What is ROG Strix Edge?

ROG Strix Edge is a vertically oriented mouse pad intended to fulfil all your gaming dreams.

It's made with a smooth cloth surface that's optimized for gaming, enabling accurate and responsive tracking, and has a thin, lightweight and flexible design for great portability.

Strix Edge also has full-color anti-fray stitched edges for superb aesthetics, and a durable non-slip rubber base.

Design Optimization

Designed for vertical orientation

ROG Strix Edge gives you the versatility to overcome any gaming scenario. With tough yet comfortable materials and the vertical design, ROG Strix Edge is not only protected against sharp desk edges, but also provides more useful zones for larger desks.

Unlike simply turning a mouse pad from a horizontal to a vertical direction, the long awaited vertical design with specifically engineered horizontal textured-weave provides ultra-smooth gaming experience in style with a competitive edge!

Design Optimization

Full-color anti-fray stitching

Most advanced full-color anti-fray stitching technology for best aesthetics and longer lifespan

Gaming-optimized cloth surface

Horizontal textured-weave engineered for smooth glide with adequate friction for control
