Instruction manual

Washer Dryer
WDNB7512EW

You'll soon be enjoying your new washer dryer.

It all begins here, with your instructions. Don't worry, there's nothing too technical coming up. Just simple, step-by-step guidance to get you up and running quickly. Sound good? Then let's get started.

Help and Guidance

We're here to help you get the most from your washer dryer. Should you require any guidance, a simple solution can often be found online at:

www.argos-support.co.uk

If you still require further assistance, call one of our experts on **0345 257 7271**.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at **www.argos-support.co.uk** If you still require further assistance, call one of our experts on **0345 257 7271**.

Safety information

1

Safety information

Important - Please read these instructions fully before installing or operating your washer dryer

Before use

- Do not install your machine on a carpet or such grounds that would prevent the ventilation of its base.
- If the supply cord is damaged, it must be replaced by the manufacturer, their service agent or similarly qualified persons in order to avoid a hazard.
- The new hose-set supplied with the appliance are to be used and that old hose-set should not be reused.
- Children should be supervised to ensure that they do not play with the appliance.
- Pets and children may climb into the machine. Check the machine before every operation.
- Packing materials may be dangerous to the children. Please keep all packing materials (plastic bags, foams etc) far away from the children.
- Keep the document bag that was supplied inside your Washer dryer and contained this user manual out of the reach of children and babies to prevent the risk of suffocation.
- Only use pre-wash programmes for very dirty laundry.
- Never open the detergent drawer while your Washer dryer is running.
- Never force the door open when your Washer dryer is running.
- Please follow the manufacturer's instructions on the use of fabric conditioner or any similar products that you intend to use in your Washer dryer.
- Do not stop your Washer dryer before the drying phase of a programme has been completed. If you have to do so, quickly remove all of your laundry and immediately spread the items on an appropriate surface to allow them to cool.

NOTE: For a softcopy of this user manual, please contact the following address:
washingmachine@standardtest.info. In your email, please provide the model name and serial number (20 digits) which you can find on the appliance door.

To ensure your safety and the safety of others, please read the following safety precautions before using or installing your Washer dryer.

Your machine is for domestic use only. Using it for commercial purposes will void your warranty.

Before setting up your Washer dryer, remove the four transit bolts and the rubber washers from the rear of the machine.

- Your warranty does not cover damage caused by external factors such as fire, flooding and other sources of damage.
- Retain this user manual for future use and pass it on to the next user.
- The necessary ambient temperature for operation of your Washer dryer is 15-25°C.
- Where the temperature is below 0°C, hoses may split or the appliance may not operate correctly.
- Please ensure that garments loaded into your Washer dryer are free from foreign objects such as nails, needles, lighters and coins.
- Lints must not be allowed to accumulate around the washer dryer.
- Residue may build up on detergent and softeners exposed to air for a long period of time. Only put softener or detergent in the drawer at the beginning of each wash.
- Unplug your Washer dryer and switch off the water supply if the Washer dryer is left unused for a long time. We also recommend that you leave the door open to prevent build up of humidity inside the Washer dryer.
- Some water may be left in your Washer dryer as a result of quality checks during production. This will not affect the operation of your Washer dryer.
- Do not exceed the maximum load for the washing or drying programme you have chosen.

Safety information

Important - Please read these instructions fully before installing or operating your washer dryer

Before use

- The appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by a utility.
- This appliance must not be installed behind a lockable door, a sliding door or a door with a hinge on the opposite side to that of the washer dryer, in such a way that a full opening of the washer dryer door is restricted.

Install your Washer dryer in a location that can be ventilated and has constant air circulation.

SAFETY WARNINGS

You must read these warnings. Ignoring these warnings may put you or others at risk of fatal injuries.

RISK OF BURNS

- Do not touch the door, drain hose or any discharged water while your Washer dryer is running. The high temperatures involved pose a burn risk.
- Open the door fully after the drying process. Do not touch the door glass. It will reach high temperatures and pose a burn risk.

ELECTROCUTION RISK

- Do not connect your Washer dryer to the mains electricity supply using an extension lead.
- A damaged power cord/plug can cause fire or give you an electric shock. When damaged it must be replaced, this should only be done by qualified personnel.
- Never remove the plug from the socket by pulling the cord. Always hold the plug.
- Never touch the power cord/plug with wet hands as this could cause a short circuit or electric shock.
- Do not touch your Washer dryer if your hands or feet are wet.
- Call the nearest authorised service company for assistance if the power cord malfunctions.

EXPLOSION RISK

- Thoroughly rinse off any chemicals, such as stain remover, from your garments before beginning a washing and drying programme. Failure to do so may cause a risk of explosion when the drying function is used.

