Safety and Care Advice

Important – Please read these instructions fully before starting assembly

Keep children and animals away from the work area, small parts could choke if swallowed.

Make sure you have enough space to layout the parts before starting.

Assemble the item as close to its final position (in the same room) as possible.

Do not stand or put weight on the product, this could cause damage.

Do not place furniture directly in front of radiators, fires or any other source of heat.

Parts of the assembly will be easier with 2 people.

Assemble on a soft level surface to avoid damaging the unit or your floor.

Dispose of all packaging carefully and responsibly.

Care for glass

Tempered glass has been treated by a special heating and quick cooling process to give it a greater weight capacity and strength.

If it breaks it shatters into thousands of small cubes, rather than shards of glass.

When storing the glass top vertically we recommend that it is delicately placed on a soft surface such as carpet or wood (not concrete). This should prevent chipping.

GLASS WARNING

Do not sit or stand upon the glass surface(s).

Do not use the glass as chopping surface.

Do not strike the glass with hard or pointed items.

When cleaning glass panels use a damp cloth or leather with washing up liquid soap if necessary, do not use washing powders or any other substance containing abrasives since these substances scratch glass.

If the glass is chipped or broken replace with glass of the type described on this label.

Consult the furniture manufacturer, retailer, or agent with regards to obtaining a manufacturing specification of shape for replacement glass quoting the model number, and batch number or date of manufacture of the table.

Keep these instructions for further use.

Do not place very hot or very cold items on the glass surface(s) unless adequately thick tablemats are used to prevent such items from coming into contact with the glass.
