Instruction manual

DWINT15LC Dishwasher

You'll soon be enjoying your new DW12LSINT Dishwasher.

It all begins here, with your instructions. Don't worry, there's nothing too technical coming up. Just simple, step-by-step guidance to get you up and running quickly. Sound good? Then let's get started.

Help and Guidance

We're here to help you get the most from your DW12LSINT. Should you require any guidance, a simple solution can often be found online at:

www.bush-support.com

If you still require further assistance, call one of our experts on **0345 257 7271**.

Icon	Type	Meaning
	WARNING	Serious injury or death risk
	RISK OF ELECTRIC SHOCK	Dangerous voltage risk
	FIRE	Fire risk
	CAUTION	Injury or property damage risk
	IMPORTANT / NOTE	Operating the system correctly

Safety information

Important - please read these instructions fully before installing or operating. Keep this manual for future reference.

1.1 General Safety Warnings

 Please check the packaging of your machine before installation and the outer surface of the machine once the packaging has been removed. Do not operate the machine if it appears damaged or if the packaging has been opened.

- Packaging materials protect your machine from any damage that might occur during transportation. The packaging materials are environmentally friendly as they are recyclable. Use of recycled material reduces raw material consumption and decreases waste production.

 This appliance can be used by children aged from 8 years and above and by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand hazards involved. Children should not be allowed to play with the appliance.

 Remove packaging and keep it out of reach of children.

 Keep children away from detergents and rinse aids.

 There may be some residue left in the machine after washing. Keep children away from the machine when it is open.

1.2 Installation Warnings

- Choose a suitable and safe place to install your machine.
- Only original spare parts should be used with the machine.

  Unplug the machine before installation.

 Your machine must only be installed by an authorised service agent. Installation by anyone other than an authorised agent may cause your warranty to be void.

 Check that the indoor electrical fuse system is connected in line with safety regulations.

 All electrical connections must match the values on the plate.

  Ensure the machine does not stand on the electrical supply cable.

 Never use an extension cord or a multiple socket connection.

 The plug should be accessible after the machine is installed.

After installation, run your machine unloaded for the first time.

  The machine must not be plugged in during positioning.

 Always use the coated plug supplied with your machine.

  If the electrical cable is damaged, it should only be replaced by a qualified electrician.

1.3 During Use

This machine is for domestic use only, do not use it for other purposes. Commercial use will void the guarantee.

 Do not stand, sit or place loads on the open door of the dishwasher.

 Only use detergents and rinse aids produced specifically for dishwashers. Our company is not responsible for any damage that may occur due to misuse.

 Do not drink water from the machine.

 Due to the danger of explosion, do not place any chemical dissolving agents into the machine's washing section.

Check the heat-resistance of plastic items before washing them in the machine.

 Only put items in the machine which are suitable for dishwashing and take care not to overfill the baskets.

Safety information

Important - Please read these instructions fully before installing or operating. Keep this manual for future reference.

 Do not open the door while the machine is in operation, hot water may spill out. Safety devices ensure the machine stops if the door is opened.

 The machine door should not be left open. It may cause accidents.

 Place knives and other sharp objects in the cutlery basket in a blade-down position.

  For models with the automatic door-opening system, when the EnergySave option is active, the door will open at the end of a program. To prevent damage to your dishwasher, do not attempt to close the door for one minute after it has opened. For effective drying, keep the door open for 30 minutes after a programme has ended. Do not stand in front of the door after the auto-open signal sounds.

 In the case of a malfunction, repair should only be performed by an authorised service company, otherwise the warranty will be void.

  Before repair work, the machine should be disconnected from the mains. Do not pull the cable to unplug the machine. Switch off the water tap.

 Operation at a low voltage will cause a decline in performance levels.

 For safety, disconnect the plug once a programme has finished.

 To avoid an electric shock, do not unplug the machine with wet hands.

  Pull the plug to disconnect the machine from the mains, never pull on the cord.

Getting to know your Dishwasher

You'll be up and running in no time

Ready? Let's begin...

Please read these instructions carefully. They contain important information which will help you get the best from your DW12LSINT and ensure safe and correct installation and operation.