FIRE RISK

- Do not keep flammable or explosive liquids near your machine.
- Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.
- Do not use a detergent ball/device if you have selected a washing and drying programme as this may cause a fire hazard.
- Do not dry your laundry under the conditions specified below as they present a fire risk.
 - If the laundry is not washed.
 - If oil based stains are not pre-treated before beginning a washing or drying programme.
 - Laundry which has been cleaned with industrial chemicals.
 - Laundry that has a high amount of sponge, foam, rubber or rubber-like parts and accessories.
- Items such as foam rubber (latex foam), shower caps, waterproof textiles, rubber backed articles and clothes or pillows fitted with foam rubber pads should not be dried in the drying process of the appliance.
- Stuffed or damaged items (such as pillows or jackets). The rubber sponge presents a fire risk during the drying process.
- Never use products that contain solvents in your machine.
- Please ensure that garments loaded into your Washer dryer are free from foreign objects such as nails, needles, lighters, matches and coins.

Safety information

Important - Please read these instructions fully before installing or operating your washer dryer

Before use

FALL AND INJURY RISK

- Do not climb on your Washer dryer.
- Make sure hoses and cables do not cause a trip hazard.
- Do not turn your Washer dryer upside down or on its side.
- Do not lift your Washer dryer using the door or detergent drawer.
- Make sure hoses and cables do not cause a trip hazard.

To avoid risk of injury, please take care when moving your Washer dryer. It is heavy and we recommend that a minimum of two people move your Washer dryer.

CHILD SAFETY

- Do not allow children to play with the machine.
- Do not leave children unattended near the machine. They might lock themselves in the machine.
- The door glass and machine surface can become extremely hot during operation. Do not allow children to touch the machine; it may damage their skin.
- The packaging of the machine could be hazardous to children. Do not allow children to play with the packaging or small parts from the Washer dryer.
- Poisoning and irritation may occur if detergent or other washing aids are consumed or come into contact with skin or eyes. Keep cleaning materials out of reach of children.

ENERGY SAVING INFORMATION

Some important information to get the most efficient use out of your machine:

- The amount of laundry you put in your Washer dryer should not exceed the maximum amount indicated. Avoid overloading to allow your machine to run more efficiently.
- Not using the pre-wash feature for normal and lightly soiled laundry will save electricity and water consumption.

PACKAGING AND ENVIRONMENT

DISPOSE OF PACKAGING AND YOUR OLD MACHINE RESPONSIBLY

Removal of packaging materials

Packaging materials protect your machine from any damage that may occur during transportation. Please recycle the packaging materials.

Recycled material reduces raw material consumption and lowers waste production.

BEFORE USE

- Do not allow pets near the machine.
- Please ensure that you have removed all of the packaging materials and protective tape from the outside of your Washer dryer, inside the drum and inside the detergent drawer before using.
- Check for any external visible damage. Do not install or use your Washer dryer if it is damaged.
- Your Washer dryer is for domestic use only and is only intended to wash and dry items which are specified by the manufacturer to be machine washable and dryable on the label and textiles composed of hand washable wool or wool blend fabrics as well as satin, lace, silk and other hand-washable garments. Do not use your Washer dryer for any purpose not expressly specified in this user guide.
- This appliance can be used by children aged from 8 years and above and by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be done by children without supervision.
- Installation of your machine must only be carried out by an authorised service agent. Installation by anyone other than an authorised agent will void your warranty.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

Getting to know your washer dryer

2

Getting to know your washer dryer

You'll be up and running in no time

Ready? Let's begin...

Please read these instructions carefully. They contain important information which will help you get the best from your washer dryer and ensure safe and correct installation and operation.

If you require any further assistance, our technical experts are happy to help. For full details, refer to the product support section at the end of these instructions.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

- Inlet hose

Installing your washer dryer

3

Installing your washer dryer

Bringing it all together

Unpacking your washer dryer

a: Carefully remove all packaging materials including the foam base, dispose of correctly.

Note: When opened, water droplets may be visible in the drum etc. this is normal as each appliance is factory tested.

Removing the transit screws

1. Before operating your machine, you must remove the transit screws from the rear of the machine.
2. Loosen the transit screws by rotating anti-clockwise with an appropriate spanner.
3. The transit screws can then be removed with a straight pull. The removed transit screws should be stored in case you need to transport your washer dryer in future.
4. Insert the plastic blanking caps from the accessories bag into the gaps left by the transit screws.

NOTE: You must remove the transit screws from your machine before first use. Faults occurring in machines operated with transit screws still fitted are outside the scope of the warranty. The transport screws should be stored for future use.

Adjusting the feet

1. Do not install your machine on a carpet or surface that will block ventilation at the base.
2. To ensure silent and vibration-free operation of your machine, install it on a firm surface.

3. You can adjust the level of your machine by using the gauge at the top.

You can level your Washer dryer by using the adjustable feet:

- Loosen the plastic adjustment nut.
- Turn the feet clockwise to increase the height of the machine. Turn the feet anti-clockwise to decrease the height of the machine.
- Once the machine is level, tighten the plastic adjustment nut.

- Never insert cardboard, wood or other similar materials under the machine to level it.
- When cleaning the ground on which the machine is located, take care not to disturb the level of the machine.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

Installing your washer dryer

Bringing it all together

Connections

Water inlet hose connections

Important: This washer dryer MUST only be connected to a cold water supply. Only use the water inlet hose supplied with your machine. NEVER use old, used, or damaged water inlet hoses.

