How can I help?

Meet your Google Assistant

Google Home is powered by the Google Assistant. Ask it questions. Tell it to do things. It's your own Google, always ready to help. Just start by saying "Ok Google".

Get answers from Google

Get real-time answers including the latest on weather, traffic, sports, finance, local businesses and more. Ask for things like translations, calculations, nutritional information and unit conversions hands-free. Or search for other information that you're curious about with the power of Google Search.

Enjoy your music

With a simple voice command, play music, podcasts, news and radio from services like Google Play Music, Spotify and more. Enjoy even more compatible audio services by streaming directly from your Android or iPhone to Google Home from one of 100+ Chromecast-enabled apps.*

*Google Home is optimised for selected music and audio services only. Subscriptions/payments may be required.

Manage your everyday tasks

Easily hear your travel itinerary, daily schedule, and more. Just ask "how long will it take to get to work?" to find out about your commute and get the real-time answers you need, right away. Google Home even curates daily information specific to you. Just start by saying, "Tell me about my day" and get up to speed on everything you need to know.

Control smart devices

Link compatible smart home products to control things like your thermostat or entertainment on your TV.*

*Controlling your TV requires a Chromecast or a TV with Chromecast built-in.

A speaker designed for any room

Google Home's high excursion speaker delivers Hi-Fi sound quality. It can also hear you reliably, thanks to far-field microphones.