If you require any further assistance, our technical experts are happy to help. For full details, refer to the product support section at the end of these instructions.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions.

Installing your Dishwasher

3

Installing your Dishwasher

Bringing it all together

3.1 Positioning your Machine

When positioning the machine, place it in an area where dishes can be easily loaded and unloaded. Do not put the machine in an area where the ambient temperature falls below 0°C.

Read all warnings located on the packaging before removing the packaging and positioning the machine. Place the machine close to a water tap and drain. Take into consideration that the connections will not be altered once the machine is in position.

Do not hold the machine by its door or panel.

Leave an adequate distance around the machine to allow ease of movement when cleaning.

 Ensure the water inlet and outlet hoses are not squeezed or trapped and that the machine does not stand on the electrical cable while positioning.

Adjust the feet so the machine is level and balanced. The machine should be placed on flat ground otherwise it will be unstable and the door of the machine will not close properly.

3.2 Water Connection

We recommend fitting a filter to your water inlet supply in order to prevent damage to your machine due to contamination (sand, rust, etc.) from indoor plumbing. This will also help prevent yellowing and deposit formation after washing.

3.3 Water inlet hose

 **WARNING:** Use the new water inlet hose supplied with your machine, do not use an old machine's hose.

 **WARNING:** Run water through the new hose before connecting.

 **WARNING:** Connect the hose directly to the water inlet tap. The pressure supplied by the tap should be a minimum of 0.03 MPa and a maximum of 1 MPa. If the pressure exceeds 1 MPa, a pressure relief valve must be fitted between the connection.

 **WARNING:** After the connections are made, turn the tap on fully and check for water leaks. Always turn off the water inlet tap after a wash program has finished.

 An Aquastop water spout is available with some models. Do not damage it or allow it to become kinked or twisted.

Installing your Dishwasher

Bringing it all together

3.4 Water drain hose

Connect water drain hose directly to water drain hole or to the sink outlet spigot. This connection should be minimum 50 cm and maximum 110 cm from floor plane.

 **IMPORTANT:** Items will not wash properly if a drain hose longer than 4 m is used.

3.5 Electrical Connection

 **WARNING:** Your machine is set to operate at 220-240 V. If the mains voltage supply to your machine is 110 V, connect a transformer of 110/220 V and 3000 W between the electrical connection.

  The earthed plug of the machine must be connected to an earthed outlet supplied by suitable voltage and current.

  In the absence of earthing installation, an authorised electrician should carry out an earthing installation. In the case of use without earthing installed, we will not be responsible for any loss of use that may occur.

 The indoor fuse current value should be 10-16 A.

Functions 4

Functions

Simple everyday use

The Control Panel

Press the Power On/Off button (1), the End Of Programme Indicator (4) will illuminate.

Select the programme most suitable for your dishes using the Programme Selection button.

The light corresponding to the selected programme (5) will illuminate and the End Of Programme Indicator will switch off.

The programme will start automatically when the door is closed.

NOTE (only for models with extra features): If an extra feature has been used on the most recent wash programme, this feature will remain active on the next selected programme. If you want to cancel this feature on the newly selected wash programme, press the feature button until the light on the button switches off.

NOTE: If you decide not to start the selected programme, please see the "Changing a Programme" and "Cancelling a Programme" sections.

NOTE: When there is insufficient softening salt, the Salt Lack Warning Indicator (4) will illuminate to indicate the salt chamber needs filling.

NOTE: When there is insufficient rinse aid, the Rinse Aid Lack Warning Indicator (4) will illuminate to indicate the rinse aid chamber needs filling.

Delaying a Programme

Press the Delay button to delay the start time of a programme for 3, 6 or 9 hours. Pressing once will delay the start time for 3 hours, pressing twice for 6 hours, and three times for 9 hours. The programme can be selected first and the delay duration after, or vice versa. Press the Delay Timer button to change or cancel the delayed start time. The remaining delay time will show on the display and the light corresponding to the delay duration (3h, 6h, 9h) will be on.

Changing a Programme

Follow the steps below to change a programme while in operation.