- Connect your Washer dryer to your cold water supply only.
 - Only use the water inlet hose supplied with your machine or one purchased through an authorised dealer.
 - A gasket is included in the hose packaging to prevent water leaks from connections. Fit this gasket to the end of the water inlet hose that will be connected to the tap.
 - Connect the angled end of the water inlet hose to the cold water inlet on the rear of the machine and hand tighten.
 - Screw the other end of the water inlet hose onto a 3/4" water tap and hand tighten.
- If in any doubt, consult a qualified plumber.
 - Turn the cold water supply on and check for any leaks.
 - Water flow with pressure of 0.1-1 Mpa will allow your machine to operate at optimum efficiency (pressure of 0.1 Mpa means that more than 8 litres of water per minute will flow through a fully opened tap).
 - Ensure that the the hose is not trapped, twisted, folded, crushed or kinked.

Drain hose connections

- Connect the water drain hose to a standpipe or to the outlet elbow of a household sink, using additional equipment. The hose must be placed between 0 cm and 80 cm from the ground.
- Never attempt to extend the water drain hose.
- Do not put the water drain hose from your machine into a container, bucket or bathtub.
- Make sure that the water drain hose is not bent, buckled, crushed or extended.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk if you still require further assistance, call one of our experts on **0345 257 7271**.

Electrical Connection

Any electrical work that is required to install this washer dryer MUST be carried out by a qualified electrician.

THIS APPLIANCE MUST BE EARTHED

Before making any electrical connections, ensure that:

- Your Washer dryer requires a 220-240V, 50Hz mains supply.
- The mains cord of your machine is fitted with a grounded plug.
- The fuse rating of the plug should be 13 amperes.
- Do not connect your Washer dryer to the mains electricity supply using an extension lead.
- If you do not have a suitable socket and fuse conforming with this, please ensure the work is carried out by a qualified electrician.
- We do not take responsibility for damage that occurs due to the use of ungrounded equipment.

NOTE: Operating your machine with low voltage will cause the life cycle of your machine to be reduced and its performance to be restricted.

Plug replacement (UK & Ireland only)

Should you need to replace the plug; the wires in the power cable are coloured in the following way:

Blue – Neutral 'N'

Brown – Live 'L'

Green & Yellow – Earth 'E'

The green & yellow wire must be connected to the terminal in the plug that is marked with the letter E or by the earth symbol.

The blue wire must be connected to the terminal that is marked with the letter N.

The brown wire must be connected to the terminal that is marked with the letter L.

If the power lead is damaged, it must be replaced by a qualified electrician.

Functions 4

Functions

Simple everyday use

CONTROL PANEL OVERVIEW

1. **Detergent drawer**
2. **Programme dial:** Use the programme dial to select the washing/drying programme for your laundry. Turn the programme dial clockwise or anti-clockwise to select the required programme. Make sure that the dial is pointing exactly at the selected programme.
3. **Additional Function Buttons:** Use these buttons to select additional functions for the laundry programme. See additional functions for more information.
4. **Start/Pause button:** Start or pause the selected programme.

DETERGENT DRAWER GENERAL VIEW

1. Liquid detergent attachments (*)
2. Main wash detergent compartment
3. Softener compartment
4. Pre-Wash detergent compartment
5. Powder detergent levels
6. Powder detergent scoop (*)

(*) Specifications may vary depending on the machine purchased.

Main wash detergent compartment

This compartment is for liquid or powder detergents or limescale remover. The fluid detergent level plate is supplied inside your machine. (*)

(*) Specifications may vary depending on the machine purchased.

Fabric conditioner, starch, detergent compartment:

This compartment is for softeners, conditioners or starch. Follow the instructions on the packaging. If softeners leave residue after use, try diluting them or using a liquid softener.

Pre-wash detergent compartment:

This compartment should be used only when the pre-wash feature is selected. We recommend that the pre-wash feature is used only for very dirty laundry.

Programme dial

To select the desired programme, turn the programme dial either clockwise or anti-clockwise until the marker on the programme dial points to the chosen programme.

Child Lock

The Child Lock function allows you to lock the buttons so that the wash cycle you have chosen cannot be changed unintentionally.

To activate child lock, press and hold button 3 and 4 simultaneously for at least 3 seconds. "CL" will flash on the electronic display for 2 seconds when the child lock is activated.

If any button is pressed or selected programme is changed by the programme dial while the child lock is active, the "CL" symbol will flash on the electronic display for 2 seconds.

If the child lock function is active and a programme is running, when the programme dial is turned to the CANCEL position and another programme is selected the previously selected programme continues from where it was left.

To deactivate the child lock, press and hold button 3 and 4 simultaneously for at least 3 seconds until the "CL" symbol on the electronic display disappears.

