HI642C HIC642

Thank you for purchasing the HOOVER induction hob. Please read this instruction manual carefully before using the hob and keep it in a safe place for future reference.

By placing the CE  marking on this product, we declare, on our own responsibility, compliance to all the European safety, health and environmental requirements stated in the legislation for this product. As applicable, the parts of this appliance are compliant to: REGULATION (EC) No 1935/2004 on materials and articles intended to come into contact with food.

Safety Reminding and Maintenance:

- **WARNING:** The appliance and its accessible parts become hot during use. Care should be taken to avoid touching heating elements.
- Children under 8 Year of age must be kept away from the appliance unless they are continuously supervised.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the
- appliance in a safe way and understand the hazards involved. Children must not play with the appliance.
- Cleaning and user maintenance shall not be made by children without supervision
- **WARNING:** Unattended cooking on a hob with fat or oil can be dangerous and may result in fire.
- **NEVER** try to extinguish a fire with water, but switch off the appliance and then cover flame e.g. with a lid or a fire blanket.
- **WARNING:** Danger of fire: do not store items on the cooking surfaces.

- **WARNING:** If the surface is cracked, switch off the appliance to avoid the possibility of electric shock.
- Do not use a steam cleaner for cleaning operations
- Metallic objects such as knives, forks, spoons and sauce pan lids must not be placed on the hob surface as they can get hot. Any spillage should be removed from the lid before opening.
- The hob surface must be allowed to cool down before closing the lid.
- After use, switch off the hob element by its control. Do not rely on the pan detector.
- This appliance is not intended to be operated by means of an external timer or separate remote - control system.
- The means for disconnection must be incorporated in the fixed wiring in accordance with the wiring rules.
- The instructions state the type of cord to be used, taking into account the temperature of the rear surface of the appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer's service agent or similarly qualified persons in order to avoid a hazard.
- **CAUTION:** In order to avoid a hazard due to inadvertent resetting of the thermal cutout, this appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by the utility.

WARNING: Use only hob guards designed by manufacturer of the cooking appliance or indicated by the manufacturer of the appliance in the instructions for use as suitable or hob guards incorporated in the appliance. The use of inappropriate guards can cause accidents.

- Always use the appropriate cookware.
- Always place the pan in the center of the unit that you are cooking on.
- Do not place anything on control panel.
- Do not use the surface as a cutting board.

- The means for disconnection must be incorporated in the fixed wiring in accordance with the wiring rules.- The instructions state the type of cord to be used, taking into account the temperature of the rear surface of the appliance.
- The hob surface must be allowed to cool down before closing the lid.- CAUTION: the cooking process must be supervised. A short term cooking process has to be supervised continuously

Dear Customer:

Thank you for purchasing the CANDY induction hob. We hope it will give many years of good service.

Please read this instruction manual carefully before using the hob and keep it in a safe place for future reference.

Product Introduction

The induction hob caters for all kind of cooking,with its electromagnetic cookingzones, and its micro-computerised controls and multi-functions, making it the ideal choice for today's family.

Manufactured with specially imported materials, the CANDY induction hob is extremely user-friendly, durable and safe.

Working Principle

The induction hob comprises a coil, a hotplate made of ferromagnetic material and a control system. Electrical current generates a powerful magnetic field through the coil. This produces a large number of vortices which in turn generate heat which is then transmitted through the cookingzone to the cooking vessel.

Safety

This hob was specially designed for domestic use.

In its constant search to improve its products, CANDY reserves the right to modify any technical, programme or aesthetic aspects of the appliance at any time.

● Protection from over-heating

A sensor monitors the temperature in the cooking zones. When the temperature exceeds a safe level, the cooking zone is automatically switched off.

● Detection of small or non-magnetic items

When a pan with a diameter of less than 80 mm, or some other small item (e.g. knife, fork, key) or a non-magnetic pan (e.g. aluminium) has been left on the hob, a buzzer sounds for approximately one minute, after which the hob goes automatically on to standby.

● Residual heat warning

When the hob has been operating for some time, there will be some residual heat. The letter "H" appears to warn you to keep away from it.

● Auto shutdown

Another safety feature of the induction hob is auto shutdown. This occurs whenever you forget to switch off a cooking zone. The default shutdown times are shown in the table below:

Power level	The heating zone shut down automatically after
1~3	8 hours
4~6	4 hours
7~9	2 hours

When the pan is removed from the cooking zone, it stops heating immediately and switches itself off after the buzzer has sounded for one minute.

Warning: Anyone who has been fitted with a heart pacemaker should consult a doctor before using the induction hotplate.

Installation

1. Cut a hole in the worktop of the dimension shown in the diagram below. A minimum of 50 mm space should be left around the hole. The worktop should be at least 30 mm thick and made of heat-resistant material. As shown in Figure (1)

Figure (1)

2. It is essential that the induction hob is well ventilated and that the air intake and exit are not blocked.

Make sure the hob is correctly installed as shown in Figure 2.