NOTE: Open the door slightly at first to stop a programme before it is complete in order to avoid water spillage.

Cancelling a Programme

Follow the steps below to cancel a programme while in operation.

7.3. Switching the Machine Off

NOTE: Do not open the door before a programme is complete.

NOTE: Leave the door of your machine slightly open at the end of a wash programme to speed up drying.

NOTE: If the door of the machine is opened or the power is cut during operation, the programme will continue when the door is closed or the power returns.

NOTE: If the power is cut or the machine door is opened during drying, the programme will terminate. Your machine will be ready for new programme selection.

Functions

Simple everyday use

Programme Table

Programme	Detergent A: 5cm ³ B1: 15cm ³ B2: 25cm ³	Duration (min)	Description
Intensive	A+B2	127	For heavily soiled dishes.
Super 50'	A+B2	50	For normally soiled, daily-used dishes with a faster programme.
Eco (Reference)	A+B2	221	Standard programme for normally soiled, daily-used dishes.
Quick 30'	B2	30	For lightly soiled dishes and a quick wash.
Prewash	-1	5T	to rinse dishes that you plan to wash later.

NOTE: THE PROGRAMME DURATION MAY CHANGE ACCORDING TO THE AMOUNT OF DISHES, THE WATER TEMPERATURE, THE AMBIENT TEMPERATURE AND SELECTED ADDITIONAL FUNCTIONS.

- Only use powder detergent for short programmes.
- Short programmes do not include drying.
- To assist drying, we recommend slightly opening the door after a cycle is complete.

Using your Dishwasher

5

Using your Dishwasher

Getting the most from your appliance

Preparing your Dishwasher for first use

- Check whether the electricity and supply water specifications match the values indicated in the installation instructions for the machine.
- Remove all packaging materials inside the machine.
- Set the water softener level.
- Fill the rinse aid compartment.

5.1 Fill the salt *(if available)*

To fill with softener salt, open the salt compartment cap by turning it counter clockwise. **(1)** **(2)** At first use, fill the compartment with 1 kg salt and water **(3)** until it is almost overflowing. If available, using the funnel **(4)** provided will make filling easier. Replace the cap and close it. After every 20th-30th wash, add salt into your machine until it fills up (approx. 1 kg).

Fill the salt compartment with water the first time you fill the salt compartment only.

Use softener salt specifically produced for use in dishwashers.

When you start your dishwasher, the salt compartment is filled with water, therefore put the softener salt in prior to starting your machine.

If the softener salt has overflowed and you do not start the machine immediately, run a short washing program to protect your machine against corrosion.

5.2 Water Softener System

The dishwasher is equipped with a water softener which reduces the hardness in the mains water supply. To find out the hardness level of your tap water, contact your water company or use the test strip (if available).

5.3 Setting Water Hardness level

- Turn the knob to the "0/Reset" position.
- Push the "Start/Pause" button and hold down.
- Turn on the machine.
- Hold down the "Start/Pause" button until the lights flash and "SL" disappears.
- The machine will display the last setting.
- Set the level by pushing the "Start/Pause" button.
- Switch off the machine to save the setting.

Using your Dishwasher

Getting the most from your appliance

5.4 Test Strip

NOTE: Level is set 3 as default. If the water is well water or has a hardness level above 90 dF, we recommend that you use filter and refinement devices.

5.5 Water Hardness Table

Level	German dH	French dF	British dE	Indicator
1	0-5	0-9	0-6	P1-P5 LEDs are on.
2	6-11	10-20	7-14	P2-P5 LEDs are on.
3	12-17	21-30	15-21	P3-P5 LEDs are on.
4	18-22	31-40	22-28	P4-P5 LEDs are on.
5	23-31	41-55	29-39	P1-P4-P5 LEDs are on.
6	32-50	56-90	40-63	P2-P4-P5 LEDs are on.

5.6 Detergent usage

Only use detergents specifically designed for domestic dishwashers.

Add the recommended amount of detergent for the selected programme to ensure the best performance.

Keep your detergents in cool, dry places out of reach of children.

See the detergent manufacturer's instructions for a further information.