Functions

Simple everyday use

Delayed Start

- Press the Delay button once.
- "1 h" will appear on the display.
- The  symbol will flash on the electronic display.
- Press the Delay button until the desired delayed time appears on the display.
- If you have skipped the delay time you wanted to set, keep pressing the Delay button until the desired delay time is displayed again.
- For the delay timer function to work, you must press Start/Pause button.
- To activate the time delay, press "Start/Pause" button.
- To cancel the time delay once it has been set, press the Delay button once. The  symbol will no longer flash on the electronic display.
- In order to add/remove laundry while delay timer function is working, you must press Start/Pause button. After adding/removing laundry, you must press Start/Pause button again to activate delay timer function.

Start/Pause button

To start the selected programme, press the Start button.

If you switch your machine to standby mode, the Start/Pause indicator on the electronic display will blink.

Cancelling Programme

To cancel a running programme at any time:

1. Turn the programme dial to the "CANCEL" position.
2. Your machine will stop the washing operation and the programme will be cancelled.
3. Turn the programme dial to any other programme to drain the machine.

Your machine will perform the necessary draining operation and cancel the programme.

You can now select and run a new programme.

Finishing Programme

Your machine will stop by itself as soon as the programme you have selected finishes.

- "END" will flash on the electronic display.
- You can open the machine's door and remove the laundry.
- Leave the door of your machine open to allow the inner part of your machine to dry.
- Switch the programme dial to STOP position.
- Unplug your machine.
- Turn the water tap off.

Additional Functions

Functions

Simple everyday use

To allow you to get the best washing results possible, your machine offers the following additional functions to complement the selected programme. To select an additional function before starting a programme:

- Press the button on the Control Panel below the symbol of the additional function you wish to select.
- If the symbol of the additional function flashes continuously, the function has been activated.
- If the symbol of the additional function blinks, the function has not been activated.

Reason for non-activation:

- The additional function is not compatible with the selected washing programme.
- Your machine has progressed too far into the selected programme for the additional function to be possible.
- The additional function you have chosen is not compatible with another additional function you have already selected.

Half-load Detection System

Your machine features a half-load detection system. If you put less than half the maximum load of laundry into your machine it will automatically set the half-load function, regardless of the programme you selected. This means that the selected programme will take less time to complete and will use less water and energy.

Temperature selection

When you select a programme the maximum temperature for that programme is automatically selected.

To adjust the temperature, press the water temperature adjustment button until the desired temperature is displayed on the digital display.

You can gradually reduce the washing water temperature between the maximum temperature and cold washing (--C) by pressing the water temperature adjustment button.

If you have skipped the water temperature you want to set, keep pressing the water temperature adjustment button until the desired temperature is displayed again.

Spin Speed Selection

When you select a programme the maximum spin speed for that programme is automatically selected.

To adjust the spin speed, press the spin speed adjustment button until the desired spin speed is displayed on the digital display.

You can gradually reduce the revolution speed between the maximum spin speed and cancel spinning (-) options by pressing the spin speed adjustment button.

If you have skipped the spin speed you want to set, keep pressing the spin speed adjustment button until the desired spin speed is displayed again.

Functions

Simple everyday use

Drying option selection

If you would like your laundry dried at the end of a washing programme, press the drying option button to select the desired drying setting.

When you press the drying option button, the option 1 "☰", option 2 "☷" and option 3 "☹" symbols will be shown on the display.

- Option 1 "☰": 100min. Recommended for laundry that will be ironed before using. To select the "☰" drying option, press the drying option button until the "☰" symbol is displayed.
- Option 2 "☷": 156 min. Recommended for laundry that requires hanging. To select the "☷" drying option, press the drying option button until the "☷" symbol is displayed.
- Option 3 "☹": 220min. Recommended for laundry that will be folded and put into a wardrobe at the end of the programme. To select the "☹" drying option, press the drying option button until the "☹" symbol is displayed.

NOTE: If one of the above drying option symbols is not displayed when you press the Dry Option button, that drying option is not available for the selected programme.

If you want your laundry dried for a fixed period of time at the end of the washing cycle:

- Press the drying option button to select the desired drying duration.
- When you press the drying option button, the option 1 "☰", option 2 "☷" and option 3 "☹" symbols will be shown on the display.

Follow the instructions on the detergent packaging when determining the amount of detergent to use for your laundry.

If you continue pressing, duration options (0:30, 0:60, 120 minutes) will be displayed. You can select the drying duration you want.

NOTE: If one of the above drying duration options is not displayed when you press the Dry Option button, it is not available for the selected programme.

