Electrical Shock Hazard

- Only plug this unit into a properly earthed outlet. If in doubt seek advice from a suitably qualified engineer.
- Failure to follow these instructions can result in death, fire, or electrical shock.

Standard Installation Accessories List

Spec.	Illustration Picture	Qty
Casing		1
Upper Chimney		1
Lower Chimney		1
Lower chimney bracket		1
Upper chimney bracket		1
Hanging Board		1
$\phi 8$ rawl plugs $\phi 8 \times \phi 6$ white color		9
Screws ST4.0x30		9
$\phi 7.2$ screws ST4.0x8		2

INSTALLATION (wall mounting)

If you have an outlet to the outside, your cooker hood can be connected as below picture by means of an extraction duct (enamel, aluminum, flexible pipe or inflammable material with an interior diameter of 150mm)

1. Before installation, turn the unit off and unplug it from the outlet.

2. The cooker hood should be placed at a distance of 65~75cm above the cooking plane for best effect.

3. Drill 3 x 8mm holes to accommodate the bracket. Screw and tighten the bracket onto the wall with the screws provided.

4. Leave up the cooker hood and hang onto the wall bracket hook.

5. Fix the one-way-valve to the air outlet of the cooker hood. Then, attached the exhaust pipe onto the one-way-valve as shown below.

Exhaust pipe

Cooker hood

6.

- i. Place the glass in appropriate position on the top the cooker hood.
- ii. Fix with 4 screws and washer. In order to avoid the glass cracking, please do not tighten the screws too strongly.
- i. By Put the inner chimney into outer chimney .Then pulling out the inner chimney upwards. Adjust to reach the height required.

- ii. Sliding the chimney to adjust the chimney height. When the height you required is reached, then hang the fixing hole to the fixing screws as showed in below pictures.

8.

- i. Drill 2 x 8mm holes to accommodate the plate II. Screw and tighten the plate II onto the wall with 2 screws provided.
- ii. Assemble the chimney onto the unit and fix it with 2 screws.

INSTALLATION (VENT INSIDE)

If you do not have an outlet to the outside, exhaust pipe is not required and the installation is similar to the one show in section “INSTALLATION (VENT OUTSIDE)”.

Activated carbon filter can be used to trap odors. In order to install the activated carbon filter, the grease filter should be detached first. Press the lock and pull it downward.

Plug the activated carbon filter into the unit and turn it in clockwise direction. Repeat the same on the other side.

NOTE:

- o *Make sure the filter is securely locked. Otherwise, it would loosen and cause dangerous.*
- o *When activated carbon filter attached, the suction power will be lowere*

DESCRIPTION OF COMPONENTS

OPERATION

Low Speed button 1

It's used for Ventilation on the kitchen. It is suitable for simmering and cooking which do not make much steam.

Medium Speed button 2

Airflow speed is ideally for ventilation in standard cooking operation.

High Speed button 3

When high density of smoke or steam produced, press high-speed button for highest effective ventilation.

Light button

NOTE: If Low / Medium / High speed buttons are press at the same time, the unit will only operate at the highest speed.

MAINTENANCE

Before cleaning switch the unit off and pull out the plug.

I. Regular Cleaning

Use a soft cloth moistened with hand-warm mildly soapy water or household cleaning detergent. Never use metal pads, chemical, abrasive material or stiff brush to clean the unit.

II. Monthly Cleaning for Grease Filter

ESSENTIAL: Clean the filter every month can prevent any risk of fire.

The filter collects grease, smoke and dust..... so the filter is directly affecting the efficiency of the cooker hood. If not cleaned, the grease residue (potential flammable) will saturate on the filter. Clean it with household cleaning detergent.

III. Annual Cleaning for Activated Carbon Filter

Apply SOLELY to unit that installed as a recirculation unit (not vented to the outside). This filter traps odors and must be replaced at least once a year depending on how frequent the cooker hood used.

IV. Changing a light bulb

Remove the screws on the glass, take off the hood glass. Find the bulb that requires replacement, you will find it located in the light fixture which is inside the exposed section of the canopy.

Disconnect the light wiring point and remove the bulb holders and wiring from the hood. Important: It's not possible to replace the bulbs individually, it will be necessary to obtain the bulbs, bulb holders and wiring as a complete part. (LED light: G4, MAX 1.5W)

Fit the replacement bulbs, bulb holders and wiring in the same manners as the originals. Then reconnect the light wiring point.

Refit the hood glass and fasten the glass screws. Make sure the screws are fully tightened.

TROUBLESHOOTING

Fault	Cause	Solution
Light on, but fan does not work	The fan blade is jammed.	Switch off the unit and repair by qualified service personnel only.
	The motor is damaged.	
Both light and fan do not work	Halogen light bulb burn.	Replace the bulb with correct rating.
	Power cord looses.	Plug in to the power supply again.
Serious Vibration of the unit	The fan blade is damaged.	Switch of the unit and repair by qualified service personnel only.
	The fan motor is not fixed tightly.	Switch off the unit and repair by qualified service personnel only.
	The unit is not hung properly on the bracket.	Take down the unit and check whether the bracket is in proper location.
Suction performance not good	Too long distance between the unit and the cooking plane	Readjust the distance to 65-75cm

CUSTOMER ASSISTANCE SERVICE

If you cannot identify the cause of the operating anomaly, switch off the appliance and contact the Assistance Service.

PRODUCT SERIAL NUMBER. Where can I find it?

It is important you to inform the Assistance Service of your product code and its serial number (a 16 character code which begins with the number 3); this can be found on the guarantee certificate or on the data plate located on the appliance.

It will help to avoid wasted journeys to technicians, thereby (and most significantly) saving the corresponding callout charges.

ENVIRONMENTAL PROTECTION

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your Local Authority or retailer for recycling advice.

This appliance is marked according to the European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE).

By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product.

The symbol on the product indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. Disposal must be carried out in accordance with local environmental regulations for waste disposal.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.