5.7 Filling the Detergent

Push the latch to open the dispenser and pour in the detergent.

Close the lid and press it until it locks in place. The dispenser should be refilled just before the start of each programme. If the dishes are heavily soiled, place additional detergent in the pre-wash detergent chamber.

5.8 Using Combined Detergents

These products should be used according to the manufacturer's instructions.

Never put combined detergents into the interior section or the cutlery basket.

Combined detergents contain not only the detergent but also rinse-aid, salt replacement substances and additional components depending on the combination.

We recommend you do not use combined detergents in short programmes. Please use powder detergents in such programmes.

If you encounter problems when using combined detergents, please contact the detergent manufacturer.

When you stop using combined detergents, make sure that water hardness and rinse aid settings are set to correct level.

5.9 Rinse-aid Usage

Rinse-aid makes dishes sparkle and helps them to dry without spotting. Rinse-aid is required for stain-free utensils and clear glasses. Use only rinse-aid for domestic dishwashers.

5.10 Filling the Rinse-aid and setting

To fill the rinse aid compartment, open the rinse-aid compartment cap. Fill the compartment with rinse aid to the MAX level and then close the cap. Be careful not to overfill the rinse aid compartment and wipe up any spills.

In order to change the rinse aid level, follow the below steps before turning on the machine:

- Push the programme button and hold it down.
- Turn on the machine.
- Hold the Programme Button down until all leds blink twice. Rinse aid setting follows water hardness setting.
- The machine will display the current setting.
- Change the level by pushing the programme button.
- Switch off the machine to save the setting.

The factory setting is "4".

If the dishes are not drying properly or are spotted, increase the level. If blue stains form on your dishes, decrease the level.

Level	Brightener Dose	Indicator
1	Rinse-aid not dispensed	P1-P5 LEDs are on
2	1 dose is dispensed	P2-P5 LEDs are on
3	2 doses are dispensed	P3-P5 LEDs are on
4	3 doses dispensed	P4-P5 LEDs are on
5	4 doses dispensed	P1-P4-P5 LEDs are on

Using your Dishwasher

Getting the most from your appliance

Loading your Dishwasher

For best results, follow these loading guidelines.

We recommend that you place large items (pots, pans, lids, plates and bowls) which are heavily soiled in the lower basket.

The upper basket is designed for delicate and lighter dishware such as glasses, coffee and tea cups and saucers. Position the dishes so that they will not get moved by the spray of water.

Cutlery should be placed in the cutlery basket. Items should be loaded individually into the appropriate slots with their handles downwards. Long utensils should be placed horizontally on the baskets.

 **WARNING:** Take care not to obstruct the rotation of spray arms.

Recommendations

Remove any coarse residue on dishes before placing the dishes in the machine. Start the machine with full load.

 Do not overload the drawers or place dishes in the wrong basket.

 **WARNING:** Always place sharp utensils with the sharp point down and open utensils with their openings down.

Upper Basket Height adjustment

Turn the Rail Stop Clips, at the ends of the rails, to the sides to open them (as shown in the image), then pull out and remove the basket. Change the position of the wheels, then reinstall the basket to the rail, making sure to close the Rail Stop Clips. When the upper basket is in the higher position, large items such as pans can be placed on the lower basket.

Height Adjustable Rack

The height adjustable racks enable glasses and cups to be placed on or under the racks. The racks can be adjusted to 2 different heights. Cutlery and utensils can also be placed on the racks horizontally.

Upper Cutlery Basket

The upper cutlery basket is designed for the placement of large and small cutlery and utensils.

Using your Dishwasher

Getting the most from your appliance

Alternative basket loads

Lower basket

Upper basket

Incorrect loads

Loading your Dishwasher

- Cigarette ashes, candle leftovers, polish, paint, chemical substances, iron-alloy materials.
- Forks, spoons and knives with wooden, bone, ivory or nacrecoated handles; glued items, items soiled with abrasive, acidic or base chemicals.
- Temperature-sensitive plastics, copper or tincoated containers.
- Aluminium and silver objects.
- Some delicate glasses, ornamental printed porcelains; some crystal items, adhered cutlery, lead crystal glasses, cutting boards, synthetic fibred items.
- Absorbent items such as sponges or kitchen rugs.