Table: Recommended drying durations for load amounts:

	1 - 2 kg	3 - 4 kg	5 kg

PROGRAMME TABLE

Programme	Washing temperature (°C)	Maximum washing / drying capacity (kg)	Detergent compartment	Programme duration (Min.)	Laundry type / Descriptions
COTTON 90° C	90°	7.0 / 5.0	2	185	Heat resistant, cotton and linen textiles. (Underwear, bed sheets, tablecloths (towels, max. 3.5 kg))
COTTON ECO	60°e	7.0 / 5.0	2	205	Heat resistant, cotton and linen textiles (Underwear, bed sheets, tablecloths (towels, max. 3.5 kg))
ECO 20°	20°	3.5 / 3.5	2	103	Lightly soiled, cottons and linen textiles (underwear, bed sheets, tablecloth (towel max. 2 kg.) (Bedding, etc.))
SYNTHETICS	60°	3.5 / 3.5	2	120	Synthetics and synthetic blended textiles (synthetic blended shirts, blouses, socks etc.)
WOOLLENS	30°	2.5	2	44	Woollen and wool blended textiles with a machine washable label
CURTAIN	40°	2.5	2	112	Use this programme to wash curtains only.
RINSE	-	7.0 / 5.0	-	44	Provides an additional rinse to any type of laundry after the washing cycle.
ALLERGY SAFE	60°	3.5 / 3.5	2	234	Baby clothes with a machine washable label.
SPIN	-	7.0 / 5.0	-	20	Provides an additional spin cycle to any type of laundry after the washing cycle.
SUPER RAPID 15'	30°	2.0 / 2.0	2	15	Lightly soiled, cotton, colored and linen textiles. Due to the short washing time of this programme, we recommend that less detergent is used than with other programmes. The programme may last longer than 15 minutes if your Machine detects an uneven load.
DAILY FAST 60 MIN.	60°	3.0 / 3.0	2	60	Soiled, cotton, colored and linen textiles.
GENTLE DRY	-	3.5	2	100	Delicate laundry bearing the suitable for machine dry label.
COTTON DRY	-	5.0	2	156	Cotton laundry bearing the "suitable for machine dry" label.
QUICK WASH & DRY	30°	0.5 kg. 33 min (3 shirts) (33 minutes)	2	33	Cotton, colored and linen laundry bearing "suitable for machine dry" label Note: Your machine determines the programme duration based on the amount of laundry loaded.
COTTON WASH & DRY	60°	5.0 / 5.0	2	285	Cotton and linen textiles (Underwear, bed sheets, tablecloth, (towel max. 3.0 kg))

 **NOTE:** PROGRAMME DURATION MAY VARY DEPENDING ON THE AMOUNT OF LAUNDRY, TAP WATER, AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

If you select more than one additional function, the functions you select may be incompatible.

Do not dry towels, cotton and linen textiles, synthetic and synthetic blended laundry together. To dry your laundry, select the most appropriate drying programme for the type of the laundry.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

Using your washer dryer

5

Using your washer dryer

Getting the most from your appliance

Washing Operation

1. Turn on the water supply.
2. Plug in your machine

Sorting Laundry

 Your laundry contains product labels which specify the appropriate washing instructions. Wash or dry your laundry according to the instructions on the product labels.

- Sort your laundry according to their type (cotton, synthetic, delicates, wool, etc.), washing temperature (cold, 30°C, 40°C, 60°C, 90°C) and the level of dirtiness (less dirty, dirty, very dirty)
- Never wash coloured and white laundry together.
- Dark textiles may contain excess dye and should be washed separately several times before being included in a mixed load.
- Ensure that there are no metallic materials in your laundry or in the pockets; if so, remove them.

- Close zips and fasten any hooks and eyes.
- Remove the metallic or plastic hooks of curtains or place them in a washing net or bag.
- Reverse textiles such as pants, knitwear, t-shirts and sweat shirts.
- Wash socks, handkerchiefs and other small items in a washing net.

WARNING: Any malfunction occurring due to foreign materials damaging your machine are not covered by the warranty.

Explanation of Washing Symbols

	Machine wash		Maximum ironing temperature 110°C
	Machine wash, permanent press		Do not iron
	Maximum washing temperature 95°C		Can be dry cleaned with any solvents
	Maximum washing water temperature 60°C		Can only be cleaned with perchloride, lighter gas, alcohol or R113.
	Maximum washing water temperature 40°C		Can only be cleaned with perchloride, lighter gas, alcohol or R113.
	Maximum washing water temperature 30°C		Do not dry cleaning
	Hand wash		Dry flat
	Do not wash		Drip dry
	Can be bleached in cold water		Line dry
	Do not use bleach.		Tumble dry
	Maximum ironing temperature 200°C		Tumble dry high
	Maximum ironing temperature 150°C		Do not tumble dry

Using your washer dryer

Getting the most from your appliance

Placing laundry into the machine

- Open the loading door of your machine.
- Check inside the drum. There may be laundry left inside from previous washes. If there is, empty your machine before selecting a programme.
- Load your laundry into the drum, ensuring it is loosely packed. Fold large objects like quilts and blankets into the drum as shown below.

- Place each item of laundry in separately.
- Check that no items of laundry are trapped between the rubber seal and the door.
- Make sure that the door is completely closed or the machine won't start the washing operation.

Choice of detergent and placing into Machine

The amount of detergent to use will depend on the dirtiness of your clothes and the hardness of your water supply; guidelines will be on the packaging of your detergent.

- If your clothes are only slightly soiled, do not do a pre-wash. Put a small amount of detergent (as specified by the manufacturer) into compartment II of the detergent drawer.
- If your clothes are excessively soiled, select a programme with pre-wash and put 1/4 of the detergent to be used into compartment I of the detergent drawer and the rest in compartment II.
- Use detergents produced for automatic washing machines in your machine.

