Safety and Care Advice

Important – **Please read these instructions fully before starting assembly**

· Check you have all the components and tools listed on pages 2 and 3.

· Remove all fittings from the plastic bags and separate them into their groups.

· Keep children and animals away from the work area, small parts could choke if swallowed.

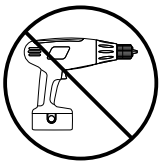

· Make sure you have enough space to layout the parts before starting.

· Assemble on a soft level surface to avoid damaging the unit or your floor.

· This product contain natural timber; you may notice some variation in the grain and colour of different component parts which is normal for furniture produced using natural wood and is not the result of any manufacturing fault.

· Do not stand or put weight on the product, this could cause damage.

· Assemble the item as close to its final position (in the same room) as possible.

· We do not recommend the use of power drill/drivers **for inserting screws,** as this could damage the unit. Only use hand screwdrivers.

· Parts of the assembly will be easier with 2 people.

· Dispose of all packaging carefully and responsibly.

Care and maintenance

· Use an appropriate furniture polish for natural wood furniture and a dry cloth to clean the product.

· Avoid placing the furniture in direct sunlight as this will cause the timber to prematurely age.

· From time to time check that there are no loose screws on this unit.

· This product should not be discarded with household waste. Take to your local authority waste disposal centre.

IMPORTANT, READ CAREFULLY -RETAIN FOR FUTURE REFERENCE.

ASSEMBLY:

Current legislation requires that the bunk bed must be fitted with 4 safety-rails and a ladder or platform for the upper bunk bed. The bunk bed meets the European EN 747-2012 standards for security and durability.

MATTRESS:

This bed is designed to use a mattress size 175 cm. long and 75,0 cm. wide. The total thickness must not exceed 16,0 cm. The mattress top must not pass the marking on the ladder.

WARNING:

High beds and the upper bed of bunk beds are not suitable for children under six years due to the risk of injury from falls. Do not use the bed if any structural part is broken or missing. Be aware that children can strangle in items such as ropes, strings, cords, harnesses and belts attached to or hung on a bunk bed/high bed.

It is recommended that you always follow the manufacturer's instructions to assemble this product.

It is necessary to frequently ventilate the room in order to keep the humidity low and to prevent mold in and around the bed.

WARNING:

Children can become trapped between the bed and the wall. To avoid risk of serious injury the distance between the top safety barrier and the wall shall not exceed 75 mm. or shall be more than 230 mm.

MAINTENANCE INSTRUCTIONS:

All assembly fastenings should always be tightened properly and that care should be taken that no fittings are loose.

CLEANING:

LACQUERED: Wooden, lacquered and painted as well as laminated surfaces should be wiped over with a cloth and a mild soap.

OIL: Oiled surfaces can be cleaned with soapy water, e.g. brown soap. Wipe with a clean cloth. To maintain the natural life in the furniture which is provided by the oil treatment, we recommend an oil aftercare of the furniture 1-2 times a year. The colourless natural oil for maintenance of oil-treated furniture is available at your local furniture store.