 **IMPORTANT:** In future, purchase dishwasher-proof kitchenware.

Important Note for Test Laboratories

For detailed information required for tests according to EN normatives and a softcopy of the manual, please send the model name and serial number to the following address:

dishwasher@standardtest.info

Care and maintenance

6

Care and maintenance

Looking after your appliance

Cleaning

Cleaning your Dishwasher is important to maintain the machine's service life.

Oil and lime may build up in your Dishwasher over time. If this occurs:

- Fill the detergent compartment but do not load any dishes. Select a programme which runs at high temperature and run the Dishwasher empty. If this does not clean your Dishwasher sufficiently, use a cleaning agent designed for use with dishwashers.
- Wipe the door seals regularly with a damp cloth to remove any accumulated residue.

6.1 Cleaning machine and filters

Clean the filters and spray arms at least once a week. If any food waste remains on the coarse and fine filters, remove them and clean them thoroughly with water.

- a) Micro Filter b) Coarse Filter c) Metal Filter

To remove and clean the filter combination, turn it counter clockwise and remove it by lifting it upwards (1). Pull the coarse filter out of the micro filter (2). Then pull and remove the metal filter (3). Rinse the filter with lots of water until it is free of residue. Reassemble the filters. Replace the filter insert, and rotate it clockwise (4).

- Never use your Dishwasher without a filter.
- Incorrect fitting of the filter will reduce the washing effectiveness.
- Clean filters are necessary for proper running of the machine.

6.2 Spray Arms

Make sure that the spray holes are not clogged and that no food waste is stuck to the spray arms. If there is any clogging, remove the spray arms and clean them under water. To remove the upper spray arm undo the nut holding it in position by turning it clockwise and pulling it downwards. Make sure that the nut is properly tightened when refitting the upper spray arm.

Care and maintenance

Looking after your appliance

Technical specification

Supplier 's Trade Mark	BUSH
Supplier's model	DWINT15LC
Capacity of dishwasher	15
The energy efficiency class	A++
Annual energy consumption in kWh per year (AEc) (280 Cycle)*	270
Energy consumption (Et) (kWh per cycle)	0,94
Off-mode power consumption (W) (Po)	0,50
Left-on mode power consumption (W) (Pi)	1,00
Annual water consumption in litres per year (AWc) (280 Cycle)**	2520
Drying efficiency class***	A
Standard programme name****	Eco
Programme time for standard cycle (min)	221
Duration of the left-on mode (T _l) (min)	-
Airborne acoustical noise emissions (dB(A) re 1 pW)	49
Freestanding/Built-in	Built-in

* Energy consumption **270** kwh per year, based on 280 standard cleaning cycles using cold water fill and the consumption of low power modes. Actual energy consumption will depend on how the appliance is used.

** Water consumption **2520** litres per year based on 280 standard cleaning cycles. Actual water consumption will depend on how appliance is used.

*** Drying efficiency class **A** on a scale from G (least efficient) to A (most efficient).

**** The "Eco" is the standard cleaning cycle to which the information in the label and the fiche relates. This programme is suitable to clean normally soiled tableware and it is the most efficient programme in terms of combined energy and water consumption.

Troubleshooting

SYMPTOM	POSSIBLE CAUSE	TROUBLESHOOTING
The programme does not start.	Your Dishwasher is not plugged in.	Plug your Dishwasher in.
	Your Dishwasher is not switched on.	Switch your Dishwasher on by pressing the On/Off button.
	Power supply is not used.	Check your indoor fuses.
	Water inlet tap is closed.	Turn on the water inlet tap.
	Your Dishwasher door is open.	Close the Dishwasher door.
	Water inlet hose and machine filters are clogged.	Check the water inlet hose and machine filters and make sure they are not clogged.
Water remains inside the machine.	Water drain hose is clogged or twisted.	Check the drain hose, then either clean or untwist it.
	The filters are clogged.	Clean the filters.
	The programme is not finished yet.	Wait until the programme is finished.
Machine stops during washing.	Power failure.	Check mains power.
	Water inlet failure.	Check water tap.
Shaking and hitting noises are heard during a wash operation.	The spray arm is hitting the dishes in the lower basket.	Move or remove items blocking the spray arm.
Partial food wastes remain on the dishes.	Dishes placed incorrectly, sprayed water not reaching affected dishes.	Do not overload baskets.
	Dishes leaning each other.	Place dishes as instructed in the section on loading your dishwasher.
	Not enough detergent used.	Use the correct amount of detergent, as instructed in the programme table.
	Wrong wash programme selected.	Use the information in the programme table to select the most appropriate programme.
	Spray arms clogged with food waste.	Clean the holes in the spray arms with thin objects.
	Filters or water drain pump clogged or filter misplaced.	Check the drain hose and filters are correctly fitted.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions.