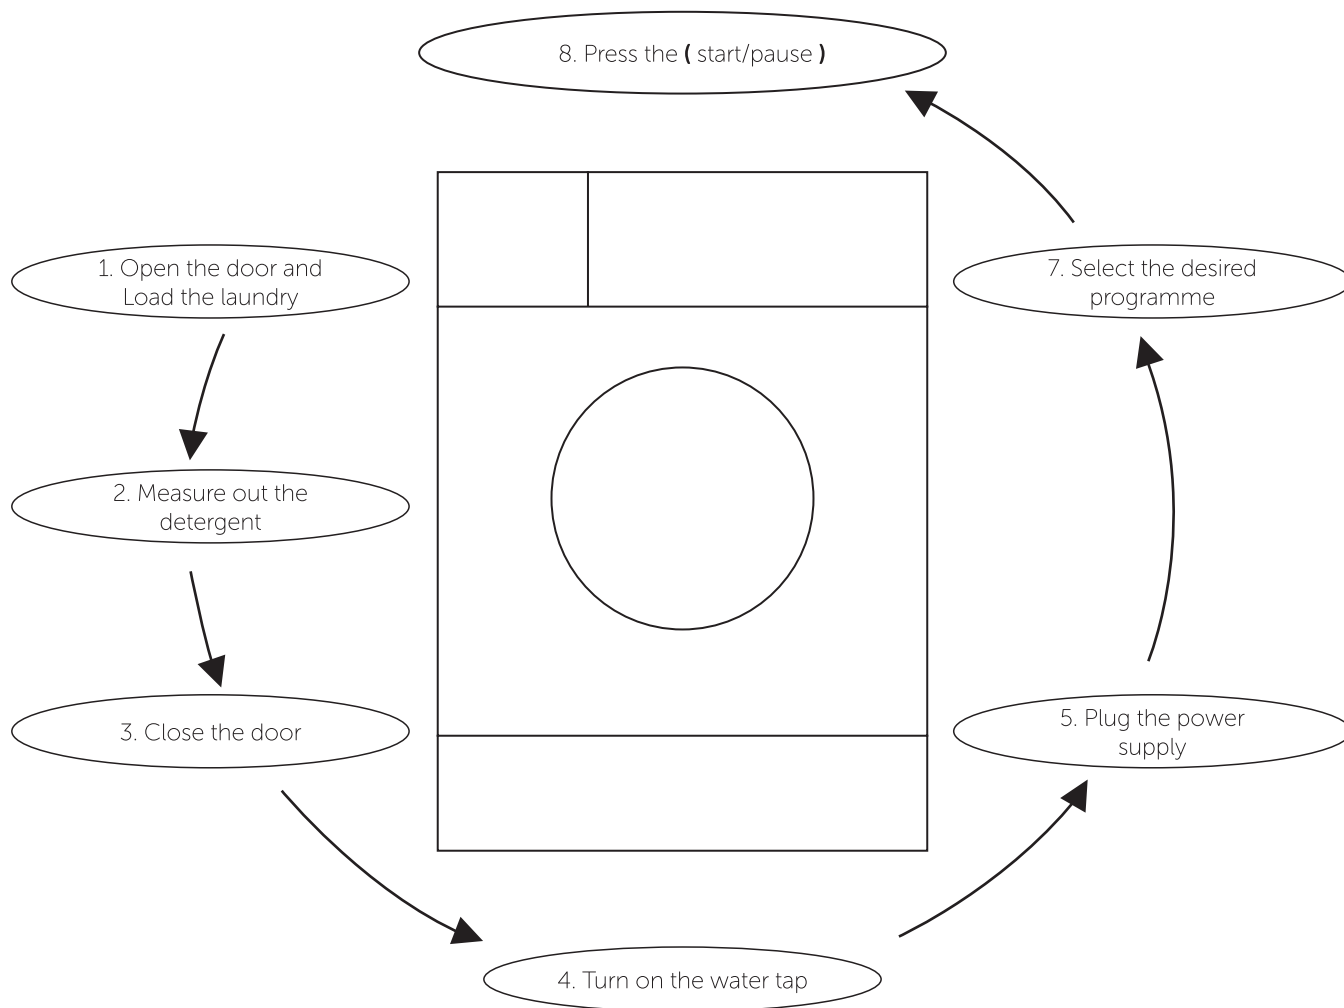

Follow the instructions on the detergent packaging when determining the amount of detergent to use for your laundry.

- The higher the degree of hardness of the water, the more detergent you will need.
- The amount of the detergent you will use will increase as the amount of your laundry increases.
- Put the softener in the softener compartment in the detergent drawer. Do not exceed the MAX level, otherwise the softener may flow into the washing water.
- Softeners with high density must be thinned before being put in the drawer. High-density softener will clog the flush and block the flow of the softener.
- You can use liquid detergent in all programmes without pre-washing. Insert the liquid detergent apparatus in compartment II of the detergent drawer and adjust the liquid detergent amount (follow the instructions on the liquid detergent packaging). Do not exceed the MAX level.

