

# **User's Guide**

Copyright © 2023. Aopen Incorporated. All Rights Reserved. Aopen Projector User's Guide Original Issue: 06/2024

To prevent electric shock, please do not open the device case. Internal components of the device are not user-serviceable. Please contact professional maintenance staff for repairs.

# Notice

Although there is an ENCLOSED PROJECTION BARE ENGINE in the projector, avoid obstructing the air inlet with any objects during use.

There is no dust filter on the vents. Still, it is necessary to avoid obstructing the air inlet, as this will trigger the projector's LCD panel and COB protection mechanism due to poor ventilation.

### Important safety announcements

Don't install equipment in a poorly ventilated area.

Don't block the vent (intake or exhaust).

Don't install equipment in hot and humid areas.

Don't install equipment in dusty or smoky areas.

# **Parts and Functions**

Important notice: Audio outlet with Microphone function headset/speaker may not work properly.

| #  | lcon | Function                           | Description  |
|----|------|------------------------------------|--|
| 1  | ٢    | On/Off                             | Turn the projector on/off.   |

| 70                        | 155                   | 87                   | 202                               |
| 80                        | 177                   | 100                  | 231                               |
| 90                        | 199                   | 112                  | 260                               |
| 100                       | 221                   | 125                  | 289                               |
| 110                       | 244                   | 137                  | 318                               |
| 120                       | 266                   | 149                  | 347                               |

#### Projection distance corresponds to screen size

### Installation and Adjustment

# **Manual Focus**

Rotate the lens to adjust the focus until the projected image is clear.

# **Keystone Correction**

• Four-point keystone correction

- Select "Projection Image Settings" and adjust "Horizon and Vector Keystone" by pressing "OK" to confirm.
- 2. Adjust each corner separately until the image fits your desired shape.

The smart projector supports vertical automatic keystone correction when starting up, and user s can also perform manual correction as needs.

### Connect to the wireless network

- 1. Turn on Wi-Fi by clicking "Wifi Settings" and press "OK".
- 2. Select the desired network and press "OK" to confirm.

# **Bluetooth settings**

- 1. Click "Bluetooth Settings" and press "OK". Then, click "Add accessory".
- Turn on the Bluetooth switch, search for the desired device (e.g. Bluetooth speakers), and connect.

### Language selection:

Select the language that best suits your personal preference.

### Date and Time setting:

Select the preferred date and time format based on your personal preference.

# **Projection mode settings:**

Select the appropriate mode based on your requirements. There are four projection modes available: Front, Rear, Front/Upside Down, and Rear/Upside Down.

# **Application settings:**

Download the app from Menu Search, type the app name, and search. Click on "Application Settings" to view all downloaded apps and select the app you want to use.

### **Input Source Selection**

Press the input button on the remote control to select the input source. Select either HDMI or USB. If USB is selected, the file manager app will appear; allowing you to choose a USB device or an SD card based on your needs.

# **Screen Mirroring Instructions**

Ensure that the projector is connected to **the same Wi-Fi network** as your mobile phone, tablet or laptop.

#### · Android system:

- a) Launch Miracast on the projector and wait for the connection prompt.
- b) Select the projector device from the screen mirroring system list to start screen mirroring.

#### · iOS system:

- a) Launch ApowerMirror on the projector and wait for the connection prompt.
- b) Select the projector device from the screen mirroring system list to start screen mirroring.

## **Common issues and solutions**

| Issues  | Solutions   |
|---|---|
| No power, LED off, and the projector cannot power on. | Check the power cable for loose connection.   |
| LED on but the projector cannot power on              | Check the power cable for loose connection, press the Power button to turn on the projector.  |
| Cannot screen mirror                                  | <ol> <li>Refer to the user guide for the correct screen mirroring<br/>function.</li> <li>Shorten the distance between the smart device and<br/>projector for better screen mirroring quality.</li> <li>Ensure that the smart phone is connected to the<br/>correct Wi-Fi network SSID.</li> </ol> |
| Cannot stream media                                   | Check the internet connection for your smart device.  |
| Remote not responsive                                 | <ol> <li>Replace remote batteries.</li> <li>Make sure the remote control is aligned with the IR<br/>sensor.</li> </ol>  |
| Unable to power off the projector                     | Press and hold the Power button for 5 seconds until the projector turns off.  |

# Reminder

- The projector is mainly used to watch native video or online video, cannot be used as a mobile phone or computer.
- If the remote control cannot control a third-party APP when in use, you need to use a USB mouse to assist in the operation.
- To download a third-party video APP, please note that you need to download the TV version of the program, not the mobile version or other versions of the program.
- 4. This machine does not support Dolby encoded audio and video files.
- If you don't use it for a long time, you need to cover the lens with a cover to prevent dust.
- Do not look into the projector's lens when the lamp is on. The bright light may hurt your eyes.

### **Disposal Instructions**

This symbol on the product or on its packaging indicates that the product must not be disposed of with other household waste. When disposing of used devices, it is your responsibility to bring it to a collection point that recycles used electrical and electronic equipment. The separate collection and recycling of used devices at the time of disposal helps to conserve natural resources and ensures that they are recycled in a manner that protects human health and the environment. For more information about

recycling points for used devices, please contact your local city office, household waste disposal service, or the shop where you purchased the product.

# **Cleaning Methods**

Before cleaning, ensure that the power socket is unplugged. Do not use pesticides or other volatile chemicals on the projector or lens, and avoid leaving rubber or vinyl products in contact with the projector for extended periods of time, as this may damage or peel off the remaining layers.

#### Cleaning the projector:

- 1. Use a soft and dry cotton cloth to wipe the surface of the projector.
- Dampen a soft cotton cloth with a diluted neutral cleaner, and gently wipe the projector surface. Dry with a dry cotton cloth.
- 3. Do not use water, benzene, or other solvents on the projector.
- 4. Do not scratch the main body of the projector with fingernails or other hard objects.

#### Cleaning the lens:

- 1. Blow off the dust on the lens surface, and wipe off any stains with a soft cloth.
- 2. Use a professional dryer or lens cleaning paper specifically for camera and glasses.

**REMARKS:** Do not use ordinary tissue to clean the lens. Ordinary tissue contains large particles of impurities that may scratch the lens.

#### Cleaning the outlet dust filter:

Turn off the power and unplug the power cord before cleaning the outlet dust filter of vents every three months. This will prevent poor ventilation from triggering the projector LCD panel and COB protection mechanism.

# **Projector Specifications**

| Model                    | QH15s                                    |