Automatic Fault Warnings

TROUBLE CODE					POSSIBLE FAULT	WHAT TO DO
P1	P2	P3	P4	P5		
					Insufficient water	Make sure the water inlet tap is open and water is flowing.
						Separate the inlet hose from the tap and clean the filter of the hose.
						Contact for service if the error continues.
					Continuous water input	Close the tap and contact for service.
					Inability to discharge water	Water discharge hose and filters may be clogged.
						Cancel the programme.
						If the error continues, contact for service.
						Contact for service.
					Faulty heaterC	contact for service.
					Overflow	Unplug the machine and close the tap.
						Contact for service.
					Faulty electronic card	Contact for service.
					OverheatingC	contact for service.
					Faulty heater sensor	Contact for service.

PRACTICAL INFORMATION

1. When the machine isn't in operation:

- Disconnect the plug and close the tap.
- Leave the door slightly open to prevent odour formation.

2. Select the dry option to remove water droplets.

3. Place dishes in the machine properly to achieve the best energy consumption, washing and drying performance. Please see the programme and consumption table for more information.

4. Rinse dirty dishes before placing them in the dishwasher.

5. Only use the Prewash programme when necessary.

6. Do not place the machine near a refrigerator because it will reach high temperatures.

7. If the machine is located in an area that is at risk of freezing, close the tap, disconnect the inlet hose from the tap and drain the water inside the hose and the machine completely.

If you require any technical guidance or find that your product is not operating as intended, a simple solution can often be found in the **Troubleshooting** section of these instructions.

Declaration of conformance to product standards

We declare that our products meet the applicable European Directives, Decisions and Regulations and the requirements listed in the standards referenced.

Packaging and the Environment

Packaging materials protect your machine from damage that may occur during transportation. The packaging materials are environmentally friendly as they are recyclable. The use of recycled material reduces raw material consumption and therefore decreases waste production.

Recycling

- Some machine components and packaging consist of recyclable materials.
- Plastics are marked with the international abbreviations: (>PE<, >PP<, etc.)
- The cardboard parts consist of recycled paper. They can be put into waste paper containers for recycling.
- Material unsuitable for domestic waste must be disposed of at recycling centres.
- Contact a relevant recycling centre to obtain information about disposal of different materials.

Disposal

The symbol on the product or on its packaging indicates that this product may not be treated as household waste. Instead, it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where the product was purchased.

Your Bush Guarantee

This product is guaranteed for twelve months from the date of original purchase. Any defect that arises due to faulty materials or workmanship will be repaired free of charge (or if applicable the product will be replaced or the purchase price refunded) where possible during this period by the dealer from who your purchased the unit.

The guarantee is subject to the following provisions:

- The guarantee does not cover accidental damage, misuse, cabinet parts, knobs or consumable items.
- The product must be correctly installed and operated in accordance with the instructions contained in the manual.
- It must be used solely for domestic purposes. The guarantee will be rendered invalid if the product is re-sold or has been damaged by inexpert repair.
- Specifications are subject to change without notice.
- Bush disclaim any liability for loss or damage arising from the breakdown of the product.
- This guarantee is in addition to and does not diminish your statutory or legal rights.

Important Data Protection Information

To find out how we and Domestic & General Insurance Plc use your data please refer to the guarantee registration material or visit www.bushregistrations.co.uk.