Using your washer dryer

Getting the most from your appliance

Quick start

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

Care and maintenance

6

Care and maintenance

Looking after your appliance

Before cleaning your washer dryer.

a: Unplug your machine from the mains power supply.

b: Close the water tap.

CAUTION: Do not use solvents, abrasive cleaners, glass cleaners or all-purpose cleaning agents to clean your Washer Dryer. They may damage the plastic surfaces and other components with the chemicals they contain.

Water inlet filters

Water inlet filters prevent dirt and foreign materials from entering your machine. We recommend that these filters are cleaned when your machine is unable to receive sufficient water, although your water supply is on and the tap is open. We recommend that you clean your water inlet filters every 2 months.

- Unscrew the water inlet hose from the Washer Dryer.
- To remove the water inlet filter from the water inlet valve, use a pair of long-nosed pliers to gently pull on the plastic bar in the filter.
- A second water inlet filter is located in the tap end of the water inlet hose. To remove the second water inlet filter, use a pair of long-nosed pliers to gently pull on the plastic bar in the filter.
- Clean the filter thoroughly with a soft brush and wash with soapy water and rinse thoroughly. Re-insert the filter by gently pushing it back into place.

CAUTION: The water inlet filters can become clogged due to water quality or lack of required maintenance and may break down. This may cause a water leak. Any such breakdowns are out of the scope of the warranty.

Detergent Drawer

The use of detergent may cause residual build up in the detergent drawer over time. We recommend that you remove the drawer every 2 months to clean the accumulated residue.

To remove the detergent drawer:

- Pull the drawer forwards until it is fully extended.
- Gently press down on the detergent drawer (as shown above) and pull the drawer from its housing.
- Clean the drawer with water and a soft brush.
- If there is any residue in the drawer housing, remove with a soft brush. Take care to prevent any residue from dropping into the machine.
- Dry the drawer thoroughly and slide it back into the housing.

Do not wash your detergent drawer in Dishwasher

Fluid detergent level plate (*)

Remove the fluid detergent level plate for cleaning and maintenance purposes, as shown and wash off any detergent residue. Slide the fluid detergent level plate back into the guides. Make sure that there is no remaining detergent residue.

(*) Specifications may vary depending on the product purchased.

Pump Filter

The pump filter system in your Washer dryer prolongs the life of the pump by preventing lint from entering your machine. We recommend that you clean the pump filter every 2 months.

The pump filter is located behind the cover on the front-lower right corner.

Care and maintenance

Looking after your appliance

To clean the pump filter:

1. You may use the washing powder spade (*) supplied with your machine or liquid detergent level plate to open the pump cover.
2. Lodge the end of the powder spade or liquid detergent level plate in the opening of the cover and gently press backwards. The cover will open.
3. Pull the black rubber hose forward and detach it from its clamp, place a container under it and remove the plug from the hose.
4. Collect the water drained from your machine in a container.

NOTE: Depending on the amount of water inside the machine, you may have to empty the water collection container a few times.

- Once the water has fully drained, fit the plug back on the hose.
- Fit the hose back into the clamp.

5. Loosen the filter cover by turning it anticlockwise and remove by pulling.
6. Remove any foreign materials from the filter with a soft brush.
7. After cleaning the filter replace the filter cover and tighten by turning clockwise. (Please note that the filter cover may leak water unless re-fitted properly.)
8. Close the filter cover. (When closing the pump cover, ensure that the mountings inside the cover meet the holes on the front panel of the machine.)

FLUSH STOPPER / BODY / DRUM

1. Flush stopper

Remove the detergent drawer and disassemble the flush stopper. Clean thoroughly to completely remove any softener residue. Refit the flush stopper after cleaning and check that it is seated properly.

2. Body

Use a mild, non-abrasive cleaning agent, or soap and water, to clean the external casing. Wipe dry with a soft cloth.

3. Drum

Do not leave metallic objects such as needles, paper clips, coins etc. in your machine. These objects lead to the formation of rust stains in the drum. To clean such rust stains, use a non-chlorine cleaning agent and follow the instructions of manufacturer of the cleaning agent. Never use wire wool or similar hard objects for cleaning rust stains.

Help is always at hand

All repairs to the machine must be carried out by an authorised repair agent. When a repair is required or you are unable to eliminate the failure with the help of the information below:

- a: Unplug the machine.
- b: Close the water tap.
- c: Contact the nearest authorised repair agent.