Figure (2)

Figure (2)

NB: For safety, the gap between the hob and any cupboard above it should be at least 760 mm.

3. Fix the hob to the worktop using the four brackets on the base of the hob. The position of the brackets can be adjusted according to the thickness of the top.

Warnings:

- (1) The induction hob must be installed by a properly qualified person. We have our own qualified installers. Never try to install the appliance yourself.
- (2) The induction hob must not be installed above refrigerators, freezers, dishwashers or tumble dryers.
- (3) The induction hob should be installed so that optimum radiation of heat is possible.
- (4) The wall and the area above the hob should be able to withstand heat.
- (5) To avoid any damage, the sandwich layer and adhesive should be heat-resistant.

4. Connection to power supply

The socket should be connected in compliance with the relevant standard, to a single-pole circuit breaker. The method of connection is shown in Figure 3.

Voltage	Wire connection				
380-415V 3N~	1 • L1	2 • L2	3 •	4 • N	5 • ⏏
	Black	Brown	Blue	Yellow/Green	
220-240V~	1 •	2 • L	3 •	4 • N	5 • ⏏
	Black & Brown	Blue	Yellow/Green		

Figure (3)

If the cable is damaged or needs replacing, this should be done by an after-sales technician using the proper tools, so as to avoid any accidents.

If the appliance is being connected directly to the mains supply, an omnipolar circuit breaker must be installed with a minimum gap of 3 mm between the contacts.

The installer must ensure that the correct electrical connection has been made and that it complies with safety regulations.

The cable must not be bent or compressed. The cable must be checked regularly and only replaced by a properly qualified person.

Diagram of induction hob:

Schematic diagram of the control panel

- 1. Heating zone selection controls
- 2. Power / Timer regulating key
- 3. Keylock/Pause control
- 4. ON/OFF control
- 5. Timer control

Instructions for Use

Preparation before using:

When the power is switched on, the buzzer will sound once and all the indicators will come on for one second and then go out. The hob is now in standby mode.

Place the pan in the centre of the cooking zone.

Operating instructions

When the ON/OFF key is pressed, all the indicators show "-". Select the power level by pressing the "+" or "-" key for the relevant hotplate. To begin with the indicator shows "5". Adjust up or down by pressing the "+" or "-" key. If you press the "+" and "-" keys simultaneously, the power setting returns to "0" and the cooking zone switches off.

See the table on Page 6 for the power specific to each cooking zone.

NB: When the ON/OFF key is pressed, the induction hob returns to standby mode if no other operation is carried out within one minute

Timing function

Press the timing key and the indicator will start flashing. Then set the time for between 1 and 99 minutes, by pressing the "+" and "-" keys. Pressing the "+" key once increases the time by one minute; pressing the "-" key once

decreases the time by one minute. When the set time exceeds 99 minutes, it will automatically return to "0" minutes. If the "-" and "+" keys are pressed simultaneously, the indicator will display "0".

Timer confirmation

1. Select the power level of the cooking zone and then press the "Timer" key. The timer can now be set.
2. When the timing indicator has been flashing for 5 seconds, the set time will be automatically confirmed.
3. After selecting a set time, confirm by pressing the "Timer" key.
4. Once the "Timer" is confirmed, a dot appears on the bottom right of the power level of the selected zone. "

Timer cancellation

After setting the time again, hold down the "Timer" key for 5 seconds. This will cancel the timer and the indicator will revert to "0".

Safety mode

To ensure the safety of children, the induction hob is fitted with an interlock device.

To lock: hold down the "Interlock" ; the hob then goes into "Interlock" mode, the timer shows "Lo" and the rest of the keys are disabled except the " ON/OFF " key.

Unlocking

Hold down the "Interlock" key for 2 seconds and the hob will return to normal working.

FLEXIBLE AREA

- This area can be used as a single zone or as two different zones, accordingly to the cooking needs anytime.
- Free area is made of two independent inductors that can be controlled separately.

As big zone

1. To activate the free area as a single big zone, Touching the Flexible Area control .

2. As a big zone, we suggest the used as the follow:

Cookware: 250mm or 280mm diameter cookware (Square or Oval cookware are acceptable)

We don't recommend other operations except for above mentioned three operations because it might effect the heating of appliance

As two independent zones

To use the flexible area as two different zones, you can have two choices of heating.

- (a) Put a pan on the right up side or the right down side of the flexible zone.

- (b) Put two pans on both sides of the flexible zone.

Notice: Make sure the pan is bigger than 12cm.

Boost mode

Touching the heating zone selection control , then touching “+” . Make sure the display shows “9” .

Touching the “+” button again ,the zone indicator show “b” and the power reach Max

Cancel the Boost mode

Touching the “-” button to cancel the Boost function, then the cooking zone will revert to its original setting.