FAULT	POSSIBLE CAUSE	TROUBLESHOOTING
Your machine will not start.	It is not plugged in.	Insert the plug into the socket.
	The fuse is faulty.	Replace the fuse.
	Mains supply is cut off.	Check the mains supply.
	Start/Pause button is not pressed.	Press the Start/Pause button.
	The programme dial is in the Stop (off) position.	Turn the program dial to the desired position.
	The door of your machine is not closed properly.	Close the door of your machine.
Your machine does not discharge	Drain hose is clogged or twisted.	Check the drain hose.
	Pump filter clogged.	Clean the pump filter.
Your machine vibrates.	The feet have not been adjusted.	Adjust the feet.
	Transit bolts have not been removed.	Remove the transit bolts from your machine
	Your machine only has a small amount of laundry inside.	This will not prevent the operation of your machine.
	Your machine is overloaded with laundry or the laundry is not distributed evenly.	Do not overload your machine. Make sure the laundry is spread out.
	Your machine is located on a hard surface.	Avoid installing your machine on a hard surface. When installing your machine, leave a 2 cm gap between walls or hard surfaces.
Excessive foam is formed in the detergent drawer.	Too much detergent has been used	Press the Start/Pause button. To stop the foam, dilute one tablespoon of softener into 1/2 litre of water and pour into the detergent drawer. Press the Start/Pause button after 5-10 mins
	Wrong detergent used.	Use detergents produced only for automatic washing machines in your machine.
Unsatisfactory washing result.	The laundry is too dirty for the programme you have selected.	Select programmes appropriate for your laundry's level of dirtiness. (See page 21 programme table)
	Not enough detergent used.	Use the amount of detergent as instructed on the packaging
	There is too much laundry in your machine.	Check that the maximum capacity of your Washer Dryer is not exceeded.
As soon as the machine is loaded with water, water discharges.	The end of the water drain hose is too low for the machine.	Set the water drain hose to an appropriate height.
No water appears in the drum during washing.	No fault. Water is in the unseen part of the drum.	- .

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions, or online at www.argos-support.co.uk If you still require further assistance, call one of our experts on **0345 257 7271**.

Help is always at hand

FAULT	POSSIBLE CAUSE	TROUBLESHOOTING
There is detergent residue on your laundry after washing	Non-dissolving particles of some detergents may appear on your laundry as white spots.	Perform an extra rinse, or clean your laundry with a brush after it dries
There is detergent residue on your laundry after washing	There is untreated oil, cream or laundry	Use the amount of detergent as instructed on the packaging in the next wash
Spinning operation is not performed or runs late.	No fault. The Unbalanced load control system has been activated.	The Unbalanced load control system will try to spread your laundry evenly. The spinning operation will begin once your laundry is evenly spread. Place the laundry in the machine in a balanced fashion next time.
Laundry remains damp after the drying operation.	Appropriate drying programme is not selected. The maximum load capacity for the selected programme might be exceeded.	Select a drying programme appropriate for your laundry (see page 21 for the programme table)

AUTOMATIC FAULT WARNINGS AND WHAT NEEDS TO BE DONE

Your machine is equipped with a built-in fault detection system, indicated by a combination of flashing wash operation lights. The failure codes are shown below.

TROUBLE CODE	POSSIBLE FAULT	WHAT TO DO
E01	The door of your machine is left open.	Shut the door properly until you hear the click. If the fault persists, turn off your machine, unplug it and contact the nearest authorised service immediately.
E02	The water pressure or the water level inside the machine is low.	Check that the cold water tap is fully turned on and that mains water is not cut-off. If the fault persists, your machine will stop automatically. Unplug the machine, turn off the cold water tap and contact the nearest authorised service.
E03	The pump is faulty or pump filter is clogged or electrical connection of the pump is faulty.	Clean the pump filter. If the problem persists, contact the nearest authorised service. (*)
E04	Your machine has excessive amount of water.	Your machine will automatically drain the water. Turn off your machine and unplug it. Turn off the cold water tap and contact the nearest authorised service.

(*) See the chapter regarding maintenance and cleaning of your machine.

Your Bush Guarantee

This product is guaranteed for twelve months from the date of original purchase. Any defect that arises due to faulty materials or workmanship will be repaired free of charge (or if applicable the product will be replaced or the purchase price refunded) where possible during this period by the dealer from who your purchased the unit.

The guarantee is subject to the following provisions:

- The guarantee does not cover accidental damage, misuse, cabinet parts, knobs or consumable items.
- The product must be correctly installed and operated in accordance with the instructions contained in the manual.
- It must be used solely for domestic purposes. The guarantee will be rendered invalid if the product is re-sold or has been damaged by inexpert repair.
- Specifications are subject to change without notice.
- Bush disclaim any liability for loss or damage arising from the breakdown of the product.
- This guarantee is in addition to and does not diminish your statutory or legal rights.

Important Data Protection Information

If you provide us with information about another person, you confirm that they have appointed you to act for them, to consent to the processing of their personal data including sensitive personal data and that you have informed them of our identity and the purposes (as set out in the Important Data Privacy notice displayed overleaf) for which their personal data will be processed.

You are entitled to ask for a copy of the information we hold about you (for which we may charge a small fee) and to have any inaccuracies in your information corrected.

For quality control and training purposes, we may monitor or record your communications with us.

If your personal details change, if you change your mind about any of your marketing preferences or if you have any queries about how we use your information, please let us know by contacting our Data Protection Officer, Domestic & General, Leicester House 17 Leicester Street, Bedworth, Warwickshire CV12 8JP.