Touching “-” and “+” control together. the cooking zone switch off and the boost function cancel automatically

- The cooking zone returns to its original setting after 5 minutes

Note: It is recommended that the cooker hood suction is switched on few minutes prior to cooking and switched off few minutes after terminating cooking.

Pause Mode

- You can pause the heating instead of shutting the hob off.
- When entering the Pause mode, all the controls except the ON/OFF control are disabled.

To enter pause mode	
Touch the lock/pause control.	All the indicator will show “ 11”
To unlock the controls	
Touch the lock/pause control.	

When the hob is in the pause mode, all the controls are disable except the ON/OFF  , you can always turn the induction hob off with the ON/OFF  control in an emergency.

Power Management Function

- it is possible to set a maximum power absorption level for the induction hob, choosing up to different power ranges.
- induction hobs are able to limit themselves automatically in order to work at lower power level, to avoid the risk of overloading.

To enter Power Management Function

Turn on the hob, then Press at the same time the "+" (timer) and key lock.

The timer indicator will show " P5" which means power level 5. The default mode is on 7.0Kw/ 7.1Kw.

To switch to another level

press +/- from the timer There are 5 power levels, from "P1" to "p5". The timer indicator will show one of them.

"P1": the maximum power is 2.5Kw.

"P2": the maximum power is 3.5Kw.

"P3": the maximum power is 4.5Kw.

"P4": the maximum power is 5.5Kw.

"P5": the maximum power is 7.0Kw/ 7.1Kw.

Confirmation and Exit Power Management Function

Press at the same time + (timer) and key lock for confirmation. Then the hob will be turned off.

Selection of cooking vessels

Iron oil frying pan

Stainless steel pot

Iron pan

Iron kettle

Enamel stainless steel kettle

Enamel cooking utensil

Iron plate

You may have a number of different cooking vessels

- 1 This induction hob can identify a variety of cooking vessels, which you can test by one of the following methods:

Place the vessel on the cooking zone. If the corresponding cooking zone displays a power level, then the vessel is suitable. If "U" flashes, then the vessel is not suitable for use with the induction hob.

- 2 Hold a magnet to the vessel. If the magnet is attracted to the vessel, it is suitable for use with the induction hob.

NB: The base of the vessel must contain magnetic material.

It must have a flat bottom with a diameter of more than 14 cm.

- 3 Use pans whose diameter is as large as the graphic of the zone selected. Using a pot a slightly wider energy will be used at its maximum efficiency. If you use smaller pot efficiency could be less than expected. Pot less than 140 mm could be undetected by the hob.

Cleanness and Maintenance

The surface of the induction hob may be easily cleaned in the following way:

Type of contamination	Method of cleaning	Cleaning materials
Light	Immerse in hot water and wipe dry	Cleaning sponge
Rings and lime scale	Apply white vinegar to the area, wipe with a soft cloth or use a commercially available product	Special adhesive for ceramic glass
Sweetmeat, melted aluminium or plastics	Use a special scraper for ceramic glass to remove residue (a silicon product is best)	Special adhesive for ceramic glass

NB: Disconnect the power supply before cleaning.

Failure Display and Inspection

If any abnormality occurs, the induction hob will automatically go into protective mode and display one of the following codes:

Fault	Possible cause	Solutions
F0/F1/F2	Fan failure	Contact the supplier
F3-F8	Temperature sensor failure	Contact the supplier
E1/E2	Abnormal voltage in power supply	Check if power supply is normal. Power on after power supply returns to normal.
E3/E4	Abnormal temperature	Check the pan
E5/E6	Poor heat radiation in cooking zone	Restart when cooking zone cools down

The above table shows how to assess and check common faults. Do not dismantle the appliance yourself, otherwise you may damage the induction hob.

Customer Care Service

If a fault should occur, before calling After Sales Service, please do the following:

- Check that the appliance is correctly plugged in
- Read the failure and display table above

If you are still unable to resolve the problem, switch off the appliance, do not try to dismantle it, and call

After Sales Service.

Special Declaration

The contents of this manual have been carefully checked. However, the company cannot be held responsible for any misprints or omissions. Also, any technical modifications may be included in a revised version of the manual without notice. The appearance and colour of the appliance in this manual may differ from the actual one.

DISPOSAL: Do not dispose this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary.

For more detailed information about treatment, recovery and recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

This appliance is labelled in compliance with European directive 2012/19/EC for Waste Electrical and Electronic Equipment (WEEE).

By ensuring that this appliance is disposed of correctly, you will help prevent any possible damage to the environment and to human health, which might otherwise be caused if it were disposed of in the wrong way.

The symbol on the product indicates that it may not be treated as normal household waste. It should be taken to a collection point for the recycling of electrical and electronic goods.

This appliance requires specialist waste disposal. For further information regarding the treatment, recovery and recycling of this product please contact your local council, your household waste disposal service, or the shop where you purchased it.
